PREFACE

INDIA: A Reference Annual was first brought out by the Publications Division of the Ministry of Information and Broadcasting in 1953, with the object of providing authentic information on the diverse aspects of our national life and activities. The response both within the country and abroad encouraged the publishers to widen the scope of the Annual in successive issues, with the benefit of advice and suggestions from many scholars, economists and others to whom we take this opportunity of expressing our gratitude.

The Annual contains information compiled from official and other authoritative sources. It does not, however, claim to be exhaustive. Readers requiring additional information are referred to the Government reports and publications, reference works and other books which are listed in the Select Bibliography at the end of the volume.

CHAPTER I

THE LAND AND THE PEOPLE

India, also known as Bharat, is well marked off from the rest of Asia by mountains and the sea which give the country an unmistakable geographical unity. Protected by the Himalayas in the north, the country stretches southwards and, at the Tropic of Cancer, tapers off into the Indian Ocean between the Bay of Bengal on the east and the Arabian Sea on the west. Lying entirely to the north of the Equator between latitudes 8° and 37° north and longitudes 68° and 98° east, it measures about 2,000 miles from north to south and about 1,700 miles from east to west and covers an area of 12,59,797 sq. miles*. Measured by the extent of its territory, India is the seventh largest country in the world. It has a land frontier 9,309 miles long and a coastline of about 3,535 miles.

THE PHYSICAL BACKGROUND

The formidable Himalayas form India's northern boundary, along which lie Sinkiang, Tibet and Nepal. Sikkim and Bhutan are two States in this region which are attached to India by special Treaties. A series of mountain ranges in the east separate India from Burma. To the northeast lies East Pakistan between the States of West Bengal and Assam. In the north-west, West Pakistan borders on India. In the south, the Gulf of Mannar and the Palk Strait separate India from Ceylon. The Andaman and Nicobar Islands in the Bay of Bengal and the Laccadive, Minicoy and Amindivi Islands in the Arabian Sea form part of the Indian Union.

Physical Features

The country comprises three well-defined regions: (i) the great mountain zone of the Himalayas, (ii) the Indo-Gangetic Plain and (iii) the southern Peninsula.

The Himalayas comprise three almost parallel ranges interspersed with large plateaus and valleys some of which, like the Kashmir and Kulu valleys, are fertile, extensive and of great scenic beauty. Some of the highest peaks in the world are to be found in these ranges. The high altitudes limit travel only to a few passes, notably the Jelep La and Natu La on the main Indo-Tibet trade route through the Chumby valley, north-east of Darjeeling. The mountain wall extends over a distance of about 1,500 miles with a varying depth of 150 to 200 miles. In the east, between India and Burma and India and Pakistan, the hill ranges are much lower. The Garo, Khasi, Jaintia and Naga hills running almost east-west join the chain of the Lushai and Arakan hills running north-south.

The Indo-Gangetic plain, 1,500 miles long and 150 to 200 miles broad, is watered by the Ganga and its tributaries, the Yamuna, the Gomati, the Son, the Ghagra, the Gandak and the Kosi. The Brahmaputra rising beyond the Himalayas enters India at its eastern extremity, flows through Assam and East Pakistan and joins the Ganga before the latter falls into the Bay of Bengal. The Punjab is watered by three tributaries of the Indus, namely, the Ravi, the Beas and the Sutlej.

^{*} Provisional.

The Pennsular plateau is marked off from the Indo-Gangetic plain by a mass of mountain and hull ranges, asyning from 1,500 to 4,000 ft in height. The more prominent among these are the Aravalli, Vindhya, bearing Markal and Ajanta and Ajanta is flanked on one side by the Sastyura Markal and Ajanta is stanked on one side by the Eastern Ghats, where the entire is 1,500 ft, and on the other by the Western Ghats where it 5,000 ft, but were in places to as much as 9,000 ft, but were in places to as much as 9,000 ft, but were in places to as much as 9,000 ft, but were in places to as much as 9,000 ft, but were in places to as much as 9,000 ft, but were in places to as much as 9,000 ft, but were in places to as much as 9,000 ft, but were in places as an arrow coastal strop, while but end the first of the plateau is formed by the work of the plateau is formed by the p

Geological Structure

Geologically also, India consists of the same three distinct units, namely, the ancient block of the Pennsula, the Himalayas and their associated group of young fold mountains flanking either side, and the Indo-Gangetie plain lying between these two

The Pennsula is a region of great geological stability and is remarkably immune from seismic disturbances of any intensity. The basal complex of the larger part of the Pennsula consists of highly metamorphosed rocks of the earliest periods

The geological sequence in the Himalayat has been almost enturely warne and there is luttle doubt that the area now occupied by the great mountains was a deep sea until late in the second geological period. Much of the area is still very imperfectly known geologically, especially in the east, and many phases of its history are still very controversial. The outermost Himalayan foothils—the Sivalikis—represent a late buckling of the erosion products of the mountains themselves. These deposits are not essentially different from some of those now forming

The Indo-Cangette plant is a macro-region of alluvium covering 3,00 000 square inder. The thickness of the alluvial deposits has never been ascertained though bornings to a depth of 1,300 feet have not revealed a rocky bottom. The filling is of very unequal depth having been replenished in the east by alluvial deposits brought down from the mountains by the rwers and in the west by windblown materials. Topographically the plants are remarkably homogeneous with hilter relief for hundreds of miles.

Climat-

The climate of India is esentially monsoon tropical and this description is valid not withstanding local variations such as the winter rains in the north west, which are entirely subsidiary to the main summer rainful regime. The seasonal rhythm can be broadly classified as follows (i) the Cold Weather from Cetober to the end of February, (ii) the Hot Weather from the beginning of March to the beginning or middle of June, and (iii) the Rainy Season from the beginning or middle of June, and (iii) the Rainy Season from the beginning or middle of June to the end of September The Indian Meteorological Department recognies four seasons (The Cold Weather Season (December-March), (ii) The Hot Weather Season (April May) (iii) the Rainy Season (June September), and (iv) the reason of the retreating south wat monsoon (October November). Tablet 1 and 2 show the normal monthly and annual maximum and monimum temperatures in shard at nearly So selected stations in India

				_				•			•				

The south-west monsoon usually breaks about the beginning of June in the West Coast and arrives elsewhere later. With the exception of the Madras Coast, India receives the major share of its rainfall between June and September from the south-west monsoon. As it retreats there is a spell of dry weather in north India and widespread rainfall in the coastal districts of Madras and Orissa where October and November are often the rainiest months of the year. The South-West Coast of India receives most of its rain during November and December.

The climatic regions of India, based on the dominant factor of rainfall, may be arranged thus: (i) regions with more than 80 inches of annual rainfall such as the West Coast (with a long dry season in the north and a short dry season in the south), Bengal and Assam; (ii) regions with 40 to 80 inches of rainfall such as the north-east plateau and the middle Ganga Valley; (iii) regions with 20 to 40 inches of rainfall, such as Madras (in which the wettest months are November and December), southern and north-western Deccan (with mean January temperatures of 65°-75°) and the upper Ganga plain (with lower January temperatures and higher July ones). To these may be added the Himalayan regions with very heavy rainfall. Table 3 overleaf shows normal monthly and annual rainfalls in about 50 selected places in the country.

POWER RESOURCES

Coal

In India coal occurs mainly in the Gondwana system of Indian Geology, minor deposits occurring in Tertiary rocks of India. The reserves of all types of coal occurring in seams of one foot or more in thickness within a depth of 1,000 ft. are estimated at 6,000 crore tons.

Oil

A tentative estimate places the potential oil-bearing areas in India at 4,00,000 square miles. However, the country's oil reserves can be estimated only in the light of the extensive programme of oil exploration which is now in progress.

Lignite

Lignite occurs in Madras, Rajasthan, Saurashtra, Kutch and Kashmir. Of these, the deposits covering an area of 100 sq. miles in and around Neyveli in the South Arcot district of Madras State are important. The total reserves have been estimated at 20,000 lakh tons.

Water Power

The total installed hydro capacity of 12.7 lakh kw represents in its firm power potential just over 2 per cent of the country's estimated 400 lakh kw firm hydro-electric potential capable of economic development.

MINERAL RESOURCES*

India's iron ore reserves have been assessed at one-fourth of the total estimated reserves in the world and her deposits the largest as compared to any other country. She is the most important producer of block mica in the world and ranks third in her manganese deposits. Her position in some rare or strategic minerals is also strong and in regard to non-ferrous metals, useful and fairly extensive deposits, particularly of bauxite, await investigation. The most important mining area is the region comprising south Bihar, south-west Bengal and north Orissa.

^{*} Estimates of reserves in regard to important minerals given in earlier editions of the Reference Annual have been revised in the light of new data now available.

Iron ore

The iron ore reserves in India are estimated at 2,100 crore tons. Large deposits of hematite ores are known in Bihar, Orissa, Madhya Pradesh, Mysore and Bombay, magnetite ores occurring in Madras, Mysore, Bihar, Orissa and Himachal Pradesh. Extensive reserves of limonite ores associated with spathic ores are present in West Bengal. The proved and indicated reserves of all the types of ores amount to about 679 crore tons.

Manganese

India is the second most important producer of manganese in the world, next only to USSR. About 10 crore tons of a total estimated reserve of 11.2 crore tons are in Madhya Pradesh and Bombay.

Chromite

Chromite, used for chemical purposes and as an alloy and refractory, comes mainly from Bihar, Orissa and Mysore. The total reserves have been estimated at 13.2 lakh tons.

Other Ferro-Alloys and Refractories 5

Occurrences of magnesite have been reported from a number of places in Andhra Pradesh, Madras, Mysore, Rajasthan and Uttar Pradesh. Reserves in the Salem region of Madras alone have been estimated at 825 lakh tons. Fire-clays occur in almost all States, those of Bihar and Bengal being the most important. The largest deposits of kyanite in the world occur in Bihar, smaller occurrences being known to exist in Orissa. Other States where kyanite occurs are Bombay, Andhra Pradesh, Mysore and Rajasthan. In 1954 India was the leading producer of kyanite. Deposits of sillimanite of potential commercial importance occur in Assam, Madhya Pradesh, Mysore and Kerala. Corundum, an important abrasive, is found in Assam, Madhya Pradesh, Rajasthan and Mysore, the reserves in Madhya Pradesh alone being of the order of 4 lakh tons including 1 lakh tons of high grade mineral.

Non-Ferrous Metals

Gold, copper and aluminium are the only metals which are produced in any quantity. India's main supply of gold comes from Mysore, the Kolar Gold Fields holding probable reserves of about 12.6 lakh tons of orc. Copper ore is mainly worked in a 80-mile belt in Bihar. In respect of mica, India holds a leading position, about 70 to 80 per cent of the world's requirements of muscovite block mica and splittings being met from Indian production.

Mica

The bulk of mica production is obtained from three mica belts in India of about 1,500 sq. miles in Bihar, 1,200 sq. miles in Rajasthan and 600 sq. miles in Andhra Pradesh. The best quality of mica, 'perhaps the best in the world, comes from Bihar.

Ilmenite

Workable deposits occur in the beach sands of the eastern and western coasts of India, those on the Kerala coast being known for their extensive occurrence. India's reserves of ilmenite in beach sands have been reckoned at 3,500 lakh tons. At present only the Travancore sands containing 50 to 70 per cent of the metal are being exploited.

Bauxite

The occurrence of bauxite, the primary ore from which aluminium is extracted, is widespread in India. The chief areas are Bihar, Madhya

Pradesh Bombay, Madras and Jammu holding probable reserves of about 2,500 lakh tons. According to a recent estimate high grade bruxite reserves are placed at 280 lakh tons, of which roughly one third is in Bihar.

Salt

The main sources of supply of salt are tile marine salt works along the coastal region. Take or pit brine salt in Rajasthan and Bombay, and rock salt deposits in Himachal Pradesh

Mis ellawous Non Ferrous Minerals

The beyl of Rajasthan and the monazite of kerala are two strategor munerals used in atomic fission. Bhar has stires which may prove a workable source of uranium. Mention may also be maje of minor minerals like alturi, againte arsenie, abettois barytes feldippri, fuller s certik, garnet, graphite, quartix sallpetre and steatite many of which are worked locally on a small stale. Of these the outlook for apartite is promising mives of its use as fertilister. Reserves of apatite bearing rocks are placed at 7 lakh tons in Bibar and 80 Jahk tons in Badars of which 20 Jahk tons are economically recoverable. A mineral of great importance as the chief raw material for the manufacture of fertilisters. Rypsum is found in Rajasthan, Madras and Bombry. The probable reserves of gypsum have been estimated at about 801 lakk tons.

THE DEMOGRAPHIC BACKGROUND

India is the world's second most populous country. According to the 1951 census which covered Sikkim but did not cover the State of Jammu and Kashmur and Part B tribal areas of Assam, the country's population is 3,567 9394. The area and population of India and the component. States and Territories are given in Table 14, while the area and population of districts, tehsis and tailots are given in the Appendices.

The following table shows the mid year estimates of population for the years 1932 57, based on the mean growth rate obtained during 1941 50. The figures include the population of Sikkim and Jammu and Kashmir.

TA	SLE 4
Tear	Croves of persons
1952	36 75
1953	37 23
1954	37 71
1955	38 24
1956	33 74
1957	39 24

The growth of population since 1901 is indicated in Table 5.

*Figures till 1941 in respect of certain areas being on the proportion their population bore to that of the District in 1951,

†Includes Sikkim (1,37,725 persons) and excludes (a) Jammu and Kashmir (estimated population of 44.1 lakh on March 1, 1951) where the census was not taken and (b) the greater part of the Part B Tribal Areas of Assam (locally estimated population of 5.6 lakh for which there is now no acceptable basis).

Burth and Death Rates

Since many births and deaths go unregistered there is a difference in the figures of births and deaths based on the registration data and those the natives of butths and deaths based on the regulation data and those provided by the census data. The following table gives India a birth and death rates per thousand for the last fifty years in decennial averages

TAPLE 6

	Per	siered	Est mater Survi a	by Revenie Med od
Decade	Buth rate	Death rate	B rth rate	Death rate
1901-10	37	-	48 1	4' 6
1911~00	37	31	49 2	48 6
1971-30	33	26	46 4	36 3
193140	3 #	23	45 2	31 2
1911-0	28	20	39 9	27 4

The following table shows the birth and mortality rates since 1947 based on the registration data

TABLE 7

Year	Per thousan	ed of populat on	For thousand I ve births
ıçar	B rth rate	Death rate	Infant mortal ty
1947	26 4	19 5	146
1948	25 2	17 0	130
1949	26 4	158	123
1950	21 5	16 1	127
1951	24 9	16 4	124
1952	25 4	15 8	116
1953	24 8	16.4	118
1954	24 4	12.5	114
1955 (a)	27 0	11.7	_
19.6 (a)	27 4	11 6	-

The Indian birth rate is one of the highest in the world and it has shown only a small decline during the last fifty years. The death rate is similarly high. During the last half century the infant mortality rate has ranged between 114 per thousand live births, the lowest recorded(in 1954), and 261, the highest recorded (in 1918). It has, however, more than halved from 232 in 1900 to 114 in 1954.

Between 1941 and 1951, births had occurred at an average rate of 40 per thousand per annum, deaths at an average rate of 27 per thousand per annum and the natural increase of population at an average rate of 13 per thousand per annum. The highest birth rate was in Central India (44), lowest in South India (36 or 37). The highest death rate was in Central India (34), lowest in South India (21 or 22). The highest natural increase rate was in North-West India (16 or 17) and West India (16) and the lowest in Central India (10).

Maternity Pattern

Making use of the 'local option' given to them, certain State Governments for the first time collected interesting information during the 1951 census. The following table shows the indices of child birth, child survival and child loss in respect of completed maternity experience for the former States of Travancore-Cochin and Madhya Pradesh:

TABLE 8

Natural Division/Stat	e		Child birth index	Child survival index	Child loss index
East Madhya Pradesh	••	••	6.1	3.6	2.5
North-West Madhya Pradesh	• •		6.3	3.6	2.7
South-West Madhya Pradesh	••	••	6.6	3.6	3.0
Travancore-Cochin	••	••	6.6	4.6	2.0

An experimental survey undertaken in 61 districts and 30 municipal towns has shown the following results in respect of first births, second births, third births, fourth births and births of a higher order.

TABLE 9

				
	Nı	ımber per 1,0	00 births which	ch are
	First births	Second births	Third births	Fourth births and births of higher order
South India (27 Districts)	228	215	181	376
West India (7 Districts)	209	180	167	444
Central India (22 Districts)	210	· 189	162	439
North-West India (5 Districts)	231	206	151	412
30 Municipal towns of India	209	196	167	428
	1			<u> </u>

Generally speaking, first births account for more than one fifth of all births accound births for nearly another one-fifth, third births about one-sixth and fourth births and births of a lighter order over two-fifths. Treating births occurring to mothers who have already given birth to three or more children as "suprovident maternity", the incidence of such improvident maternity, in final compared with other countries is as follows:—

TARLE 10

Elderly persons	55 to 64 65 to 74 75 and over	5 t 2 2 1 0
	ŀ	100 0

In India the proportion of jux emids in very high and the proportion of people who he beyond middle age is very low. India is their jux emide proportion (38 3 per cent) is exceeded only by the countries of Africa (39 1 per cent), South and Central America (60 1 per cent). South West Ana (40 6 per cent) and South East Ana (40 6 per cent), while the proportion for European and horth American countries ranges between 21 8 and 27 6 per cent. The proportion of people aged 55 and above is only 9 3 per Cin. India as compared to 21 4 per cent in Trance and 21 1 per cent in the

Density

The average density of population in India is 312 per sq. mile. It varies considerably from State to State, being as high as 3,044 in Delhi and dropping as low as 10 in the Andaman and Nicobar Islands. The following table shows the area, population and density of population for the States and Territories:

TABLE AREA, POPULATION AND DENSITY OF INDIA AND THE COMPONENT STATES AND TERRITORIES

(c) In working out the Density of India the area and population of Jammu and Kashmir and Part B Tribal Areas of Assam have not been taken into account.

⁽a) Provisional.
(b) The State of Jammu and Kashmir and Part B Tribal Areas of Assam were not included in the 1951 census. The 1941 census population of Jammu and Kashmir was 40.2 lakhs and the statutory estimates of the Registrar-General as on 1st March, 1950 and 1951 were 43.7 and 44.1 lakhs respectively. A local estimate of population of Part B Tribal Areas of Assam (32.289 sq. miles)

The variation and density of population between 1921 and 1951 were as follows

	Percentage Increase (+
1921-31	Decrease (-
1931—41 1941—51	+11 0 +14 3
1921	+13 4 Dens ty
1931 1941	217 241
1951	275 312

The following table shows the variations according to the 1951 census in the density of population according to natural geographical divisions

Languages

The 1951 census enumerated a total of 845 languages or dialects including 720 Indian dialects spoken by less than a lakh persons each and 63 non-Indian languages. Some 32.4 crore persons or 91 per cent of the population speak one or the other of the fourteen languages** specified in the Constitution. About 1.2 crore persons (3.2 per cent) speak one or the other of the 23 tribal dialects and nearly 1.8 crore persons (5.0 per cent) speak one or the other of the other Indian dialects spoken by a lakh or more persons each.

The language returns of the Punjab, Delhi and Himachal Pradesh were affected by controversy. The returns relating to the languages concerned, namely, Hindi, Urdu, Hindustani or Punjabi, had, therefore, to be lumped together with the result that no all-India totals could be specified for persons speaking these languages. The number of persons speaking the various languages specified in the Constitution and the percentage of each language-group to the total population are shown in table 17.

^{*} Exclusive of people living in the State of Jammu and Kashmir and Part B Tribal Areas of Assam where the 1951 census was not taken.

^{**} Fourteen languages have been specified in the Constitution. Since some persons preferred to return Hindustani, instead of Hindi or Urdu, the 1951 census enumerated 15 instead of 14 languages.

eople speaking the languages specified in the constitution

Livelshood Pattern

Out of a total of 3,566 lakh,** 2,143 lakh of people (or 60 1 per curl were classified in 19.3) as 'non examp dependent; consisting munly of women and children who do not take part in procuring their own livelihood. Of the rest, examps dependent; accounted for 379 lakh persons (or 10 6 per cent) and the halvare of 1,044 lakh persons (or 29 3 per cent) was overed by self-supporting persons. Of the last category of persons, about 710 lakh (or 63 1 per cent) were 'agriculturists' and 334 lakh (or 31 9 per cent) 'onn-signiculturists'.

Out of every 100 Indians (uncluding their dependents), 47 are mainly peranti-proprietors, 9 mainly tenants, 31 landless labourer, one a land-lord or rentier (agricultural), while 10 are engaged in industries or other non agricultural production, 6 in commerce, 2 in transport and 12 via the services and miscellaneous professions. Table 18 shows the non earning dependents and earning dependents among the two major classes and eight sub-classes of the hielphood pattern.

^{*}The number of persons speaking Hindi in India excluding the Funiab, Delhi and Himachal Fradesh was 1,088 lakin. The corresponding figures for Urdu, Hindiustani and Tunjabs were 136 lakin, 82 lakin and 8 lakin trapectuely

^{**} Records containing information for about 3 lake people in the Punjah were destroyed by fire.

TABLE 18
DISTRIBUTION OF POPULATION BY LIVELIHOOD PATTERN

(In lakhs)

	Self-support- ting persons	Non-earn- ing depen- dents	Earning dependents	Total
Cultivators of land wholly or main- ly owned	4 57	1,001	215	1,673
Cultivators of land wholly or mainly un-owned	88	189	39	316
Cultivating labourers	149	247	52	448

Grand Total	1,044	2,143	379	3,566

Urban and Rural Population

Of the 35.69 crore who constitute the total population of the areas of the country where census was taken in 1951, only 6.19 crore or 17.3 per cent live in cities and towns, while the remaining 29.50 crore or 82.7 per cent live in villages. There is a slow but steady shift towards urbanisation as shown below:

TABLE 19

•		Percentage of t	Percentage of total population		
Year	•	Rural	Urban		
 1921		88.6	11.4		
1931		87.9	12.1		
1941		86.1	13.9		
1951		82.7	17.3		

There has been an increase of 3.4 per cent in the urban population during the last decade which is more than the combined increase amounting to 2.7 per cent, during the two previous decades

There are 3 016 towns and 5 58 009 villages in the country 36.5 per cent of the total rural population lives in small villages (under 500 persons), 48 8 per cent in medium sized villages (between 300 and 2000 persons), 19 4 per cent in large villages (between 2000 and 5000 persons) and 5 3 per cent in very large villages (over 5000 persons) 30 0 per cent of the urban population lives in cities (population of one Likh and over) 30 1 per cent in major towns (population between 20 000 and one Iakh) 28 6 per cent in minior towns (population between 5000 and 20 000) and 3 ner cent in townships (population between 5000) and 20 000) and

The total number of occupied houses as 644 bable of which 512 bable are in vallages and 102 bables in to me giving an average of two houses for the property of the property o

There are in India 31 distinctive urban localities which have a population of one lash and over as shown in the table below. Of these 31 are town groups (a group of towns which adjoin one another so closely as to form a single initiab ted urban ly for demographic purposes) and 40 solated towns. The population of these localities accord and to the 1931 census is as follows:

TABLE 21 CITIES WITH POPULATION OF OVER A LAKH EACH

Linguistic Breakdown

Data relating to the mother-tongue of 14 lakh people of Indianorigin in 27 countries is as follows. Data in respect of countries such as Burma, Ceylon, South Africa and Trinidad having large populations of Indian origin, are not yet available.

TABLE 24

Language	Number of People
Tamil	4,81,628
Hindi, Urdu, Hindustani	4,55,745
Gujarati	2,37,552
Punjabi	97,073
Telugu	47,606
Malayalam	44,922
Sindhi	15,166
Marathi, Konkani	12.414
Bengali	4,073
Others	3,090

Country-wise distribution of these language groups is as follows:

Tamil

Malaya-Singapore' (4,60,985), Mauritius (10,500) and Fiji Islands (10,000).

Hindi, Urdu, Hindustani

Mauritius (2,80,000), Fiji Islands (1,24,000), Malaya-Singapore (1,355).

Gujarati

Kenya (69,000), Tanganyika (61,000), Uganda (44,000), Mauritius (21,000), Zanzibar and Pemba (15,000), Fiji Islands (8,000), Nyasaland (6,000), South Rhodesia (4,500), North Rhodesia (3,500), Ruanda Urundi (2,000), Indonesia (2,000), Malaya-Singapore (1,301), Belgian Congo (1,200).

Punjabi

Kenya (50,000) Malaya-Singapore (30,592), Tanganyika (5,000), Indonesia (4,000), Fiji Islands (3,000), Uganda (3,000).

Telugu

Malaya-Singapore (24,093), Indonesia (20,000), Mauritius (3,500).

Malayalam

Malaya-Singapore (44,339)

Sindhi

Indonesia (12,000), Hong Kong (1,600)

Marathi, Konkani

Uganda (2,603), Tanganyika (1,600), Zanzibar and Pemba (1,000).

Bengali

Malaya-Singapore (3.834)

CHAPTER II

NATIONAL SYMBOLS

NATIONAL EMBLEM

The National Emblem of India is an adaptation from the Satnath Loot Capital of Asoka as it stands today. In the original, raised by the Emperor to mark the hallowed spot where the Buddha first initiated his disciples in the eight fold path of salvation, there are four lons, standing back to back, mounted on an abasis with a firse earning seculptures in tight relief of an elephant a galloping horte, a bull and a lon, separated by intercenting whese (Kahara) over a bell hadped lotts Carced out of a single block of sandstone the Capital was crowned by the Wheel of the Law (Dharea Chahra)

In the National Emblem adopted by the Government of India on January 26, 1920, only three-loons are visible, the fourth being hidden from view. The wheel (Châr or) appears in relief in the centre of the abacits with a build on the right and a honce on the left and the outlines of the other wheels (Châr or) on the extreme right and left. The bell shaped lotus has been omitted. The words, 'Sahamasa jayate, from the Mandaré (Bpantado meaning 'Truth alone trumphs,' are inscribed below the Emblem in the Decanagari serpit.

NATIONAL FLAG

The National Flag is a horizontal tricolour of deep saffron on the top, white in the middle and dark green at the bottom in equal proportions. The ratio of the width to the length of the Flag is two to three. In the centre of the white band there is a wheel in navy blue to represent the Charlas. Its dessin is that of the wheel (Charlas) which appears on the abacus of the Sarnath Lion Capital. Its diameter approximates to the width of the white band and it has 24 spokes.

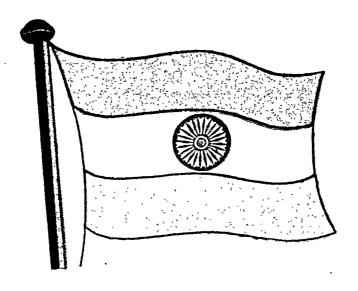

The National Flag was adopted by the Constituent Assembly of India on July 22, 1947, and was presented to the nation, on behalf of the women of India, at the inidinght session of the Assembly on August 14, 1947

Use of the Flag

Rules and regulations to ensure the proper use and display of the Flag have been fram up by the Government of India These prohibit the dipping of the Flag to any person or thing. The regunential colour, the State East the organisational or institutional flag will be used for this purpose when necessary

No other flag or emblers should be placed above the National Flag or to its right. All flags are placed to the left of the National I lag if they are hung in a line. When other flags are raised, then the National Flag must be the highest.

When other flags are flown along with the National Flag on the same haly ard the latter should be at the top. The Flag should not be carried flat or horizontally, but always aloft and free. When carried in a procession it must be borne high on the right shoulder of the standard bearer and carried in front of the procession.

सत्यमेव जयते

When the Flag is displayed from a staff projecting horizontally or at an angle from a window sill, balcony, or the front of a building, the saffron end should be at the top.

Normally, the National Flag should be flown on all important Government buildings such as high courts, secretariats, commissioners' offices, collectorates, jails and the offices of the district boards and municipalities. The frontier areas may fly the National Flag at some special points. The President of the Indian Republic and the Governors of States have their personal flags.

The use of the Flag will, however, be unrestricted on certain special occasions such as Independence Day, Mahatma Gandhi's birthday, during the National Week and on any other days of national rejoicing.

NATIONAL ANTHEM

Rabindranath Tagore's song Jana-gana-mana was adopted as the National Anthem of India on January 24, 1950. The song was first sung on December 27, 1911, during the Congress session at Calcutta. The song was first published in January 1912 under the title Bharat Vidhata in the Tattvabodhini Patrika, of which Tagore was himself the editor. The poet translated it into English in 1919 under the title Morning Song of India. The complete song consists of five stanzas. The first stanza, which has been adopted by the Defence Forces and is usually sung on ceremonial occasions, reads as follows:

Jana-gana-mana-adhinayaka jaya he
Bharata-bhagya-vidhata.
Punjaba-Sindhu-Gujarata-MarathaDravida-Utkala-Banga
Vindhya-Himachala-Yamuna-GangaUchchhala-jaladhi-taranga
Tava subha name jage
Tava subha asisa mage
Gahe tava jaya-gatha.

Jana-gana-mangala-dayaka, jaya he
Bharata-bhagya-vidhata
Jaya he, jaya he, jaya he,
Jaya jaya jaya jaya he.

The following is an English rendering of the stanza quoted above:

Thou art the ruler of the minds of all people,

Thou Dispenser of India's destiny.

Thy name rouses the hearts of the Punjab, Sind,

Thy name rouses the hearts of the Punjab, Sind, Gujarat and Maratha, of Dravid, Orissa and Bengal; It echoes in the hills of the Vindhyas and Himalayas,

Mingles in the music of Jamuna and Ganga,
And is chanted by the waves of the Indian Sea.

They pray for Thy blessings and sing Thy praise,
Thou Dispenser of India's destiny,
Victory, Victory, Victory to Thee.

NATIONAL SONG

At the same time as the National Anthem was adopted, it was decided that Bankim Chandra Chatteriee's *! sende Maiaram which was a source of imp ration to the people in their strategie for freedom shall livve an equal status with *Jame gana mena *! sende Maiaram occurs in Bankim Chandra Chatteriee's novel *Anadae 'dalp published in 1882* The first political occasion on which it was sung was the 1895 session of the Indian National Congress * The following is the text of its first stanza.

Lande Mataram 1

Sujalam suphalam malayaja shitalam,

Shasyashyamalam Mataram I

Shubhrajyotsna pulakitayaminim Phullakusumita doimadala shobbinim.

> Suhasınım sumadhura bhashınım, Sukhadam varadam Mataram!

The following English translation of the stanza is by Shr: Aurobindo:

I bow to thee Mother,

Richly watered richly fruited, Cool with the winds of the south.

Dark with the crops of the harvests.

The Mother!

Her nights rejoicing in the glory of the moonl ght,

Her lands clothed beautifully with her trees in flowering bloom, Sweet of laughter, sweet of speech,

The Mother, giver of boons, giver of bliss !

CHAPTER III

CONSTITUTION

The Constituent Assembly of India was originally designed to frame a Constitution for the whole of the undivided sub-continent. With the bulk of members elected by the then Provincial Assemblies of British India, and with nominees from the Princely States and the Chief Commissioners' Provinces, the Assembly first met on December 9, 1946. It was, however, boycotted by members of the Muslim League, which demanded the partition of the sub-continent and the creation of Pakistan with its own separate Constituent Assembly. A resolution on Objectives was adopted by the Constituent Assembly on January 22, 1947, and a number of committees were appointed to report on the various aspects of the proposed Constitution. But the Assembly was able to function properly only after the political uncertainty hampering its work was removed as a result of acceptance, by all the principal parties concerned, of the scheme of partition put forward by the Viceroy, Lord Mountbatten, on June 3, 1947.

On the basis of the reports of the committees appointed early in 1947, the Drafting Committee of the Constituent Assembly of India prepared a Draft Constitution which was published in February 1948 and presented to the Assembly for general discussion on November 4, 1948. Meanwhile, the passing of the Indian Independence Act and the transfer of power on August 15, 1947, had freed the Assembly from all the limitations under which it had been born and enabled it to proceed with the task of Constitution-making as a sovereign body. The Constituent Assembly finalised and adopted the Constitution on November 26, 1949. The Constitution, as it finally emerged, comprised 395 Articles and eight Schedules.* It came into force on January 26, 1950.

The preamble to the Constitution enshrines the resolve of the people of India to secure for all citizens: "Justice, social, economic, and political; Liberty of thought, expression, belief, faith and worship; Equality of status and of opportunity; and to promote among them all Fratemity assuring the dignity of the individual and the unity of the Nation."

THE UNION AND ITS TERRITORY

India is a Union of States and its territory comprises the territories of the States of Andhra Pradesh, Assam, Bihar, Bombay, Kerala, Madhya Pradesh, Madras, Mysore, Orissa, Punjab, Rajasthan, Uttar Pradesh, West Bengal and Jammu and Kashmir, the Union Territories of Delhi, Himachal Pradesh, Manipur, Tripura, the Andaman and Nicobar Islands and the Laccadive, Minicoy and Amindivi Islands and such other territories as may be acquired.†

^{*}For broad details about the amendments to the Constitution, see under 'Amendment of the Constitution' in this Chapter.

[†]Before the adoption of the Constitution (Seventh Amendment) Act, 1956, there were 10 States specified in the First Schedule to the Constitution as Part A States, 8 as Part B States, 9 as Part C States and one Part D Territory. Chapter XXX in 'INDIA 1957' may be consulted for details about reorganisation of States.

COTIZENSHIP AND FRANCHISE

The Constitution provides for a single and uniform citizenship for the whole of Indra. Both within the territory of the Judian Union, descent from Indian patents, or residence for a period of five years at the commencement of the Constitution entitle and the second of the years at the commencement of the Constitution entitle and Found Pakketan who fulfil certain conditions to become citizens. The properties of the properties of the constitution of their residence. No such person who columnarily acquires the citizenship of any foreign State is entitled to the right.

The foregoing provisions of the Constitution deal only with broad qualifications for exturning at the time of its commencement leving details to be filled in by Parliamentary legislation. This has since been done by the Cluteraphy Act, 1935, which provides for the acquastion of citteraphy after the commencement of the Constitution by birth, descent, registration, naturalisation and as a result of incorporation of certacity. The Act provides for the termination and depression of cutteraphy under certain tercumpaters. Another notable feature of the Act is the formal recognition of Commonwealth citteraphy in India. It empowers the Union Government to extend, on a reciprocal bias all or any of the rights of an Indian citter to the citizens of other Commonwealth countries and the Republic of Ireland

Article 326 of the Constitution confers the right of vote on every person who is a citizen of India and who is not less than twenty-one years of age on a freed date and is not otherwise disqualified under the Constitution or any la r of the appropriate Legislature on the ground of non residence, unsoundness of mind, crime or corrupt or lightly practice.

FUNDAMENTAL RIGHTS

Part III of the Consultation (Articles 12 to 53) enumerates seen broad cattgories of Fundamental Rights, "amely, the right to equality, the tright to freedom the right squaret exploitation, the right to freedom of religion, cultural and eductational rights, the right to property, and the right to constitutional remedies, which provides that the fundamental rights are justicable and any citzen can know the Supreme Court for their enforcement

The right to equality includes equality before the law, probabilities of discrimination on grounds of religion race, caste, see or place of birth, and equality of opportunity in matters of public employment. Social equality has been secured by abolishing 'unbuchability' and making its practice in any form a pumbability offence.

Article 19 guarantees to the citizen ha right to freedom of speech and expression, assembly, association or union movement, residence, acquisition, holding and disposal of property and the right to practise amy profession or to carry on an occupation, trade or business. The Constitution does not, however, but these from making laws preterribing reasonable restrictions on the exercise of these rights in the interests of the security of the State, friendly relations to with foreign States, public order, decency or morabily or in relations on contempt of court, delamation or institute to an offence or in the interest of and the general public or for the protection of the nativests of any Schrödlaid Tribe. The conference of these rights does not affect the operation of any examp law or prevent the State from making

any new law relating to the professional or technical qualifications necessary for practising any profession or carrying on any occupation, trade or business or the carrying on by the State, or by a corporation owned or controlled by the State, of any trade, business, industry or service whether to the exclusion, complete or partial, of citizens or otherwise.

Three other basic principles of common law which the Constitution has recognised in Articles 20-21 as fundamental rights are: (i) No person shall be prosecuted and punished for the same offence more than once; (ii) No person accused of any offence shall be compelled to be a witness against himself; and (iii) No person shall be deprived of his life or personal liberty except according to procedure established by law. The right against exploitation prohibits all forms of forced labour, child labour and traffic in human beings.

Freedom of conscience and free profession, practice and propagation of religion for all and the right of minorities to conserve their own culture, language and script and to receive education and establish and administer educational institutions of their choice are guaranteed by the Constitution.

The right to property is protected by Article 31 which provides that "no person shall be deprived of his property save by authority of law." This does not, however, deprive the State of its right to compulsory acquisition of private property for a public purpose, after payment of compensation. The Article was amended in 1955 so as to keep outside the purview of law courts the question whether the compensation provided by a specific law is adequate or not.

DIRECTIVE PRINCIPLES OF STATE POLICY*

The Directive Principles of State Policy, though not enforceable through courts of law, are regarded as "fundamental in the governance of the country." These lay down that the State shall strive "to promote the welfare of the people by securing and protecting, as effectively as it may, a social order in which justice, social, economic and political, shall inform all the institutions of the national life." These principles further require the State to direct its policy in such a manner as to secure the right of all men and women to an adequate means of livelihood, equal pay for equal work, and, within the limits of its economic capacity and development, to make effective provision for securing the right to work, education and public assistance in the event of unemployment, old age, sickness and disablement or other cases of undeserved want. The State is also required to secure to the workers humane conditions of work, a decent standard of life, and full enjoyment of leisure and social and cultural opportunities.

In the economic sphere, the State is to direct its policy in a manner as to secure the distribution of the ownership and control of the material resources of the community to subserve the common good and to ensure that the operation of the economic system does not result in the concentration of wealth and means of production to the common detriment. The State is also enjoined to guard against the abuse of workers' health and strength and to protect childhood and youth from being forced by economic necessity to enter avocations unsuited to their age or strength and against exploitation and against moral and material abandonment.

^{*}The extent to which these directives have been implemented after the inauguration of the Constitution can be seen from some of the succeeding chapters, particularly those dealing with education, health, social welfare, relief and rehabilitation, Scheduled Castes and Tribes, land reform, co-operative movement, community development, labour and others.

Among the other directives of State Policy are the organisation of agriculture and animal husbandry on modern and scientife limes promotion of cottage industries in rural areas, saving the feed of mutrition and improvement us the standards of living and public health, prohibition of intovicating drinks and drugs provision for free and compileory education for all children up to the age of fourteen, organisation of visiting participation, separation of judicary from the executive, promulgation of a uniform evaluated for the whole country, protection of national moniments, promotion of educational and economic interests of Scheduled Custes, Scheduled Tribes and other weaker sections and the promotion of international peace and security just and honourable relations between nations, respect for international law and trenty obligations, and settlement of international disputes by arbitration

THE UNION

EXECUTIVE

According to the provisions contained in Part V of the Constitution, the Union Executive consists of the President, the Vice President and the Council of Musisters with the Prime Musister at its head

President

The President is elected by an electoral college consisting of the elected members of both Houses of Parliament and of the Legislative Assembhes (Vidhan Sabbas) of the States in accordance with the system of proportional representation by the single transferable vote. The President must be a citizen of India, not less than 35 years of age, and eligible for election as a member of the House of the People (Lok Sabha). His term of office is five years and he is eligible for re election. The President may be removed from office by impeachment for any violation of the Constitution, which under Article 60 it is his duty to preserve, protect and defend. In his capacity as the head of the State, the President is empowered to make appointments, summon, prorogue, address, send messages to Parliament and dissolve the House of the People, issue ordinances during recess of Parliament, make recommendations for introducing or moving money bills and give assent to bills, and grant pardons, reprieves, respites or remissions of purushment or to suspend, remit or commute sentences in certain cases The executive power of the Union vested in him is exercised by him either directly or through officers subordinate to him in accordance with the Constitution

Vice President

The Vice President a elected by the normbers of both House of Parlaments assembled at a joint stimp on the basis of proportional representation by means of the single transferable vote. He must be a citizen of India, not less than 35 years of age and eligable for election as a member of the Council of States (Agia Sabbe). His term of office is also five years. The Vice President arts as the ev-officio Chairman of the Council of States and to the council of States and the States and the States and the council of the President. While so acting the exercises all the pointers and discharges at the discharges and the states and the S

fror details about the functioning of the Union Government, see Chapters IV and V

Council of Ministers

Article 74 of the Constitution provides for a Council of Ministers headed by the Prime Minister to aid and advise the President in the exercise of his functions. The Prime Minister is appointed by the President who also appoints the other Ministers on the advice of the Prime Minister. Although the Council holds office during the pleasure of the President, it is collectively responsible to the House of the People. It is the duty of the Prime Minister to communicate to the President all decisions of the Council of Ministers relating to the administration of the affairs of the Union and proposals for legislation and information relating to them and if the President so requires, submit, for the consideration of the Council of Ministers, any matter on which a decision has been taken by a Minister, but which has not been considered by the Council.

Attorney-General

The Attorney-General, appointed by the President, advises the Government of India on all such legal matters and performs such other duties of a legal character as may be referred or assigned to him by the President and discharges the functions entrusted to him by or under the Constitution. He holds office at the pleasure of the President and has the right of audience in all courts in the country.

PARLIAMENT

The Legislature of the Union which is called "Parliament" consists of the President and the two Houses known respectively as the Council of States (Rajya Sabha) and the House of the People (Lok Sabha).

Council of States (Rajya Sabha)

The Council of States consists of not more than 250 members, of whom 12 are nominated by the President and the rest elected. The elected members are representatives of the States and the Union Territories, the allocation of seats being made in accordance with the provisions contained in the Fourth Schedule to the Constitution. The nominated members are persons having special knowledge or practical experience in literature, science, art and social service. To fill a seat in the Council, the candidate must be a citizen of India and not less than 30 years of age.

The Council of States is not subject to dissolution, one-third of its members retiring on the expiration of every second year. The elections to the Council are indirect, the alloted quota of the representatives of each State being elected by the elected members of the Legislative Assembly of that State in accordance with the system of proportional representation by means of the single transferable vote. The representatives of the Union Territories are chosen in such manner as Parliament by law prescribes.

House of the People (Lok Sabha)

The House of the People consists of not more than 500 members directly elected from territorial constituencies in the States (the representatives of the State of Jammu and Kashmir being appointed by the President on the recommendation of the legislature of the State), and not more than 20 members to represent the Union Territories chosen in such manner as Parliament by law provides. The number of seats to each State is so allotted that the ratio between the number and the population of the State is, as far as practicable, the same for all States. The President can nomi-

nate two members to the House of the People to represent the Anglo-Indian community if in his opinion it is not adequately represented

The House of the People, unless sooner dissolved, has a maximum duration of five years from the date approinted for its first meeting. This may be extended by a maximum of one year by a Prlamentary law while a Proclamtion of Dimergency is in operation

IEDICESRS*

The Supreme Court of India resists of a Cinef Justice and not more than pudges appointed by the Prendent of The Judges hold office till the age of 65. For appointment as judge of the Supreme Court, a person must be supposed to the Supreme Court, a person must be supposed to the Supreme Court, a person must be supposed to Judge Court or of two or more such courts in succession; or an advocate of a High Court or of two or more such courts in succession for at least ten years, or, on the opinion of the President, a distinguished jurist. Privision has also been mide for the appointment of a judge of a High Court as an add hee judge of the Supreme Court and retired judges of the Supreme Court from practising in any court of law or before any other authority in India.

A judge of the Supreme Court cannot be removed from office except by an order of the President passed after an address by each House of Pathaneut, supported by a majority of not less than two-thirds of the memberpresent and voting, has been presented to the President in the same session for such remoal on the ground of proved mithehaviour or incapsuty.

COMPTROLLER AND AUDITOR-GENERAL OF INDIA

Articles 149-151 provide for the appointment of a Comptroller and Auditor-General of India by the President to Leep watch on the accounts of the Union and the States. His dissess and powers are prescribed by or under law made by Parliament. His reports submitted to the President and the Governors of States are, laid before each House of Parliament and the Legislatures of States.

THE STATES!

The system of Government in the States, as embodied in Part VI of the Constitution, closely resembles that of the Union

EXECUTIVE.

The State Executive consists of the Governor and a Council of Ministers with a Chief Minister at its head

Coverror

The Governor of a State is approinted by the President of India for a term of five years and holds office during his pleasure. Only Indian cuttens above 35 years of age are eligible to appointment to thus efficient. The Governor is debarred from being a remiser of other House for Parliament or of a House of the State Legislature and from holding any other office of profit.

• For details about the organization, functions and powers, see Chapter VI

The number was creently rased to ten by the Supreme Court (Aumber of Judges)
Act, 1936, from seven originally prescribed by the Constitution

‡ For details of the functioning of the State Governments, see Chapters IV and V

Council of Ministers

The Constitution provides for a Council of Ministers with a Chief Minister at the head to aid and advise the Governor in the exercise of his functions except in so far as he is, by or under the Constitution, required to exercise his functions in his discretion. The Chief Minister is appointed by the Governor who also appoints other Ministers on the advice of the Chief Minister. The Council of Ministers is collectively responsible to the Legislative Assembly of the State, though holding office during the pleasure of the Governor.

Advocate-General

The Advocate-General, who advises the Government of the State on such legal matters and performs such other legal duties as are referred or assigned to him by the Governor or entrusted to him by the Constitution or any other law, is appointed by the Governor and holds office during his pleasure.

LEGISLATURE

For every State there is a Legislature which consists of the Governor, and in the States of Andhra Pradesh, Bihar, Bombay, Madhya Pradesh, Madras, Mysore, Punjab, Uttar Pradesh and West Bengal, of two Houses and in other States of one House. Where there are two Houses, one is known as the Legislative Council (Vidhan Parishad) and the other as the Legislative Assembly (Vidhan Sabha). Parliament can, by law, provide for the abolition of an existing Council or for the creation of one where one does not exist if the proposal is supported by a resolution of the concerned Legislative Assembly passed in the manner prescribed in the Constitution.

Legislative Council (Vidhan Parishad)

The Legislative Council of a State comprises not more than one-third of the total number of members in the Legislative Assembly of that State, and in no case less than 40 members. Nearly one-third of the members of the Council are elected by the members of the Legislative Assembly of the State from amongst persons who are not members of the Assembly, one-third by electorates consisting of members of municipalities, district boards and other local authorities, one-twelfth by registered teachers in educational institutions not lower than secondary schools and a further one-twelfth by registered graduates of more than three years' standing. The remaining members nominated by the Governor are chosen from among those who have distinguished themselves in the fields of literature, science, art, co-operative movement and social service. Like their counterpart at the Centre, the Legislative Councils are permanent, one-third of their members retiring on the expiration of every second year.

Legislative Assembly (Vidhan Sabha)

According to Article 170, the Legislative Assembly of a State consists of not more than 500, and not less than 60 members chosen by direct election from territorial constituencies in the State. The demarcation of territorial constituencies is to be done in such a manner that the ratio between the population of each constituency and the number of seats allotted to it is, as far as practicable, the same throughout the State. The normal term of an Assembly is five years unless it is dissolved earlier.

JUDICIARY .

There is a High Court in each State which stands at the head of the State's judicial administration. I ach High Court consists of a Chief Justice and such other judges as the President may, from time to time, deem increasing to appoint the Chief Justice of a High Court's appointed by the President in consultation with the Chief Justice of India and the Governor of the State, and in the case of appointment of a judge other than the Chief Justice, the Chief Justice of the High Court concerned. They hold office until they attain the age of 60 and are removable in the same manner as a judge of the Supreme Court of India. To be eligible for appointment as a judge, one must have held a judicial office in India for ten years or must have precised at an advocate of a High Court or of two or more such courts in succession for a similar period. The Constitution also provides for the establishment of subordinate courts.

THE UNION AND THE STATES

Relations—legislative and administrative—between the Union and the State are described in Pvt AI of the Constitution. The power of establishing new States or altering the area, boundaires or numer of any existing State at vested in the Union Parliament. It can do so by passing an appropriate law for the purpose on the recommendation of the President, who, in his turn, is required to refer the matter to the legislatives of the affected States for the expression of their vives within a period specified in the reference or within such further period as the Fresident may allow Any such law shall be deemed to be an amendment of the Constitution for purposes of Article 508

Legislative Relations

The distribution of legislative powers between the Union and the States is governed by the provisions of the Seventh Schedule consisting of three Lists-the Union List, the State List and the Concurrent List-under which the known sphere of legislative activity has been imposed out by enumerating as exhaustively as possible, the various categories or subject matters of legislation The Union List contains 97 entiries pertaining to subjects of all India importance such is defence, foresen affairs, communications, currency and comage, banking and insurance, customs duties, etc., in regard to which Parliament has exclusive power to make laws The State Legislatures have exclusive authority to make laws in regard to the 66 entries in the State List which include such subjects as maintenance of law and order, administration of justice, local government, public health and samitation, education, agriculture, forests and fisheries, trade and industry, etc. The third or the Concurrent List which consists of 47 entries deals with subjects of common interest to the Union and the States, such as the legal system economic planning and social security, trade and industry, electricity, newspapers, books, etc., in regard to which both Parliament and the State Legislatures can make laws

Territorally, the legislative jurisdiction of Parliament extends to the whole or any part of the territory of India while that of the legislature of a State to the whole or any part of that State. Parliament also legislates for any part of the territory of India which is not in a State on matters which fall under the exclusive purview of State legislatures.

The Constitution provides that if any law made by the legislature of a State is repugnant to any provision of a law made by Parliament

[·] For details of the jude al system see Chapter VI

or to any provision of an existing law with respect to any of the matters enumerated in the Concurrent List, then the law made by Parliament shall prevail and the law made by the legislature of that State, shall, to the extent of the repugnancy, be void. As regards powers of legislation on subjects which have not been enumerated in either of the three Lists, usually known as 'residuary powers,' they have been exclusively vested in the Union Parliament.

The Constitution further provides that if the Council of States declares by a resolution supported by two-thirds of the members present and voting that Parliament should make laws in respect of any matters contained in the State List, Parliament can make laws for these also and such laws will remain in force for a period not exceeding one year unless continued under a fresh resolution and shall cease to have effect on the expiration of a period of six months after the resolution has ceased to be in force. Parliament exercises such a right if a proclamation of emergency is in operation and a law made thereunder shall have effect for six months.

Administrative Relations

Although the executive authority of the Union and the States is coordinate with their respective legislative powers, the Constitution envisages the Union Government entrusting the administration of some of its functions to State Governments or to officers thereof and issuing directions therefor. To this end, the Constitution places the States under the constitutional obligation of so exercising their executive power as (i) to secure compliance with laws passed by Parliament and earlier Central laws applicable to them, and (ii) not to impede or prejudice the exercise by the Union of its executive power, the Government of India having the power to give directions for this purpose. The President may, with the consent of a State, entrust the Union's executive functions to the State Government or to officers thereof. The States in their turn, acting through the Governor, may entrust functions connected with their executive power to the Government of India or to officers thereof. The Union Government has also the right to construct and maintain highways or other means of communication of national or military importance within the territory of a State and may also direct a State Government to take measures for the protection of railways within its borders. The adjudication of disputes regarding the use, distribution or control of the waters of, or in, any inter-State river or river valley may also be provided by law by Parliament. The President can, in the public interest, establish inter-State Councils for enquiring and advising on inter-State disputes, investigating and discussing subjects of common interest and making recommendations for better coordination of policy and action.

FINANCE

Part XII of the Constitution deals with provisions relating to finance, property, contracts and suits. It lays down a broad scheme of distribution of revenues between the Union and the States.

The Union Government has powers to raise money by taxes and duties mentioned in items 82 to 92A in the Union List and to collect fees in respect of any of the matters in the Union List excluding court fees, and the State Governments have similar powers with respect to items 45 to 63 in the State List and to collect fees in respect of any of the matters in the State List excluding court fees. Apart from these, the Constitution mentions the following specific categories of taxes in which the Union and

the States have a common interest and v hose proceeds accrue to them in different proportions

- (t) Dottes which are ferred by the Union, but are collected and wholly appropriated by the States, no. 1 non-judicial stamp duties and excise duties on medicinal and toilet preparations (Article 260)
- (e) Taxes which are leared and collected by the Union but whose net proceeds are wholly assigned to fix State: These include succession desire disting on property other than agricultural land terms of the goods and pusengers carried by rail, and the state of the st
- (iii) Taxes which are levied and collected by the Union but whose net proceeds are shared between the Union and the States Taxes on income other than agricultural income come under this category (Article 270)
- (w) Taxes which are levied and collected by the Union but whose proceeds may be shared with the States as provided by Parliament by Law, e.g. Union excise duties other than those on medicinal and todel preparations (Articles 272)

The Constitution empowers the Union Government to borrow on the security of the Consolidated Fund of India within limits prescribed by Parlament. The Limon can also grant loans to State Governments and guarantee loans raised by them. The States have powers to truse their own loans on the security of their respective Consolidated Funds.

The Constitution proudes for the appointment of a Finance Commission by the President, at stated intervals, to make recommendations to him in regard to the distribution of the net proceeds of taxes which are, or may be, dwided between the Union and the States and in regard to the principles which govern the grants and to the States.

There is also procision for an independent authority to audit the account of both the Union and the States. Exemption of Union property from State taxation and State property, from Union taxation, adjustment in respect of certain expenses and pensions, prey purses of the rulers of former princely States and restrictions as to imposition of taxes on the sale or purchase of goods in the course of river-State trade or import and export transactions with foreign countries form the subject matter of some of the other financial provisions. The rest of the prositions in this Part, deal with property, contracts, rights, liabilities, obligations and suits involving the Union and the State of

TRADE AND CONNERCE

Part XIII of the Constitution embodies the general principles of freedom of trade, commerce and intercourse throughout the territory of
"The fire Finance Comm suon, under this provision was set up in November 1951.

^{*}The fert France Comm usor, addr thu provision was set up in Agreenber 1931, and administed in special Federate 3. Because 1931, as Clair man was appointed on April 2, 1936. Because Commission on with Strick. Sambanam set plants of the proceedings of the process of the proces

the Union. Although Article 302 empowers the Union Parliament to impose certain restrictions on this freedom in the public interest, neither Parliament nor any State Legislature has power to make any law which authorises any preference or discriminates between one State and another. Such discrimination is, however, possible under parliamentary law to deal with scarcity of goods in any part of the country. Subject to these restrictions, the State legislatures are empowered to impose reasonable restrictions on the freedom of trade, commerce or intercourse as may be required in the public interest. Parliament also has the power to appoint any authority it considers appropriate to enforce the foregoing provisions.

PUBLIC SERVICES†

Part XIV deals with recruitment, conditions of service, tenure of office and dismissal, removal or reduction in rank of persons serving the Union or a State. It also provides for the appointment of a Public Service Commission for the Union and for each of the States.

ELECTIONS

The superintendence and control of all elections to Parliament and to the legislatures of the States and of the President and Vice-President of the Union are vested in an Election Commission consisting of a Chief Election Commissioner and such other Commissioners as necessary appointed by the President. The President also appoints Regional Commissioners in consultation with the Election Commission. The conditions of tenure and service of the Commissioners are determined by the President. The procedure for the removal from office of the Chief Election Commissioner is the the same as in the case of a judge of the Supreme Court.

Parliament, in respect of elections to its two Houses, and the State legislatures in respect of elections to the State legislatures are empowered to make provisions by law in regard to all matters relating to them. The validity of any such law cannot be called in question in any court.

OFFICIAL LANGUAGE

Article 343 of the Constitution provides that the official language of the Union shall be Hindi in the Devanagari script and the form of numerals for official purposes shall be the international form of Indian numerals. English will, however, continue to be the official language for a period of not more than 15 years from the commencement of the Constitution. The President is authorised under Article 344 to constitute, after the expiration of five years from the commencement of the Constitution and thereafter at the expiration of ten years from such commencement, a special Commission to examine the growth and development of Hindi and make recommendations as to its progressive use for all or any of the official purposes of the Union with a view to replacing English completely at the end of the stipulated period.* The Constitution also provides that the

[†]For details, see Chapter V.

^{*}In pursuance of this provision the President appointed a 21-member Commission called the "Official Language Commission", with the late Shri B.G. Kher as Chairman, in June 1955. The report of the Commission was submitted to the President on August 6, 1956 and later placed before both Houses of Parliament on August 12, 1957. It is at present under examination by the Parliamentary Committee envisaged under Article 344.

The main views and recommendations of the Commission can be summarised as follows: (1) In the light of the fully democratic basis of Indian polity, it is not possible to envisage English as the language of India's mass medium. "The obvious linguistic medium for pan-Indian purposes is the Hindi language." (2) It is neither necessary nor possible to pronounce now whether a general changeover from English to Hindi would be practicable

recommendations of the Commission will be examined by a Parliamentary Committee of 30 members (20 members from the House of the Prople and 10 from the Council of States) elected by the respective Houses in accordance with the system of proportional representation

The Constitution further lays down that the legislature of a State may, by law, adopt any one or more of the regional languagest in use in that State or Hundi as the language to be used for all or any of the official purposes For communication between one State and another and between a State and the Union, the language for the time being authorised for use in the Union shall be used. The need for the use of the English language in the proceedings of the Sunreme Court and the High Courts and in bills, enactments and other laws has been recognised and Article 347 makes special provisions on the subject. The proviso to Article 343 also empowers the President to authorise the use of Hindi in addition to English for any of the official purposes of the Union even during the stipulated period of 15 years

EMERGENCY AND OTHER SPECIAL PROVISIONS

According to Article 352, if at any time the President of India is satisfied that there has arisen a grave emergency created by war or internal disturbance, which threatens the security of India or any part of its territory, he can by declaration (a) give directions to the constituent States as to how their authority is to be exercised and (b) suspend from operation several Articles (268 to 280) of the Constitution under which at is obligatory on the part of the Union Government to make certain contributions to the States It is, however, necessary that the President's Proclamation is laid before each House of Parliament for approval within a period of two months During the period of such an emergency, Parliament has the power to legislate with respect to any of the matters enumerated in the

Another occasion on which the President can by proclamation assume to hunself all or any of the functions of the Government of a State is in the event of the failure of the State's constitutional machinery he does either on receipt of a report from the Governor or when he is other-

by 1965. This will depend on the efforts made in that direction in the meanine. (3) In view of the clastic provisions of the Coas tuition, it would be possible to continue the use of English even beyond the period of 15 years and to secontimodate the strustion as it develops. angular even reycon the period of 15 years and to accommonate the strustion as a successful without amending the Constitution (4) Hand will replace Legislar drifty on a hunted extent as it would not wholly a episto the shoes of English, the regional languages having been yielded their appropriate places (3). For the present, no retruction should be placed on the use of English for any of the purposes of the Union. English should, continue as an alternative medium as long as it was necessary and its discontinuance should be effected after sufficiently long notice (6) The D-vanagari script should be adopted, optionally, for the wing of other Indian Languages bendes the Umon language (1) The Central Covernment would be justified in presents og a trassonable measure of knowledge of Hunds as a quality. ment would be pistoned in presents on a resembnote measure or innoverage of 11mp as a quant feature for early min obs servered to be see extraint, provided a sufficiently long noncer was given and the measure of inquintic ability was moderate. (8) When the time comes for the changever the Supremer Coart will have so function only most blank language. The fower that the contract of the suprement of the reportal language. This multiple inspacts part term thought any will findering the contract the contract of the constitution of the constitut ten account or procession with posterior at the computation of the secondary stage, English to be used the secondary stage, English to be used to the contrary about principally as a "1 terary language" except where it was taken columbary [10]. The Communion of a due accept the suggestion that there should be taken columbary [10]. The Communion of a due accept the suggestion that there should be compensation point from the India-speaking students to learn another removal language other than H rule, (11) The Commission suggested the establishment of a National Academy of Languages for the development of the Union and regional languages.

The E 5th Schedule to the Consutation recognises the following fourteen as the language of this Schedule to the Consutation recognises the following fourteen as the language of the Schedule Schedule Consultation and Ledu

wise satisfied that a situation has arisen in which the government of the State cannot be carried on in accordance with the provisions of the Constitution (Article 356).

Scheduled Castes and Tribes

Besides the general provisions which guarantee the equal civil and political rights of all citizens, the Constitution contains special provisions to safeguard the interests of, and assist, minorities like the Anglo-Indian community and certain weaker and backward sections like the Scheduled Castes and the Scheduled Tribes to progress more rapidly. These provisions include reservation of seats in Parliament and the State legislatures, preferential treatment in the matter of public employment and extended educational facilities.* A special responsibility has been placed on the Union Government to promote the welfare of the Scheduled Castes and Schedules Tribes and it has been vested with adequate powers to carry out its obligations in this behalf. Article 224 (I) read along with the Fifth Schedule details provisions as to the administration and control of Scheduled Areas and Scheduled Tribes in the States other than Assam.

Tribal Areas in Assam

Another special provision which the Constitution makes is with regard to the administration of the tribal areas of Assam. Article 244 (2) read along with the Sixth Schedule to the Constitution provides for the constitution of certain autonomous districts and autonomous regions in these areas. The Governor of Assam who is specially entrusted with the task of administering these areas on behalf of the President is empowered to constitute councils for these districts and regions. These councils are empowered to make their own rules for the administration of their respective areas. They have powers of legislation with respect to disposition of land, administration of villages, inheritance of property, marriage and social customs, etc. They can constitute village councils or courts for the trial of suits and disputes, administer district and regional funds and establish and manage schools, dispensaries, markets and fisheries. Certain powers of assessment and collection of taxes on land, professions, trades and employment, vehicles and boats are also vested in the councils. The Governor of Assam is empowered to appoint a Commission to enquire into and report on the administration of the autonomous districts and regions. If necessary, the Governor may also place one of his Ministers in special charge of their welfare. The areas specified in Part B of the Sixth Schedule (the North East Frontier Agency and the Naga Hills District-Tuensang Area) are administered by the President acting through the Governor of Assam as his agent and to these the provisions of Article 249 (dealing with the President's regulation-making power for the peace, progress and good government of the Union Territories of the Andaman and Nicobar Islands. and the Laccadive, Minicoy and Amindivi Islands) apply.

Special Officers

Article 338 provides for the appointment of a Special Officer by the President for the Scheduled Castes and Scheduled Tribes. It is the duty of this Officer to investigate all matters relating to the safeguards provided for these sections under the Constitution and to report to the President on their working. The President is further required to place these reports before both the Houses of Parliament. The appointment of another Special Officer is envisaged under Article 350B. He is required to perform

^{*}See Chapter XIV for the implementation of these safeguards and a review of the administration of the tribal areas.

similar duties with regard to constitutional safeguards provided for linguistic

AMENDMENT OF THE CONSTITUTION

Article 369 provides that an amendment to the Constitution may be metaled only by the introduction of a Bill for the purpose on culter House of Parliament, and when the Bill is paired in each House by a majority of not less than too-close the members of that House present and voting, it is allowed to the President for his assent and upon such assent to stage of the terms of the Bill. He Constitution shall stand amended in accordance of which ratification by the legislatures of not less than one-half of the Sistes has also been prescribed, relate to the election of the President, the Supreme Court and the High Cours, the dustribution of legislature powers between the Centre and the States, the representation of the States in Parliament and the procedure for amendment of the Constitution.

Since its inauguration on January 26,1950, there live been seven amendments to the Constitution The Constitution (First Amendment) Act, 1951, besides making minor changes in Articles 15, 19, 83, 87, 174, 176, 341, 342, 372 and 375, added two new Articles 31A and 31B and a Ninth Schedule after the Eighth Among the more notable features of this Act are (i) the addition of a saving clause to Article 15 (prohibition of discrimination) enabling the State to make special provisions for the advancement of socially and educationally backward classes, and [n] the substitution of clause (2) in Article 19 by a new clause broadening the State's power to impose 'reasonable restrictions' on the citizens' right to freedom of speech and expression, in the interest of "friendly relations with foreign States" and in relation to "defamation or incitement to an offence," besides security of State, public order, decency and morality, etc., which were included in the original clause as well. The two new Articles added after Article 31 (right to property) provided for the saving of laws relating to acquisition of estates and the validation of certain land reform. Acts and Regulations passed by the States and specified in the Ninth Schedule.

The Constitution (Second Amendment) Act, 1932, sought to amend Article 81 with a new to readystumg the scale of representation in the House of the People, necessitated by the completion of the 1931 certain The Third Amendment passed in 1932 substituted entry 33 of: the Concurrent Last in the Seventh Selvedule by a new one, including food-stuffs, cattle folder and raw cotton and just as additional items whose production and supply could be controlled by the Centre, if expedient in public instruct.

The Constitution (Fourth Amendment) Act, 1935, amended Articles 31, 31A, 303 and added a few more entires to the Ninth Schedule. The amendment to Article 31 (2) provided that when the State compulsorily acquires private property for a public purpose, the scale of compensation prescribed by the authorising legislation would not be called in question in a court of live Article 31A was amended so as to exclude the temporary taking over of a property by the State either in public interest or to secure to Article almagement from the compensation clause. The amendment of Article almagement from the compensation clause The amendment State monopoles. Seven new entires were also added to the Ninth Schedule.

The Constitution (Fifth Amendment) Act, 1955, substituted the provise to Article 3 by a new one empowering the President to fix a time

limit for State Legislatures to express their views on proposed Central laws affecting the area and boundaries, etc., of their respective States. The Sixth Amendment passed in 1956 added a new entry, i.e. 92A, to the Union List of the Seventh Schedule relating to taxes on the sale and purchase of goods in the course of inter-State transactions and the relevant clauses under Articles 269 and 286 on the same subject.

The Constitution (Seventh Amendment) Act, 1956, necessitated by the reorganisation of States, involved not only the establishment of new States and alterations in State boundaries but also the abolition of the three categories of the States and the classification of certain areas as "Union Territories." This led to the amendment of Article I and the First Schedule to the Constitution. Among the other important Articles which were affected by this amendment were Article 80 (composition of the Council of States) along with the Fourth Schedule dealing with the allocation of seats in the Council to the States; Articles 81 and 82 which were substituted by new ones; Article 131 on the original jurisdiction of the Supreme Court; Article 168 providing for bicameral legislatures in certain States; and Articles 216, 217, 220, 222, and 224 dealing with the High Courts. Two new Articles 350A and 350B were added with a view to implementing the recommendations of the States Reorganisation Commission regarding constitutional safeguards for linguistic minorities.

CHAPTER IV

LEGISLATURE

India is a Sovereign Democratic Republic with a parliamentary form of government based on universal adult franchise. Sovereignty rests with the people. The executive authority is ultimately accountable for all its decisions and actions to the people through their elected representatives in the legislature.

UNION PARLIAMENT

The constitutional provisions governing the composition of the two graphs of the Union Parliament have already been dealt with in the preceding chapter. The total number of members in the Council of States, as constituted at present, is 23% of whom 220 are the elected as constituted at present, is 23% of whom 220 are the elected representative of the State and the Union Territories and 1st normand by the President The present strength of the House of the People is 500 consisting of 500 members directly elected from the fourteen States (including its front of the fourteen States (including its front that it is a state of the State) and the fourteen of the House of the House of the State of the State of the State of the State of the House of the House of the Himschall Pracisch, Manupur and Tripura, and five members normanted by the President to represent Angle-Indians, the Parts Deterritories of the State Schedule and the Union Territories of the Andaman and Nicobar Islands and the Laccadive, Minicoy and Amindivi Nalands.

The State wase allocation of seats in the two Houses and the strength of political parties in the House of the People, as on March 1, 1908, is shown in the following table

Officers of Parliament

Among the principal officers of Parliament are the Chairman and D-puty C tairman of the Council of States and the Speaker and the Deputy Speaker of the House of the People The offices of both the Chairman of the Council and the Speaker of the House are of great dignity and power B-sid-s presiding over the deliberations of the respective Houses, they act as their representatives and guardians of their liberities. They interpret rules of the Houses and are the final authority on the procedure to be followed in any matter in the respective Houses or any of their committees power to certify a Money Bill vests in the Speaker of the House of the People, who also presides over joint sittings of the two Houses.

The incumbents of these offices are

COUNCIL OF STATES

S Radhakrishnan Deputy Chairman ...

S V, Krishnamoorthy Rao

HOUSE OF THE PEOPLE

Speaker M Ananthasayanam Ayyangar Deputy Speaker Hukam Singh

Functions of Parliament

The main functions of Parliament are to make laws for the country, to make finances available for the needs of the Government and appro-

Nominated by the President.

priate funds necessary for the services of the State and, finally, to criticise and control the Government. The two Houses form part of the Electoral College for the election of the President and constitute the Electoral College for the choice of the Vice-President. The Council of Ministers is collectively responsible to the House of the People which also votes the salaries and allowances of Ministers and can force the resignation of the Council of Ministers by refusing to pass the budget or any other major legislative measure or by adopting a vote of no-confidence.

The legislative authority of the Union Parliament extends to all matters enumerated in the Union and the Concurrent Lists of the Seventh Schedule. All legislation requires the consent of both Houses of Parliament. Delegated legislation is also subject to review and control by Parliament. Although all financial legislation must be recommended by the President, the House of the People alone can sanction grants, appropriations and proposals for taxation. Parliament's power to debate public questions and to review the work of the different departments of the Government is unfettered by any limitations except those imposed by the Constitution or by its own rules of procedure. In times of emergency, the legislative authority of Parliament also extends to the matters enumerated in the State List. Besides these, amendment of the Constitution, impeachment of the President and the removal of judges of the Supreme Court and High Courts and of the Chief Election Commissioner and the Comptroller and Auditor-General are among the powers which are exclusively vested in Union Parliament.

Procedure

The more important rules of procedure of the Union Parliament are incorporated in the Constitution itself. Subject to these, each House of Parliament is competent to make detailed rules with regard to its own procedure and conduct of business. Accordingly, the two Houses have adopted such rules after the new Constitution came into force.

Subject to the provisions relating to Money and other financial bills, a bill may originate in either House of Parliament. All legislation requires the consent of both Houses of Parliament, which decide every issue by a simple majority of the members present and voting except where a special majority is required by the Constitution. Until Parliament by law otherwise provides, the quorum to constitute a meeting of either House of Parliament is one-tenth of its total membership.

The procedure governing the actual passage of bills in the two Houses, is identical. Every bill has to pass through the following stages, i.e., (i) introduction and publication; (ii) general debate on principles; (iii) clause by clause consideration; and (iv) the passing of the bill by the House.* After its passage in the two Houses, the bill is presented to the President for his assent and becomes law only after the President has given such assent. In cases of disagreement between the two Houses, the President is empowered to call a joint sitting to deliberate and vote upon the measure. At joint sittings also decisions are taken by a simple majority of the members present and voting.

There is a special procedure for Money Bills which can be introduced only in the House of the People. When a Money Bill has been passed

^{*} Important bills are referred to a Select/Joint Committee for further scrutiny before they are passed by the House.

by the House of the People, it is transmitted to the Council of States for its recommendations and the Council, within a period of fourteen days from the date of the recent of the bull, returns it to the House with its recommendations and the House threupon either accepts or rejects all or any of the recommendations of the Council.

The budget or the annual financial statement of the estimated receipts and expenditure of the Government a presented to both the Houses. There is a general discussion of the budget during which no details are discussed of expenditure as submitted to the House of the Ecople in the form of chanda for grains. The House may not or refuse a grant or may agree to it with reduction but cannot propose any increase. The debrites of the first of the fir

Regulation of Business

Pariamentary work constitutes one of the important procecupations of Government in a democracy. Though Pariament's duret relationship with the Government is through the political execution, i.e., Minuters, the day to-day working of Pariament makes large claims on the time and resources of the various administrative departments through which the Minuters implement the politics endosed by Parliament.

The framing and working of the programme of humners of Parliament require a good deal of co-ordination and planning in haison with the Government. In India this to the teaponability of the Department of Parliamentary Affairs. It determines the programme for any reason, the priorities for the different intens in the programme and the amount of un't to be allotted to each. This is done in close haison with two higher co-ordinating bodies, namely, (i) the Parliamentary and Legal Affairs. Commuttee of the Gabinet on the Government's side, and (ii) the Business Advisory Commuttee for each House on Parliament's side.

Committees of the Houses

Parlamentaty Committees perform an important function in the day today transaction of Parlaments business. They are appointed either on a motion adopted by the Hoose usefl or by the Speaker. One third of the members of a Committee constitute the quorium for a meeting. The stitings of the Committees private and they are empowered to automono witnesset to appear these error and to require production of any papers or records. The Coursel of Sister also functions through more or less a similar system of Committee and the Committee on each House are the Business Advisory Committee and the Committee on Privileges.

Control Over Executive

Apart from the general financial control that the House of the Feople exercises through the hadgetary process, it also keeps on reviewing the financial administration of the Government through its Committee

on Public Accounts and on Estimates. The Committees are elected by the House from among its members by the single transferable vote. Ministers are debarred from being members of these Committees. The Public Accounts Committee scrutinises the financial transactions of the Government after the budget has been executed in order that public money is spent in accordance with Parliament's decisions. It also ensures future economy by calling attention to cases of waste, extravagance, loss, nugatory expenditure or lack of financial integrity in public services. The Estimates Committee which examines selected budget estimates has to report on "what economies, improvements in organisation, efficiency and administrative reform consistent with the policy underlying the estimates may be effected." It also examines whether the money provided in the estimates is well laid out and suggests the form in which estimates shall be presented to Parliament.

In addition, the members of the two Houses have other opportunities of raising debates and eliciting information on the policies of the Government and other public questions and of ventilating grievances against the administration. These include 'questions' by members and 'half-anhour discussions' on matters arising out of questions; the debates on the President's addresses; emergency adjournament motions; and resolutions and substantive motions of different kinds.

The debate on the address of the President to a joint sitting of the two Houses, outlining the policy of the Government on matters of vital concern to the people and the programme of the Government for the session, provides a major occasion for the discussion of governmental policies.

Whenever there is any urgent public question, any member may bring forward a motion for the adjournment of the House to discuss that matter. For debating less important matters without moving for an adjournment of the House, there is provision for short discussion and 'calling attention' to such matters. After giving a notice of 15 days, a member may move a resolution on any matter of general public interest, which if adopted is communicated by the Speaker to the Minister concerned for necessary action. In extreme cases there is provision for a motion of want of confidence in the Council of Ministers which can be moved under a prescribed procedure.

Another method of exercising control over the Executive is through the Committee on Government Assurances set up under the new rules of the House of the People. The function of this Committee is "to scrutinise the assurances, promises and undertakings, etc., given by Ministers from time to time on the floor of the House and to report on the extent to which such assurances have been implemented and, where implemented, whether such implementation has taken place within the time necessary for the purpose."

STATE LEGISLATURES

Of the fourteen States of the Indian Union, ten have a bicameral and four a unicameral legislature. The constitutional provisions governing the composition of the two Houses of the State Legislatures have already been dealt with in a previous chapter*. The strength of the Legislative Councils (Vidhan Parishad) and Legislative Assemblies (Vidhan Sabha) in the States

^{*} For the names of the members of State Legislative Councils and Assemblies, see Chapter XXX.

. . Figures in brackets and care the number of vacant seats.

3 This excludes 25 seats for the Pakistan-occupied areas of the State which are kept in abeyance pending the return of those areas to the Indian Union.

Officers of the Legislature

Like the two Houses of the Union Parliament, the State Legislatures also have their presiding officers known as the Chairman and the Deputy Chairman of the Legislative Council and the Speaker and the Deputy Speaker of the Legislative Assembly. The Chairman of the Council and the Speaker of the Assembly enjoy powers and privileges and perform functions similar to those of their counterparts in the Union Parliament.

Functions

The State Legislature has exclusive powers over subjects enumerated in List II of the Seventh Schedule to the Constitution and concurrent powers over those enumerated in List III. Ordinances promulgated by the Governor are subject to the approval of the Legislature. The financial powers of the Legislature include statutory authorisation of all expenditure, taxation and borrowing by the State Government. The Council of Ministers is responsible to the Legislative Assembly of the State.

Procedure

Articles 188 to 213 of the Constitution of India describe the more important rules for the conduct of business, disqualification of members, powers, privileges and immunities of State Legislatures and their members and the legislative procedure for ordinary and financial bills. In addition, the State Legislatures are empowered by the Constitution to frame their own rules of procedure. The quorum for a meeting of the Legislature is one-tenth of its membership or ten, whichever is higher. A simple majority of the members present and voting, except where a special majority is required by the Constitution, decides all questions before either House of the Legislature. In the discharge of their duties the members and officers of the State Legislatures are immune from the jurisdiction of law courts. Freedom of speech and discussion in the Legislatures is guaranteed by the Constitution. Legislatures cannot, however, discuss the conduct of any judge of the Supreme Court or of any High Court in the discharge of his duties. In their proceedings, the State Legislatures use either the official language or languages of the State, Hindi or English.

The detailed procedure governing the passage of ordinary bills and financial bills is almost the same as for the Union Parliament. Ordinary bills may originate in either House, and in order to become law they must be passed by both the Houses without amendments or with only such amendments as are agreed to by both. In case of disagreement between the two Houses, there is no provision for a joint sitting as in the Union Parliament. If a disputed bill is given a second passage by the Legislative Assembly after an interval of three months from the date of its transmission to the Legislative Council, it automatically becomes law after one month of such passage, irrespective of the action of the Legislative Council.

The Legislative Assembly alone has the power to originate Money Bills. The Legislative Council can make only recommendations in respect of changes it considers necessary within a period of fourteen days of the receipt of the bill from the Assembly. This in no way affects the freedom of the Assembly to accept or reject the recommendations of the Council.

The State Legislatures also have their system of Committees to facilitate proper transaction of business.

Reservation of Bills

As mentioned earlier, no bill passed by the State Legulature can be made law unless it has received the assent of the Governor Beside possessing the power to give or withhold his assent, the Governor may also reserve certain bills for the consideration of the Union President Such bills relate to subjects like compulsory acquisition of property, estates and jagurs measures affecting the powers and the position of High Courts and unposition of taxes on the storage, distribution and sale of water or electricity in inter State river or niver valley development project Further no bills seeking to impose restrictions on inter State trade can be introduced in a State Legulature without the previous sanction of the President.

Control over Executive

Besides exercing the usual powers of financial control, the State Legislatures use all the normal parliamentary devices I ke question discussion debates adjournments and no-confidence motions and resolutions, etc., to keep a watch over the day to-day functioning of the Executive Like the Union Parliament, they also have their Committees on Estimates and Public Accounts to ensure that grants sanctioned by the Legislature are properly utilised

CHAPTER V

EXECUTIVE.

UNION

The head of the Indian Union is the President. All executive authority of the Union, including the supreme command of the Defence Forces, formally vests in the President and all executive actions of the Government are taken in his name. In the exercise of his functions, the President is aided and advised by a Council of Ministers with the Prime Minister at the head.

The Council of Ministers, as at present constituted, comprises (i) Ministers who are members of the Cabinet, (ii) Ministers who are not members of the Cabinet but hold Cabinet rank, and (iii) Deputy Ministers. The Cabinet finally determines and lays down the policy of the Government.

The personnel of the Union Government, as reconstituted on March 13, 1958, was as follows:

President:

Vice-President:

Members of the Cabinet

- Jawaharlal Nehru
- 2. Govind Ballabh Pant
- 3. Morarji Ranchhodji Desai
- 4. Jagjivan Ram
- 5. Gulzarilal Nanda

Attached and Subordinate Offices

Where the execution of the policies of the Government requires decentralisation of executive direction and the establishment of field agencies, a Ministry has under it subsidiary organisations which are called Attached and Subordinate Offices. The Attached Offices are responsible for providing executive direction required in the implementation of the policies laid down by the Ministry to which they are attached. They also serve as repository of technical information and advise the Ministry on technical aspects of questions dealt with by them. The Subordinate Offices function as field establishments or as agencies responsible for the detailed execution of the decisions of Government. They generally function under the direction of an Attached Office, or where the volume of executive direction involved is not considerable, directly under a Ministry.

Reorganisation of Administrative Machinery

In order to ensure that the machinery of administration is geared up to the new tempo of developmental activities, a number of measures to reorganise the administrative structure and machinery and refashion its methods and procedure have been taken during the last few years. The reorganisation of the Central Secretariat cadres has been carried out. At the request of the Planning Commission, Shri A D. Gorwala examined the state of public administration in 1951 and made recommendations concerning the administration of public enterprises. Early in 1953, the Government of India invited Dr Paul H Appleby, consultant in public administration to the Ford Foundation, to study the administrative system and make recommendations for its improvement. Some of the important recommendations of Dr Appleby were the establishment of an Institute of Public Administration, the setting up of an organisation and methods office, consolidation of administrative responsibilities for the implementation of the community projects and other developmental activities, appointment of executives to fill in the gaps in the administrative hierarchy so as to make it truly pyramidal, elimination of fixed "Cadre" limitations in order to make recruitment wholly dependent upon frequent and flexible determination of needs, and the establishment of extensive personnel development programmes designed to maximise the potentialities of all persons working for the Government.

Action on many of these recommendations has been taken. An Institute of Public Administration has been established at Delhi. An Organisation and Methods Division, as part of the Cabinet Secretariat, was set up in March 1954 The main task of the Division is to supply the leadership and drive, and to build up a common fund of information, experience and competence in organisation and methods work by co-operative effort. The three fold plan with which the Division started its activities was (i) to create a consciousness of the prevailing inefficiency and of the need and scope for improvement, (ii) to find out facts and to see what actually was wrong and where, and to locate causes which adversely affect the speed and quality of work, and (ut) to devise and apply appropriate remedies. The work of the Division is carried on through the O and M Cells set up in each Ministry or department under the charge of a selected officer of the grade of Deputy Secretary Inspections, case studies, arrear statements, standing guard files, recording and indexing, delegation of enhanced authority to the Section Officers personal discussion among officers, and procedural reforms are some of the methods by which the O and M Division tries to achieve speedy and efficient disposal of cases A 'Quality Control Drive' has also been launched with the object of eliminating unnecessary or repetitive notings, pointless cross references to other Sections or Ministries, or lack of attention to the intrinsic urgency or the human aspect of questions under consideration.

Pay Commission

The Government of India announced the appointment of a Commission of Enquiry to examine the structure of emoluments and conditions of service of Central Government employees on August 21, 1957 The mem bers of the Commission are

Chairman B Jagannadhadas (Judge, Supreme Court)

Members VB Gandhi, N.K. Siddhanta, M.L. Dantwala, Smt M Chandrasekhar, L.P. Singh (Member Secretary), and H.F.B. Pais (Associate Secretary)

The terms of reference of the Commission are as follows

 Examine the principles which should govern the structure of emoluments and conditions of service of the Central Govern ment employees,

- "(2) Consider and recommend what changes in the structure of emoluments and conditions of service of different classes of Central Government employees are desirable and feasible, keeping in mind the considerations mentioned below;
- "(3) Recommend, in particular, the extent to which benefits to the Central Government employees can be given in the shape of amenities and facilities; and
- "(4) In making their recommendations, the Commission will take into account the historical background, the economic conditions in the country and the implications and requirements of developmental planning, and also the disparities in the standard of remuneration and conditions of service of the Central Government employees on the one hand and of the employees of the State Governments, local bodies and aided institutions on the other, and all other relevant factors.

"The Commission may consider demands for relief of an interim character and send reports thereon. In the event of the Commission recommending any interim relief, the date from which this relief should take effect will be indicated by the Commission.

"The Commission will devise its own procedure and may appoint such advisers as it chooses for any particular purpose. It may call for such information and take such evidence as it may consider necessary. Ministries and departments of the Government of India will furnish such information and documents and other assistance as may be required by the Commission,"

In an interim report dated December 14, 1957, the Commission recommended the grant, with effect from July 1, 1957, of an increase of Rs. 5 per month in the dearness allowance of all Central Government servants (with a few specified exceptions) whose basic pay does not exceed Rs. 250 per month. The Government have accepted the recommendation.

STATES

The States, like the Centre, have a parliamentary system of responsible government. The Governor, the constitutional head in each State, is a common constitutent of both the State Legislature and the Executive.

Like that of the Union President, the office of the Governor is of considerable dignity. All executive actions of the State are expressed to be taken in his name. His oath of office makes it his solemn duty to "preserve, protect and defend the Constitution and the law" to the best of his ability and to devote himself to the service and well-being of the people.

Among the more important powers of the Governor are the appointment of State Ministers, the allocation of Government business among them, the summoning and proroguing of the State Legislature, dissolution of the Legislative Assembly and the granting of pardons and remissions, etc., of sentences of persons convicted for offences under the State laws. Bills passed by the State Legislature, except under certain conditions, require the assent of the Governor to become law. The discretionary powers of the Governor relate to the administration of tribal areas in Assam and to

making of reports to the Union President about (i) the administration of Scheduled Areas and Tribes if any, in his State and (ii) the breakdown of the constitutional machinery In the latter case, the administration of the State is taken over by the Union Government and the discretionary powers of the Governor are considerably enhanced, for the responsibility of administering the State as an agent of the President devolves on hun.

ORGANISATIONAL PATTERN

The executive power of the State is co-extensive with its legislative authority Although all executive actions of the State are expressed to be taken in the name of the Governor, the real Executive of the State is the Council of Ministers headed by the Chief Minister It is, however, the duty of the Chief Minister to communicate to the Governor all decisions of the Council of Ministers relating to the administration of the affairs of the State and proposals for legislation, and to furnish all such information to him as he might desire in this connection. The advice tendered by the Council of Ministers to the Governor is treated as confidential and cannot be enquired into by a court of law The Council works on the principle of collective ministerial responsibility and is accountable to the Legislative Assembly of the State The number of Ministers, who in some States are assisted by Deputy Ministers and Parliamentary Secretaries, varies from State to State *

Conduct of Government Business

Under Article 166(3) of the Constitution, the Governor is empowered to make rules for the more convenient transaction of Government business and its allocation among Ministers Similar to the practice at the Centre, the State Ministers also work on the portfolio system, each Minister being the final authority in regard to the day to-day administration of subjects allotted to his Ministry Only matters of policy along with subjects in which more than one Ministry is concerned or on which there is difference of opinion between them are referred to the Cabinet or the Council of Ministers Like the Ministries in the Union Government, the State Ministries are headed by Secretaries as their administrative heads. In addition, the States also have Chief Secretaries,* who besides acting as Secretaries to the State Cabinets, deal with all matters connected with public services and such other miscellaneous subjects as are not allotted to other departments, and generally co-ordinate the work of all the Government departmerts The State Secretariats are patterned more or less like their counterpart at the Centre

Besides Secretaries, who advise the Ministers on all matters of policy, there are heads of departments whose number corresponds to the number of the important subjects administered by a State It is the departmental herd who carries out the pol cy and programme of the Government at the headquarters as well as in the districts through a field staff

ADMINISTRATIVE UNITS**

It is necessary for the sake of administrative convenience and delegation of authority to subordinate officers to have each State sub-divided into smaller units. Although there is some variety in the sub-divisions,

population of each is given in an appendix at the end

For the personnel of the State Councils of Ministers and names of Chief Secretaries to State Governments see Chapter XXIX ** A Complete 1 t of dutricts and their taluks tehs is, along with the area and

the District is common to all the States. Some of the States have a bigger unit called the Division headed by a Commissioner.

District Administration

The principal unit of administration is the district under a Collector and District Magistrate. As Collector, he is responsible to the Board of Revenue, and through it to the Government for the proper collection of revenue and for the administration of all matters connected with land other than irrigation, agriculture and forestry in their technical aspects, and registration. As District Magistrate, he is responsible for the maintenance of law and order and the criminal administration of the District. For this purpose, the police force in the District with the Superintendent of Police as its immediate head is under his control and direction, although for purposes of disciplinary control and technical supervision, the Superintendent is responsible to the Inspector-General of Police. Besides a number of Assistant or Deputy Collectors and Magistrates who help him in the discharge of his duties, the Collector has also at his disposal the assistance and professional advice of a number of other district officers such as the Executive Engineer, the Deputy Commissioner of Excise, the Civil Supplies Officer and the Forest Officer, etc.

For the sake of administrative convenience each District is divided into a number of Sub-Divisions, usually three to five. The Sub-Divisional Magistrate who is in charge of the Sub-Division is the principal assistant of the District Magistrate and is responsible to him for the maintenance of law and order, collection of Government dues and other connected matters in the Sub-Division. A Sub-Division is further divided into Taluks or Tehsils in the charge of a Tahsildar or a Mamlatdar.

Among other district officials are those belonging to the departments of Education, Medical, Public Health, Agriculture, Veterinary, Cooperatives, Industries, Labour, Jails, Local Fund Audit, etc., who carry out their respective duties under the direction and orders of their heads of departments at the State headquarters.

Steps have been taken in the District to strengthen and improve the machinery of general administration at all levels for purposes of developmental programmes. Co-ordination at State headquarters is achieved through an inter-departmental Committee of Secretaries in charge of various development departments with the Chief Secretary or the Secretary in charge of planning as the Chairman. Generally, the functions of co-ordination for planning and for the implementation of district programmes are combined in a single officer commonly described as the Development Commissioner. As a rule, a Committee of the State Cabinet under the Chief Minister provides overall guidance and direction. State Planning Boards which include leading non-officials have also been constituted in most of the States.

The District administration has also been geared to act as a popular agency for social change. The Collector, who is the Chief Development Officer of the District, is assisted in many States by additional Collectors and District Development or Planning Officers. In order to associate the people with the formulation and implementation of development programmes, District Development or Planning Committees have been set up in almost all the States. Members of the State Legislature and Parliament from the Districts, representatives of District and Municipal Boards and leading non-official workers are associated with these Committees.

LOCAL GOVERNMENT

Local self governing institutions are broadly classified into two categories—urban and rural. In the larger cute they are known as Carporations, and in rurdium and small towns as Municipal Committees or Boards. The civic necisio Trural access towards after by Durtice to Tallak Boards and Gome Pachpaid, area of the control purisherous extending to the general admittance of the product of the product of the product of the Committees, 12, 133 Municipal Committees and Boards, 383 Small From Committees, 22 Notified Area Committees, 309 Durtext and other Local Boards and 1,23,670 Gram Panchog sts in India at the end of October 1956.

Corporations

The corporations, established under specific Acts of the State Legislatures, eajoy more powers than municipalities in district towns. Their elected presidents are known as Mayors The administration of a city under a corporation is entrusted to three authorities (I) the General Council of the Corporation, (u) the Standing Committees of the Council, and (ut) the Commissioner or Executive Officer The General Council appoints all the officers of the corporation except the Commissioner who is usually appointed by the State Government. The Standing Committees elected by the Council carry out the main work of the administration covering taxation and finance, engineering works, health and education. The executive power of the corporation vests in the Commissioner, who prescribes the duties of the various establishments and supervises their work-Besides matters connected with the safety, health, education and other conveniences of the citizens, the jurisdiction of the corporation also extends to the maintenance of streets and bridges, avenues and parks, recreation grounds and markets.

Municipal Boards and Committees

Smaller etites and district towns have elected municipalities with functions similar to those of corporations. They have elected Presidents and also function through committees. All the members of a municipality consisted its general body which discusses and decides all questions of policy and important decides of municipal administration. The powers of passing the budget, imposing latation, voling expenditure and making rules and regulations west in the general body. The day-today work of the municipality incarried on by an executive officer, drawn either from the State cadre of municipal executive officers or from the State Cadre of municipal executive officers or from the State Cadre Chail Service.

In general the obligatory functions of a mususpality are seavenging and samitary measures to keep public streets clean and healthy, regulation of places for the disposal of the dead and registration, of births and deaths construction, maintenance, and improvement of public streets, latines, drains etc., maintenance of public bropitals and provision of medical relief, primary education, regulation of oflerance or dangerous trades and practices, lighting of public streets, and provision of adequate water supply. At their own discretion, municipalities may, however, also take up the construction and maintenance of libraries, museums, rest houses and other public buildings, and the laying out of public gardies, parks, public streets and any other measures likely to promote the welfare of cutzens. In recent years, a number of bugger citted has established Improce-

^(*) For a brief history of local self-governing immitutions, see Chapter XXXII of "INDIA 1957

ment Trusts and Town Planning bodies to improve the existing conditions of cities and to regulate their future expansion. The passing of the Slum Areas (Improvement and Clearance) Act, 1956, by Parliament and its recent extension to Delhi have been significant steps in this direction.

District Boards

The principal function of a district board is to provide for primary and secondary education, to construct and maintain roads other than high-ways, and to manage public health and charitable institutions in rural areas. Like municipalities, district boards are also elected on the basis of adult franchise. They have their Presidents and Vice-Presidents who are elected by and from among the members of the board. For the day-to-day execution of their work, district boards have a permanent Secretary or Commissioner who works under the direction of the elected President. The rest of the executive staff of the board consists of engineers, health officers and inspectors, etc. The boards also function through committees.

Village Panchayats

One of the directive principles of State policy in the Constitution of India is that the State shall take steps to organise village panchayats and endow them with such powers and authority as may be necessary to enable them to function as units of self-government (Article 40). In pursuance of this directive, most of the States have enacted the requisite legislation and the network of village panchayats now covers more than half the total number of villages in the country. Under the second Plan, the number of panchayats is expected to increase to 244,564 by the end of 1960-61.

Panchayats are elected by gaon sabhas consisting of the entire adult population of the village. Elected from among the villagers, they are responsible for the provision of civic and other amenities to the residents. Medical relief, maternity and child welfare, the management of common grazing grounds, the maintenance of village roads, streets, tanks and wells and provision of sanitation, drainage, etc., are some of the other functions which are usually undertaken by them. In some places panchayats also look after primary education, the maintenance of village records and the realisation of land revenue. For building up funds they levy taxes on houses and lands, fairs and festivals, sale of goods and impose octroi duties, etc.

Besides their administrative and civic functions, panchayats also have a judicial wing called the nyaya panchayat. Elected from among the members of the village panchayat, they are competent to try minor offences under the Indian Penal Code and other special and local laws. Their powers of punishment are limited to the imposition of moderate fines. Their civil jurisdiction extends to suits of the money value of Rs. 200. The nyaya panchayat employs a simple and summary procedure for the disposal of cases. Legal practitioners are not permitted to appear before it.

Finances

The problem of adequate finance for local bodies has been one of great difficulty ever since their inception. At present, the sources of local finance are (i) taxes levied by local bodies (ii) taxes levied by local bodies but collected by the State Governments on their behalf; (iii) share in the taxes levied and collected by the State Governments; (iv) grants-in-aid given by the State Governments; and (v) revenue from non-tax sources.

The Local Finance Enquiry Committee appointed in 1949 and the Taxation Enquiry Commission appointed early in 1953 went into the ques-

tion of finance for local bodies. The Local Imance Enquiry Committee recommended that terminal taxes on goods or passengers earned by a radiways, so a part and taxes on radiway fares and fergibts listed under item 39 of the Union List should be reserved for local bodies. I further recommended the reservation of some ten or tactive other taxes such as those on lands and buddings mineral rights, entry of goods into local areas, consumption and asle of electricity, advetiments other than those published in newspapers, goods and passengers curried by road or inland waterways, whiches, animals and pets, professions and luturities and tolls and capitation tixes listed in the State List of the Seventh Schedule to the Constitution for utilisation by local bodies.

The Taxation Enquiry Commission which explored the subject equally thoroughly was of the view that a sound system of local finance can rest only on local and direct taxation. The Commission felt that the present tendency of the State Governments to encroach on the taxation powers of the local bodies should be curbed and certain taxes should be reserved for their exclusive utilisation. In the Commusion's opinion no amendment of the Constitution was necessary for this purpose. The State Governments should gradually cease encroaching upon the right of the local bodies which should be encouraged to develop the stems of taxation assigned to them The Commission was also unable to approve of the idea of local bodies This, it felt, was tansharing the taxes levied by the State Governments tamount to receiving revenue without responsibility. In the Commission's opinion grants in aid based on specific needs and subject to the maintenance of efficient standards would be more appropriate. The Commission prescribed a two-fold criteria for the devolution of powers of taxation to local bodies (i) stability of the taxes and (ii) canaciar to leve and admin-(1) stability of the taxes and (11) capacity to levy and administer the taxes equitably and adequately

The Commission also stated that Municipal Acts should not merely enable the load bodies to levy taxes, but also provide for their collection. Since the prospects of the local bodies securing capital in their own name for purposes of development like water supply, dranage, stim elegannee, etc. were not considered bright the Commission recommended financial assistance by the State Governments in the shape of loans and subsidies.

PUBLIC SERVICES

The success of a democracy with the "Welfare State" as its objective, depends largely on the ability and effectiveness of its public services to execute the economic and social policies of the Government. It is therefore, necessary to have a system of secriminent and truning which will attract the best available latent in the country to the ranks of public services. Accordingly, the Constitution provides for the establishment of a Public Service Commussion for the Union and similar bodies for the States.

UNION PUBLIC SERVICE COMMISSION

The Union Public Service Compussion is an independent statutory body constituted under Article \$15(1) of the Commution of India The Chairman and other members are appointed by the Frendent, as nearly as one tails of the members being persons who at the time of their appointment have field office for at least ten years either under the Government of India or a State Government. A member of the Commission holds office for a term of my years or until he attains the age of \$0. The Chairman or a member of the Commission can be removed only by the President on the ground of muchaniour after he has received a report from the Supreme Court to whath a reference is made for an inquiry

In order to emphasise and ensure the independence of the Commission, the Constitution debars its Chairman from further employment either under the Government of India or the Government of a State. A member, other than the Chairman of the Commission is, however, eligible for appointment as Chairman of that Commission or of a State Public Service Commission, but for no other Government employment.

The personnel of the Union Public Service Commission, as on April 1, 1958, was as follows:

Chairman Members V.S. Hejmadi

S.V. Kanungo

J. Sivashunmugam Pillai

C.V. Mahajan

J.N. Mukherjee

P.L. Verma

S.H. Zaheer

G.S. Mahajani

Functions

The functions of the Commission as prescribed in Article 320 of the Constitution are: (i) recruitment to all civil services and posts under the Union Government by written examination, by interview and by promotion and (ii) advising the Government on all matters relating to methods of recruitment, principles to be followed in making appointments to civil services and posts and making promotions and transfers from one service to another. All disciplinary matters affecting Government servants, any claim by or in respect of persons who are serving or have served under the Government of India in a civil capacity for re-imbursement of any expenses incurred by them in defending legal proceedings instituted against them in respect of their official acts and any claims for the award of compensation in respect of injuries sustained by Government servants while on duty, etc., also fall within its sphere of responsibility. It is obligatory for the Government to consult the Commission on all these matters. The President can, however, with the approval of Parliament make regulations specifying the matters in which either generally or in any particular class of cases or circumstances, it shall not be necessary for the Government to consult the Commission.

The Union Public Service Commission submits an annual report of its work to the President who causes it to be laid before each House of Parliament. If there are any cases where the Government is unable to accept the advice of the Commission, a memorandum explaining the reasons for suchnon-acceptance has to be placed before Parliament.

The standards and syllabi of competitive examinations for recruitment to the all-India and Central Services are laid down by the Commission with great care in consultation with the Ministries of the Government of India and educationists of standing. In addition to qualifying in the written test, candidates competing for these services have also to appear at a viva voce test which enables the Commission to assess their personality. The Chairman or a Member of the Commission presides over the Board which includes one more member of the Commission; the Commission is assisted at these tests by senior administrators and others of high academic standing.

With the increase in the Government's networks, particularly in common with the implementation of schemes of development under the The Year Plans, the Commusion has to make direct recruitment to quite a large number of specialised posts, which cannot be filled by promotion of persons belonging to duly constituted services. A the interview fit such posts a representative of the Ministry concerned in sizably poins the selection board and helps the Commission to assess the similarity of the candidates. In addition, it is usual to associate with the borrd a specialist or two not consistent holds practical or written tests as well. If the commission is unable to recruit unable candidates by open adventment it explores possibilities of securing suitable personnel through direct contact with experts in different fields.

A new field of recruitment to Coul Services has come into being as a result of the deco on by the Government on consultation with the Commiss on that officers of the Defence Services who have return recently of are about to return may be absorbed in earl pous for which they may be found suitable by the Commission. A special procedure for this recruitment has been adopted. This source of recruitment has proved valuable, especially for posts requiring technical personnel or organizing ability, apart from serving the object of mitigating hardsh p to Defence Service officers returning at a comparatively young age.

ALL-INDIA SERVICES

Recruiment to the two all India services (i.e. the Indian Administrative Service and the Indian Police Service) and other Contral services 'n made, as has already been mentioned, by the Union Public Service Commission, on the basis of a competitive examination supplemented by a rise sesse test. The condusions of service of persons appointed to the public services under the Union are resulted by Acts of Palaisment. The All India Services Act was passed by Parliament in October 19o1 and detailed rules and regulations under the Act have since been promufagues.

The Constitution also provides for reasonable security of service and tenure to the immbers of the services. Under Article 311, no member of a civil or an all India service under the Union or a State can be dismissed or removed by an authority subordinate to that by which he was appointed Further, before they are dismissed or reduced in rank, the delanquent of further, services are a reasonable opportunity to defend themselves. This providege as however, demed (i) to those convicted on a truminal charge, (ii) where the dismissing authority is satisfied that it is not practicable to give the offender an apportunity to defend himself, and (iii) where the

[•] Due ar, 1st an Forten Service, Ind an Aud 1 and Acronius Service, Julius D. Marchan Service Indian Railway Account Service Indian Railway Account Service Indian Control and Indian and Indian Service Indian Service Indian Service Indian Service Indian Indian Service Indian Indi

President or a Governor is satisfied that from the point of view of the security of the State, it is inexpedient to allow an opportunity for defence to the offender.

Training of Services

The two all-India Services have their own training schools: (i) the Indian Administrative Service School at Delhi and (ii) the Central Police Training College at Abu. The curriculum of the IAS Training School is designed to make the new entrants conscious of their new role as public servants in independent India. The basic training imparted to the new entrants lays particular stress on fostering correct attitudes to questions of personal and public conduct. Among the principal subjects in which the trainee must have a thorough grounding are Indian history and Constitution, elements of criminal and civil law, the theory and practice of public administration with special reference to the social, cultural and economic developments in the country and the language of the State to which he is allotted.

The course at the Police Training College, Mt. Abu, includes a period of military training besides thorough instruction in the duties and responsibilities of a police officer. A new feature of the training programme, both for the IAS and the IPS is an educational and cultural tour to Army and Police training institutions, development project areas and community project and national extension blocks.

CENTRAL SECRETARIAT SERVICE

The Central Secretariat Service (CSS) embraces all posts in the Central Secratariat of the ranks of Under Secretary, Section Officer and Assistant except those specifically excluded with the concurrence of the Ministry of Home Affairs. In addition, all posts in Attached Officers which can with advantage be manned effectively by officers of this service are also included in it. The service is organised into four Grades. Recruitment to Grade I (Under Secretary) is made entirely by selection of officers from Grade II (superintendent) on the advice of the Central Establishment Board. Recruitment to Grade II is made by promotion from among the permanent members of Grade III (Assistant Superintendent). Half the number of vacancies in Grade III are filled by direct recruitment on the results of the combined competitive examinations held for the IAS and other Central Services, and the remaining by promotion from Grade IV (Assistant). A new Selection Grade has also been created and persons appointed to this Grade are normally expected to hold posts of Deputy Secretary in the Central Secretariat and other departments of the Government.

CENTRAL ADMINISTRATIVE POOL

An Administrative Pool of 120 officers for staffing senior posts at the Centre was constituted by the Government of India in October 1957 in consultation with the State Governments. The purpose is to build up a reserve of officers with special training and experience for economic administration and for maintaining continuity of knowledge and experience in the field of general administration.

INDUSTRIAL MANAGEMENT POOL

For staffing senior managerial posts in the public enterprises functioning under the Union Ministries, the Government of India also constituted in November 1957 an Industrial Management Pool, with an initial

permanent strength of 200 officers. For the present, the Ministrus of Steel, Mines and Fuel, Transport and Communications and Commerce and leading will be practicaping in the scheeps, which will be under the administrative control of the Union of the Mines, which will be under the administrative control of the Union of the Ministral will be under the administrative control of the Union of the Polar Majura. Any other Vinnes concerned upon the property of the Polar being a Section of the Polar being a Sected by a Special Recruitment and which has received as many as 18,544 applications in response to an advertisement.

REORGANISATION OF CENTRAL SERVICES

In September 1936, the Government of India appointed an Officer of Special Duty to work with a Committee of Senior Secretaries, entirested with produced to the control of the Committee of Senior Secretaries, entirested with grant senior of the State and reporting upon the structure, organisation and conditions set, of public services, largely in the context of the growing repurements of the State in the public sector. The Officer submitted his recommendations, will also include subjects relating to the composition of the various cadres and the question of training and further education of different classes of public servants.

STATE SERVICES

To recruit personnel to their civil services, the States also have Public Service Commissions on the model of the Union Commission. Although the two all India services are organised on the basis of State cadres and a majority of the principal administrative posts both at the State and dustret headquarters is manued by members of these, the States have their own civil services to administer the subjects falling within the sphere of their autonomy

The executive branch of the State Civil Service is the most important among the public services of the State. Most of the sub-divinousal appointments are held by the members of this service. The two other important branches are the State Public and Judicial Services. Recruitment to all these services is made on the basis of competitive examinations conducted by the respective State Public Service Commissions Apart from these, there are a good number of other State cadres to man the technical branches of governmental administration like public works, irrigation, forests, agriculture, public health, education, veterinary, regulation, cooperation, commining and national extension services and so on.

Essudes enjoying the usual safeguards provided for civil services in the Constitution, the members of these services are governed by detailed rules and regulations made by their enspective States. Almost all the States have their own arrangements for giving the requisite training to fresh cutrains. The States have also taken measures to reorganize the public services with a view to meeting the new demands of planned development.

CHAPTER VI

JUDICIARY

The adoption of a federal Constitution by India in 1950 did not disturb the continuity of existing laws and the unified structure of courts evolved through a century of highly centralised administration under the British. Article 372 provided that all laws which were in force immediately before the commencement of the Constitution, with the exception of the Government of India Act, 1935, and the Indian Independence Act, 1947, would continue to be in force until altered, repealed or amended by a competent legislature or authority. In order to bring the provisions of any existing law into accord with those of the Constitution, the President of India was empowered to order the necessary adaptations and modifications in such law. Article 375 provided that "all courts of civil, criminal and revenue jurisdiction, all authorities and all officers, judicial, executive and ministerial, throughout the territory of India, shall continue to exercise their respective functions," subject to the provisions of the Constitution. The future unity of the judicial structure was further preserved by placing such basic branches of law as criminal law and procedure, civil procedure, marriage and divorce, adoptions, wills, intestacy and succession, transfer of property, contracts, evidence, etc., on the Concurrent List.

SUPREME COURT OF INDIA

The Supreme Court of India stands at the apex of a single, unified judicial system for the whole country.* The Constitution has invested it with wide appellate powers over all other courts and tribunals; and its position as the highest judicial body in the country has been further strengthened by making High Courts, including the appointment and removal of their judges, a Union subject. The real importance of the Supreme Court, however, emerges from its unique position as the guardian and interpreter of the Constitution. In this capacity, the Court has not only to hold the scales even between the Union and the States, but also to act as the custodian of the liberties of the citizen.

The membership of the Court, as on March 1, 1958, was as follows:

Chief Justice:

S. R. Das

- 1. N.H. Bhagwati
- B. Jagannadhadas **
- 3. T.L. Venkatarama Aiyar
- B. P. Sinha
- 5. J. Imam

On deputation as Chairman, Central Pay Commission.

For constitutional provisions governing the composition of the Court and appointment of judges etc., see Chapter III.

The following are the Law Officers of the Union Government;

Attorner General of India 31 C. Setalwad Soluctor-General of India C.K. Daphtary

Powers of Interpretation

As regards the precise powers of the Supreme Court to interpret the Constitut on, the Court has defined the position in a number of its own judgments given during the last six years. It has recognised that the Indian Consultation has followed a ria media between the American system of judicial supremacy and the English principle of parliamentary supremacy The Judiciary in India cannot after or amend the law under the timer of "lib-ral interpretation" It has no powers to review legislative policy or to nullify the Act of the legulature with reference to general principles of jurisprulence To put it in the words of the Court itself 'Where the fundamental law has not limited, either in terms or by necessary implication, the general powers conferred upon the legulature, we carnot declare a limitation under the not on of having discovered something in the spirit of the Constitution which is not even mentioned in the instrument. It is difficult, upon any general principles, to limit the omnipotence of the sovereign legislative power by jud cial interposition, except so far as the express words of a written Constitution give that authority ".

Subject to these Levistators, it is the daity of the Suptrime Court to see that the lase in the country are fairly administered and no ottain it de-ined patice by any court or tribunal. To enable it to discharge this duty effectively, the Suptrime Court has been indowed with necessary powers by the Constitution. Article 140 provides that "the fair declared by the Suptrime Court half be binding on all courts within the territory of I reduce." Further, in exercise of its juridiction, the Suptrime Court is authorised to past sich decree or order as in necessary for doing complete justice in any case or matter pending before it, and any decree or order so passed is enforceable throughout the territory of India. All real and judical authorities in the country are specifically enjoined by the Constitution to act in and of the Suptrime Court.

Turisduction

The Supreme Court has both oragreal and appellate jurnsletton. Its exclusive jurnsletton extends to all disputes between the Union and one or more States or between two or more States inter it. Article 22 of the Centitation gives an extensive original jurnsletton to the Supreme Court in regard to the enforcement of fundamental rights guaranteed under Part III of the Constitution. It is empowered to issue directions or orders in the salesse of writs of heleast employ, madessup, prohibition, que termede and justice of an of there, the enforce these rights. Any person who companies of the order these rights. Any person who companies of the order the enforce them that. Any person who companies of the order than the control of the supreme Court, whose post fundamental rights is at history to more the Supreme Court, whose post fundamental rights in the control only to state in the confirmed only to state the confirmed

The appellate jurisdiction of the Supreme Court extends to all cases from the High Courts involving questions of law concerning the interpretation of the Constitution. In regard to appeals in rivil and criminal case of a special nature, the jurisdiction of the Supreme Court corresponds to

A.K. Gopalag w the State of Mairas, 19.0

that exercised by the Privy Council before the commencement of the Indian Independence Act, 1947. Besides a very wide appellate jurisdiction over all courts in India, the Supreme Court has a special advisory jurisdiction in matters which may specifically be referred to it by the President.

Under the 1935 Act, an appeal on a constitutional question could be taken to the Federal Court only if the High Court which decided the case certified that it involved a substantial question of law relating to the interpretation of the Constitution. The new Constitution empowers the Supreme Court to admit such an appeal, by special leave, even if the High Court refuses a certificate. In cases of ordinary civil appeals, the pecuniary value of the subject matter in dispute should be Rs. 20,000 and above instead of the minimum of Rs. 10,000 formerly fixed for appeals to the Privy Council.

In criminal cases, the right to appeal to the Supreme Court has been provided for, "if the High Court (a) has on appeal reversed an order of acquittal of an accused person and sentenced him to death; (b) has withdrawn for trial before itself any case from any court subordinate to its authority and has in such trial convicted the accused person and sentenced him to death; or (c) certifies that the case is a fit one for appeal to the Supreme Court." Parliament is authorised to confer on the Supreme Court any further powers to hear and entertain appeals from any judgment, final order or sentence in a criminal proceeding of a High Court in Indian territory.

Working of the Court

The Supreme Court is a court of record and has all the powers of such a court, including the power to punish for contempt of itself. It has the power to frame its own rules of procedure. In the exercise of these powers, it made the Supreme Court Rules, 1950, which as amended from time to time, govern the day-to-day working of the Court. Under Article 145 of the Constitution, the Supreme Court can fix the minimum number of judges who are to sit for any purpose and may provide for the powers of single judges and Division Courts, subject to the condition that all cases involving a substantial question of law as to the interpretation of the Constitution are heard by a Bench consisting of not less than five judges. Judgments of the Supreme Court, which must always be delivered in open Court, are arrived at with the concurrence of the majority of the judges present at the hearing. A judge who does not agree with the majority may give a dissenting judgment.

The cases in the Supreme Court can be filed by the parties personally or through advocates, specially registered as "Advocates on Record". If it is an appeal case, copies of the judgments of lower courts along with all relevant evidence, oral as well as documentary, have to be printed before the case is filed.

The Roll of Advocates of the Supreme Court is kept in two parts, the first containing the names of senior advocates and the second those of other advocates. Under the existing system, all advocates in the Court are instructed by agents on its rolls, and no senior is permitted to appear without a junior. At the end of 1957, some 2,263 lawyers were registered with the Supreme Court Bar.

SUPREME COURT DECISIONS

During the year 1957, the Supreme Court disposed of 228 petitions under Article 32 of the Constitution for the enforcement of Fundamental

Rights and 136 appeals involving questions regarding the interpretation of the provisions of the Constitution. The following are the details of some of the cases so decided

Prize Competitions

In this case, * the firm which was conducting a treasmorth competition was required to obtain a license for the purpose under the Bombiry Lottenes and Prize Computition Control and Tox Act. The pritioners contended inter also that the competition which had an element of skill was not a gamble and that the impagined Act contractened their findamental rights under Article 19[1)[g) of the Constitution to carry on their trade or business and also offended agamst Article 30] of the Constitution insaminch as it imposed retirections on trade, commerce and intercourse between States and was not saved by Article 30(4b) of the Constitution.

The Supreme Court held that the prize competution in question was a gamble as it contained a chance element. It obsers did not the ancest seers and law-queers of linds looked upon gambling as a permicious vice and deprecated its practice and that the air the England, Scotland, USA and Australia. Therefore such an activity, although it comprised the external forms and the formatices of trade, could not fall within the meaning of the words 'trade,' 'bunners', 'remineret' and 'intercourse' occurring in Article 19(1)(g) or Article 30(1), and the real purpose of the such Article could not have been to guarantee or declare the free-dom of gambling. The Supreme Court reversed the decision of the Bombay High Court and held that such gambling actuates were not protected by either Article 19(1)(g) or Article 301 of the Constitution and that the impugged Act was constitutional and valid.

Presidential Election

Under the Presidential and Vice-Presidential Election Act, 1952, the Election Commission issued a gazette notification appointing a time schedule for the filing of nominations, for scrutiny of nominations, for withdrawal of candidatures, for polling and counting of votes and for declaration of the result of the Presidential Election. In this case, ** the petitioner, an 'intending candidate' for the said election, submitted that the time was too short and that he was prevented from filing the nomination paper for want of time He, therefore, moved the Supreme Court under Article 71(1) of the Constitution to inquire into and decide what was described as a 'grave doubt' in connection with the election of the President of India and to direct the Election Commission not to proceed with the polling for the said election Since Article 71(1) confers jurisdiction and power on the Supreme Court to inquire into and decide 'all doubts and disputes arising out of or in connection with the election of a President or Vice-President", the Court was called upon to decide upon the meaning of the word 'elec-tion' as used in the said Article. The Court dismissed the petition and held that the word 'election' occurring in Article 71 means the entire election process culminating in a candidate being declared elected and that doubts and disputes arising out of or in connection with any of the stages of such completed election only can be inquired into and decided upon by the Supreme Court, after the completion of the entire process compendiously called the election.

^{*} The State of Bombay v R M D Chamarbaugwala & Others.

* Dr Narayan Bhaskar k-hare v Election Commission of India.

Service Matters

Three important cases came up for hearing before the Court under this head:

- (1) Article 320(3)(c) of the Constitution provides that the Union Public Service Commission or the State Public Service Commission, as the case may be, shall be consulted in all disciplinary matters affecting a person serving under the Government of India or the Government of the State. the first case,* the respondent who was a servant of a State Government contended that his reduction in rank from a senior to a junior post was wrong since the provisions of Article 320(3)(c) were not complied with in his case. The Court had to consider whether the word 'shall' in the said Article was to be taken in a mandatory sense and as to the effect of non-compliance with the provisions of the said Article on the order made. The Supreme Court held that the non-compliance with the provisions of the said Article will not render the proceedings invalid and that the absence of consultation or any irregularity in consultation will not afford a public servant a cause of action in a Court of Law or entitle him to any relief by way of a writ under the special powers of the High Court or Supreme Court under Articles 226 and 32 of the Constitution respectively.
- (2) One Parshotam Lal Dhingra** who was under the service of the Union of India was reduced from an officiating higher rank to his substantive lower rank. As Article 311(2) of the Constitution provides that the punishments of dismissal, removal and reduction in rank cannot be meted out to a Government servant in civil service without giving him a reasonable opportunity to defend himself, it was contended by him that his reduction which was effected without such reasonable opportunity being afforded to him was illegal. The Supreme Court held that the principle embodied in Article 310(1) that Government servants hold office during the pleasure of the President or the Governor, as the case may be, is qualified by the provisions of Article 311 which give protection to Government servants. But if dismissal, removal or reduction in rank of a servant is sought to be brought about otherwise than by way of punishment, then the Government servant cannot claim the protection of Article 311(2). If the Government has by contract, express or implied, or under the rules the right to terminate the employemnt at any time, then such termination in the manner provided by the contract or the rules is, prima facie and per se, not a punishment and does not attract the provisions of Article 311. real test whether a reduction is by way of punishment is to find out if the order of reduction visits the servant with any penal consequences. If a servant is appointed to a higher post on probation or on an officiating basis the implied terms of his appointment to that higher post are that his service may be terminated on reasonable notice and the reduction of such servant to his substantive post will not attract the provision of Article 311(2), as the servant in such a case had no vested right to hold the post of the higher rank in which he was allowed to officiate. Even if a supposed misdeed or misconduct of the Government servant is the motive which actuated the Government's action, if the Government was exercising its right under the contract, then Article 311 will not be attracted. What is necessary to find out is not what induced the Government to act but what right it was exercising. The appeal of Parshottam Lal Dhingra was dismissed by a majority of 4 to 1 as it was not considered to be a case of reduction by way of punishment.

^{*} State of U. P. v. Manbodhan Lal Srivastava.

^{**} Parshottam Lal Dhingra v. Union of India.

(3) Article 311(2) of the Constitution provides that no member of a Civil Service of the Union or of a State shall be dismissed, removed or reduced in rank unless he has been given a reasonable opportunity of showing cause against the action proposed to be taken against him. In the third case* before it, the Supreme Court has held that the term 'reasonable opportunity' envisaged by the above menuoned provision includes the following

- "(i) An opportunity to deny his guilt and establish his innocence, which he can only do if he is told what the charges levelled against him are and the allegations on which such charges are based .
- (a) an opportunity to defend himself by cross-examining the witnesses produced against him and by examining himself or any other witnesses in support of his deferce, and finally
- (iii) an opportunity to make his representation as to why the proposed punishment should not be inflicted on him, which he can only do if the competent authority, after the enquiry is over and after applying his mind to the gravity or otherwise of the charges proved against the Government servant, tentatively proposes to inflict one of the three nunishments and communicates the same to the Government servant"

LAW COMMISSION

In response to suggestions made from time to time in Parliament and outside, the Government of India announced in the Lok Sabha on August 5, 1953, the appointment of a Law Commission with the following personnel:

Chairman MC Setalvad

Members M.C. Chigla, K.N. Wanchoo, G.N. Das, P. Satyanarayana Rao, N.C. Sen Gupta, V.K.T. Chari,

D Narasa Raju, S M Sikri, G S Pathak, and G N Joshi.

The terms of reference to the Commission required it (i) to review the system of judicial administration in all its aspects, and suggest ways and means of improving it and making it speedy and less expensive, and (ii) to examine the Central Acts of general application and importance, and re-commend lines on which these should be amended, reused, consolidated or otherwise brought up to date

After its maugural meeting on September 16, 1955, the Commission commenced working in two Sections One Section took up the problem of the reform of judicial administration. It first collected statistical and other details relating to the judicial set-up in the various States and then prepared and circulated a comprehensive questionnaire to the High Courts, Bar Associations, individual lawyers, compressal organisations and public men interested in judicial riform. The Courts was the base for local enquired and arrived at tentative conclusions which formed the base for local enquired. and direct at tensative consequences when homes the basis of the High Courts for examining winesses. The report of the Commission on the Reform of Judicial Administration is expected to be available before June 1958.

The other Section of the Law Commission is mainly concerned with the revision of Statute Law By the end of December 1957, the Commission

Khem Chand v the Union of India and Others.

submitted seven reports to the Government on: (i) the liability of the State in tort; (ii) parliamentary legislation relating to sales-tax; (iii) Limitation Act, 1908; (iv) the proposal that High Courts should sit in Benches at different places in a State; (v) British Statutes applicable to India; (vi) Registration Act, 1908; and (vii) Partnership Act, 1932.

HIGH COURTS

The judicial administration of every State is headed by a High Court.* As shown in the table below, there are at present fourteen High Courts in the country:

TABLE 27

Serial No.	Name	Year of establishment	Territorial jurisdiction	Seat of the Court	
1	Allahabad	1919	Uttar Pradesh	Allahabad (Bench at Lucknow)	
2	Andhra Pradesh	1954	Andhra Pradesh	Hyderabad	
. 3	Assam	1948	Assam, Manipur and Tripura	Gauhati	
4	Bombay	1861	Bombay	Bombay (Bench at Nagpur)	
5	Calcutta	1861	West Bengal, Andaman and Nicobar Islands	Calcutta	
6	Jammu & Kashmir	1928	Jammu & Kashmir	Srinagar	
7	Kerala	1956	Kerala, Laccadive, Minicoy and Amin- divi Islands	Ernakulam	
8	Madhya Pradesh	1956	Madhya Pradesh	Jabalpur	
9	Madras	1861	Madras	. Madras	
, 10	Mysore	1884	Mysore	Bangalore	
. 11	Orissa '	1948	Orissa	Cuttack	
12	Patna	1916	Bihar	Patna	
13	Punjab	1947	Punjab, Himachal Pradesh and Delhi	Chandigarh (Bench at Delhi)	
14	Rajasthan	1949	Rajasthan	Jodhpur (Bench at Jaipur)	

For three-quarters of a century, till the establishment of the Federal Court of India in 1937, some of these courts were virtually the highest courts in the country. The Judicial Committee of the Privy Council, which exercised an appellate jurisdiction in certain categories of cases, had no administrative control over the High Courts. Under the new Constitution, however, the power of the High Courts has been affected to the extent that the Supreme Court, with a slightly wider appellate jurisdiction, has now been established within the country. The Constitution does not, however,

^{*} For the personnel of High Courts, see Chapter XXIX.

vest the Supreme Court with any administrative control over the High Courts, although some administrative link has been provided by Article 217 which requires the President to consult the Chief Justice of India while appending judges to the High Courts

Ordinarily, a High Court is identified with the State where it exeresses its jurisdiction, but the State Legislat ure livis no power to alter the constitution or the organization of the High Court. This power verts in the Union Parliament. Similarly, the power to remove High Court judges also vests in Parliament. The special procedure to be followed in this matter is the same as prescribed for the removal of Supreme Court judges (A) vested [24]. Clause 4 and 5]

Powers and Functions

No substantial change in the powers and dutter of the High Courts has been made by the Coordulation. These are more or less the same as those prescribed in the Royal Letter Patent and the subsequent enactions the control of the con

The High Courts have powers of superintendence over all courts and tribunals within their jurisdiction (Article 225). They can call for returns from such courts make and issue general rules and presentle forms to regulate their practices and proceedings and determine the manner and form in which books, entires and accounts shall be keep.

Under Article 226 e.er, High Court has the power to issue to any person or authority, including any Government within its jurisdiction, directions orders or writs, including writs which are in the nature of habbar compar, unadomar, prohibitor, que unranks and aethoran, or any of them for the enforcement of any of the rights conferred by Part III of the Constitution and for any other purpose.

SUBORDINATE COURTS

The district judges, who prende over the principal evil courts of original jurisdiction are appointed by the Governor of a State in consultation with the High Court concerned. Appointments of persons, other than district judges, to the judicial service of a State as dos made by the Governor in consultation with the State Public Service doministion and the High Court, and the power of posting promotion after grating leave to persons belonging to the judicial service and holding posts inferior to those of district judges visits in the High Court

Structure and Functions

Subject to minor local variations, the structure and functions of the subord nate or mofusal courts are more or less uniform throughout the country Each State is divided into a number of districts, each under the juris-

diction of the principal civil court presided over by a district judge. Subordinate to him is a hierarchy of different grades of civil judicial authorities.

Besides hearing suits, properly so-called, the civil courts exercise jurisdiction over several other matters, such as guardianship, marriage and divorce, testamentary and intestate representation and admiralty jurisdiction. In another category of cases, such as those pertaining to the Land Acquisition Act and the Forest Act, questions affecting civil rights are, in the first instance, dealt with by administrative officers or tribunals, but their decisions are subject to the appellate authority of the appropriate civil courts. There is a third group of cases affecting civil rights which are tried by administrative or quasi-judicial tribunals, or other statutory bodies. In such cases, there is no express provision for appeal to civil courts and the parties frequently invoke the intervention of the High Court for writs.

Griminal Justice

The Code of Criminal Procedure, as amended and revised from time to time, regulates the administration of criminal justice and the constitution of criminal courts. The officer presiding over the district court in civil suits is the judge of the Sessions Division for criminal cases in that district. The Sessions Judge is sometimes assisted by additional or assistant sessions judges. These officers are subordinate only to the High Court and are comparatively independent of the executive. They, however, deal only with the more serious crimes and take cognisance of cases only when they have been committed to them by a magistrate after a preliminary enquiry.

The exercise of preventive jurisdiction in certain matters and the trial of crimes listed as not triable by a Sessions Court are entrusted to magistrates of various classes under the general supervision and control of the District Magistrate. In his capacity as the District Collector, the latter is subordinate to the executive administration of the State. It is in this context that the question of the separation of the judiciary from the executive becomes relevant. A redeeming feature of the situation, however, is that in respect of nearly all judicial acts, the magistracy, including the District Magistrate, is subject to the control of the High Court. Some categories of cases involving minor crimes are tried by honorary magistrates, generally retired officers or other responsible citizens, and by benches of magistrates.

Separation of Judiciary from Executive

In pursuance of the directive principle regarding the separation of the judiciary from the executive (Article 50), the States of Assam, Bombay, Madhya Pradesh and Madras have implemented the reform fully. The States of Andhra Pradesh, Bihar, Punjab, Rajasthan, Kerala and Uttar Pradesh have carried it out partially. The reform, as it has come into operation in the State of Madras, has been designed within the framework of the Criminal Procedure Code and has been implemented by an executive order. Broadly speaking, it divides all the powers and functions of a magistrate under two heads (i) judicial, and (ii) non-judicial. The officers discharging judicial functions have been placed under the High Court. Another important feature of the reform is that, for purely judicial work, only those qualified in law are eligible to become magistrates. Similar schemes, with modifications to suit local conditions, have been introduced in other States also.

CHAPTER VII

DEFENCE

The supreme command of the Armed Forces is select in the President of India, the responsibility in their administration and operational control resting with the Months of Defence and the three Services Headquarters. The main function that the Months of the maintain the desire services are properly co-ordinated, (ii) decusors on poly matters are of stand from the Government, transmitted to the three Services are properly co-ordinated, (iv) decusors on poly matters are of stand from the Government, transmitted to the three Services Headquarters and umpl-mented, and (iii) necessary financial sanction for defence expenditure is obtained from Parlament.

ORGANISATION

Although the over'll control of the three Services vests in the Ministry of Defence they normally function directly under their respective Chiefs of Staff The occupants of these of Foca as on March 1, 1955, were

Chief of the Army Stoff General K.S. Thumayya Chief of the Arms Stoff Vice Admiral S.H. Carlillo Chief of the Art Stoff Air Marshal S. Mukerjee

Arrey

The Army is organised into three commands—Southern Lastern and Western—each under a General Officer Commanding in Chief of the rank of Lieutenant-General. Each of the Commands is further divided into Areas under a General Officer Commanding of the rank of Vajor General. The Areas are in turn sub-dunded into Sub-Areas, each under a Brigadine.

The Army Headquarters, located in Della, functions under the Clief of the Army Staff Its six rain Brancher, eith under a Major General, are General Staff Branch, Adjutant-General's Branch, Quartermatter-General's Branch, Niste General of Ordnance's Branch, Engineer in-Chief's Branch and Military Secretary's Branch

The General Staff Branch consists of the Directorates of Military Operations Military Intelligence, Military Training, Staff Duties, Weynons and Equipment, Armoured Corps, Artillery, Infantry, Signals and Territorial Anny

The Adjutant General's Branch is divided into three Directorates, namely, those of Organisation, Personal Services and Judge Advocate-General The Medical Directorate, though 'epiarate under a Major-General, is technically placed under this Branch

The Quartermatter General has two main Directorates one to organise all rial set and air movements of personnel and stores within and outside the country and the second to provide accommodation for the personnel. The Directorates of Supply and Transport and of Remounts, Veternary and Farms are also under the overall supervision of the Quartermasters.

Rear Adm ral R D Exters w'll take over as Chief of the Naval Staff in April 1958, with the rank of Vice Admiral.

The two main departments under the Master-General of the Ordnance are the Directorate of Ordnance Services and the Directorate of Electrical and Mechanical Engineers. The Ordnance Corps is responsible for procuring, stocking and supplying all kinds of defence equipment required for the troops. The Electrical and Mechanical Engineers' Directorate is charged with the responsibility for inspection, repair and maintenance of all types of mechanical and electrical equipment used by the Army.

The Engineer-in-Chief is the head of the Corps of Engineers and of the Military Engineering Service. He advises the Chiefs of Staff of the three Services on all engineering works, including their planning and construction.

The Military Secretary maintains personal records of officers and is responsible for their posting and transfers, promotions and retirement as well as for the granting of honorary ranks.

Navy

At the Naval Headquarters in Delhi, the Chief of the Naval Staff is assisted by four Principal Staff Officers, namely, the Deputy Chief of the Naval Staff, the Chief of Personnel, the Chief of Material and the Chief of Naval Aviation. He functions through four Operational and Administrative Commands, one afloat and three ashore. These are: (i) Flag Officer Commanding, Indian Fleet, (ii) Commodore-in-Charge, Bombay, (iii) Commodore-in-Charge, Cochin, and (iv) Naval Officer-in-Charge, Visakhapatnam.

The Indian Fleet today comprises the new flagship INS Mysore—the 8,700 ton Colony-class cruiser, formerly known as HMS Nigeria and acquired by the Navy recently, INS Delhi—the 7,030 ton Leander-class cruiser, and a number of destroyers, frigates, mine-sweepers and other ships.

The Naval Aviation Wing, started in 1953 with a squadron of 10 Sealand amphibious aircraft, acquired some Firefly target-towing aircraft in 1955. An aircraft carrier HMS Hercules was also acquired in 1957 and is now being refitted in the U.K. The Hydrographic Office, set up for the Marine Survey of India, has started its main work of producing and printing charts for the Survey.

Air Force

The Chief of the Air Staff is assisted by three Principal Staff Officers controlling the three main Branches of Air Headquarters, viz., the Deputy Chief of the Air Staff, the Air Officer-in-Charge Personnel and Organisation, and the Air Officer-in-Charge Technical and Equipment Services. Each of these three branches controls a group of Directorates.

Under Air Headquarters come three major Air Force formations, namely, Operational, Training and Maintenance Commands, located at Palam, Bangalore and Kanpur respectively.

In pursuance of the Reserve and Auxiliary Air Forces Act, passed by Parliament in 1952, five Auxiliary Air Force Squadrons, namely, No. 51 (Delhi), No. 52 (Bombay), No. 53 (Madras), No. 54 (U.P.) and No. 55 (Bengal) have been formed. The last two squadrons were raised during 1957.

TRAINING INSTITUTIONS

The Army and the Air Force are now self sufficient in the matter of training while the Navy is well on the way to achieving this objective. The principal institutions imputing training to officer cadets of all the three Services are described below.

National D ferce leademy

The National Defence Academy moved from Dehra Dun to Khadakvasla near Poona in December 1954. The first course at Khadak-vasla began on January 10 1955. The Academy is ultimately to provide accommodation for 1500 cadets.

Admissions to the Academy are made on the basis of a qualifying hammal witten examination conducted by the Union Public Service Commission at different centres in the country, followed by an interview before a Services Selection Board Boys who his persued the Matriculation or use quisilent examination, and we between 15 and 174 years of age on the first day of the month on which the course starts in the Academy are eligible for admission. Cadets must be unmarried and cannot marry during the persued of their stay at the Academy.

All the expenses of the cadets while at the Academy, except the pocket expenses of Rs. 30 per month, are borne by the Government. Where the monthly income of the parents is less than Rs. 300, even this expense is borne by the Covernment.

The course at Khadakvasla is of three years' duration, after which the cades receive specialised training at their respective Service colleges or establishments

Defence Services Strff College

Another important institution where training is imparted to serving officers on an inter Service haus is the Defence Service Staff College at Wellington in South India I I has been designed to train officers up to the standard required for second-grade staff appointments and also to equip them for command and higher staff appointments. About 100 officers of all the three Services are trained every year, the duration of the course being 10 months.

Armed Forces Medical College

Established in 1948, the Armed Forces Medical College at Poona, breades imparting training to newly commissioned medical officers, runs refresher courses for medical officers of the Armed Forces to keep them upto-date in their profession. Specialist courses are run in hygiene, x ray, blood transfission and pathology.

Army Colleges and Schools

The Mil tary College at Dehra Dun at the premier centre for training future officers of the Army. The principal source of entry into the College is the hational Defence Academy. Cadets passing out of the Academy recover, one-years a training at Dehra Dun before being commissioned The other categories of entrains in higher are groups are those who have qualified in the competity is entrance examination of the Union Public Public Commission and the Services Selection Board for two years' training graduate cades of the NGC for a year and a half, other graduates selection.

ted for specialised commissions in the technical arms for a year and serving Regular or Territorial Army personnel—JCOs and NCOs—for two years.

At the Military College, cadets undergo strenuous training designed mostly to equip them with the basic military knowledge necessary for all Army officers whatever their corps, arm or service. The programme of training at the College aims at moulding young cadets into model soldiers by an all-round development of their personality.

The Army runs a number of schools for advanced training in the different arms and trades for other ranks as well as for officers. The Armoured Corps Centre and School at Ahmednagar undertakes the training of regimental instructors, squadron commanders and regimental commanders of the Corps. The College of Military Engineering at Kirkee imparts training to officers and other ranks in all aspects of military engineering. Longer courses of over two years' duration are also conducted there to train officers up to the degree standard.

The School of Signals at Mhow imparts basic and advanced technical training in tele-communication and signal tactics. The School of Artillery at Deolali provides training in field, anti-tank, and anti-aircraft artillery, while its branch at Bombay provides training in coastal artillery. The Infantry School at Mhow conducts courses in the tactical and administrative handling of units and sub-units for senior officers and junior commanders of all corps in the Army. The Ordnance School at Jabalpur imparts specialised corps training in the identification, handling, storage, care, custody and preservation of all items, including ammunition and explosives, stocked by ordnance depots.

The other Army training centres and schools are the Service Corps School, Bareilly; the Remounts Veterinary and Farms Centre and School, Meerut; the School of Physical Training, Poona; the Army and Air Transport Support School, Agra; the School of Mechanical Transport, Faizabad; the Corps of Military Police Centre and School, Faizabad; the Education Centre and School, Pachmarhi; the Military School of Music, Pachmarhi; and the Electrical and Mechanical Engineering School, Trimulgherry.

Naval Training Centres

Except for specialised technical courses, training of all officers and men of the Navy is undertaken at the main Naval training centres located at Cochin, Bombay and Visakhapatnam. Advanced courses in subjects like gunnery, torpedo and anti-submarine and communications have already been started in the country, and the Service hopes to achieve complete self-sufficiency in training in the next two years or so.

The principal training centres of the Navy are INS Venduruthy and the Naval Air Station Garuda, both situated at Cochin. The Venduruthy is the premier training establishment, comprising technical schools for gunnery, navigation and torpedo and anti-submarine. The Garuda has the training aircraft of the Navy and some technical schools.

At INS Shivaji, situated at Lonavla (Bombay State), mechanical engineers and artificiers are trained. Recently, a new Engineering College was started there to train junior engineer and electrical officers of the Service.

INS Valsura, the Electrical School of the Navy at Jamnagar, trains officers and men of the Electrical Branch of the Service. With most of the

ships now acquired being fitted with complicated electronic equipment, training at this School has been geared to the present requirements of the Service

New recruits coming into the Navy are trained at IAS Cheminat Visikhapatnam and on completion of their course, become rating O'licers and men of the Supply and Secretariat Branch are trained at IAS Homits in Bombay IAS histor is the juntor officers' training ship Sea training is imparted by the Fleet

Air Force Colleges and Schools

The base from trausing of a year's duration for puni pilots in imparted at the Air Force Flynn College, Jodhpur, Advanced Jose and conversion trausing on jets and multi-engined asteroit are conducted at Hiderabad Engli associates also have their minist trausing at Jodhpur and advanced trausing at Hiderabad before graduating as full fledged

Flying instructors are trained in a separate school at Tambaram The Air Force Administrative College at Coimbatore trains officers in various ground duties, and medical officers receive training at the School of Aviation Medicine recently established at Bangalore

The Ar Force Technical College at Jalahalli trains enqineering officers in technical engineering, signals, and armanient and electrical engineering. The school at Jalahalli trains airmen in accounting, equipment, general office duties, medical assistance, telephone operating, drill instruction, police duties, music, motor driving and catering. Another school, also located at Jalahalli, trains airmen in higher signal trade

DEFENCE PRODUCTION

Among the measures taken in recent years to attain self sufficiency in delence equipment are: (i) the opening of the Machine Tool Prototype Factory at Ambarnath, (ii) the taking over by the Government of the Jerrycan Factory at Wadala and the Barrel Factory at Wadala and the Barrel Factory at Husaval for the production of ordnance stores, (iii) the expansion of the existing Naval Dockyard at Bombay to enable it to meet the requirements of the Indian Fleet, (iv) the production of HT-2 traner averaft by the Hindustra Aureraft Lamsted, Bangalore, and (v) the unplementation of schemes for the production of electronic, ratio and radar equipment at the Bharat Electronics Ltd., Bangalore, and

Plans are also under way to build warships in India. The Hindustan Shippard at Visakhapatnam has been entrasted with the construction of a survey vessel in the first instance

Following the recommendations of the Ordinance Factories Reorganisation Committee, a Defence Production Board has been constituted. Its functions are (i) to deal with all matters concerning production in ordinance factories, (ii) to co-ordinate research, development and designing activities in the three Syrices and the ordinance factories, and (iii) to ensure effective liasion between the ordinance factories and the corresponding civilian industry in the country.

DEFENCE SCIENCE

A Research and Development Department was brought into existence on January 1, 1958, bringing together under the Scientific Adviser to the Minister of Defence, the Defence Science Organization (consisting of scient-

tists) and the Technical Development Organisation (manned for the greater part by Service officers). The integration of scientific and military thinking in defence matters which this Department is intended to bring about, will ensure an increase in the tempo and scope of scientific research in defence.

The Defence Science Organisation, established in 1948, is engaged in research on different aspects of defence science, viz., ballistics, operational research, communications, explosives, training methods and military physiology.

The Institute of Armament Studies established at Kirkee in 1952, provides basic training to officers in science and technology as applied to armaments. It maintains contacts with the universities and other civilian research institutions and promotes, in all possible ways, the dissemination of basic knowledge on defence science. It is also responsible for studying and carrying out research on the performances of weapons and equipment.

SPECIAL ASSIGNMENTS

In addition to their normal duty of defending the country, the Armed Forces, from time to time, perform certain emergency duties, such as (i) the rendering of help in areas affected by natural calamities like floods, earthquakes and famines. (ii) the carrying out of photographic surveys which are of use in the planning and development of hydro-electric and other schemes and (iii) the reclamation of waste land. In recent years, India's Defence Forces have also assisted the United Nations in implementing the Korean Truce Agreements and the recommendations of the International Commissions for Supervision and Control in Viet-Nam, Laos and Cambodia set up under the Cease-fire Agreement concluded at Geneva on July 20, 1954. Several officers and other ranks, including some from the Navy and the Air Force, were deputed in September 1954 for the second assignment which still continues. The Army embarked on yet another mission of peace when on November 16, 1956, an Indian contingent was sent to Egypt to join the United Nations Emergency Force. In a recent mercy mission to the flood-affected areas of Ceylon, the Air Force dropped over half a million pounds of supplies and medical aids.

DEFENCE FINANCE

The following table shows the defence expenditure during the last eight years on revenue and capital accounts:—

TABLE 28
DEFENCE EXPENDITURE*

(In crotes of supees)

Year		Revenue Account	Capital Account	Total
1951-52 (Acruals)		186.28	10.17	196.45
1952-53		192.38	5.96	198.34
1953-54	••	198.06	10.16	203.22
1954-55 ,,		201.34	8.47	209.81
1955-56	••	188.37	17.59	205.96
1956-57	••	192.15	19.70	211.85
1957-58 (Revised Estimates)		266.05	24.93	290.98
1958-59 (Budget Estimates)		278.14	27.00	305.14

For a comparative statement of Defence expenditure to total national and Central expenditure, see Chapter XIX.

TERRITORIAL ARMY

The Territorial Army which was rused in October 1919, is designed to give the youth of the country an opportunity of receiving military transitioning in it ert space time and to see Rechardity or times of emergency by providing units to supplement the first Rechardity or times of emergency by possibility for internal declaration of the Territorial Army does not invoke the transition of t

Any able bodied national of India between the ages of 18 and 35 (with relaxation in the upper age limit for entry into certain technical units) and possessing the requisite qualifications is eligible to join the Territorial Army as an officer or other rank

The Territorial Army has two types of units—provincial and urban Recruit train or, in provincial units lasts 30 days. In the urban units training in given for 32 days in the exemps after working hours at week ends or on hol days. Every member of the Territorial Army 100 has undergone recruit training is lable to undergo annul training for two calendar months in the provincial units and for a period varying from aminimum of 120 hours to a maximum of 210 hours to the urban puls.

While under training or otherwise employed, officers and other ranks of the Terutorial Army are entuited practically to the same pay and allowancer rations and medical fucilities as are admissible to the corresponding ranks of the Regular Army. They are also entitled to terminal gratinity and dasability and Emily persion under certain conditions.

A 1 mited number of appointments on the permanent staff with a tenure of three to five years is offered to all ranks of the Territorial Army provided they possess the necessary experence and qualifications Territorial Army personnel are also entitled to the award of decorations and metals.

LOK SAHAYAK SENA

The Aux hary Territorial Army, which was reorganised as the National Volunteer Force in 1954 is now designated as "Lok Sahayak Sena. Its aim is to give elementary mil tary training to about 5,00,000 men in five years."

All able-bodied men except ex Servicemen and ex NCC cadets, between the agen of 18 and 40 can join the Lok Schayak Sena Membersh po of the force catters no liability to m litary service. Under the new scheme special attention is given to the training of people in border areas

The recruis are given 30 days training which includes a literacy course for those who are illiterate. A record of the trainers is maintained and the outstanding trainer in each camp is given a Certificate of Ment Others receive certificates in token of their completing the full period of training successfully. During the training period every trainer is provided with free accommodation clothing and food and an out-of pocket allowance of Rx 15 on the conclus on of the camp.

NATIONAL CADET CORPS

Development of qualities of leadership and discipline in the youth of the country is the aim of the National Cadet Corps.

The Cadet Corps consists of three Divisions, namely, Senior, Junior and Girls. The Senior and Junior Divisions are composed of three Wings—Army, Navy and Air Force. The Army Wing has units of the Armoured Corps, Artillery, the Corps of Engineers, the Signals Corps, Infantry, the Corps of Electrical and Mechanical Engineers and the Medical Corps.

In addition to the normal basic training, cadets of the technical units receive specialised training. The Naval Wing units are, of necessity, raised in the coastal towns where facilities for naval training are available. In the Air Wing units, theortical and practical training is given in flying and, with the help of the flying clubs, the cadets obtain 'A' flying licences at Government expense. Gliding has also been introduced as part of the training of air cadets. The special needs of the girl cadets have been fully kept in view and their training has also now been made more instructive, interesting and useful. Aero-modelling and gliding have also been introduced in the Senior Wing of the Girls' Division.

The progressive increase in the strength of the Corps since its inception is shown in the following table:

TABLE 29

1-1-1958		64,475	76,530	5,730	9,270	1,56,005

AUXILIARY CADET CORPS

The Auxiliary Cadet Corps has been started to cope with the demand for military training for boys and girls in schools who cannot get admission to the National Cadet Corps. This Corps has made rapid progress, and its strength at the end of 1957 was about 7,61,800.

The Auxiliary Cadet Corps trains the youth of the country in team spirit, discipline and patriotism. Its instructors selected from schools are trained by Regular Army staff of the various NCC units.

WELFARE OF EX-SERVICEMEN

Special attention is given to the resettlement of ex Servicemen in Gormment and private services vocational and technical trades, land colonies and transport services. Training in basic agriculture is given to facilitate their absorption in the community projects as given reads. In the matter of employment, preference is given to ex Servicemen in filling up appointments in the police, watch and ward, excee and other dripartments where military training is a qualification. In addition, relaxation in age limits to the extent of the military service rendered has been permitted. Through the concerted efforts of the Central and State Governments as well as private organisations employment has been found for 1,06 0417 ex Servicemen, including 875 officers, during the last seein years.

One of the most important non-official organisations which renders useful assistance to ex Servicemen and their families in close Luison with the local administrations, is the Soldiers', Salon's and Airmen's Board The Board which has its headquarters in New Delhi, co-ordinates the activities of State boards who, in their turn, control's network of District Boards, reinforced in some cases by telsal or taluka committees. There are at present 189 such boards. Apart from the funds of the Board which are primarily used for payment of special pensions to blinded ex Servicemen and to meet the expenditure on other miscellaneous items, there are a number of other Central funds like the Flag Day, Fund, the Armed Forces Reconstruction Fund, which also render valuable assistance in the welfare of ex-Servicemen.

CHAPTER VIII

EDUCATION

Education is the responsibility of the State Governments, the Union Government confining its activities to the co-ordination of facilities and determination of standards in respect of higher education or research and scientific teachnical education. Co-ordination of thinking and planning in regard to elementary and secondary education is provided through All-India Councils. The Union Government is also responsible for the running of four universities (Aligarh, Banaras, Delhi and Visva Bharati) and such other institutions of national importance as Parliament may by law declare. It also administers the award of scholarships and fellowships in pursuance of the policy to promote cultural relations with other countries and co-operation with international organisations like the UNESCO.

The state of literacy in the country according to the 1951 census, the steps taken to bring about an improvement in educational facilities at all stages of education, the progress achieved till 1955-56 and the targets aimed at for 1960-61 are dealt with in the pages following.

ELEMENTARY AND BASIC EDUCATION

Basic education being the accepted pattern of our educational system, the system of elementary education is gradually being brought in line with it. The basic system sets out an activity curriculum in which learning is correlated with the physical and social environment of the children and also with a productive activity like spinning and weaving, gardening, carpentry, leather work, book craft and domestic crafts including cooking, sewing, house management, etc. The programme for the conversion of the existing elementary schools into basic ones, the opening of new basic schools, the introduction of crafts in non-basic schools, the production of literature on basic education and training of basic school teachers is progressively being carried out. The recommendations of the Assessment Committee appointed in 1955 have generally been accepted and are being implemented.

An All-India Council for Elementary Education has been set up to advise the Central and State Governments on all matters relating to elementary education and to prepare programmes for the early implementation of compulsory and free elementary education.

The progress of primary education showing basic education separately is indicated in the following table:

TABLE 37
BASIC AND NON-BASIC PRIMARY EDUCATION

Year	Number	of schools	Number of se rolls (in th		Direct expenditure (in crores of rupees)			
ı car	Primary(a)	Basic	Primary(a)	Basic	Primary(a)	Basic

1954-55	2,64,139	38,515	2,22,43	33,71	51.10	7.30		
1955-56	2,78,768	47,813	2,29,66	50,60	53.98	12.16		

SECONDARY EDUCATION

Significant among the reforms carried out on the recommendations of the Secondary Education Commission which reported in August 1953, with the aim of making it a self-contained and complete stage up to the age of 17, are:

- (1) Substitution of the present system in which the secondary stage serves as a terminal stage entirely subservient to university education by a diversified system, is being achieved through the conversion of existing schools into multipurpose types. These schools offer instruction in languages, social studies, general science, compulsory craft in addition to a course in either science, technology, commerce, agriculture, fine arts, home science or humanities.
- (2) Provision of facilities for bringing about improvements in teaching science, libraries, introduction of craft in middle schools, training of teachers and career masters, etc.

⁽a) Inclusive of pre-primary schools.

- (3) The establishment of the All-India Council for Secondary Education to advise the Central and State Governments
- (4) The compulsory study of three languages at the secondary stage, in regard to which the views of the State Governments have been insited

Table 38 provides at a glance the development and financing of secondary education during the five years of the first Plan

TABLE 38 SECONDARY EDUCATION

Year	\umber of schools	Number of students on rolls (in thousands)	Total direct expenditure (in erores of rapees)

1953-54	25,767	64,10	42 17
1904 55	27,518	68,93	45 51
1955-56	32,568	85,27	53 02

HIGHER AND UNIVERSITY EDUCATION

Post-secondary education in India is imparted through (a) arts and second colleges, (b) professional colleges, (c) special educational colleges, (d) research institutions and (c) inwestiates in States where there is a Board of Higher Secondary and Intermediate Education, the post-instermediate stage to conducted under the direction and control of universities in respect of courses of study, examinations and award of degrees and diplomat

Universities are of three different types Affiliating universities do not themselves undertake any textung but merely a percurbe course of study, conduct examinations and award degrees and displants in respect of colleges affiliated to them. The Affiliating and Texching type of University, and diston to careving out functions of the affiliating type, offers teaching and research facilities generally as the post-graduate level and may once cases from the post intermediate level onwards. The Residential and Teaching type of Universities are unitary organizations, controlling all colleges under their jurisdiction in all respects and understangle teaching at all levels. A number of the younger universities in India belong to the last attackers.

A forum for the discussion of university problems and for the mutual recognition of degrees and diplomas awarded by the universities in India is provided by the Inter-University Board founded in 1925. The functions of this Board are advisory in character.

Brudes the universities, there are a large number of institutions which cater to higher learning. The Jamas Millia at Delhi and the Guriskil at Hardwar bave the same standing as other immersities, although they were not officially established as such under Central or State Acts Many of the research alsopatories and mixtutions mentioned in the character of Sentifies.

Research are recognised by the Inter-University Board as centres of higher research. Some of them undertake teaching as well.

In Table 39 is shown the State/Territory-wise distribution of the various types of institutions catering to higher education in 1955-56 and in Table 40 relevant data in respect of the Universities is given for 1957.

General Education in Universities

A significant development in the sphere of higher education was the appointment of a Study Team headed by Dr. S. Bhagavantam to examine the working of general education courses in some of the leading universities in the USA and the UK and to suggest how far these could be introduced in India. The Team which reported in January 1957 has drawn up two schemes. In the main scheme, the Team has recommended that general education

• Information not available

covering basic studies in the fields of natural sciences, social sciences and the humanities together with training in communication skills should be com pulsory for all under graduate non professional faculties. In the alterna tive scheme six periods a week in the first and second years of the degree course are to be devoted to general education

Nine experts in general education from different universities in the USA were invited to serve as consultants to Indian universities introducing general education courses

The reports of these groups were discussed in December 1957 and the introduction of general education courses has been accepted in principle by almost all universities in India many of them having actually introduced them in one form or another

Usuarstv Grants Commission

In pursuance of the recommendation of the University Education Commission appointed by the Government in 1948, the University Grants Commission was constituted in 1953 It was given an autonomous statutory status by an Act of Parliament in 1956 Most of the matters connected with university education including the determination and co-ordination of standards and facilities for study and research have been committed to the care of this body. The Commission has the authority to make appropriate grants to different universities and implement development schemes

The composition of the Commission as on March 1, 1958 was as follows

Chapman	C D Denmukn
Members	HN Kunzru
	K.S Krishnan
	A.L. Mudahar
	Dewan Anand Lumar
	G C. Chatterjee
	k G Saiyidain
	N \ Wanchoo
Secretary	Samuel Mathau

TECHNICAL EDUCATION

The progress of institutions at the school and collegiate level engaged in the field of technical education during the first Plan period was as follows

TABLE 41 TECHNICAL EDUCATION

Of the 8 new engineering colleges and 31 new polytechnics provided for during the second Plan period, 6 colleges and 18 polytechnics have already started functioning. Six engineering colleges and 12 polytechnics in the private sector have also started functioning with promise of substantial assistance from the Centre. The Western Higher Technological Institute at Bombay envisaged in the second Plan, is expected to admit the first batch of students in 1958. Substantial assistance in the form of laboratory and workshop equipment and expert professors for the Institute has been secured from the USSR under the UNESCO Expanded Programme of Technical Assistance. It has been decided to set up the Southern and Northern Institutes at Madras and Kanpur as soon as possible and they will probably start functioning in 1959. The Government of the Federal Republic of Germany have agreed to assist in the establishment and development of the Southern Institute with laboratory and workshop equipment and expert professors. The Indian Institute of Technology at Kharagpur was incorporated by an Act of Parliament in April 1957 as an of National Importance'. It has on its rolls at present about 1,400 students for various under-graduate courses and about 100 students for postgraduate courses and research work. Metallurgical engineering, chemical engineering and mining engineering have been added recently to the under-graduate courses in the Institute to train the much needed technical personnel for the steel plants, fertiliser factories, mineral development, etc. The range of subjects for post-graduate work has also been increased and facilities are now offered in about 22 different fields.

After the second Five Year Plan had been formulated the Planning Commission appointed an Engineering Personnel Committee to make an estimate of the demand for technical personnel during the Plan period and to recommend measures necessary for meeting that demand. The Committee estimated that the short-fall of technical personnel would be of the order of 1,800 graduates and 8,000 diploma holders by 1960-61. It recommended that in order to bridge this gap between supply and demand during the current Plan period and to meet in part the requirements for technical manpower in the subsequent Plan periods, 18 more engineering colleges and 62 more polytechnics should be established in different parts of the country. The Committee estimated that these new institutions would make available about 2,794 additional seats for degree courses and 8,220 additional seats for diploma courses in civil, mechanical, electrical and electrical communication engineering. The Union Government, Planning Commission and the All-India Council for Technical Education examined the matter in detail and came to the conclusion that in the existing circumstances the best course for the expansion of technical education in the country was to increase the training capacity of existing institutions wherever possible and new institutions should be established only if found necessary. A scheme for expanding the training capacity of 19 existing engineering colleges and 50 polytechnics so as to yield about 2,570 additional seats for degree courses and 4,890 additional seats for diploma courses immediately has been formulated and is now in the course of implementation.

It is estimated that when all the schemes undertaken under the second Five Year Plan are fully implemented and the expansion of the existing institutions is achieved, the annual admission for the first-degree courses in all branches of engineering and technology will be of the order of 10,500 students and for the diploma courses 19,000 students by 1960-61. This will represent a four to five-fold increase in the facilities as compared to the position in the pre-Plan years. Further, with the establishment of all the higher technological institutes during the Plan period, the provision

for post-graduate courses, advanced studies, etc., in engineering and technology will be of the order of 2,000 seats

Over 600 research scholarships and 30 national research fellow-have been instituted for training at university departments, research laboratories and other institutions. Vigorous efforts have also been made to secure practical training facilities in industry for technical graduates and diploma holders. In the year 1957-53 over 900 training places for graduates and 500 training places for diploma holders were secured in a large number of industrial concerns, Government departments, etc. Steps are also being taken to train an adequate number of trained teachers under senior teachers at higher technical institutions.

The All India Council for Technical Education had recommended some time ago that a Board of Technical Education fully representative of all interests concerned, including industry and commerce should be set up for the co ordinated development of technical education in each State and to ensure proper standards in the institutions. The Council also drew up a model scheme for the State Boards. In pursuance of these recommendations, the State Governments of Andriar Pradesh, Assam, Bihar, Bombay, Kerala, Madras, Mysore, Orssa, Rajastihan and West Bengal have set up State Boards of Technical Education and Training State Boards are in the process of being established in Madhya Pradesh, Punjab and Uttar Pradesh.

RURAL HIGHER EDUCATION

As recommended by the Rural Higher Education Committee, set up in 1954, a National Council for Higher Education in Rural Areas has been set up to advise the Government on all matters relating to the development of rural higher education. The Council edecide 10 autitutions for development into rural institutes and these have started functioning. The course as approved by the Council and adopted by the rural institutes are; (i) a three-year diploma course in rural sciences, (ii) a three-year criticate course in agreed-cultural science, (iii) a three-year retrificient course in course in the properties of the course in agreed start of the course in agreed start of the course in course in the course in agreed the course in cash and the course in the course of the course in course in the course of the course in course in the course of the course in course. Edicate are now being made to secure recognition of the Diploma in Rural Services to a first degree of a University.

SOCIAL EDUCATION

Social education embodies a five-point programme to promote (i) heracy, (ii) knowledge of the rules of health and hygene, (iii) improvement of the adults' economic status, (ii) sense of enterachip with an adequate consciousness of rights and duster, and (i) healthy recreations studed to the needs of the community and the medivation. The States execute the various schemes, while the Centre provides guidance, financial assistance and co-ordination

To develop autable techniques and carry out research on selected problems of social education as well as to serve as a clearing house for information, a National Centre for Fundamental Education has been established in New Delhi. The Centre will also train higher grade personnel for social education work. To encourage the production of literature mutable for children and adults, prizes are offered to authors of the best books in all regional language.

Audio-Visual Aids

Started after independence, the Central Film Library has a stock of 3,476 films and 1,498 film strips on various educational and cultural subjects. These are loaned free of charge to educational and other institutions that become members of the Library. It has 1,045 educational institutions and social organisations scattered throughout the country as its members. A quarterly journal 'Audio-Visual Education' has been started in 1957 with a view to fostering interest in the use of audio-visual techniques among teachers and social education workers.

Seminars for the training of audio-visual workers have been organised by the Centre as also by the States. A Central Audio-Visual Education Institute will start functioning in 1958.

EDUCATION OF THE HANDICAPPED

A National Advisory Council advises the Government on all problems concerning education, training and employment of the physically and mentally handicapped. Scholarships are awarded to blind, deaf and orthopaedically handicapped students for higher education or for technical or professional training. Grants are provided to institutions and organisations for the handicapped chiefly for undertaking developmental work for the handicapped.

The training centre for the Adult Blind at Dehra Dun imparts training in handicrafts to about 150 blind men from all parts of the country. A women's section with a capacity of 20 has been recently added to the centre. Attached to this centre is a small experimental workshop, set up in 1954 employing ten blind workers. An employment office for the blind has been functioning in Madras since July 1954. It has so far placed 73 adult blind men in various industries.

DEVELOPMENT OF HINDI

A fifteen-year programme for the development and propagation of Hindi has been adopted. Twenty-three Expert Committees have been constituted under the Board of Scientific Terminology for evolving technical terminology in Hindi. About 34,000 technical terms have been evolved during the year thus raising the total number of terms so far evolved to nearly 1,07,000.

Standard key-boards have been evolved for the Hindi typewriter and the Hindi teleprinter. A Committee has been set up to evolve a standard system of short-hand suited to the genius of Hindi as well as other regional languages.

Universities have been financially assisted for carrying out a marphophonetic analysis of all the major regional languages. It has been decided to bring out lists of words common to Hindi and eleven other major regional languages. Five lists pertaining to Hindi-Bengali, Hindi-Tamil, Hindi-Malayalam, Hindi-Kashmiri and Hindi-Telugu have been published. Two lists of 500 and 2,000 basic Hindi words prepared last year have been revised.

A draft directive has also been prepared to be sent to the authors of elementary Hindi books proposed to be prepared for non-Hindi speaking people. Definite rules have been framed for the recognition of Hindi examinations conducted by various Hindi organisations in the country. Model syllabi have also been prepared for different examinations. Grants

have been given to various non Hindi speaking States for implementation of their schemes for the propagation and development of Hindi and to private organisations for the preparation of a Hindi the Conditional dictionaires and a history of Hindi Internative, etc. The Hindistant Culture Society, Allahabad which was entrusted with the work of prepar paring a standard English Hindi dictionary on the lines of the Concist Oxford Dictionary has submitted letters. A to L of the dictionary to Government for final approval. Action has been mitiated on the following new schemes for the propagation and development of Hindi.

- Preparation of terminological index of all standard Hindi works old and new
 - 2 Collection and indexing of special vocabularies on Arts and Grafts with the help of existing literature and actual field work.
 - 3 Investigation of terminological material in old literature
- 4 Preparation of technical encyclopaedias, dictionaries and other reference books in Hindi
- 5 Publishing revised and critical editions of standard Hindi works now out of print
- 8 Publication of omnibus volumes of the works of eminent Hindi writers
- 7 Exchange of debaung teams of schools and colleges between non Hindi speaking areas and Hindi speaking areas
- 8 Organisation of lecture tours by prominent Hindi scholars and writers of Hindi areas to non Hindi speaking areas and our perso
- 9 Holding of seminars of Hindi teachers of non Hindi speaking areas in Hindi speaking areas and title testa
- 10 Research into frequency of Hindi words

YOUTH WELFARE

A significant development since independence has been the attention given to the drawing up of programmes eatering to the recreational cultural and emotional needs of the jouth of the country and to the task of co-ordinating the work of various agencies engaged in youth welfare activities

The highlights of this endeasour have been as follows

- Organisation of annual inter university youth festivals since 1954 and assistance to universities for the organisation of inter collegiate festivals;
- (a) Holding of youth leadership training camps where short term training is imparted to selected teachers in the promotion of extra-curricular activities
- (iii) Travel concessions and financial assistance for organising youth tours to places of historic scenic and cultural interest and to development project areas.
 - (n) The establishment of the Youth Hostels Association of India and the setting up of youth hostels all over the country
 - (v) Assistance to universities and State Governments in the promotion of youth welfare boards and committees for the success ful implementation and co-ordination of youth welfare activities.

- (vi) Pilot surveys of the living conditions of students at selected university centres.
- (vii) The setting up of non-student youth clubs and centres.
- (viii) The Labour and Social Service Scheme to inculcate a sense of the dignity of manual labour in students and to bring them into contact with villages.
 - (ix) Campus Work Projects Scheme to provide much needed amenities to universities and other educational centres like gymnasia, swimming pools, open air theatres-cum-auditoria, etc.

PHYSICAL EDUCATION AND SPORTS

Physical Education

A 'National Plan of Physical Education and Recreation' has been prepared for strengthening institutions and colleges of physical education, implementing the syllabi of physical education, popularising norms of physical fitness tests, conducting seminars, awarding fellowships and scholarships for higher studies in physical education, granting assistance to Vyayamshalas and Akhadas, holding of physical efficiency weeks and festivals and production of documentary and feature films on physical education.

The first National College of Physical Education has been set up at Gwalior in 1957 offering training facilities for a three-year degree course in physical education.

Sports

The highlights of the encouragement offered to the organisation of sports have been the following:

- (i) The establishment of the All-India Council of Sports
- (ii) The setting up of State Sports Councils in Andhra Pradesh, Assam, Bihar, Bombay, Delhi, Kerala, Madras, Rajasthan, U.P., West Bengal and Andaman and Nicobar Islands.
- (iii) The Rajkumari Sports Coaching Scheme under which coaching centres have been established under the guidance of expert Indian and foreign coaches since 1953 and assistance given to sports federations to modernise sports equipment and to enable them to participate in international sports tournaments.

National Discipline Scheme

In order to bring up the younger generation under a proper code of discipline and to infuse in them ideals of good citizenship and comradeship, a scheme for the physical and general social training of displaced children was introduced in July 1954. A start was made in the training of the children in Kasturba Niketan at Delhi. The scheme has since been extended to a large number of schools in and around Delhi, Punjab U.P., Bombay Madhya Pradesh, Jammu and Kashmir and West Bengal. About 73,000 children are under training in the various States.

The children are given training by trained instructors in the traditional form of drill which is essential both for physical fitness and disciplining the mind. This training is supplemented by lectures in classrooms on the country's cultural heritage and the deeds of valour and chivalry of our ancestors.

CHAPTER IX

CULTURAL ACTIVITIES

The National Culture Truit was set up to promote art and culture to foster the consciousness of art among the people. Thu is sought to be achieved through the agency of the Lahit Kida Akademi (Academy of Art), Sangeet Natak Akademi (Academy of Bance, Drama and Music) and Sahitya Akademi (Academy of Letters). The Iachibuse for mass communication at the disposal of the State have also been pressed into service to make the people conscious of their cultural heritage. A number of institutions have actively collaborated in the task of popularising traditional arts and crafts.

ART

The activities in the realin of art, sponsored directly or indirectly by the State, aim at the preservation of the traditions of the past, their enrichment by the work of modern arists, the improvement of standards in art and the refinement of public taste

Lalu Kala Akademi

The Laht Kala Akademi, set up in October 1934, it devoted to the promotion of the study and research in painting, sculpture, architecture and the applied arts. It also co-ordinates the activities of the regional or State academies, encourages exchange of ideas among various schools of air, publishes lutrature and fusters inter-regional and inter-national contacts through exhibitions, exchange of personnel and of art objects.

The Akademi has instituted a survey of the arts and crafts of the different regions of the country. The maintenance of a photographic record of ancient monuments, sculptures and painting and reproduction of works of art that have decared are among other important activities undertaken by it. A beginning has been made in these directions with the photographing of the paintings in the Kulu palace and the reproduction of paintings in the Badami Cares in the Bijapiur district of Bombay State.

A seminar on 'Art Education', sponsored by the Akademi in 1956, was attended by a number of distinguished artists and educationists

The holding of annual national exhibitions and displays of exhibits in various art centres in the country has been another activity aimed at enabling arisis to reach a wider public than before Four such national exhibitions have been held so far.

In furtherance of the objective of establishing international connects through exhibitions of traditional and modern art, exhibitions of Canadian pannings, Hungarian folk arts, Chinese frantieraffs, Polsh arts and contemporary German art were organized. As Indian exhibition, comprising samples of contemporary art and classical material process was arranged in Europe in 1984.

Lists of these recognised institutions are given in the Appendices.

Publications

Among the art publications brought out by the Akademi are Mughal Miniatures, a Portfolio of Contemporary Paintings, a set of 12 picture post-cards in colour consisting mainly of Rajasthani paintings, Krishna Legend in Pahari Paintings and two Portfolios of Ajanta and Marwar Paintings. The forthcoming publications of the Akademi are three portfolios of Krishangarh and Bundi paintings and Indian paintings in relation to Indian poetry. The Akademi also brings out a bi-annual art journal "The Lalit Kala".

The Publications Division of the Ministry of Information and Broadcasting has also brought out a number of important art publications. These include Kangra Valley Painting, Indian Art Through the Ages, Architecture and Sculpture of India, 5000 Years of Indian Art, Buddhist Sculptures and Monuments, The Way of the Buddha and Buddhist Shrines in India.

National Gallery of Art

The National Gallery of Modern Art, established in 1954, now possesses works of nearly 100 artists, including Rabindranath Tagore, M.A.R. Chughtai, Nandalal Bose, Abanindranath Tagore, Jamini Roy, Mukul Dey, Amrita Sher Gill, M.F. Hussain, Kripal Singh Shakhawat, E.F. Brunner, Avinash Chandra, D.P. Roy Chaudhury, Sudhir Khastgir, Freda Brilliant, J. Sultan Ali, N.S. Bendre, A.K. Haldar, G. Bhatt, K.S. Kulkarni, R.D. Rawal and Satish Gujral.

DANCE AND DRAMA

The active promotion of India's dance and dramatic traditions and adapting them to modern conditions has been a significant feature of the cultural activities since the achievement of independence.

Sangeet Natak Akademi

The main task which the Sangeet Natak Akademi, inaugurated in January 1953, has set for itself is the survey of and research in the different art forms of the country. In order to preserve them as part of our cultural heritage, the Akademi has a plan to record and film them. To develop these arts and to make them popular, it organises and sponsors seminars and festivals and establishes new art institutions.

The National Festival of classical, traditional and modern ballet dances, excluding folk dances, was organised by the Akademi in Delhi in 1955. The Akademi has taken over the Manipur College of Dance at Imphal, in order to make it the main centre of training in the Manipuri style of dance. Recitals by leading classical dancers are being filmed in order to preserve all the important styles of dancing. Books on Indian dance are being collected to build up an up-to-date reference library.

The Folk Dance Festival has become an integral part of the annual Republic Day celebrations. To keep a record of the different styles, folk dances are being filmed and recorded by the national and regional academies of dance and drama.

A National Drama Festival was sponsored by the Akademi in 1954 and plays in all the major Indian languages as well as in Sanskrit, English and Manipuri were staged. A seminar on Films and another on the 'Future of Indian Drama' were organised in 1955 and 1956.

Among other proposals under active consideration are the establishment of a National Theatre in New Delhi and the starting of a National School of Drama

Radio Drama

The National Programme of Plays, broadcast simultaneously from different stations of All India Radio, in the languages of the regions, has made available to listeners all over India some of the best known plays in Indian dramatic literature of the past 75 years. The presentation of these plays in all the twelve major lunguages of India has involved a big literacy effort by emment men in their translation and adaptation.

MUSIC

A sustained effort to preserve and develop our music—classical, light and folk—and to make it popular is being made by the Sanget Natak Akademi and All India Radio While the Akademi has been decoung itself chiefly to survey and research, publications, seminars, festivals and trating institutions, All India Radio has come to be the biggest patron of music

Music Festival

The first National Music Festival was held in Delhi in 1954 and the second in Patna in 1956 under the auspices of the Akademi These festivals will soon be a regular feature of the activities of the Akademi and will be organised in different parts of the country

Library of Music

In order to build up a library of Indian music, efforts are being made by the Akademi to record select renderings by the leading classical musicians belonging to all the schools. Old gramophone records are also being collected for this purpose. Complete classified catalogues of manuscripts on Indian music are to be published. A bibrary of books on Indian music up to Enchlate research and recorded by the regional academics.

Seminar on Indian Music

At the third seminar of Indian music, leading exponents of the Karnatak and Hindustan systems discussed such topics as music education and its future, growth and problems of popular mus c, relationship and affinity between folk and classical music, problems of orchestration in Indian music and group singing et al.

Radio Sangeet Sammelan

This annual feature of All India Radio provides an opportunity to people all over the country to herr in one series all the kreat In livin masters of Hindustani as well as Karnitak muse During the 1937 Karnatak muse at Madras, Viyawada, Tiruchi and Hyderland were hed. This regular museal event of the vera a ms at sumulating appreciation of the principal forms of Classical muse and presenting a variety of ragus and regus An annual muse of empetit on confined to yoing artists a mow a regular feature preceding the Summelian and aumed at discovering new talent. Along with the Sammeliu symposis are organised wherein amment museologists discuss the variety problems relating to the develop-

ment of music and examine possibilities of giving it a new direction. "Rhythm and Tempo in Indian Music" was the subject of discussion at the symposium held in 1957.

National Programme of Music

Started in 1952, the Programme aims at fostering a better mutual appreciation between the two systems of music—Hindustani and Karnatak. In this weekly programme, listeners have an opportunity to hear top-ranking artists. Folk music and operas are also broadcast periodically.

Light Music

The planned development of modern light music is another feature of AIR's music policy. Based on classical and folk melodies and making use of old and new lyrics, light music is prepared and presented by a number of stations.

Folk Music

Fully equipped units for 'on the spot' recording of folk music and for their editing and presentation are to be set up soon at a number of stations. Selected folk music now forms an important part of both national and local programmes.

Vadya Vrinda

The AIR National Orchestra (Vadya Vrinda), set up in 1952, has built up a reportoire of 113 compositions. The Vadya Vrinda has recently attempted thematic compositions such as Meghadootam and Kalingavijayam. Among the new items presented during 1957 were Jwalamukhi and Hariali, on the occasion of the centenary of India's first struggle for independence.

LITERATURE

In the field of letters, as in that of art and music, an attempt is being made to improve standards, to foster and co-ordinate literary activities in all the Indian languages, to create among the people the consciousness of the basic unity of the literatures in various Indian languages and to promote through them the cultural unity of the country.

Sahitya Akademi.

The Sahitya Akademi, which seeks to achieve these objectives, was inaugurated in March 1954. The publication of a National Bibliography of Indian Literature to include all books of literary merit published in the twentieth century in the 14 major languages specified in the Constitution as well as books in English published in India or written by Indian authors, is one of the important activities of the Akademi. The final text of this bibliography, edited at the National Library, Calcutta, is now being printed.

Preparation of critically edited texts of Kalidasa's works by eminent scholars has made progress. *Meghadoota*, edited by S.K. Dey, has already been published. Prof. Velankar's critical edition of *Vikramorvasiya* is in the press. The text of *Ritusamhara*, collated by the late P.M. Lad, is being finalised by S.K. Dey.

Bharatiya Kavita 1953, an anthology of poems selected from each of the 14 major languages along with their Hindi translations, has been published. A second volume covering the years 1954 and 1955 is in the press.

Histories of Malayalam literature by P.K. Parameswaran Nair and of Bengali I terature by Sukumar Sen have been completed and will shortly be published.

Selections from the Adi Granth have been compiled, edited and translated into English by a committee of distinguished. Sikh scholars under the ausp ers of the Sahitya Akademi. The translation, which was sponsored by UNASCO will be published shortly. Another publication similarly sponsored by UNASCO and prepared under the auspiess of the Sahitya Akademi is C. Rajagopalacharis. English rendering of selections from the Amba Ramagnam.

Wenty five foreign classes have been selected for translation into all the major Indian lanewages. Translations of the Chinese class cs. Analest of Confients and I studen of Los Tse of the Japanese classes, Tale of Conjor of Voltanes Combide of Molicers plays and of Thucydides s Hutory of the Philippanena Isr are ready for publication

Hinds translators of well known works in other Indian Language published a far are (i) Bhaganas Budha (Marathi classic by Dharmananda Kosumbi (ii) Aftin ka Falia (Oriya novel by kal ndicharan Pangrath) (vi) Arata Simham (Malayalam novel by k M Panikkai) (vi) Arata Simham (Malayalam novel by The Marathi (av) Arata (Arathi classic bi Marathi classic by Lakhumanhastri Joshi) (vii) barga Nibeta (Bengali novel by Tara Sankar Bandyopadhyaya) and (mi) Amit Santa (Oriya novel by Gopnath Mohamb)

Trandations of these works in other Indian languages have been taken in hand. Bekgenn Buddhe has already been published in Gujarati. Hindi, Kannada Malawalam Sindhi. Tamil and Telagu Hazari. Prasid Dowweds novel Banabatta Ki. dankatha has been published in Gujarati, Kannada and Malayalam. Its Bengali translation is in the press. Moth is Varietie (tural sketches in Hindi by Rambriksha Benipuri) has been translatied into several languages.

Twents-one short mores and 101 poems of Tagore are being transliterated into Destaugars script and will shortly be published. The two columes will then be considered and published in other Indiana language Select ans from Clasur-was all the Indian Inquigage are under preparation and will be published to the original language as well as in translations

Other publications already brought out include a Russian—Hindi Detionary a symposium on Contemporary Indian Literature and the first number of a half yearly journal Indian Literature
Writers is also under preparation

A 'Who is Who' of Indian

Gandhian Literature

Carly in 1956, a scheme was launched by the Ministry of Information and Broad-asting to publish a complete collection of Mahatima Gandhis writings specifies and letters in chronological order in a series of volume. These volumes are to be brought out in English, Hinds and City on the tribe languages in which out in English, Hinds work, on the collection of Miliatrian Gandhis writings which appeared in Madasa Opinion in South Africas and other material pretaining to the period prior to 1903 has been completed. Translation of the material already

collected has been taken in hand. The first volume in this series consisting of the writings and speeches of Gandhiji from 1884 to 1896 was brought out on January 26, 1958.

Literary Broadcasts

AIR programmes have also made their impact on contemporary Indian literature. The policy of associating eminent literary men in all the regional languages of India as producers of the 'Spoken word' has helped the evolution of a class of literature which is adapted to the special exigencies of a listening audience.

Select broadcast talks are brought out in the form of a quarterly journal, AIR Selections, in English and Prasarika in Hindi. They are also published in the form of books on different themes.

A National Symposium of Poets, organised for the first time in 1956, is now a regular annual feature providing an opportunity for listeners to listen to the latest compositions of the leading poets in the country.

An all-India gathering of writers representing different branches of creative writing was convened in 1956. At this Sahitya Samaroh, trends in contemporary Indian poetry were reviewed and vital problems concerning Indian literature were discussed. The second Sahitya Samaroh meeting in April 1957 devoted itself to contemporary Indian fiction and short stories as also to a discussion on the requirements of language for mass communication.

National Book Trust

The National Book Trust was set up in 1957 with C.D. Deshmukh as Chairman to encourage the production of good literature and to make such works available at moderate prices to libraries, educational institutions and the public.

The Trust will also publish standard works on education, science, culture and the humanities. Classical Indian literature, translations of foreign classics and of Indian classics from one regional language to another and reproduction of the pick of Indian art will receive special attention. The universities and other learned bodies can seek the assistance of the Trust for the publication of approved books. The Publications Division of the Ministry of Information and Broadcasting will be the principal publisher of the Trust.

. CULTURAL RELATIONS WITH OTHER COUNTRIES

External Relations Division

An External Relations Division has been established in the Ministry of Scientific Research and Cultural Affairs to promote better understanding and good-will by means of exchanges of delegations of artists, students, scholars, publications, exhibitions, art objects, as also through presentation of books, selection of Indian teachers for service abroad, participation in international congresses and conferences, cultural agreements, construction and maintenance of international students' houses and hostels, and subsidising of foreign translations of Indian classics.

Delegations

A cultural delegation of six writers led by Humayun Kabir was sent to attend the Pakistan Cultural Conference held at Kagmari, Dacca,

in February 1957 The Madras University Hockey Team wiited Kabuli on the occasion of the Afghan Jashan celebrations during August 1957. Nalinashab Dutt and D Valsinsha were selected to go to Cambodia and JM Majumdar, D Valsinsha and Rev J Bikkhu to Thulland to participate in the 2,500th Buddhi Jayanti Celebrations on the invitation of the Governments of Cambodia and Thulland respectively. A party of musicans and dancers was sent to Nepil to participate in the Candhi Jayanti celebrations organised by the Indian Embassy in Kathonardia.

A delegation of students from Silkims suited India at the invitation of the Government of India. Ten Nepalese students were invited as observers to the Fourth Inter-University Youth Testival. A forty-member Rumania Folk Song and Dance Ensemble from Rumania valued India as guest of the Government and gave performances in Delhi, Bombay, Calcutta and Madras. A delegation of leaders from Nepal belonging to different poliucal parties and another of prominent women from Russia visited India during 1957. An important writer to visit India during the year was Mr. Halldor Laxness, a Noble Prize wingour in Literature.

Cultural Agreements

To promote cultural relations, cultural agreements were concluded with Poland and Rumania

Grants

Financial assistance in the form of ad he grants was given to the followmy societic ranged in furthering closer cultural contacts. Indo-Expitan
Cultural Association, Caro, Indo-Iranian Cultural Association, Telestan; Indo-Turkish Cultural Association, Indo-Iranian
Society, Bonjiay, Indo Nepal Friendship Association, Kathmandu;
Thetan School at Kalimpong, Ramakrishna Mission Centre in London;
School of Openal and African Studies, London, Indian (YMCA) Union
and Hostel, London, Indian Students' Association, Paris, India League,
Sydney, and Indian Students' Association in the United Kingdom.

Indian Council for Cultural Relations

The Indian Council for Cultural Relations was established in November 1949 with the object of establishing, reviving and strengthening cultural relations between India and other countries. Although financed entirely by the Covernment of India, the Council functions as an autonomous' body

Amongst the many activates of the ICCR, the following are worthy of mention (i) Exchange of enument scholars, asvints and students, (u) Maintenance of chairs of Indology in foreign universities, (iii) Appointment of lecturers in Indian culture almost, (ivi) Presentation of books and films about India, (v) Welfare of foreign students in India, (vi) Reception and entertainment of distinguished foreignes in India, and (vii) Organisation of summer examps, seminars and social gatherings for the benefit of foreign students in India.

The Council publishes two quarterly journals, namely, IndvAston Culture in English and Topiffs it Hard in Animo: Bender, it subsidies a journal in Persian and English under the title Indv-Innere. The Council also sponsons the publication of are manuscripts and other valuable books about India and undertakes publication of books and brochures relating to different aspects of India's Culture.

CHAPTER X

SCIENTIFIC RESEARCH

The policy of the Government of India with regard to science was announced on March 13, 1958 in a resolution placed before both Houses of Parliament. The aims of this scientific policy are:

- (i) To foster, promote, and sustain, by all appropriate means, the cultivation of science, and scientific research in all its aspects—pure, applied, and educational;
- (ii) To ensure an adequate supply, within the country, of research scientists of the highest quality, and to recognise their work as an important component of the strength of the nation;
- (iii) To encourage and initiate, with all possible speed, programmes for the training of scientific and technical personnel, on a scale adequate to fulfil the country's needs in science and education, agriculture and industry, and defence;
- (iv) To ensure that the creative talent of men and women is encouraged and finds full scope in scientific activity;
- (v) To encourage individual initiative for the acquisition and dissemination of knowledge, and for the discovery of new knowledge, in an atmosphere of academic freedom;
- (vi) And, in general, to secure for the people of the country all' the benefits that can accrue from the acquisition and application of scientific knowledge.

COUNCIL OF SCIENTIFIC AND INDUSTRIAL RESEARCH

Scientific research under State auspices in India is carried out mainly through the Council of Scientific and Industrial Research and the various national laboratories or institutes set up under its control. The Council also awards grants-in-aid to scientists in research institutions and university laboratories in the country, grants fellowships to qualified persons who wish to pursue science as a career, and disseminates scientific knowledge and information. It also maintains a National Register of Scientific and Technical Personnel in the country. In general, the Council is the chief vehicle of Government's policy for the promotion and co-ordination of scientific and industrial research in India.

Finance

The activities of the Council are mainly financed by the Union Government. Besides other sources of income such as income from royalties and premia on processes leased out, sale of publications, fees and charges levied for consultation, testing, etc., the Council receives gifts of land, buildings and finances from State Governments and others and donations from industrialists. The recurring expenditure of the Council stood at Rs. 2.67 crore during the year 1957-58 and the estimated capital expenditure for the same year stood at Rs. 1.16 crore.

Administration

The Council is administered by a Governing Body with the Prime Minister as President and the Minister for Scientific Research as

Vice President Other members include prominent representatives of science, industry and Government. The Governing Body is advised by a Board of Scientific and Industrial Research consisting of emment scientists, industrialists and others. The Board, in 115 turn, 13 assisted by a number of research and other advisory committees.

National Laboratories

Since the advent of Independence, a number of national laboratories and institutes have been set up by the Council at various centres in the country. A list of these is given in Table 42

Plans are under way for the establishment of a Central Mechanical Engineering Retearch Institute in eastern India and a National Aeronautical Research Laboratory at Bangalore

Shonsored Resea ch

Through a liberal system of grants in ad, scientists in other research laboratories and universities are enabled to puruse fundamental and applied research and develop their own apenal fields. The research schemes sponsored by the Council cover a very wide variety of subjects including various branches of physics chemistry technology and engineering, dealing with not only fundamental problems but also problems concerning processing of raw materials and utiliation of commodities. There are, at present, more than 300 such schemes in progress in over 70 research centres in the country. Apart from the results achieved, the schemes provide opportunates of training for young research workers and the development of active centres of independent research work.

An important item of work during the year was the inauguration of a systematic and integrated programme of investigations for the International Geophysical Year

Priot Plant

Lately, there has been greater emphasis in the national laboratories on pide plant investigations leading up to actual production. An experimental coke oven plant has been set up at the Central Fuel Research Institute Jealgora and a piol towshaft furnace a being set up for the production of iron without the use of coking coal at the National Metallurgial Laboratory, Jamshedpur

Liawost

Lasson between treastch and industry hist been strengthened by the establishment of regional offices for industrial lasson at Bombay, Calcutta and Madras A committee has been set up to consider details of joint action by the research laboratories on the one hand and the Development Wing of the Ministry of Commerce and Industry on the other, in regard to bepreal profilems concerning industrial development.

The Council of Scientific and Industrial Research maintains a Directorate for dissemination of scientific information addressed to various types of readers. The Indian National Documentation Centre at Delhi is also maintained by the GSIR.

Some Achievements

A survey of the coal resources of the country by the Central Fuel Research Institute has led to the discovery of large reserves of coal suitable for

coking and blending, besides helping coal-producing and coal-consuming industries.

Investigations on the washing possibilities of various types of coals have shown that by judicious processing in coal washeries, it is not only possible to provide the coals required for the iron and steel industry, but also to obtain products utilisable for power generation and manufacture of chemicals and fertilisers.

Studies on the sintering characteristics of iron ore fines of Madhya Pradesh have shown that the fines can be employed for steel production after processing. Studies on the L.D. process have revealed that Indian pig irons can be successfully processed in one step to give steel. Noteworthy among other projects studied in the National Metallurgical Laboratory is the one relating to the replacement of nickel in stainless steel by manganese. The results of beneficiation studies on low-grade manganese ore available as dumps at pitheads in manganese mines are of great value to the industry. Useful work has been done in the beneficiation of chromite, wolfram, graphite and uranium ores.

Studies directed to the production of refractories have shown that fosterite and sillimanite can be profitably utilised as raw materials.

The Regional Research Laboratory, Hyderabad, has developed processes for the production of active carbon of high grade.

Two processes, namely, production of manganese sulphate from low-grade manganese ores and cuprous oxide from copper scrap, have been leased out for commercial development from the Central Electro-Chemical Research Institute, Karaikudi.

Cheap grain substitutes with good nutritive value, based on indigenous materials, have been developed at the Central Food Technological Research Institute, Mysore. A protein-rich multi-purpose food, which can be used with advantage along with other foods to correct deficiencies in proteins, minerals and vitamins, has been formulated from groundnut flour and pulses.

The Central Leather Research Institute has undertaken a series of demonstrations of improved tanning processes developed at the Institute for the benefit of tanners. It has successfully replaced wattle bark by indigenous tanstuffs, and a process for preparing tanning extracts has been worked out. A number of industrial leathers and tanning auxiliaries have been produced in the Institute.

A light-weight, multi-cellular material with excellent heat insulation and mechanical strength properties known as Foam Glass has been produced by a process developed at the Central Glass and Ceramic Research Institute, Jadavpur (Calcutta).

Investigations carried out at the Central Building Research Institute have shown that bricks of good quality can be produced from black cotton soil.

The method of all-weather road construction in which locally available soil and aggregates are utilised, developed by the Central Road Research Institute, New Delhi, is now being tried in some States as pilot plant projects.

A batch process for the production of table salt from crude Sambhar salt has been developed at the Central Salt Research Institute, Phavnagar

The National Botanical Gardena, Lucknow, has collected a large number of plants of economic and medicinal value from various prits of the country the distribution of economic plants is being correlated with topography and other edaphic factors

MUCLEAR RESEARCH AND ATOMIC ENERGY

Nuclear research is of recent origin in India. Pioneering work in this field was done by the Tata Institute of Fundamental Research, Bombay, which carries on Indiamental research and advanced study in the field of audient physics and mathematics. It is also an important centre for cosmic ray research and has made notable contributions to the theory of elementary particles. The Institute is entrusted with the training of personnel in the field of Atomic Length.

Another institut on connected with nuclear research is the Institute of Nuclear Physics Calcutta, which was founded by the late Dr. Meghnad Saha, F. R.S., and was formally inaugurated in 1920.

Alomic Energy Commission

A decision has recently been taken by the Government of India to tablish an Atomic Energy Commission with full executive and financial powers. Headed by the Secretary to the Government of India in the Department of Atomic Energy, the Commission will be responsible for formula in policy preparing the budget of the Department and implementing Government's policy in all matters concerning atomic energy.

Department of Atomic Energy

The scientific aspects of the work entrusted to the Department under the Atomic Energy Act of 1948 are carried out by the Atomic Energy Exabilishment and the Atomic Minerals Division

The Atomic Energy Establishment, Trombay, is the chief centre for research and development in the field of atom cenergy and consists of three main groups—the Physics the Chemitry and the Linguistering groups, in addition to the Boology, Medical and Health Divisions.

The more important functions of the Atomic Minerals Division are solutional survey, prospecting exploration and mining of minerals used in the production of atomic energy, (b) working and development of atomic minerals on an industrial scale, (c) procurement of atomic minerals,

India's first atomic reactor "Apiara", which is of the swimming pool type went into operation on August 4, 1956. Designed, engineered and built entirely by Indian personned except for the fuel elements which were obtained on base from the U k..., it is the first reactor to go into operation in Asia outside the U.S.S.R.

Work is also in progress on a reactor of the Canadian NRX type, which has been given by the Government of Canada as a gift to India under the Colombo Plan This reactor is expected to go into operation about the end of 1953

A third reactor which will enable the study of the effect of different lattices, shapes and sizes of fuel elements, mixed lattices containing uranium or plutonium and thorium is also under construction.

Assisted by a Board of Research in Nuclear Science and Advisory Bodies for Chemistry, Physics, Cosmic Rays, Biology and Medicine, the Department has been providing grants-in-aid for work on specified research projects at various university laboratories and research institutions. Special mention may be made of the Physical Research Laboratory, Ahmedabad, the Bose Institute, Calcutta and the Indian Institute of Science, Bangalore.

On the industrial side, it is proposed to produce all the materials required for the full atomic power programme. The Indian Rare Earths (Private) Ltd., established in August 1950, has set up a plant at Alwaye which processes monazite sands and produces rare earth chlorides and carbonates as main products and trisodium phosphate as a by-product. The Thorium Uranium Plant of the company at Trombay treats the residual cake which is left over after the rare earth content of monazite has been extracted.

The Travancore Minerals (Private) Ltd., was set up in October 1956, to take over the mineral sand industry of South India.

A small uranium plant which will turn the uranium salt into reactor grade uranium metal is being constructed at Trombay and is expected to go into operation by the end of 1958. A small plant for the fabrication of fuel elements is in the course of construction. A pilot plant for the extraction of uranium from copper tailings is in operation in Ghatsila. Heavy water will be produced in quantity as a by-product at the fertilizer plant which is being built at Nangal. It is also intended to set up a pilot plant for producing beryllium oxide of nuclear purity and sintering it into bricks. Studies are also in progress for the erection of a plant to produce automatically pure graphite.

OTHER DEPARTMENTAL RESEARCH ACTIVITIES

There are eleven Hydraulic Research Stations under the Central Board of Irrigation and Power. The Central Water, Power and Irrigation Research Centre, Khadakvasla (near Poona), is the pioneer hydraulic research station in India.

A Research and Development Directorate has been set up under the Ministry of Communications (Directorate-General of Civil Aviation). It is concerned with type certification, manufacture of aircraft and development of specifications for aircraft materials.

The Forest Research Institute, Dehra Dun, conducts research in the utilisation of timber for constructional purposes.

The All India Radio maintains a research unit in New Delhi to investigate problems relating to the propagation and reception of radio waves and the design and performance of radio receivers.

The Railway Board has established a research centre at Lucknow with sub-stations at Lonavla and Chittaranjan to investigate problems referred to them by the railway workshops and the Central Standards Office (Railways).

The prol lems of road development and road materials, highways and bridge engineering ports and harbours etc., are dealt with by the Roads Organisation functioning under the Minutry of Transport

The Indian Standards Institution, functioning under the Ministry of Industries lays down standard specifications for materials and products

OTHER INSTITUTIONS

A number of research organisations financed by private endowments and Governmental assistance are engaged in the feld of scientific research. The more important of these are dealt with in the following paragraphs.

The Bose Institute, Calcutta, is engaged on research in physics, chemistry plant physiology, plant breeding cytogenetics, nucro-biology and zoology

The Birbal Sahni Institute for Palaeobotany, Lucknow, carries on research in the fossil flora of India and related problems

The Indian Association for the Cultivation of Science, Calcutta one of the oldest research organisations in the country, conducts post-graduate research in fundamental and applied aspects of physics and chemistry

The Indian Institute of Science, Bangalore, founded in 1909, provides for advanced instruction and conducts original investigations in all branches of scientific knowledge

The Physics Research Laboratory Ahmedabad is a centre for research in atmospheric physics, cosmic rays electronics and theoretical physics

Co-operative research associations for the investigation of problems per lang specifically to industry have been brought into existence. Associations of this type have affectly been formed by the Ahmedabad textile in justry the silk and art s lk m lis of Bombay and the jute mills of Calcutta. An association for the rubber industry is thely to be set up soon

The Shri Ram Institute for Industrial Research in Delhi renders valuable research service to industrial concerns

Several colleges universities and research institutions provide courses of study and research facilities in the various branches of science.

MEDICAL RESEARCH

In recent years med cal research in India has gained considerable momentum. Problems relating to the control and cure of diseases, specially those peed at 10 Ind and mante conditions and environment are recovering attention in med cal college and specialised institutions dealing with medical research. India an research workers have made notable contributions to the study and chemotherapy of diseases particularly malaria, leprosy, kalazar, fibriars and cancer.

The Indian Council of Medical Research founded in 1912, has contributed greatly to the fostering and co-ordination of medical research in India.

Apart from medical colleges and attached hospitals each specialising in some branch of research the country has a number of specialised institu-

tions. The All India Institute of Hygiene and Public Health, Calcutta, provides training in the use of preventive and social medicine for diseases peculiar to India and ascertains how the results of pure and applied research can be utilised for promoting medical protection and positive health. The School of Tropical Medicine, Calcutta, carries out research in diseases peculiar to tropical areas.

The King Institute of Preventive Medicine, Guindy, Madras, conducts research in and prepares bacterical vaccines, sterile solutions and therapeutic sera.

Research in tuberculosis and other chest diseases is in progress at the Vallabhbhai Patel Chest Institute, Delhi. Studies of the morphology of the tubercle bacilli and the effect on them of the different drugs constitute a special feature of its investigations.

The Lady Willingdon Leprosy Sanatorium at Chingleput and the Silver Jubilee Children's Clinic at Saidapet have been taken over from the Madras Government and converted into the Central Leprosy Research Institute.

The Haffkine Institute, Bombay, undertakes large-scale manufacture of vaccines, sera and other biological products and carries out investigations involved in their manufacture. It has been functioning as the chief centre for investigations connected with the prevention and treatment of plague. The scope of the Institute's work has been enlarged to cover, amongst others, the problems of nutrition, malaria and virus diseases.

Investigations on cancer are carried out at the Indian Cancer Research Centre, Bombay, Statistical surveys of the incidence of cancer in India have also been undertaken by it.

Investigations in the Central Research Institute, Kasauli, relate to problems of microbiology, scrology and biochemistry. The Institute maintains a pathological museum.

The Pasteur Institute located at Coonoor is engaged on research in rabies, influenza, anti-venom serum, tropical eosinophilia and serological reactions.

The activities of the Central Drugs Laboratory, Calcutta, centre round biological and chemical assays of drugs. The Laboratory maintains a herbarium and tenders technical advice to concerns manufacturing drugs.

AGRICULTURAL RESEARCH

The Indian Council of Agricultural Research established in 1929 sponsors research in both agriculture and animal husbandry in institutions belonging to the Central and State Governments, the universities and other institutions.

The Indian Agricultural Research Institute, Delhi, is the oldest institution devoted to research in all aspects of agriculture. It has well-equipped laboratories and extensive farms for carrying out large-scale cultural investigations on food crops.

The Indian Veterinary Research Institute, Izatnagar, deals with veterinary diseases and their cure, while the Indian Dairy Research Institute,

Bangalore, looks after darry research The Central Rice Institute and the Central Potato Research Institute devote themselves to problems of research relating to rice and potatoes respectively. The Institute of Plant Industry, Indoor is engaged in evolving improved varieties of a number of agricultural commodities.

A large number of commodity committees devote themselves to research in specific commodities such as cotton sugarcane, coconut, tobacco, oilsedis, arceanut and lac. The Indian Central Cotton Committee has a laboratory for research in cotton technology at Bombay and the Lac Research Institute is located at Ranch (Bhair).

Although it does not undertake research, the activities of the Directorate of Plant Protection and Plant Quarantine under the Ministry of Agriculture, help research in many ways

The Central Manne Fuhenes Research Station Mandapam, carries out biological investigations in edible fish found in the coastal waters of the country. These include the mackerel, the sardine and marine prawis Research stations are to be set up in Bombay, the Gulf of Kutch, Visakhapatam and the Andamans.

The Central Inland Fuhrers Research Station Calcutta deals with mindin fish—setuanner reverse and lacuturine and pond fish. The work of the Institute has to far been confined to fish and fisheries of the Ganga and the Mahanadh basins but the scope is to be enlarged to include the edible fish of ponds lakes and reservoirs. Problems of water pollution and their effect on fish are also to be unvestigated.

CHAPTER XI

HEALTH

The figures given below, based on data available in registers of births and deaths, reflect the improvement in the general health of the people since 1947.

TABLE 43

	1947	1954	1955
General death rate per thousand of population Infant mortality rate Incidence of deaths per thousand of population on account of:	19.7 146	12.5 113	11.7
(i) Fevers (ii) Small-pox (iii) Plague (iv) Cholera (v) Dysentery and diarrhoea (vi) Respiratory diseases *Expectation of life (in years)	10 8 0 1 0 3 0 4 0 8 1 5 26	6 4 0 1 0 0 0 07 0 6 1 1 32	4 8 0 1 0 0 0 03 0 6 1.3

Health programmes are the responsibility of State Governments, but certain programmes relating to malaria control, filaria control, family planning and such fields as water supply and sanitation, control of communicable diseases and expansion of training facilities have been initiated and supported by the Centre under the two Plans. The general aim of health programmes under the second Plan is to expand existing health services, to bring them within the reach of all people and to promote a progressive improvement in the level of national health.

PREVENTION AND CONTROL OF DISEASES

-Malaria

The anti-malaria measures undertaken in the country since the twenties of the present century touched only a fraction of the estimated 20 crores of people exposed to malaria. The need for a well-conceived, integrated nation-wide scheme to fight the menace was met by the launching of the National Malaria Control Programme in 1953. The Programme is being implemented with the active participation of the State Governments as well as with the assistance of the US Technical Co-operation Mission. The Malaria Institute of India, which co-ordinates the implementation of the programme and distributes supplies, is responsible for research and for the training of staff in methods of malaria control.

At the beginning of 1957-58, about 13.5 crores of people were given protection and 174½ malaria units out of an allotted 200 units were formed and functioning.

A recent study conducted by the Malaria Institute revealed that the mortality rate due to malaria declined from 17.2 per 10 lakh of population in 1951-52 to 12.7 per 10 lakh of population in 1955-56, resulting in a corresponding fall of 67.7 per cent in the consumption of anti-malarials.

In conformity with the experience of other countries, it has been decided to convert the National Malaria Control Programme into the National Malaria Eradication Programme with effect from April 1, 1958. The US Technical Co-operation Administration and the WHO have agreed to assist the Programme during 1958 59 with financial help amountains to 8 7 million and 15 million adollars respectively.

Filana

The National Filaria Control Programme, launched in 1954-55, consists of (a) mass administration of drugs in filarious communities, and (b) anti-mosquito measures. Twenty two survey units and 46 control units have been allotted to the different States. Surveys covering a population of about 160 lakh in the participating. States other than West Bengal and Ansant are in progress. Mass therapy has been administered to about 10.6 lakh persons and 3.66 lakh houses have been sprayed with Dieldrin. A centre for practical demonstration and field training has been established at Ernakulam.

Tuberculosis

It has been estimated that nearly 25 lakls of people suffer from the translation of the suffer of the annually About 90 to 100 erore man daw are lost every year owing to the incidence of this disease. Concerted measures have been taken to combat and control the menace, the more important of which are deals with in the following paragraph.

The BCG vaccination programme, started in 1948 with the help of the International Tuberculosis Campaign and later of the WHO and the UNICEF, is meant to extend protection to a susceptible population of 12 crores especially those below 25 years of age One hundred and forty must etchnical teams, each consisting of a doctor and six technicians, are engaged in field work. By the end of December 1957, over 10 crores of persons were tested and about 3.5 crores of them saccinated. Simultaneously, the assessment of the efficacy of BCG has been under way since 1954.

Four centres for demonstrating the technique of TR control and providing training to medical and questiary personnel have been established at New Belhi. Patina. Trivandrum and Madera Modier will start functions shortly at Nasgur. Three more much centres will be set up during 1958-99. Training in also imparted at other minitutions such as the Vallabhiban Partel Chest Institute at Delir minitutions.

As shown in the following table, there was a considerable increase in the number of TB hospitals, sanatoria and clinics and of the beds therein during the petrod 1930 to 1936

TABLE 44
TB HOSPITALS, SANATORIA AND CLINICS

	t950	1956		
Sanatoria TB hospitals Clinica TB warda Beds	49 35 110 116 20,371	69 71 174 145 22,138		

Under the second Plan, it is proposed to provide 4,000 additional beds, mainly for the segregation of patients living in overcrowded homes in urban areas.

The number of health personnel working in TB institutions in 1955 was: doctors 921; nurses 770; health visitors 104; social workers 7; X-Ray technicians 55; laboratory technicians 71 and general personnel 2,681.

There are 15 after-care colonies in India where ex-patients are rehabilitated after they are cured. Eight such colonies will be set up during the second Plan period. Approval has already been accorded to the establishment or upgrading of at least one after-care and rehabilitation centre at Delhi, Madras, Lucknow, Amargadh (Bombay,) Poona and Dhubulia (West Bengal).

A five-year national programme based on the recommendations of a technical committee, of which Dr. P.V. Benjamin was convenor, has been formulated. This was in pursuance of the recommendations of the Central Council of Health for tackling the problem on a national emergency basis.

A countrywide survey was started in September 1955 under the auspices of the Indian Council of Medical Research. The New Delhi Tuberculosis Centre, New Delhi, the All-India Institute of Hygiene and Public Health, Calcutta, the Tuberculosis Centre, Patna, the Tuberculosis Centre, Trivandrum, the UMT Sanatorium, Arogyavaram, Madanapalle, and the Tuberculosis Clinic, Hyderabad, are participating in the survey work. The Delhi, Madanapalle, Trivandrum and Hyderabad units have completed work in their zones. The Patna unit has also completed the survey except for two inaccessible blocks in Patna City.

A TB Seals Sale Campaign is being conducted and BCG Day observed every year to focus the country's attention on this menace. Conferences of TB workers and of those connected with the BCG campaign are also being held periodically to harness the experience of the field workers in combating the disease.

The Tuberculosis Association of India is the largest voluntary organisation in the country, engaged, since its establishment in 1939, in stimulating anti-tuberculosis activities in a scientific and co-ordinated manner. It assists the authorities to combat the disease and provides assistance through the Tuberculosis Workers' Conferences, the Secretaries' Conferences, the technical committees and forums which bring together State officials and voluntary workers. It also runs several institutions which provide training facilities for TB personnel and demonstrate advanced methods in the treatment of TB cases.

Leprosy

The number of leprosy cases in India was estimated in 1953 at about 15 lakhs. Andhra, Assam, Bihar, Madhya Pradesh, Madras, Kerala and certain parts of Uttar Pradesh and Bombay are areas of high incidence.

Under the Leprosy Control Scheme, started during the first Plan period, four treatment and study centres (one each in Madras, Madhya Pradesh, West Bengal and Uttar Pradesh) and 52 subsidiary centres have

been sanctioned in 12 States and Union Territories. The subsidiary tentres provide for mass treatment of all cases, detection of cases in the early stages of welction and their tentiment and health education of the public. The treatment and subsidiary centres carry out, in addition, a detailed survey to study its epidemiology and assess the results of subhone therapy. A composite programme for establishment of 100 subsidiary centre, upgrading of leprony claims and hospitals provision of facilities for treatment of leprony cases in the NES blocks and training of medical personnel has been neducided in the second Plan.

The Central Leprosy Teaching and Research Institute at Chinsleput provides treatment to indoor and outdoor patients at its two hospitals—the Lady W llingdon Leprosy Sanstorium, Chingleput, and the Salver Jubilee Children's Clinic at Saidapet. The Mobile Epidemiological Unit of the Institute is usuing 15 centres covering 200 village.

The Mission to Lepers which was started as early as 1875 is the most important of the voluntary organisations engaged in ann leprosy work. The Hind Kusht Nivaran Sangh and the Gandhi Memorial Trust are also done valuable work in this field.

Lenereal Diseases

It has been estimated that five to seven per cent of the population suffer from spihlus in the States of Bombay, Madras and West Bengal The hilly tracts extending from Aashmi to Assam also show a high nucleance. Cademic spihlus has also been noted Yaws is found in a few districts of Orsian Madhya Pradesh. Madras and the former Hyderabard State. West Bengal and Himachai Pradesh have full time VD control officers. Pilot projects for the control of yaws are in progress in Madhya Pradesh, Orsian and Andrea.

A scheme which provides for the establishment of 8 VD clinics at State headquarters and 75 at the district level and for the training of medical and auxiliary personnel has been included in the second Plan

Influenza

An influenza centre was opened in 1950 at the Pasteur Institute, Coonoor A pilot plant for the production of influenza varus vaccine has been set up there.

Cancer

Problems relating to cancer have been under investigation at the Indian Cancer Research Centre, Bombay, since its establishment in 1952. The Chittaranjan National Cancer Research Centre, Calcutta, was taken over by the Central Government in April 1957. It is proposed to encourage Inther research in cancer by establishing some new cancer wards or units in the existing hospitals in the country. The Government of India took over the Tala Memoral Hospital, Bombay, in April 1957, in April 1957.

NUTRITION AND PREVENTION OF FOOD ADULTERATION

Disability resulting from nutritional deficiency is a major public health problem all the world over Dietary and nutrition surveys conducted in India s nee 1935 here revealed quantitative as well as qualitative deficiency in the diet of the Indian people. The estimated daily requirements of an adult person vary between 2,400 and 3 000 calories according to the nature of work. But an average Indian diet, according

to Dr. Aykroyd, formerly Director of the Nutrition Research Laboratories, Coonoor, contains only 1,750 calories. It also lacks essential food elements like proteins, fats, minerals and vitamins.

The general raising of dietary standard is largely an economic problem and is linked up with the development of Indian economy. In the meantime, however, several measures have been taken to meet nutritional deficiency of certain vulnerable sections of the Indian population, such as expectant and nursing mothers, school children, industrial workers, etc. The measures taken include school feeding programmes, distribution of skimmed milk, supply of food yeast as a supplement to the Indian diet and manufacture and popularisation of cheap but nutritious food.

Skimmed milk received from UNICEF is being distributed to an increasing number of persons, and 3,84,600 persons received supplies through maternity and child welfare centres and hospitals during 1955, while the number of beneficiaries among school children during the same period was estimated at 35,35,000. The States of Andhra Pradesh, Bombay, Kerala, Madras, Uttar Pradesh and West Bengal have been implementing programmes of school feeding for some time past. Under this scheme, children in the primary and elementary schools are supplied milk and in some cases nutritious snacks such as fruits, roasted gram, etc. The Madras Corporation provides school meals to mal-nourished children. Supplements like vitamin tablets and cod liver oil are distributed to under-nourished children in some States. Industrial canteens have been established in big industrial cities like Bombay, Calcutta, Madras and Hyderabad, where workers are provided with tea and snacks; in others meals are supplied on the premises.

Consumer trials to assess acceptability of food yeast as a supplement to Indian diets have been conducted in Iabour colonies in Delhi and certain rural and urban areas in the States of Madras, Uttar Pradesh and West Bengal. The results indicate that food yeast at the rate of ½ oz. per head per day is acceptable to some people and results in marked improvement in their health. The Central Food Technological Research Institute, Mysore, has succeeded in producing a cheap but nutritious multi-purpose food. Two ounces of this food cost about 1½ annas and contain proteins, vitamins and minerals in sufficient quantity. Several industrial canteens as well as canteens run by the Southern Railway and other leading firms are using this food.

While research in nutritional problems is carried out at the Centre, mainly under the auspices of the Indian Council of Medical Research, regional dietary and nutrition surveys are undertaken in the States. The ICMR runs the Nutrition Research Laboratories at Coonoor and also promotes special schemes of research in nutritional problems at universities and other institutions. There are research units in Calcutta, Bombay, Bangalore and other cities.

The Nutrition Advisory Committee

The Nutrition Advisory Committee enjoys the status of a national organisation. Established in 1938, it consists of 10 experts, including the Chairman. The Committee's recommendations for nutrition policies during the second Plan period fall into the following broad categories:

- (i) Protection of vulnerable groups of the population;
- (ii) Control of specific nutritional diseases;

- Organisation of nutrition work as an integral part of the work of the State Health Departments, and
- (10) Nutrition education as part of general health education.

Nutration Research Laboratories

Research in problems of nutrition has been under way in India since the beginning of this century. The Nutrition Research Laboratories were established in 1929. The functions of these Laboratories are as follows:

- to carry out researches in all aspects of human nutrition and allied sciences,
- (ii) to train workers in nutrition, both for public and clinical nutrition work and for a career of research in nutrition;
- (ni) to prepare sustable educational material for the public; and
- to advise public organisations and State and Central Governments on matters pertaining to nutrition whenever called upon to do so

A special nutrition section was organized in 1943 in the Hygiene and Pathology Branch of the Medical Directorate at the General Head-quarters, Ministry of Defence Another nutrition section was set up in 1913 in the Ministry of Food In November 1947, the Ministry of Health appointed an adviser on nutrition Nutrition centres are also an Kerala, Madiya Pradesh, Bihar, Bombay, Kerala, Madiya Pradesh and West Benezil

Prevention of Food Adulteration

The State Acts empowered local authorities to take action against those expossible for food adulteration. Although adulteration of food was practised on a wide scale, no effective measures were taken by these bodies. There was need to tighten up measures against offenders. Accordingly, Parliament adopted the Prevention of Food Adulteration Act, 1954, which provided for deterrant punishment to offenders. The Act came into force throughout the country, except Jammu and Kashimr, on June 1, 1935. The Charles of the Contral Committee for Food Standards and the Duple August 1950 prosecutions were launched under the Act Central Food Laboratory, envisaged in the Act, were inaugurated on June 1, 1935, and they advise the Central and State Governments on matter arming out of the administration of the Act.

WATER SUPPLY AND SANITATION

At the beginning of the first Plan period, 128 towns with a population of 50,000 and over, 60 towns with populations between 30,000 and 50,000 and 210 towns with smaller populations had protected water supply as extended that only about 25 per cent of the urban population was severed by protected water supply About 450 lakli people in towns beked such supply and over 500 lakh people were without severge facilities.

National Water Supply and Sanitation Scheme

Two hundred and fifty-five water supply schemes and dramage schemes for urban areas and 133 for fural areas were approved for execution utilities end of March 1956 under the scheme faunched by the Union Covernment on a national basis in 1954. The programme was hampered

by the late start as also by lack of technical personnel and difficulties in the supply of equipment.

A sum of Rs. 28 crore has been provided in the States' second Five-Year Plans for rural schemes, the Centre contributing by way of grants-in-aid Rs. 85 lakh and Rs. 72 lakh during 1956-57 and 1957-58. For the urban areas, the Plan provides for an expenditure of Rs. 30 crore in the Central Plan and Rs. 23 crore in the States' Plans. A sum of 6.425 million dollars has been made available for the implementation of the scheme by the U.S. Government.

The Plan also envisages training of public health engineering personnel for implementing the programme. Training of 30 engineers in a ten-month course and of 90 engineers and 120 engineering subordinates in a three-month course as also of 120 plant operators and 30 sanitary inspectors has been proposed.

The Central Public Health Engineering Organisation has been set up for helping State Governments in the preparation and execution of their schemes and for giving technical advice and guidance. Three foreign experts, provided by the TCM, are associated with the Organisation.

MEDICAL RELIEF AND SERVICE

Medical relief and service is primarily the responsibility of the States. Certain charitable institutions also participate in the provision of medical relief. Table 45 shows the position in regard to the number of hospitals and dispensaries, the number of patients treated by them and the expenditure involved in their maintenance for the years 1947 to 1955.

TABLE 45
HOSPITALS AND DISPENSARIES: PATIENTS TREATED AND EXPENDITURE

Year	Number of hospitals and dispensaries	Number of patients treated	Expenditure (in rupees)
1947 1948 1949 (a) 1950 (a) 1951 (a) 1952 1953 (a) 1954 1955 (b)	3,825 4,383 5,509 4,319 5,564 9,497 9,600 9,806 9,833	4,30,19,772 5,47,68,123 8,53,53,125 6,66,71,549 8,24,90,434 11,01,98,788 11,68,69,535 11,34,70,494 12,67,60,302	4,63,84,083 7,61,41,243 10,86,08,937 10,85,39,506 12,25,71,610 21,80,07,223 21,59,07,595 22,75,87,535 30,63,45,533

Contributory Health Service Scheme

The Contributory Health Service Scheme, which came into of central Government employees and their families. The staffi of ten autonomous and serves over 4 table of Central Government employees and their families. The staffi of ten autonomous and semi Government organisations and their families have also been admitted into the Scheme. The contributions are based on a gradual scale varying from 50 nP to Rs. 12 according to emoluments. There are now 118 full time medical officers including 26 women doctors and 20 specialists and 397 ancillary staff. The number of dispensaries 17 including 3 mobile dispensaries to serve beneficiaries residing in outlying areas. The total attendance during 1957 was 32,49,211 as compared to 29,62,265 in 1956.

Employees' State Insurance Scheme

The health insurance scheme which provides inter alia medical benefits to industrial workers under the Employees' State Insurance Act, 1948, was first introduced in Delhi and Kanpur in February 1952. It now covers 15 lakh workers in the country. Under the scheme, an insured worker is entitled to receive mehical help at the State dispensaries, his residence and in hispitals. A total of 15 45,794 new and 49,88,011 old cases were treated at various State Insurance dispensaries and clinics of the panel doctors in 1955 56 and 1,86 931 and 14,477 cases were referred to specialists and for admission in the hospitals, respectively. It has been decided to extend the medical benefits under the scheme to families of majored workers.

Colliery and mica workers receive medical help at institutions maintained by the Coal Mines Labour Welfare Fund and the Mica Mines Labour Welfare Fund The private employers as well as the States provide medical relief to their employees

Primary Health Centres for Rural Areas

Seventy four primary health centres were established in National Extension Blocks during the first Plan period under a scheme launched in 1954. Each centre serves the Block area with an average population of 60 000 from where a team of health workers covers the surrounding area and looks after the curative and preventive health needs of the area. About 2 000 such centres will be established during the second Plan period in addition to about 1,000 in the Community Project Areas, 184 of them were already in custence at the end of 1956 57 and 362 were proposed for opening in 1957-38

Two hundred and one maternity and child welfare centres were set up in backward areas in the country with a Central subsidy by 1955-56. The work of these units will be linked up with primary health centres during the second Plan.

Central Health Service

A Service consulting of all Class I and Class II Medical, Public Health and Research post under the Government of India (other than those under the control of the Ministry of Railways and Defence) was constituted in 1995. Selection of eligible candidates has been completed and the Service at initial constitution will consust of about 500 Class I posts and about 420 Class II posts.

INDIGENOUS AND HOMOEOPATHIC SYSTEMS OF MEDICINE

It is an accepted policy of the Government to give all possible encouragement to the indigenous and homoeopathic systems of medicine and incorporate from them contributions of approved value in the existing system of medicine. Several measures have been taken by the Union and State Governments in this connection.

Dave Committee

A Committee under the chairmanship of Shri D.T. Dave was asked to study and report on the question of establishing uniform standards in respect of education and the regulation of practice of Vaids, Hakims and homocopaths. It submitted its report in 1956. The Committee recommended a uniform five-year degree course in Ayurueda and Unani and a five-and-a-half-year degree course in homocopathy. Their other recommendations related to the upgrading of existing educational institutions, the provision of facilities for post-graduate research, the preparation of text books and the creation of separate Faculties for Apurvedic and Unani systems of medicine.

Regarding regulation of practice, the Committee recommended the creation of separate Gentral Councils for Ayurvedic, Unani and homocopathic systems of medicine on the lines of the Indian Medical Council. They have also recommended the creation of two separate Directorates for Ayurcedic, Unani and homocopathic systems of medicine at the Centre and as far as practicable in the States. The Central Council of Health considered the report in January 1958. Being of opinion that under existing conditions it is not possible to lay down a uniform policy, it has recommended to the State Governments to take such steps as are practicable and desirable for the development of Ayurveda and other indigenous systems of medicine. Active encouragement to research has been commended to the Union Government.

Central Institute of Research in Indigenous Systems of Medicine

The Central Institute of Research in Indigenous Systems of Medicine has been functioning since August 24, 1953 at Jamnagar. Its main functions are to promote research in indigenous systems of medicine and train workers in methods of such research. There is a 50-bed hospital and an outpatient department, besides a pharmacy, a museum and a pathological research laboratory in the Institute. Research programmes under income and a second programmes and a second programmes and a second programmes and a second programmes are second programmes. under investigation at the Institute, among others, are: (i) the study of Pandu Roga, Grahani, Jalodar and Amavata cases and (ii) indentification of crude Amazata cases. of crude Ayurvedic drugs, plants and herbs, cultivation of medicinal herbs, etc. A new 'Siddha' unit was started during the year 1956-57. modern section of the Institute investigated and studied diagnosis and treatment in Ayurvedic and Siddha systems of 134 cases from the point of view of modern medicine.

Ad hoc schemes of research in Ayurveda and Unani are also being promoted by grants to States, educational institutions and non-Governmental research organisations.

Uniform Standards in Education.

There are more than 50 colleges and schools for the teaching of the Ayurvedic and Unani systems of medicine in the country, but the methods of tracking the country of the co of teaching, the courses of studies and the standards of examination differ from incident from institution to institution. At its third annual meeting held at Rajkot in February 1916, the C-niral H-alth Council recommended a fiveyear degree course and the prescription of minimum standards in the matter of admits out and curricula A post graduate training centre in Arqueda was started at Jannagar in July 1926

Regulation of Practice

Attempts to regulate practice in the indigenous systems of medicine date from the second decade of the present century By now, State Boards have been set up in almost all States for this purpose.

Homocopsthy

In 1935 the Government of India approved a five-year degree course in homotopathy Under the second Plan, it is proposed to upgrade five custing teaching institutions, prepare a homo-opathic pharmacopora and encourage schemes of research. In some States, Boards for the regulation of practice in homocopathy have also been set up.

DRUG MANUFACTURE AND CONTROL

Drug Control

The Drugs Act and the Drugs Rules are operative in all the States except the States of Rajasthan and Mysore. Steps have been taken in these two States also for setting up the necessary machinery.

Under the Drags Act the Union Government has powers to keep a check on the quality of imported drags. The State Governments are respossible for controlling the quality of drags which are manufactured, sold and distributed in the country. The provisions of the Act were made even more strungent by the enactment of the Drugs (Amendment) Act passed in March 1955. Among other provisions, penalty for offences under the Act has been enchanced to three years' impresonment. All patent and proprietary drugs must declore their formulae on the labels.

The Drugt Technical Advisory Board to advise on technical matters arising out of the administration of the Act and the Drugt Consultative Committee to advise the Central and State Governments with a view to securing uniformity throughout India in the administration of the Act, have been formed

The Central Drugs Laboratory, Calcuita, serving as a statutory institution under the Drugs Act, analyses and tests samples of drugs as are sent to it and performs such other functions as are entrusted to it by the Central and State Governments

Drugs and Magic Remedies (Objectionable Advertisements) Act

This Act which came into force on April 1, 1935 prohibits the publition of objectionable advertisements relating to sexual stimulants, alleged magic cure for venereal discuss and discuss peculiar to women. Import and export of objectionable advertisements are controlled in close insion with the Carlonn and Porial authorines who can, under Section 6 of the Act, intercept articles suspected to contain objectionable advertisements. The Assistant Drugt Camellers at Bentaby Madras Calcutta and New Delh and the Technique of the Primary and Magic Remedies (Objectionable and the Technique 1935 to advase the Collection of Customs Liasson is also maintained with Indian Embassier High Commissions, Legauous and Consulates abroad. Offences under the Act are punishable with six months' imprisonment and/or fine. The Government of India has decided that in view of the importance attached to family planning in the national health programme, advertisements of contraceptives should, however, be permitted.

Drug Manufacture

The BCG Vaccine Laboratory at Guindy in Madras, established in 1948, manufactures enough vaccine to meet the country's requirements and its output is being drawn upon by international organisations like WHO and UNICEF to meet the BCG requirements of South-East Asian countries. It is noteworthy that 4,43,280 ccs. of Tuberculin and 1,93,790 ccs. of BCG vaccine were supplied to indentors in India till the end of November in 1957 and 25,800 ccs. of Tuberculin and 64,560 ccs. of BCG vaccine were supplied to Malaya, Singapore, Burma, Ceylon, Pakistan and Afghanistan.

The Central Research Institute at Kasauli (1906) supplies India's entire needs of vaccine for TAB, cholera, rabies, anti-venom sera, tetanus anti-toxins, diphtheria toxoid and diphtheria anti-toxin. vaccines are manufactured at the Influenza Centre, Coonoor.

The Hindustan Antibiotics Ltd., Pimpri, has already gone into production and produced 140 lakh mega-units of penicillin in 1956. If a 60 per cent expansion programme, which is under consideration, is taken up, the factory will be able to meet almost the entire demand for penicillin in the country and reduce imports worth nearly Rs. 2 crore every year. factory is also to undertake the manufacture of other antibiotics like Streptomycin and Chloromycetin. A well-equipped research laboratory has also been started.

The DDT factory at Delhi went into production on March 25, 1955. Its existing production capacity is one ton per day which is shortly to be raised to two tons. Another factory with a capacity of 1,400 tons per annum is being the factory with a capacity of 1,400 tons per annum is being set up soon at Alwaye in Kerala. When the two factories go into full production, the country's dependence on imports to meet the present requirements of DDT will be considerably reduced.

In pursuance of the recommendations of an expert committee appointed in 1952-53, which were reviewed by representatives of the Central and State C and State Governments in 1955, several measures have been taken for stabilising circles. stabilising cinchona cultivation in India, such as effecting substantial reduction reduction in the import of synthetic anti-malarial drugs, exploring markets for Indian for Indian quinine in foreign countries and evolving a uniform price for quining a uniform price for quinting a u quinine. The Council of Scientific and Industrial Research and the Indian Council of Scientific and Industrial the possibilities of Indian Council of Scientific and industrial Resident of Medical Research are investigating the possibilities of using containing and industrial and investigating the possibilities of using containing and an additional and additional additional and additional and additional additiona using quinine produced in India for purposes other than anti-malarial.

The Haffkine Institute at Bombay manufactures sulpha drugs which rank among the best in the world market. The Imperial Chemical Industries (India) Ltd. product 1000 per (India) Ltd. produces 500 tons of BHC (benzene hexachloride) per year. Annual Control of the con year. Approval for the production of 1,500 tons of BHC per year has been accorded to the True accorded to the Tatas.

The Medical Stores Organisation, having four depots at Madras, Bombay, Calcutta and Karnal, is maintained primarily for ensuring a supply of medical starral. Medical Depots and Factories ply of medical stores of proper quality and approved patterns to Government, semi-Government and certain non-Governmental institutions Over 9 000 regular and a large number of casual indentors draw supplies from these depost

At the factories of the Organisation, a large number of drugs and dressings are manufactured to meet the requirements of both civil and military medical stores depots. There is also a repair workshop at the Madras depot for repairing surrical instruments and appliances.

EDUCATION AND TRAINING

Medical education in general is the responsibility of the States. The Government of India's interest is limited to the promotion of higher studies and specific schemes of research and specialised training.

There are at present 49 medical colleges, 7 dental colleges and 55 other institutions for training in the allopathic system of medicine. Establishment of new medical colleges at Bhopal Jamnagar, Ranchi. Kanpur, Pondicherry, Jabalpur, Hubh and kozhikode was stanctioned during the first two years of the second Plan. In addition to this, expansion of 11 medical colleges so as to admit 100 additional students was also sanctioned.

With a view to giving post graduate training to select doctors, a sheme to upgrade certain departments has been in operation since 1948, and the following instructions have been upgraded so far Institute of Obsteting and Gynacology, Government Hoppital for Women and Children Madras, Institute of Concentration of Covernment General Hospital, Madras, Institute of Annata Health, Bangalor, Indian Cancer Research Certe, Bombay, Vallabhbbat Patel Chett, Indian Cancer Research Certe, Bombay, Vallabhbbat Patel Chett, Bernell Christian Medical College, Vellore, Bernell Covernment General Hoppital Madras, Upgraded Department of Patellatries Madras Medical College, Washapathans, the Department of Patellatries Madras Medical College, Valshapathans, the Department of Patellatries Madras Medical College, Valshapathans

Departments of Social and Preventive Medicine have been started in the medical colleges at Naspur, Dibrugarh, Guntur, Vuaskhapatnam, Trivandrum, Gwalior, Lucknow and Laherasarai and sanction for ther establishment in the colleges at Madras, Jaipur, Calcutta and Utkal has been given

All India Medical Institute

An All India Institute of Medical Sciences, which aims at self sufficiency in post graduate medical education in India, was set up in 1996 under dan Act of Parliament. An under graduate medical college with 121 students and a post-graduate course in the Department of Orthopaedics have already started functioning. Besides the medical college, the Institute will have a dental college, a nursing college, apr graduate teaching centre and a 550-bed hospital.

Specialised Training

Facilities for the training of nurses exist in practically all major hospitals in the country on the nursing colleges at Vellore and New Delhi. Besides, many State and non official organisations like the Andhra Mahia Sabha Madras have organised short term course with the help of grants from the Centre Provision has been made under the second Plan to assist the State Governments in the training of 36,000 dats. There are also

schemes under the second Plan to train 1,700 health visitors as against a target of 600 under the first Plan. The Malaria Institute of India is conducting a training course for health personnel working under the schemes to control malaria and filaria. Students from certain Asian and African countries also received training at the Institute during 1954-55. A training scheme for maternity and child welfare workers is in operation under the auspices of the All-India Institute of Hygiene and Public Health, Calcutta.

Training of Auxiliary Medical Workers

A scheme to train auxiliary medical workers received the approval of the Union and State Governments in 1954. It envisages a two-year course in elementary curative and preventive medicine, minor surgery, sanitation and hygiene, laboratory techniques, health education and, in the case of women workers, also midwifery. Those trained under the scheme will not be allowed to set up independent practice. They are expected to work as aides to the doctors and serve the Government for at least five years.

FAMILY PLANNING

The objects of the family planning programme, as laid down by the Planning Commission, are (i) to obtain an accurate picture of factors contributing to the rapid increase of population in India; (ii) to discover suitable techniques of family planning and devise methods by which knowledge of these techniques can be widely disseminated; and (iii) to make advice on family planning an integral part of service in Government hospitals and public health agencies.

Out of Rs. 497 lakh—Rs. 400 lakh in the Central sector and Rs. 97 lakh in the States' sector—provided for family planing in the second Plan, Rs. 373.25 lakh are for family planning clinics, Rs. 15.75 lakh for training, Rs. 50 lakh for education, Rs. 50 lakh for research and Rs. 8 lakh for Central organisations. About 2,500 clinics—2,000 in rural and 500 in urban areas—will be opened during the Plan period. The pattern of Central grants to the State Governments, local bodies and voluntary organisations in this respect is as follows:

Non-recurring expenditure-100%

Recurring expenditure—as indicated below:

TABLE 47

,

A high power Lamily Planning Board his been constituted at the Centre to formulate family planning programmes. Lamily Planning Boards are also functioning in the States of Andhra, Assun, Bihar, Bombay, Aerala, Mufars Myore, UP, West Bengal and the Union Territory of Humachal Pradesh. The States of Andhra Assum, Bihar, Bombay, Madeas, Mysore, Panjah and Rajsisthan have also appointed full time. Tamily Planning Offi ers. Truining in the technique of family planning is imparted at the Family Planning, and Research Centre at Bombay, the Family Planning, Training Demonstration and Experimental Centre at Raminagram (Mysore) and the All India Institute of Hygiene and Public Health at Calcuta Grants to open recional training centres have been given to the States of Aerala, Madray UP, MP, West Bengal and Punjab Efforts are made to educate public opinion with the help of pamphlets, posters, films, exhibitions, children's days, etc.

Research

Research on contraceptives is being carried on at the Contraceptive Testing Unit, Indian Cancer Research Centre, Dombay, the All India Institute of Hygiene and Public Health, Calcutta and Pharmacology Department, Lucknow University, Lucknow Sustable contraceptives are tested at the Contraceptive Testing Unit and recommended for use in the family planning clime.

CHAPTER XII

SOCIAL WELFARE

PROHIBITION

The Constitution enjoins the State to endeavour to bring about prohibition of the consumption of intoxicating drinks and drugs throughout the country. In December 1954, the Prohibition Enquiry Committee was appointed to suggest a programme and a machinery for the implementation of the directive in the light of the experience of the States in implementing their prohibition policies in the past. The Committee's main recommendation that schemes of prohibition be integrated with the country's developmental plans was affirmed by a resolution of the Lok Sabha on March 31, 1956, which recommended the formulation of a programme to bring about nationwide prohibition speedily and effectively.

At the end of 1956, the area in which prohibition was in force was 32.2 per cent of the total area and its population 39.9 per cent of the country's population. The following table gives the State-wise breakdown of the area and population under prohibition:

TABLE 49

AREA AND POPULATION UNDER PROHIBITION*

States and Terri- tories	Total area (sq. miles)	Area under prohibi- tion (sq. miles)	Percent- age of Col. 3 to 2	Total popula- tion (in lakhs)	Popula- tion of dry areas (in lakhs)	Percentage of col. 6 to 5
Andhra Pradesh	1,05,700	56,693	53.6	312.6	199.0	63.6
Assam	85,062	3,860	4.5	90.4	15.0	16.6

TOTAL	10,56,457	4,16,300	39.4	2,886.3	1,444.1	50.0

^{*}The figures for area and population for reorganised States given in 'INDIA 1957' were provisional and these have now been revised.

Programme and Policy

An interim programme has been formulated by the Planning Commission. While stressing the importance of evolving a common approach, the Commission has left it to each State to fix a triget date and to formulate its policy in accordance with local conditions and erreimstances. Pending a detailed scruting of the proposals made by the Prolibition Figury Commistee, the Planning Commission has commended the following steps to the States.

- (i) Discontinuance of advertisements and other inducements for the use of alcoholic drinks,
- (u) Stoppage of drinking in public premises (hotels, restaurants, clubs) and at public receptions (In applying this rule, care should be taken to ensure that the rights of foreign musions are not affected and foreign visitors and tourist are not put to inconvenience or harasament).
- (iii) The setting up of technical committees to draw up phased programmes with the object of
 - (a) reducing progressively the number of liquor shops both in the rural and urban areas,
 - (b) gradually increasing the number of closed days during the week for liquor shops,
 - (c) reducing the supplies to liquor shops,
 - (d) progressively reducing the strength of liquor produced by distilleries in India,
 - (e) closing of shops in and near specified industrial and development project areas,

 (f) removed of shops to place apply from the main street.
 - (f) removal of shops to places away from the main streets and living quarters in towns and villages,
 - (iv) Taking of active steps to encourage and promote the production of cheap and health giving soft drinks,
 (v) Assistance to private agencies in the organisation of recrea-
 - (w) Prohibition to be made a major item of constructive work in national extension and community project areas and in rural welfare extension projects

Progress

All States of the Indian Union except Bihar, Jammu and Kashmir and West Bengal have taken steps to enforce a phased programme of total prohibition. A Prohibition Board has been constituted in Bihar for preparing a phased programme.

Total prohibition has been enforced throughout the State of Madras and the law recently sufficient by providing fir enchanced penalties and summary trial for prohibition can be supported by the extune wet areas—the Aurangabad (except Fast Khandah distribution) to excuss the became part of the State as a result of the States reorganisation in November 196, will go day from April 1, 1959 in Andriar Praciesh, the administration of prohibition law has been entrusted to the poince department and vigorous step have been taken to effectively implement total prohibition in the area of the former Andriar State. All toddy shops in the Telangana area are to be shirted from populous areas and all opium addicts are to be licensed

The entire district of Kamrup in Assam has been declared a dry area. In Orissa, prohibition has been extended to the Ganjam and Koraput districts, facilitating thereby the effective enforcement of the law in the neighbouring districts of Andhra Pradesh. In the non-prohibition areas of Orissa, steps are being taken to progressively reduce the number of liquor and drug shops and to extend dry days to cover pay days and the two days following, as also national holidays. Legislative measures to strengthen the prohibition law of 1956 have also been taken. In Rajasthan the Legislature will soon take up the Rajasthan Prohibition Bill for enactment.

All toddy shops in the Andaman and Nicobar Islands have been closed permanently and liquor shops closed for five days in the week. The policy of gradual prohibition in Delhi is being continued and steps were taken recently to ban the advertising of liquor, prohibit drinking in public, restrict serving of liquor in clubs, prohibit the sale of drinks to persons under the age of 25, increase dry days to two days in the week and declare national holidays as dry days.

The campaign in favour of prohibition through posters, films, journals, etc., has been intensified with the establishment of the National Committee for the Prevention of Alcoholism. In October-November 1957, the Committee held a conference which was attended by well-known figures in the prohibition movement from abroad as well as by doctors, administrators and social workers. Prohibition weeks continue to be organised and those held during 1957 evoked considerable popular enthusiasm.

In furtherance of the aim to introduce total prohibition of the consumption of opium throughout the country by 1959, a progressive cut of 10 per cent every year in the quota of opium allowed to the States' Excise Departments is being effected. The State Governments in turn have been applying cuts in the quota of opium supplied to licensed vendors. Sale of opium husk as well as its import from outside the State has been banned in the dry areas of Uttar Pradesh. There has been complete prohibition of charas in India since 1946. The sale of ganja has been prohibited throughout Uttar Pradesh from April 1, 1956. The Government ganja store-house in Madras was closed in 1949-50. A permit system has been in force in Bombay since 1947 under which ganja and bhang are supplied to registered addicts from Government depots in restricted quantities. All licenced selling of opium, ganja and bhang has been discontinued in the Kutch and Saurashtra areas. cultivation of ganja and its sale and import have been prohibited in Mysore. In other States, the issue price as well as the retail price of ganja and bhang have been greatly enhanced to discourage their consumption.

A conference called by the Narcotics Commissioner of the Government of India reiterated an earlier decision to stop the oral consumption of opium by April 1959. It also called upon the State Governments to ban the consumption of ganja, charas and other hemp drugs by that date.

WELFARE MEASURES FOR CERTAIN MALADJUSTED GROUPS

Immoral Traffic in Women and Girls

The Indian Penal Code provides for imprisonment up to 10 years and fines (Sec. 366 A, 372 and 373) for the procurement, buying and selling of girls under 18 years for prostitution. Similar penalties have also been prescribed for importing into India girls below 21 years for this purpose. In addition, the following special measures against immoral traffic are in force in

the States

The Bombay Prevention of Prostitution Act (Act XI of 1923) the Madras Suppression of Immoral Traffic Act (Act V of 1930) The Bengal Suppression of Immoral Traffic Act (Act V of 1933) The UP Suppression of Immoral Traffic Act (Act VIII of 1933) The U1' Suppression of Immoral Trailie Act (Act VIII of 1973)
The Yunjab Suppression of Immoral Trailie Act (Act VI of 1933)
The Malhay Fradeth Suppression of Immoral Trailie Act (Act III of 1953)
The Biliar Suppression of Immoral Tr. Fie Act (Act III of 1913)

The Mysere Suppression of Immoral T are not (Act D1 in 1933). The Mysere Suppression of Immoral T aff. Act (Act VIII of 1935). The Travancore Oochin Suppress on of Immoral Traffic Act (Act IV of 1952).

The Saurashtra Prevention of Prostitution Art (Act VIII of 19:2) The Hyderabad Suppression of Immoral ? raffic Act (Act VIII of 1932)

The Ajmer Prevention of Prostitution Act (Act 1 of 1933)

the Ajmer revenuon of Fromtution her vac 1 of 1973)
The Panala Suppression of Immoral Traffic Act (Act II of 2004 Bidram)
The Suppression of Immoral Traffic Act (Jammu & Lashmir Act of 1954)
The Uttar Pradesh Naik Girls Protection Act (Act VII of 1929) The Uttar Pradesh Minor Girls' Protection Act (Act VIII of 1929)

The Bombay Devadas Protection Act (Act X of 1931)
The Madras Devadas (Pre-cution of Dedication) Act (Act XXXI of 1947)

The Madras Act has been extended to the State of Andhra and the Bengal Act to Delhi The Bombay Devadasi Protection Act, 1934, and the Madras Devadasi (Prevention of Dedication) Act, 1947, declare illegal the practice of dedicating women or girls as detadasis. The Uttar Pradesh Naik Girls' Protection Act, 1929, authorises District Magistrates to remove minor eurls of the Naik caste from the custody of their guardians, if it is suspected that such girls are being trained as prostitutes The Suppression of Immoral Traffic in Women and Girls Act, 1956, received the assent of the President

There are several institutions which aim at making good citizens out of fallen women The more important of such institutions are the the Stra Sadanas maintained by the State of Madras The Shradhanand Anath Mahilashram of Bombay, the Good Shepherd Home in Madras, Crispin's Home in Poona, the Salvation Army Home, the Fendall Home and the All Bengal Women's Union Home in West Bengal and the Khushallagh Mission Orphanage at Gorakhpur Out of 80 Homes and about 330 Rescue Shelters which are being opened in various parts of the country with assistance from the Central Social Welfare Board during the second Plan period, some are meant for lodging and reclaiming women and girls recovered from houses of ill repute

Juvenile Delinquents

on December 30, 1956

Children Acts are in force in the States of Andhra Pradesh, Bombay, Madhya Pradesh, Madras, Mysore, Punjab, Kerala, Uttar Pradesh and West Bengal The Bombay Act was extended to the former States of Amer and Delhi The Borstal Schools Acts, which are slightly different in scope, are in operation in the States of Andhra, Bombay, Kerala, Madras, Mysore, Punjab, Uttar Pradesh and West Bengal The Reformatory Schools Act of 1897 has also been enforced in all the bigger States and some Union Territories There are 67 remand homes, 49 certified schools, 7 reformatory schools, & borstal schools and 5 juvenile jails in the country

Besides formal education, vocational training in a number of trades is imparted to the inmates of the three types of institutions referred to above Some of these institutions also provide juvenile delinquents, on their release, with implements and money to enable them to settle down in trades learnt by them while in school Others provide follow-up services inmates of the certified schools are given training in citizenship and democratic living and encouraged to take part in extra curricular activities, such as sports, debates, dramas, music and scouting

Beggars

The Criminal Procedure Code treats vagrants and vagabonds alike and provides penalties under Section 55 (i) (b) and 109 (b). Beggars may be proceeded against under Section 133 as those committing public nuisance. Beggary within railway premises was prohibited by law on February 15, 1941. The following special Acts have been passed to prohibit begging in public places:

The Bombay Prevention of Beggary Act, 1945. The Bengal Vagrancy Act, 1943. The Bihar Prevention of Beggary Act, 1952. The Madras Prevention of Beggary Act, 1945. The Cochin Vagrancy Act, 1945. The Hyderabad Prevention of Beggary Act, 1941. The Mysore Prevention of Beggary Act, 1944. The Travancore Prohibition of Begging Act, 1945. The Bhopal Prevention of Beggary Act, 1947.

Begging is also prohibited in Madhya Pradesh, Punjab and Uttar Pradesh under the respective Municipalities Acts. The Police Acts of Bombay, Calcutta and Madras City also provide measures against begging.

There are institutions in the States for the custody, care and assistance of beggars in their rehabilitation. There are 18 certified institutions with a total capacity for 2,000 beggars in Bombay. West Bengal has 8 beggar homes with accomodation for 2,050. There are 7 similar institutions in Madras, 8 including 3 relief settlements in Kerala and 2 in the Union Territory of Delhi. There is a Beggar Home each in the States of Uttar Pradesh, Madhya Pradesh and Mysore. The inmates of these homes are provided with food, clothing, education, facilities for physical culture and vocational training. The money seized from the vagrants is used for their common benefit such as the purchase of radio sets. Annual sports are a regular feature of the homes. Programmes of bhajans and folk songs are organised. The inmates are taken to places of interest like the zoo and the museum and are treated to cinema shows.

Bal Sahyog

A novel type of vagrant home-cum-training centre is in existence in New Delhi in which the inmates take part in the management of the home. Juvenile vagrants are picked up by contact clubs operating in different parts of the city and are given training in carpentry, tin-smithy, tailoring, spinning, weaving and canning. The home also offers adequate facilities for the education and recreation of the inmates.

CENTRAL SOCIAL WELFARE BOARD

The Central Social Welfare Board, set up in August 1953, is an autonomous body through which funds made available under the Plan by the Government* are distributed to voluntary social service oganisations for "strengthening, improving and extending" the existing activities in the field of social welfare and for developing new programmes and carrying out pilot projects. It is also charged with the task of exploring the need for and the possibility of implementing new welfare activities.

Among the various schemes directly sponsored by the Board are the Welfare Extension Projects, Urban Family Welfare Projects and the training programmes. Welfare Boards, consisting mainly of women social workers and representatives of the State Governments, have also been constituted

^{*} Rs. 4 crore under the first Plan and Rs. 14 crore under the second Plan.

and are functioning in all the States Since its inception the Board has sanctioned Rs 110 lakh by way of yearly grants-in aid to 4,185 institutions and Rs 83 10 lakh as long term grants to 492 institutions

Helfare Extension Projects

A scheme of rural welfare known as Welfare Extension Projects, was launched on August 15 1904 Each of these projects covers a group of about 25 villages and a population of about 20 000 The programme and activities of these projects comprise balwadis (community creches and pre basic schools) maternity and infant health services (including those for the handicapped and the delinquents) literacy and social education for women, arts and crafts centres and recreational activities Care has been taken to avoid duplication of activities conducted by governmental and non governmental organisations in the areas covered by the Welfare Extension Projects

The coverage of these projects between August 1954 and December 1957 is indicated in the table below

TARLE 50 WELFARE EXTENSION PROTECTS

	Number of Welfare Ex ens on Projects	Number of centres	Villages covered	Popula tion cover ed (in lakhs)	Total expends tu e (in lakhs of rupecs)*	CSWBS contribu t on (n jakl s of rupees)

Apr I 1956 to December 1957	133	828	3 715	32	30 00	20 00
TOTAL	430	1 978	9 715	87	62 40	41 60

Weltare Estension	rojects c	t the New	Type			
Apr I 1957 to January 1958	42	588	4 200	20	١	
As est mated at the end of the sec ond Plan pe sod (March 1961)	1,550	13 250	1,19 000	715 00	1 503 00	736 00

The Project Implementing Committee is responsible for the formulation and execution of the programme in each Welfare Extension Project area Each project area is generally divided into 4 or 5 centres of 5 villages each, each centre being under the charge of a trained gram senta, who is assisted by a midwife or a day and a craft assutant The expenditure on each project during the first Five-Year Plan was Rs 25 000 Half of this amount was contributed by the Board as grants-in aid, while the other half was raised from other sources such as the State Governments local bodies and public contributions From April 1, 1957, the Board has undertaken all work relating to the welfare of women and children in the Community Development blocks and most of the welfare extension projects will be established in com-

Exclusive of expend ture met f om local contributions.

[†] This includes both old and new types of projects,

munity development block areas. Each project covers about 100 villages and a population of 60,000 to 70,000.

For the execution of this programme, 1,300 gram serikes, 39 midwives had received training up to the end of August 1957 and 1,045 gram serikes and 254 midwives were under training.

Urban Family Welfare Scheme

A scheme called the Urban Family Welfare Scheme has been sponsored for promoting the welfare of women. Under this, industrial co-operatives are being formed for starting small-scale industries in selected urban areas. Each of these industries will provide employment (mainly at their homes) to about 500 women of lower middle class families. According to an estimate, a woman employed in this way earns between Re. 1 and Rs. 1.50 per day. Five such units benefitting 2,500 families have already gone into production at Delhi, Hyderabad, Vijayawada and Poona. A few others will be set up shortly in Assam, Bombay, Kerala, Mysore and West Bengal, the aim being to set up 20 such units by the end of the second Plan period for the benefit of 10,000 families.

Other Programmes

On the basis of the recommendations of the Advisory Committee on After-care Programmes and of the Social and Moral Advisory Committee, a comprehensive programme for starting 80 after-care homes, at the rate of 5 each for a State, and nearly 330 shelters, at the rate of one in each district, has been formulated. The homes will provide appropriate training and meet other needs of persons discharged from correctional and non-correctional institutions and rescued women and girls and render necessary assistance for their economic rehabilitation. The shelters will receive discharged and rescued persons and send them to the homes, assisting their rehabilitation in certain cases. The following table indicates the progress made in this direction:

TABLE 51

	Number of State homes	Number of District shelters	Number of production units	Number of beneficiaries
From April 1956 to December 1957	31	90	31	10,000
As estimated at the end of the second Plan period (March 1951)	80	330	63	40,000

The Board has formulated three new programmes of social welfare to be implemented during the rest of the second Plan period. One of these is the starting of 100 pilot Welfare Extension Projects in urban areas; the second relates to the provision of facilities to enable women in the age group 25 to 30 years to attain the minimum educational qualifications prescribed for recruitment as welfare workers like *Gram Sevikas*, midwives, primary teachers etc., and the third makes provision for basic welfare services in *Gramdar* villages. All these programmes are to be worked through voluntary welfare organisations, to which grants-in-aid will be made by the Board.

CHAPTER XIII

RELIEF AND REHABILITATION

Of nearly 88 6 lakh d splaced persons from Pakistan who had migrated to India till the end of 1957 47 4 lakhs came from West Pakustan and the rest from East Pakistan While the large scale influx of such persons from West Pakistan came to an end some years are migrants from East Pakistan continued to enter the country in considerable numbers till October 1956, when their entry came to be regulated by a system of priorities in the issue

The ass stance provided by Government towards the relief and rehabilitation of displaced persons till the end of December 1957 and the State wise distribution of the displaced population are shown in the tables below

	41 63 000	46 93 000	83 56 000

DISPLACED PERSONS FROM EAST PAKISTAN

Over 97 per cent of the displaced persons from East Pakistan are concentrated in West Bengal (31.63 lakhs), Assam (4.87 lakhs) and Tripura (3.74 lakhs), the rest being dispersed in Bihar (67,000), Orissa (12,000), Uttar Pradesh (6,000) and Manipur (2,000). 2.64 lakh persons were still being maintained at the end of 1957 in 168 camps located in West Bengal, Bihar, Orissa and Tripura. Unattached women and children, and old and infirm displaced persons were being cared for in 44 homes and infirmaries in the eastern zone with accommodation for about 60,000 inmates.

About 46,000 displaced persons in Bihar have been dispersed to rehabilitation sites and the rest are expected to be settled by the end of 1958. Nearly 4,000 persons still being maintained at the Charbatia Camp in Orissa are also to be dispersed to rehabilitation sites by the end of 1958. Uttar Pradesh and Manipur have practically completed their rehabilitation programme. About 75,000 out of 1,28,000 families in Assam have been provided with rehabilitation assistance and the rest will be resettled during the next two years. In spite of paucity of available cultivable land and limited scope for industries in Tripura, 53,000 out of 83,000 displaced families have been given rehabilitation assistance and the rest are expected to be settled by the end of the second Plan period. West Bengal has already provided assistance to 28,99 lakh persons in their rehabilitation.

The rapid rehabilitation of the camp population under the Land Development Scheme for Rural Rehabilitation, the Dandakaranya and the Raima Serma Valley Scheme is receiving special attention. Homes are being constructed for the unattached, old and infirm who may have to be maintained by Government for a relatively longer time.

To resettle 4.9 lakh families of the displaced persons from East Pakistan, loans to the extent of Rs. 50 erore have so far been advanced. With a view to rehabilitating surplus displaced population in States other than West Bengal, Assam and Tripura, 65 schemes providing for the settlement of 7,834 families on 42,462 acres of land have already been sanctioned involving a cost of Rs. 3.39 erore. Under this scheme, 2,021 displaced families have been rehabilitated in Bihar and Madhya Pradesh. Possibilities are being explored to locate over 2 lakh acres of land for the purpose of rehabilitation in the States of Bombay, U. P., Orissa, Bihar and Madhya Pradesh.

Till the end of 1957, a sum of Rs. 142.67 lakh has been sanctioned as house building loans to the displaced persons in urban areas. The table below indicates the State-wise location and the total number of the residential units constructed:

TABLE 54

		No. of residential units				
State		State		By Government	By D.P.s with the State assistance	Total
Andaman & Nicobar Islands Assam Bihar Manipur Orissa Tripura Uttar Pradesh West Bengal		452 23 676 — — — 1,173 6,039	560 27,290 3,409 607 2,520 73,130 2,73,600	1,012 27,313 4,085 607 2,520 73,130 1,173 2,79,639		
TOTAL	•••	8,363	3,81,116	3,89,479		

In addition, 137 squatters' colonies have been selected for regularisation of which colonies providing for 6 733 families have been regularised. A sum of Rs. 264 48 lakh has been sanctioned for development of 71 urban and rural colonies.

Up to June 1937 about 32 000 persons received training in various arts and crafts and about 6 000 were undergoing training. To provide employment to the displaced persons in development schemes, Contracts Dissions have been set up the one in West Bengal employing about 4 000 displaced persons daily About 2 03 dish displaced persons have so far been placed in employment through the medium of employment exchange. Twenty schemes have been sanctioned for the stung up or expansion of the medium in distinct. These will cost about 100 persons. During 1957 1 Bischemes of small scale industries were sanctioned.

These will cost Rs 15 28 lakh and offer employment to 2 750 displaced persons.

For the education of the displaced students in the eastern region, the opening of 1 529 primary schools 22 secondary schools and 20 colleges has been sanctioned. During 1957, the expenditure on displaced students was estimated at Rs 1469 lakh

With a view to resetting a sizeable displaced population, an area of 80 000 sq miles is being developed on the borders of Andhra Fradesh. Orisis and Madhya Pradesh under the Dandakaranya Scheme It is expected that before the onset of the monsoon, I 000 acres of land will be reclaimed for the purpose of setting up a small colony of 100 displaced families

DISPLACED PERSONS FROM WEST PAKISTAN

Though rehef camps for dualaced persons from West Pakistan have long been closed down about 20 000 unattached women and children and old and infirm persons are still being maintained in homes and infirmaries organised and run by Gowen and and 22.00 such persons maintained in private hories continued to recover activations relief. Over Ris 6 error have been spent on the inauntenance education and technical training of the inmates of these homes and infirmate discation and technical training of the inmates of these homes and infirmate and effort is being made to train and educate the able bodied and young and to disperse others with reha of these homes to State Governments.

About 50 per cent of the 47 40 lakh displaced persons from West Pakastan have been settled on evacuee land and no occupations anollary to been accommodated in evacuee louses and new constructions for the other hard to the set of th

Besides about 2 to lath displaced non agriculturists have been provided with gainful employment in the services and trades and about 90,000

have been given vocational and technical training. An aggregate of Rs. 22.85 crore has been advanced as loans through the State governments and the Rehabilitation Finance Administration to enable the urban displaced population to set up trades and industries. In addition, 85 schemes for medium and small-scale industries have been sanctioned, involving an expenditure of Rs. 1.27 crore. These schemes are expected to open up employment opportunities for 8,700 persons.

A sum of Rs. 1.80 crore was advanced to educational, medical and cultural institutions as graints-in-aid for providing facilities to displaced students. In addition, a sum of Rs. 36.58 lakh was paid as grants to the State Governments for providing financial assistance to displaced students.

COMPENSATION

The Final Compensation Scheme, approved by Parliament in September 1955, replaced the Interim Compensation Scheme sanctioned in November, 1953. Under this scheme, a compensation pool was created out of all evacuee property valued at Rs. 100 crore and a Government contribution of Rs. 85 crore in the shape of Government built property constructed for displaced persons. This pool is being utilised to compensate displaced claimants for the immovable property left behind by them in Pakistan. Proclaimants for the value of Rs. 10,000 and under—accounting for 90 per cent of perty of the value of Rs. 10,000 and under—accounting for 90 per cent of evacuee property and 97 per cent of Government built property is sold to evacuee property and 97 per cent of Government built property is sold to the displaced claimants and non-claimants at the reserve price. The loans advanced towards their purchase are adjusted against their claims. Besides,

the Scheme provides for payment in cash of verified claims up to Rs. 10,000. Since May 1937 cash payment of such claims is restricted to Rs. 1,000, the balance being paid in 4 per cent National Plan Savangs Certificates.

Up to the end of December 1957, a sum of Rt 74 00 erace very paid as compensation to 2 47 lakh claimants. This amount includer Rt 43 37 erore paid in each, its 18 55 crore in 75,100 claimants have been paid the first instalment of public dues in additionable and Rt 11 18 erose by 83 distinction of the result of the result

OTHER KINDS OF RELIEF

Emergency Relief Organisation

A country-wide organisation known as the Emergency Relief Organisation to provide relief in times of floods, famines, earthquakes, etc., is in the process of being established. The Organisation will ensure that

- relief operations are conducted according to plans drawn up ahead of an emergency and, as far as possible, by personnel well trained in conducting such operations,
- (n) emphasis is laid on the principle of self-help so that assistance from outside the area affected by a disaster is reduced to the minimum.
- (iii) each of the interested social welfare agencies is allotted a definite role to play, and
- (w) the district and local authorities, the State Governments and the Government of India take on themselves the responsibility for proper integration of the activities in this respect within their respective spheres

The Organisation, when fully established, will function at the Central, State and district levels The central organisation will implement the emergency relief policy of the Government, co-ordinate the efforts of the States and provide such relief services and supplies as can be arranged only by the Government of India.

The Scheme has been accepted in principle by all the States and Territories. The organisation has been established at the State and district levels in Bombay, Orissa, Punjab, Rajasthan, Delhi, Himachal Pradesh, Manipur, Pondicherry and Tripura, while Bihar, Madras, Mysore and Uttar Pradich have set it up at the State level only.

As part of the Central Emergency Relief Organisator, a training matrite known as the Central Emergency Relief Training radiative known as the Central Emergency Relief Training radiative known been set up at Nagpur and has started functioning. The Institute is writered to by down a basic pattern of training in emergency relief operations for the country as a whole and provides a source of supply of trained personnel in adequate numbers not only for unstructional purposes but also for manning the various relief services envisaged under the Scheme Seven courses of training, each of five week's duration, have so the been completed

Prime Minister's National Relief Fund

Since November 1947, when the Prime Minister's National Relief Fund was founded, a sum of about Rs. 1.82 crore has been used in providing relief to people affected by national clamities such as earthquakes, floods, cyclones, draught, famine, and fire. Relief has also been given to displaced persons from Pakistan. During 1957, the disbursements from the Fund were as follows, leaving a balance of about Rs. 5,19,262:

CHAPTER XIV

SCHEDULED CASTES, SCHEDULED TRIBES AND OTHER BACKWARD CLASSES

The welfare and advancement of certain sections of the Indian population has been made the special concern of the State under the Constitution. It prescribs protection and safeguards for these classes—Scheduled Castes, Scheduled Tribs and other Backward Classes—either specifically or by way of g near lights of cuttens with the object of promoting their educational and economic interests and of removing certain special social disabilities the Scheduled Castes were subject to. These are

- (i) the abolition of "Untouchability" and the forbidding of its practice in any form (Art 17),
- the promotion of the educational and economic interests of these classes and their protection from social injustice and all forms of exploitation (Art. 46).
- (iii) the throwing open of Hindu religious institutions of a public character to all classes and sections of Hindus (Art. 25).
- (w) the removal of any disability, liability, restriction or condition with regard to access to shops, public restaurant, hotels and places of public entertainment, the use of wells, tanks, bathing ghats, roads and places of public resort maintained wholly or partly out of State funds or dedicated to the use of the general public (Art 15).
 - the right to practise any profession or earry on any occupapation, trade or business (Art 19)
- (vi) the forbidding of any denial of admission to educational institutions maintained by the State or receiving aid out of State funds (Art 29).
- (vu) the obligation of the State to consider their claims in the making of appointments to public services and reservation for them in case of inadequate representation (Arts 16 and 333).
- (viii) special representation in Parliament and State Legislatures for a period of ten years (Arts 330, 332 and 334).
 - (ix) the setting up of advisory councils and separate departments in the States and the appointment of a Special Officer at the Cratte to promote their welfare and safeguard their interests (Arts 164, 338 and Fifth Schedule), and
 - (x) special provision for the administration and control of scheduled and tribal areas (Arts 244 and Fifth and Sixth Schedules)

The population of the Scheduled Gastes is now estimated at 5.55 crores as a result of the size of revised lists under the Scheduled Castes and Scheduled Tribes Lius (Modification) Order, 1956. The criminal Tribes number about 40 lakhs, while the number of other backward classes is yet to be family determined.

The State-wise distribution of the Scheduled Castes and Tribes according to the 1951 census is shown in the following table:

MEASURES TO ERADICATE UNTOUCHABILITY

A three-pronged attack—legislative, executive and educational—has been launched to eradicate the evil of untouchability which continues to be practised in some form or the other in certain parts of the country.

The Untouchability (Offences) Act, 1955

This Act, which came into force on June 1, 1955, provides penalties for preventing a person, on the ground of untouchability, from entering a place

of public worship, offering prayers therein or taking watter from a sacred tank, well or spring Penalties are also provided for enforcing all kinds of social disabilities, such as denying access to any shop, public restaurant, public hospital or educational institution, herel or any place of public entertainment, the ute of any road, river, well, tank, water tap, bathing glast, cremation ground, sanitary convenience, tharmhala, sens or musiphthana or utensit kepts much institutions and hotels and restaurants. The Act also presentine penalties for enforcing occupational, professional or trade disabilities or disabilities in the matter of enjoyment of any benefit under a charitable trust, in the construction or occupation of any residential premises in any locality or the observance of any social or religious usage or ecermony

The Act also lays down penalties for refusing to sell goods or render services to a Harijan because he is a Harijan, for molesting, injuring or annoying a person or organisating a boyoott of, or taking any part in the ex-communication of a person who has exercised the rights accruing to him as a result of the aboltion of untouchability.

Higher penalues have been prescribed for subsequent offences. For the purpose of awarding punshinents, incutement or abetiment of the offence has been treated in the same manner as the commission of the offence. The onus of proving innocence has been thrown on the accused. The offences under this Act are cognisable and compoundable.

Campaign Against Untouchability

Since 1954, the Government of India have been guing financial hacking to the movement to craditate untouchability. Both official and non-official agreeies are buring utilized for this purpose. State Governments have unstructed their district officers and their officials, who deal with the public, to stress the need for and urgency of doing away with this sed! "Haripan Days" and "Haripan Wests" are observed in almost all the States to focus public attention and enlist the people's ex-operation in the eradication of untouchability. State and District Advisory Committees have been established to promote co-operation between the Scheduled Castes and other sections of society Publicity media, such as books, pamphlets, handbills, and audio-visual aids have also been present units service.

The assistance and co-operation of voluntary organisations, such as the Hanjan Sevak Sangh, Bhartaya Depressed Claiser League, the Hahjan Ashram of Allahabad, etc., have been obtained in the fight against unntouchability. A sum of Rs 61,50,746, of which Rs 14,77,200 came from the Centre, was given as grants in-aid to these organisations during the first Plan period. The Central grant carmarked for this purpose under the second Plan is Rs 50 lakh with an additional Rs 25 lakh to be spent on publicity through the media of films, press, radio, etc.

Pic Central Government have already sanctuoned Rs 9,22,225 for direct payment to non-official organisations during the year 1956-57. In addition, a sum of Rs 4,50,000 has been provided for the production of flims on the removal of unfouchability Governments for this purpose.

REPRESENTATION IN LEGISLATURES

Under Articles 330, 332 and 334 of the Constitution, seats, proportionate as far as possible to their population in the States, have been reserved for the Scheduled Castes and Tribes in the Lok Sabha and the State Vidhan

Sabhas for a period of ten years after the inauguration of the Constitution. Table 57 gives details of the representation in Parliament and the State Legislatures.

TABLE 57

REPRESENTATION IN THE SERVICES

The manner in which the State carries out its obligation to reserve posts. for them in the public services in case of inadequate representation and to consider their claims consistent with the maintenance of efficiency of administration, has been left outside the purview of obligatory consultation with Public Service Commissions (Art. 320 (4)).

On January 26, 1950, the Union Government decided that 12½ percent of the vacancies for which recruitment is made by open competition on an all-India basis and 16½ per cent of the vacancies to which recruitment is made otherwise, be reserved for the Scheduled Castes. For the Scheduled Tribes, the vacancies are to be reserved at a uniform rate of 5. per cent in both cases. Where recruitment is made on a regional basis, the reservation must be in proportion to the population of the Scheduled Castes and Scheduled Tribes in the region, subject to a minimum reservation of 5 per cent for the Scheduled Tribes.

⁽a) One seat reserved for the Autonomous Districts in Assam.

⁽b) Number prescribed in the new Constitution of Jammu and Kashmir.

To facilitate their adequite tepresentation in the services, the minimum age limit for recruitment has been raised by five years and examination fies have been reduced by three fourth. The principle of reservation will also apply in cases minimum from the promotion is subject to the privating of a qualifying department of the promotion of the properties of the promotion of the properties of the promotion of the properties of the promotion of th

To properly give effect to the reservation decided upon, model rosters have been prescribed for recruitment by open competition and otherwise Employing authorities are required to maintain a roster of every 40 vacancies, the number of vacancies to be reserved for the Scheduled Castes and Tribes being specified in it. If the vacancies in a Service or Cadre are too few for the purpose, all corresponding posts are to be grouped together. There is a provision for the carry over for two years of reserved vacancies for which suitable candidates from these classes are not forthcoming. Annual reports are required to be submitted by the employing authorities for scrutiny by the Government. Concessions in the matter of confirmation and protection in the matter of retrenchment have also been extended to these clas-Statutory bodies and semi governmental institutions functioning under the Central Government are also required to observe the rules laid down for reservation. Some of the State Governments have also drawn up rules for the reservation of posts for these classes, and steps were taken during 1956-57 to increase their representation in State services

At the beginning of 1937, 2,26,000 persons belonging to the Scheduled Castes and Schrüdled Tribes were holding permanent and temporary posts in the Government of India Statistics collected through Employment Exchanges reveal that 33,000 persons were placed in employment during 1936, e. 14,500 by the Central Government, about 9,500 by the State Government and approximately 9,000 by other employers

ADMINISTRATION OF SCHEDULED AND TRIBAL AREAS

Part X of the Constitution read with the Fifth and Sixth Schedules provides for the administration and control of the Scheduled Areas and Scheduled Tribes in States other than Assam and for the administration of tribal areas in Assam.

Autonomous Tribal Areas of Assam

In pursuance of the provisions of the Sixth Schedule, I Regional Council and 5 Dattice Councils have been set up in the districts of the United Khasi-Janua Hills, Gare Hills, Mizo Hills, North Cachar Hills and Mistr Hills Each of these District Councils consists of not more than 24 members, there fourtus of them being elected by adult suffrage The Councils possess wide legulative and rule making powers as also certain financial and taxation powers.

Tribes Advisory Councils in Other States

The Fifth Schedule to the Constitution provides for the setting up of a Tribes Advancy Council in each of the States having Scheduled Areas and, if the Penident so directs, for constituting such a Council in States which have Scheduled Tribes but no Scheduled Areas. Tribes Advisory Councils have been set up so far in the States of Andrian Pardests, Jibast, Dombay, Madhys been set up so far in the States of Andrian Pardests, Jibast, Dombay, Madhys have been set up to far in the States of Andrian Pardests, Jibast, Dombay, Madhys the States of the Stat Pradesh, Orissa, Punjab, Rajasthan, and West Bengal. These Councils advise the Governors on such matters, concerning the welfare of the Scheduled Tribes and development of the Scheduled Areas as may be referred to them.

WELFARE AND ADVISORY AGENCIES

Commissioner for the Scheduled Castes, and Scheduled Tribes

A Special Officer has been appointed by the President under Article 338 of the Constitution to (i) investigate all matters relating to the safeguards for the Scheduled Castes and Scheduled Tribes provided under the Constitution, and (ii) report to the President on the working of these safeguards. The Commissioner has so far submitted six reports to the President. Each State will have in the near future one Assistant Commissioner to assist the Commissioner in the discharge of his duties.

Central Advisory Boards

To associate members of Parliament and public workers with matters pertaining to the development of Tribal areas and the well-being of the Scheduled Tribes and Scheduled Castes, two Central Advisory Boards—one for Tribal Welfare and another for Harijan Welfare—have been constituted by the Government of India. These Boards advise the Government of India on all matters relating to the welfare of these classes. They are also expected to assess the requirements of the tribal people in Scheduled and other Tribal Areas, formulate schemes for their welfare, periodically review the working of sanctioned schemes and evaluate the benefits derived from them with a view to suggesting improvements.

Welfare Departments in the States

The proviso to Article 164 (1) of the Constitution requires that in the States of Bihar, Madhya Pradesh and Orissa, Welfare Departments in charge of a Minister be set up. Welfare Departments have been set up in these States as well as in Andhra Pradesh, Assam, Bombay, Kerala, Madras, Mysore, Punjab, Rajasthan, Uttar Pradesh, West Bengal, Himachal Pradesh, Manipur and Tripura.

WELFARE SCHEMES

Under Article 339 the Union Government can give directions to States in the drawing up and execution of schemes for the welfare of the Scheduled Tribes in the States. Under Article 275 (1) the Centre is required to give grants-in-aid to the States for approved schemes for their welfare and for improving the tone of administration in Scheduled Areas. The Government of India have been giving grants for the welfare of ex-Criminal Tribes since 1953 and for that of the Scheduled Castes since 1945. The steps taken to implement the constitutional directive are briefly noted below.

Educational Facilities

Measures to provide increased educational facilities have been taken, the emphasis being on vocational and technical training. The concessions include free tuition, stipends, scholarships and the provision of books, stationery and other equipment. Clothing and mid-day meals are also supplied in many places.

During the first plan period, a sum of Rs. 10,32,75,406 was spent on the education of the backward classes—Rs. 3,88,38,843 on Scheduled Castes, Rs. 5,10,33,518 on Scheduled Tribes, Rs. 16,79,358 on ex-Criminal Tribes and

Rs 1,17,23,687 on other Backward Classes During the second Plan period, the e-penditure proposed is Rc 23,75,52,452 in 1956-57, a sum of Rs 4,44,29,858 was spent, of which Rs 4,34,99,473 were under the Central and Rs 9,30,335 under the State Sector

An important recent development in furthering the education of tribal people has been the preparation of text books in 8 tribal dialects and the training of tribal teachers in some States About 4,000 schools, of which 1,000 were sussifican schools and 650 sanker kendrat, ballundur, etc., were opened in the tribal areas during the first Plan period.

The Government of India instituted a scheme for grant of scholarships to the Scheduled Castes in 1944-45. This benefit was extended to the Scheduled Tribes in 1948-49 and other Backward Classes in 1949-50. The following table shows the amounts spent on this account.

TARLE SE

(In lakhs of rupees)

Year	Scheduled Castes	Scheduled Tribes	Other Back- ward Classes	Total
1951-52	8 18	2 82	4 41	15 41
1952-53	14 36	5 22	10 94	30 52
1953-54	26 36	8 19	26 51	61 56
1953-55	45 80	12 38	49 71	107 89
1955-56	63 78	13 05	73 70	150 53
1955-57*	88 24	15 68	83 68	187 60

· Provisional

The Central Government's scheme to award scholarships to deserving students from these classes for studies in foreign countries came into force in 1933-54, and from 1935-56 the number of such scholarships was increased from 6 to 12—4 for each of the three groups. Tourist class scap passages are also awarded to students who receive foreign scholarships without travel grants. So far 9 Scheduled Caste, 10 Scheduled Tribe and 12 other Backward Class scholars have been selected for the award of Overseas Government of India scholarships, in addition to 11 belonging to the other Backward Classes and one to the Scheduled Castes under other central schemes.

Seventeen and a half per cent of the ment scholarships granted by the Centre to deserving students of the lower income groups for studies in institutions which are members of the Indian Public Schools Conference, are reserved for the backward communities. Some of the State Governments offer similar scholarships. Some public schools also award scholarships to deserving backward class students. Reservation of seats, lowerings of minimum qualifying marks and raising of the maximum age limit for admission of members of these classes in all technical and educational institutions are among other steps commended by the Union Government to all educational authorities.

Economic Opportunities

Among the measures taken to advance the economic interests of the tribal population, a scheme to control the wasteful method of shifting cultivation is the most againcant. Of a tribal population of 225 lakh, about 26 lakh persons practice shifting cultivation annually over an area of

22,55,816 acres, the total area used so far for shifting cultivation being five times this figure. The problem is in its acute form in the States of Andhra, Assam, Bihar Madhya Pradesh and Orissa and the Union Territories of Manipur and Tripura. The scheme to control shifting cultivation was started during the first Plan period. Nine pilot project centres were established in the State of Assam, 4 colonisation schemes were started in Andhra and nearly 285 families in Bihar, 366 in Madhya Pradesh, 2,496 in Orissa and 3,124 in Tripura were settled under the scheme.

In the second Five Year Plan, it is proposed to undertake a more ambitious programme of settling 27,213 tribal families and establishing 208 demonstration centres and 3 pilot farms at an estimated cost of Rs. 287.33 lakh. A further sum of Rs. 130.00 lakh has been earmarked for tackling this problem in other ways in the States of Assam, Andhra Pradesh, Bihar, Madhya Pradesh, Orissa and the Union Territories of Manipur and Tripura.

Andhra Pradesh, Bihar, Bombay, Madras, Orissa and Uttar Pradesh have launched schemes to improve irrigation facilities, to reclaim waste land and to distribute it among members of the Scheduled Castes and Scheduled Tribes. In addition, facilities for the purchase of livestock, fertilisers, agricultural implements, better seeds, etc., are also being extended to them. Some States have set up demonstration farms for training them in methods of scientific cultivation. Cattle breeding and poultry farming are being encouraged among these people

The Governments of Andhra Pradesh, Assam, Bihar, Bombay, Uttar Pradesh and West Bengal are encouraging the development of cottage industries through loans, subsidies and training centres. Nearly 111 cottage industry centres were opened in the tribal areas during the first Plan period. Multi-purpose co-operative societies which provide credit in cash and in kind to the Scheduled Castes and Tribes have also been established in Andhra Pradesh, Bihar, Madras, Mysore, Orissa, Uttar Pradesh and West Bengal. During the first Plan period, 312 societies of this type were established and 350 grain-golas were opened to advance loans in kind during the lean seasons of the year. In some States, such as Bombay and Andhra Pradesh, contracts for exploiting forest produce are being given to the Scheduled Tribes through labour co-operative societies. During the first Plan period, 653 such societies were started in various States.

Legislation exists in almost all the States to extend relief to the indebted, including those belonging to the Scheduled Castes and Scheduled Tribes. Measures for the abolition of their debt bondage have been taken in Orissa and Bihar. Andhra Pradesh, Assam, Bihar, Madhya Pradesh, Orissa and West Bengal have enacted tenancy laws to ensure security of land tenure to the Scheduled Tribes.

Other Welfare Schemes

Other welfare schemes include the grant of house sites free or at nominal cost, assistance by way of loans, subsidies and grants-in-aid to local bodies for the construction of houses for their *Hariyan* employees and monetary assistance to co-operative building societies specially started for the benefit of the Scheduled Castes and Scheduled Tribes. Some 2,340 miles of bridle and hill paths were constructed at a cost of Rs. 6 crore and 3,144 dispensaries and mobile health units established in tribal areas during the first Plan period.

Tribal Research Institutes

Tribal research institutes, which undertake intensive studies of tribal arts culture and customs, have been set up in Bihar, Madhya Pradesh Ori sa, Rajasthan and West Bengal The Gauhati University has started the study of the social and cultural life of the tribes in Assam In Bombay, tribal research is being conducted by the Anthropological Society of Bombay, the Gujarat Research Society and the University of Bombay In West Bengal, the Cultural Research Institute has produced valuable reports on several aspects of tribal life in the State The D partment of Anthropology, Government of India has completed intensive research studies on important tribes of Tripura and Kerala, while studies in respect of tribals in other States are in progress. Studies in the culture and languages of the people of NEFA are being undertaken by the research department of NEFA The Tribal Research Bureau in Ori sa has all o under aken investigation on several important tribal problems The Bharatiya Lok Kala Mandal Udaipur, is a pioneer non-official organisation which has conducted cultural survey of 14 tribes in the former Madhya Bharat State and others in Rajasthan

Progress Under Second Plan

It is proposed to open \$3,167 schools and hostels and 200 community and cultural centres in tribal areas and also to give supends and other concessors to 3 lakh tribal students during the second Plan period. The corresponding educational facilities contemplated for the Scheduled Castes are the establishment of 6 000 schools and hostels and scholarships and freedings for 30 lakh scholarships and other educational concessions Besides the States' plans to construct 1,0200 miles of bridle and hill paths and \$30 bridges in tribal areas, there is a Central Plan to build \$40 miles of motorable roads and 720 miles of bridle and hill paths and \$30 bridges in tribal areas, there is a Central Plan to build \$40 miles of motorable roads and 720 miles of bridle and hill paths involving an expenditure of Rs 4 error. The health schemes comprise the properties of dispensaries, mobile health units, the training of health better the scheduled control of the scheduled control of the scheduled control of the scheduled control of \$20 miles of bridle and over 394 wells for ex Crim mal. Tribes. The housing programme and over 394 wells for ex Crim mal. Tribes. The housing programme comprise the proposition of \$1,29 300 houses or house sites for the Scheduled Castes at a cost of \$8 5 20 crore and \$4,500 houses for the ribals the ribal.

The Plan includes colonisation schemes for the settlement of 12,000 tribal families in 186 colonies and rehabilitation of 15,246 families of ex Criminal Tribes. There is also provision for the conversion of the conversion of the conversion of the conversion of the conversion for the conversion of the conversion for the conversion of the conversion for starting 800 additional forest multi purpose co-operative societies. Table 59 shows the details of expenditure under various heads for the first and second Plan periods.

CHAPTER XV

MASS COMMUNICATION

BROADCASTING

There are today 28 radio stations covering all the important linguistic areas of the country as against only six in 1947. The stations are grouped into four regions as follows —

> North Delhi, Lucknow, Allahabad, Patna, Jullundur, Jaipur-Ajmer, Simla, Bhopal, Indore and Banch.

West Bombay, Nagpur, Ahmedabad-Baroda, Poona, Rajkot and

Dharwar
South Madras, Tiruchirapalli, Vijaya-

wada, Trivandrum, Kozhikode,
Hyderahad and Bangalore.

East Calcutta, Cuttack and Gaubati,

In addition, Radio Kashmir has two stations at Srinagar and Jammu. The number of radio centres, transmitters and receiving centres, as on March 1, 1958, was 32, 52 and 28, respectively.

Programme Policy and Composition

In planning its programmes, All India Radio is guided not only by the tates and preference of listeners but also by the unportant objectives which a broadcasting organisation must fulfil, namely, information, education and entertainment. It does not accept sponsored programmes or any matter that amounts to commercial advections. Its news service is in accordance with responsible professional standards and covers only next of news value and of public interest. It maintains complete objectivity and impartuality in its news broadcasts

Music programmes comprise nearly a half of all the programmes broadcast from AIR. The content and scope of these programmes have already been dealt with in an earlier chapter * Talks, features and discussiont cover a wide range of subjects and help listeners to keep abreast of the latest developments in arts, sciences and literatures. A National Programme of Talks given by well-known personalities in these fields is broadcast every. Wednesday and is relayed by all stations. Documentary features, group discussions, interviews, etc., are being put on the air more frequently than before to make the programme interesting and varied.

Table 60 shows the composition and the time approximately taken by various categories of programmes during 1957—

Vividh Bharati

Vividh Bharati is a new venture of AIR seeking to meet the demand of the average listener for a variety programme of light and popular music skits. Inaugurated on October 3, 1957, it is being broadcast for 5 hours on weeks days and for 7½ hours on Sundays and principal festival days. Carried on two very powerful short-wave transmitters simultaneously from Bombay and Madras, the programme can easily be heard in any part of India. The items comprising songs, skits, playlets, operattas, poetry recitals and music are based on contributions by all the radio stations in India.

Special Audience Programmes

Rural broadcasts deal with all aspects of rural life and provide useful information to the villagers through dialogues, discussions, plays, news, talks, weather reports, etc. Problems concerning agriculture, health and hygiene

[†] It is regretted that due to an error the figures given in programme composition for Home Services in INDIA 1957 (page 165) were totals (in minutes) of monthly averages for the whole year for each category of programmes shown therein.

are dealt with by experts Under the Central Government Subsidy Scheme, 25,036 community sets were supplied till March 1957 to various State Governments for installation in the rural areas, and arringements were made for the supply of 11,166 recencers complete with sixiliaries during 1937-58

Special Farm Forum programmes are also broadcast from some of the stations. One hundred and fifty Farm Forums were formed and special programmes were broadcast to them in an experiment partly financed by UGSEN and curred out by AIR at Poons with the co-operation of the content of Bombay, the Tata Institute of Social Sciences and other assistances.

Educational programmes for schools are at present broadcast from 20 stations. They are mean to must national awareness and withen the outlook of young listeners. Persons with considerable experience in the educational field are now being appointed at stations for these broadcasts A series of special courses for school broadcasts with the co-operation of Mr. Read of the School Broadcasts Division of BIOC were organised during 1900.

The number of schools with radio receivers, as on October 31, 1957, was 9,603

Special programmes for women and children are broadcast by each station in which information on homekeeping, child care, nutrinton, mental health and their place in the community, and the nition is given. Talks, discussions, short stories, choises, plays, fentures and quiz, programmes are broadcast in programmes meant for children.

Programmes for industrial workers are broadcast from Madras, Bombay, Calouta, Ahmedabad, Lucknow, Allahabad, Trayandrum and Korbhoder. They are means to provide information and entertainment to industrial workers and their timings are fixed in consultation with the Labour Department of each State Government. The number of industrial sets in use on December 31, 1956 vas 200.

Forces programmes are broadcast from Delhi, Srinagar and Jammu.

Five Year Plan Publicity

staned publicity is given to the objectives of and achiesements under the Five Year Plans through autable programmer arranced from all tations. In addition to the programmers originated at the studios, relays and recordings from dam, factory and project sites and documentary features are presented by stations. Thirteen National Features on important development projects were broadcast by the end of March 1938.

A total of 3,171 programmes covering various aspects of the second Five Year Plan were broadcast from all stations of AIR during 1957. Of these, 2,029 were talks, 459 discussions, 344 dialogues, 141 plays and feature programmes, 83 songs, 7 reviews and 103 interviews

Programme Production Staff

Eminent musicians and musicologists, playwrights and literateurs from different regions have been appointed Producers and Assistant Producers. Their experience and special qualifications have been extremely valuable in programme-making in the fields of music, drama and literature.

Programme Exchange

A Programme Exchange Unit has been set up for the exchange of recordings between the radio stations in India and outside broadcasting organisations. The external section has supplied fairly regularly such material to broadcasting organisations in the USSR, Nairobi, Australia, Yugoslavia, Indonesia, Japan and Fiji Islands. The BBC and UNO have also been furnished with recordings. The internal section makes available outstanding programmes of various stations to one another.

Transcription service

The Transcription Service, started in 1954, maintains a central Library of recordings in which recorded speeches of eminent persons of India, music recitals by exponents of the various important gharanas of Indian music and folk music are preserved. It has also recordings of post-prayer addresses of Mahatma Gandhi for a duration of about 50 hours.

The Transcription Service is now producing long playing microgroove records which carry programmes of a duration of about 20 minutes on one side of the record.

Programme Advisory Committees

The Central Programme Advisory Committee advises AIR on general principles to be kept in view in planning and presentation of programmes and suggests how they can be made more useful and interesting. The Central Advisory Board for Music lays down in general terms the music policy for the guidance of AIR. At stations, public opinion is associated with the planning and presentation of programmes through (i) the Programme Advisory Committee (attached to all Stations), (ii) the Rural Advisory Committee (attached to all Stations) and (iii) the Consultative Panels for Educational Broadcasts (attached to stations broadcasting school programmes).

Programme Journals

The programmes planned by the different stations are announced in advance in the following journals:

TABLE 61

Name of Journal		Published from	Language	Periodicity	
Akashvani (formerly Indian Listener) Awaz Sarang Betar Jagat Vanoli Vani Nabhovani	••	Delhi " Calcutta Madra: Ahmedabad	English Urdu Hindi Bengali Tamil Telugu Gujarati	Weckly Fortnightly	

News Services

News bulletins in the Home Services of AIR are broadcast in English and Hindi four times a day; in Bengali, Oriya, Tamil, Telugu, Kannada, Malayalam, Punjabi, Marathi, Gujarati and Assamese three times a day; in Kashmiri, Dogri and Urdu twice; and in Gorkhali once a day. A bulletin is also broadcast for troops in the Forces Programme in Hindi once a day.

Seventy-six bulletins—46 in the Home Services and 30 in the External Services—are broadcast daily To give a wider coverage to news form the States, regional news buildeum are also broadcast. The Lucknow and Bhopal stations broadcast a buildeum in Hindi, Bombay in Marathin and Gujarata, Madras in Tamid, Calciutta in Bengal, Hyderabad in Telugu, Bangalore in Kannada, Trivandrum in Malayalam, Gauhati in Assamese and Srinagar in Kashmiri, Dogit, Urdia and Pushtu.

Radio newsreel programmes—two in English and one in Hindi.—are broadcast every week, besides a series of special newsreel bulletins on important occasions

External Services

Broadcasts on the External Services of AIR are carried in 16 languages including Burmers, Cantonese, French, Kuoyu, Indonesian, Punhu, Portugues, Persain, Arabic, Swahili and Tibetan beside: English and the Indian languages For people of Indian origin abroad, AIR has a general service in English, Hindi, Tamil, Gujarati and Konkani.

Out of a total transmission time of 20 hours and 5 minutes a day, Hindi covers 2 hours and 20 minutes, Tamil 1 hour, Konkam 30 minutes, Burmese 55 minutes, Gujarati 1 hour, English 5 hours and 30 minutes, Cintonices 30 minutes, Kuoyu 45 minutes, Indonesian 45 minutes, Tibetan 30 minutes, Pushtu 1 hour, Persian 1 hour and 15 minutes, Arabic 1 hour and 30 minutes, Swahli 35 minutes, French 1 hour and 67 orthygiese 1 hour.

Thirty news bulletins in 16 languages are broadcast daily in the External Services

Growth of Listening

The number of radio set owners has shown a steady increase since the manguration of broadcasting in 1927, as shown in the following tables

Import and Production of Radio Sets

Until a few years ago, India depended mostly on imported sets. In recent years, however, a number of modern factories have been established for the manufacture of radio sets. In addition, a large number of sets are assembled on a cottage industry basis. The following tables show the position about the import and manufacture of sets in India:

TABLE 64

THE PRESS

According to the first report of the Registrar of Newspapers for Indis, released on July 22, 1937 there were 6 570 newspapers in extinence on December 31 1936. The philest number (1,271) of newspapers was published in the State of Bombay, followed by West Bengal (1,129). Uttar Pradesh (7,56). Madras (717) and Debit (556). These accounted for more than two-thirds of the total number of newspapers published in the country.

The periodicity wise distribution of newspapers shows that there are 476 dashes 1,903 weekles, 593 fortmehtlies and 2,506 monthlies

476 dailies 1,903 weekles, 558 fortinghthes and 2,506 monthlies

The State-wise breakdown according to periodicity is given in the fol-

lowing table

Table 66

Newsprint

Until recently, India depended entirely on foreign countries for the requirements of its newsprint. The only Indian concern, the National Newsprint and Paper Mills Ltd. at Chandani in Madhya Pradesh, went into production in January 1955 and has an annual installed capacity of about 30,000 tons. The rest of India's newsprint comes mainly from Canada, Finland, Norway and Austria. The quantity and value of the newsprint imported between 1952-53 and 1956-57 are given in the following table:

TABLE 68
IMPORT OF NEWSPRINT

News Agencies

There are only two major Indian news agencies, the Press Trust of India and the United Press of India. The Hindustan Samachar is a minor agency. Accurate information in respect of news agencies is not available, for no registration is necessary in the case of news agencies, as in the case of newspapers under the Press and Registration of Books Act, 1867. Nine minor Indian news agencies were also reported to be operating, apart from the above-mentioned three news agencies.

Amongst the foreign news agencies, the following six world news agencies operate in India (1) Reuters of the United Kingdom, (2) the Agence France Press of France, (3) the Associated Press of America (through the Times of India group of newspapers), (4) the United Press of America, (5) the International News Service of United States, and (6) Tass of the Soviet Union

Press Information Bureau

Information regarding the policy, plans, achievements and other activeties of the Government of Indra is made available to the Press in English and 12 Indian languages by the Press Information Bureau During 1937-36, textual services were received by about 4,477 Indian newspapers and periodicals, photographic services by 542 and photographic in the form of ebonoid blocks by 700. Indian and foreign correspondent accredited to the Government of India at headquatters numbered 156 in 1937. They were from the USA, Canada, the USSR, 11 European countries, seven Asian countries and Africa.

The Bureau's Information services in Hindi and Uridu are struct from the head office in New Delhi and those in other Indian languages from the regional offices at Calciuta (Bengali), Gauhati (Assamese) Guttack (Oriya), Bombay (Maratiti and Gujaran), Madras (Tamiland Teliuga), Bangalore (Kannida), Errinkolam (Vilayalam) and Jullundur (Punjahl) The Bureau's regional and branch offices are linked up with the beadquarters by teleprinter lines, and information of numerical enhance is made as alable to the former without a ordable time lag after release in Delhi Distribution offices at Lucknow, Varanasa and Patha provide similar service to Hindi newspapers and another at Nagpur to Maratin newspapers. Another office is to be opened at Jupur to serve Hindi newspapers.

Information Centres have been opened at New Delhi, Jullundur, Smagar, Madras, Lucknow, Patna, Hyderabad, Travandrum, Rajkot and Nagpur as part of a scheme to open Information Centres at State capitals and other important places Similar centres will be opened in other States also. For the benefit of the vullagers, Information Centres have been set up at Hurskud and Bjakra Nangal. Similar centres are proposed to be opened at Kon and other projects.

Freedom of the Press

Article 19 (1) of the Constitution guarantees "the right to freedom of sperch and expression" to all citizens. This freedom has been interpreted by the courts to include freedom of the Press Under the Constitution (First Amendment) Act of 1931, Parlament can tract legislation reasonably retricting the exercise of this right," in the interest of the security of the State, friendly relations with foreign States, public order, detenney or morality, or in relat on to contempt of court, defamation or incitiment to efficie "The words" reasonable restrictions "occurring in clause (2) of Article 19 male much legislation quitticable.

Press Laws

There are hie main central laws relating to the Press.

(1) The Prist and Regulation of Books Ad, 1867, provides for the regulation of printing presses and newspapers, preservation of copies of books and newspapers, printed in India, and for the regulation of such books and newspapers. The Act was amended by an Amending Act of 1955, its man object being the setting up of a statutory machinery for the collection of and nating available to the public authenties statution regarding all aspects of

the newspaper industry. It empowers the Government of India to appoint a Press Registrar who is required to maintain an up-to-date Register of Newspapers as prescribed under the Act. The publishers of newspapers must furnish to the Press Registrar information, statistics and returns required by him. The Registrar, or any gazetted officer authorised by him, has access to the relevant records maintained by the publisher for the collection or verification of such information. The Press Registrar is required to prepare an annual report containing a summary of the information supplied to him. Wilful disclosure of information supplied by a newspaper, other than that provided under the Act, is a penal offence. The Press Registrar is authorised to issue certificates of registration to newspapers.

The amending Act and the rules framed under it came into force from July 1, 1956. The Registrar of Newspapers for India has been appointed and an organisation for the collection, maintenance and publication of information concerning newspapers has been set up under him.

(2) The Working Journalists (Conditions of Service) and Miscellaneous Provisions Act, 1955, came into force on December 20, 1955.* The more important provisions of the Act concern the appointment of Wage Boards, their composition, powers, etc. Under the Act, an employer must give six months' notice to an editor and three months' notice to other working journalists in case of retrenchment. The Employees' Provident Funds Act, 1952, has been extended to all newspaper establishments employing 20 working journalists or more. The Act prescribes a maximum of 144 working hours during four consecutive weeks for a journalist. It also contains provisions for a weekly holiday, casual leave, earned leave and leave on medical grounds.

Under Section 17 of the Act, money due to an employee is recoverable from the employer in the same manner as arrears of land revenue. The Industrial Employment (Standing Orders) Act, 1946, has been extended to all newspaper establishments with 20 or more working journalists. The Working Journalists (Industrial Disputes) Act, 1955, has been repealed and its provisions incorporated in this Act.

- (3) The Newspaper (Price and Page) Act, 1956, provides for the regulation of the prices charged for newspapers in relation to their pages and of matters connected therewith for the purpose of preventing unfair competition among newspapers, so that newspapers may have fuller opportunities of freedom of expression. Under Section 3 of the Act, the Central Government may from time to time by notification in the official Gazette make an order providing for the regulation of the prices charged for newspapers in relation to their maximum or minimum number of pages, sizes or areas and for the space to be allotted for advertising matter in relation to other matters therein. The scope of the Act is restricted to newspapers which appear at intervals of a week or less.
- "(4) The Delivery of Books and Newspapers (Public Libraries) Act, 1954, provides that the publisher of every book and newspaper published in India shall deliver at his own expense a copy of the publication to the National Library at Calcutta and one such copy to each of the other three public libraries specified by the Central Government by notification in the official Gazette within 30 days of its publication.

^{*} On March 19, 1958, the Supreme Court held Section 5 (1) (iii) of the Act, relating to gratuity in the event of voluntary resignation, to be 'ultra vires' the Constitution.

(5) The Parhamentary Proceedings (Protection of Publication) Act, 1956, provides that no person shall be liable to any proceedings, civil or criminal, in any court in respect of the publication in a newspaper of a substantial time report of any proceedings of either House of Parliament, unless the publication is proved to have been made with malice. Parliamentary proceedings proceed by wireless telegraphy are also protected by the Act.

Courses in Journalism

The following Universities have introduced courses in journalism -

Na	те ој Описткиј	Nature and scope of course
1	Calcutta	Two-year Diploma course open to graduate or those who have passed the Intermediate Ex- amination and have at least one year's practical
2	Gujarat	experience of newspaper work The course was introduced by the University a few years ago, but no college or institution
3	Madras	has yet made a start One year (January to December) Diploms course conducted in the University
4	Mysore	Journalism is included as one of the optional

subjects for the BA degree of the University and
is taught at the Maharaja's College, Mysore
Runs courses for Diploma and Certificate
examinations, each of one year's duration, at

6 Omania examinations, each of one year's curation, at the Hulop College, Nagpur Conducts two courses, each of one year's duration, for "Diploma in Journalism" (open to graduate) and "Certificate of Profreency in Journalism" (Open to Matriculates)

in Journalism " (open to Matriculates)

Maintains a University Journalism Department at Camp College, New Delhi, and offers a one-year post-graduate course for " Diploma in Journalism "

FILMS

India is one of the major film-producing countries of the world. At the end of 1937, there were 527 producing concerns, 4,173 distributing agencies, 67 studios, and 3,555 cinema horses. The output of feature films for the year 1937 was 292. Table 69 shows the number of feature films produced in various languages and certified for public exhibition in 1931, 1931 and between 1947 and 1945 certified for public exhibition in 1931,

In addition, the Central Board of Film Censors certified a total of 588 Shorts for public exhibition during the calendar year 1957 These consisted of

(i) Shorts over 2 000 ft. in length (ii) Shorts 2,000 ft. and below in length			41 516
(i) Shorts above 800 ft. in length (ii) Shorts 800 ft. and below in length		::	7 24
Total	•		588

^{*} This information has been culled our from film industry journals. Included in the number of enterna houses are also 462 touring enternas.

Exports

Export of canena films from India during the first eight months of 1957 letched foreign exchange worth Rs 72 45 lakh The total footage exported was about 15 4 million in flower films are exported to over 50 countries These include Cylon, Sudanna films are exported to over Asten, the U.K., Nepal Burma Sungaport, Iran, Indonesia, Tinaland, Camboda, Transda, Kenya, the Ower Umon, Czechoslovakia, France and the U.S.A. A Film Lxport Advisory Committee, with headquarters of the Committee, with headquarters of the Committee of the Com

at Bombay, has been constituted to suggest ways and means of stimulating exports.

National Film Board

As a measure of economy, it was decided to give up the proposal for the setting up of the National Film Board as recommended by the Film Enquiry Committee.* In consequence, the Cinematograph Bill, 1956 was withdrawn from Parliament in August 1957. Steps are, however, afoot to set up a Film Finance Corporation, a Film Institute and a Film Production Bureau.

Children's Film Society

The Society was registered under the Society Registration Act in May 1955. The principal aim of the Society is to undertake, aid, sponsor, promote and co-ordinate the production, distribution and exhibition of films specially suited or of special interest to children and adolescents. The Government provide grants-in-aid to the Society for this purpose. The Society has produced so far two feature films, 'Char Dost', and 'Jaldeep'. It also prepared two adaptations, 'Ram Shastri Ka Nyay' and 'Bal Ramayan', besides adapting and dubbing a number of foreign films in Hindi.

The film 'Jaldeep' was awarded the Certificate of Merit as the best children's film of 1956 at the State Awards for Films held in April 1957. The Society is at present producing two films, viz., 'Scout Camp' and 'Ganga ki Laharen.'

Film Festivals

During 1957 Indian films won significant recognition at a number of international film festivals:

'Aparajito' was awarded the Golden Lion of St. Mark at the Venice Film Festival. This prize, according to the Venice Regulations, is awarded to the film which is foremost among those that make a genuine contribution to the progress of cinematography as a means of artistic expression, spreading civilisation and culture, and promoting brotherhood of peoples.

'Pather Panchali' was given the best award at the San Francisco Festival for being the best picture of the world.

'Jagate Ráho' won the Great Grand Prix, the highest award at Karlovy Vary (Czechoslovakia), for its deep human content expressed in a remarkable poetic form.

'Jaldeep' produced by the Children's Film Society won the first prize at the Ninth International Exhibition of Films for Children at Venice in the children's age-group 13 to 16 for its 'exalted theme'.

'Kabuliwala' (Bengali) was given a special award for having the best music at the International Film Festival held in Berlin.

'Gotama the Buddha' was given a special Certificate of Merit at the Cannes Film Festival. Of other Indian documentary films, 'Magic Touch' was awarded the 'Diploma of Honour' at the Milan Sample Fair

For action taken on other recommendations of the Committee, see INDIA 1957, pp. 180-81.

(Italy) 'Wonder of Work' won the first prize at the International Congress of Occupational Health at Helinki, and 'Operation Khedda' won a silver culp for uts suggestive description of a subject in the III International Cinematograph in Rome, in addition to a diploma. It also won a diploma and bronze metal at the Moscow Festival All the three documentaries were produced by the Films Division of the Munistry of Information and Broadcasting.

State Awards for Films

State Awards for films of high aesthetic and technical standard and of educative and cultural value have been a regular annual feature since 1954 Regional Committees at Bombay, Madras and Calcuta, consisting of distinguished men in public life and other persons qualified to judge technical standards selected from a panel of names received from film organisations recommend films for the consideration of a Central Committee of Awards*

As from 1958 the following annual cash awards have also been sanctioned for films —

(1)	For the best feature film, winning the President's Gold Medal	Rs	25,000
(u)	For the second best feature film	R_3	12,500
(1 1)	For the best children s film, winning the Prime Minister's Gold Medal	R ₃	25 000
(14)	For the second best children's film	R,	12,500
(v)	For the best documentary, winning the President's Gold Medal	Rs	5,000
(v1)	For the second best documentary	R_5	2,500

Documentaries and Arwsreels

Documentary films and newarcels are produced mainly by the Films Division of the Umon Ministry of Information, and Breadcasting Till the end of 1937, it had produced 400 newarcels and released 347 documentaries for exhibition. Pilms means for exhibition in cutema halks are produced in English Hindi. Bengali Tamil and Telugu, whereas those intended for exhibition through mobile, years are produced also in Gujarati. Punjahi, Assamete, Kannada Kashmiri, Onya, Marathi and Malayalam. They are made in 35 mm standard size and are of an average length of 1,000 feet. Those used in mobile vans are in 16mm, size and 400 feet in length. Some of the documentaries are made in colour.

While the bulk of documentaries are produced by the Films Division, private producers are also entrated with the production of films on selected subjects. In 1957, 10 such films were produced by private producers, out of which one documentary was purchased by the Government. In addition, 8 ready made films were purchased from the State Governments. Three children's magazines were also produced during the same period Production of short carroon films has also been taken in hand and it is proposed to produce two films every year. O nes uch films in rearing completion.

Interesting events within and outside India are included in the newsreels Items from foreign countries are received from various newsreel

Awards for best films produced in 1956 are given in the Appendices

organisations as part of an arrangement for free exchange of newsreels. Happenings within the country are covered by more than 12 cameramen of the Films Division. In addition, events covered by the film units of the State Governments are also utilised.

Every cinema is required under the terms of its licence to exhibit at each performance not more than 2,000 feet of films approved by the authorities specified in the conditions governing the grant of licence. Under contracts with the cinemas, the Films Division supplies them with approved films on payment of rental not exceeding one per cent of the average weekly net collections. One newsreel and one documentary a week are released to all cinema houses by rotation. Films are supplied free of charge to schools, colleges, charitable institutions, hospitals, semi-Government and non-profitmaking bodies, etc.

Documentary films approved for external publicity are supplied to 65 missions abroad. A special monthly overseas edition of newsreels is compiled and supplied to 20 external posts. These are utilised by the Indian Missions for exhibition in their premises and outside and are also lent to social and educational institutions and to local Indian residents, etc. Distribution of selected films in the UK through the BBC (TV) continues. Distribution through commercial channels continues in Africa, Ceylon, Thailand, and Ghana. Arrangements for the commercial distribution of the Films Division's films in Europe are nearing completion.

Film Censorship

The Central Board of Film Censors was constituted in January 1951 for certification of films for the whole of India. The Board has seven members, including the Chairman, all of whom are appointed by the Government of India. The head office of the Board is at Bombay and there are regional offices at Bombay, Calcutta and Madras. The Regional Officers are assisted by members of an Advisory Panel who are also appointed by the Government of India. They include educationists, doctors, lawyers, social workers, etc.

Every film, in respect of which an application for certification is received, is viewed by an Examining Committee. An appeal lies to a Revising Committee, if the person who has applied for certification is not satisfied with the decision of the Board. A film may also be referred to a Revising Committee by the Chairman on his own initiative. The applicant for certification is given an opportunity to put forward his point of view before both the Examining and Revising Committees. Finally, an appeal may be made to the Government of India.

Certificates for unrestricted public exhibition are called Universal certificates and bear a 'U' mark. Films restricted to adults, i.e., to persons above the age of 18 years, are given Adult certificates and bear an 'A' mark on them. If any portion of a film is excised, a triangular mark is put at the left-hand bottom corner of the certificate, and a description of the deleted portion is endorsed on the reverse of the certificate. The decision of the Board in respect of each film examined by it is published in the Gazette of India.

A directive is issued by the Board for the guidance of members of the Examining and Revising Committees. It contains broad principles and detailed rules which aim at discouraging crime, vice, immorality, indecency, incitement to disorder, violence, breach of law, disrespect to a foreign country or people, etc.

Between January 1931 and December 1957, the Board certified 5691 Indian films and 15,151 foreign films During 1957, the Board examined 2,901 films of which 678 including 5694 foreign films were refused certification, 2 802 were given 'U' and 101 'A' certificates films consisted of 2 923 foreign films and 800 Indian films 'The certification from the films totalled 73,615 feet

A Research Section has been opened for the purpose of assessing public reactions in respect of films seen by them

PUBLICATIONS

The task of reaching the people through the medium of the printed word for providing them with authentic information about their cultural heritage, the activities of the Government, the progress of various development programmes and places of towns interest is shared by the Publications Division of the Union Ministry of Information and Broad-casting and the departments of Information and Publicity in the States

Publications Division

Bendes being responsible for the production, distribution and sale of popular pamphies, books, journals, albums, etc. for this purpose, the Publications Division also advises the various Ministries and Departments of the Government on the preparations and production of publicity interacture relating to their specific activities. Publications are brought out by the Division in English, Hund, and regional languages.

The Division publishes 20 magazines, including general and cultural magazines such as March of India and Afad (in Hindi and Urdu), a children's magazine, Bal Bhards (in Hindi) and journals devoted to community development (Karakshera in English and Hindi) and the Plan (Topma in English and Hindi) in a dedition, a new journal on weights and measures, entitled Metric Menures, was brought out in January 1958 with the object of promoting better understanding of the change-over to the metric system in India Two more journals, namely, Indian Information and Bhardsha Samakha, are being brought out since February 1953 These provide a condensed record of the main activities of the Government and of principal events in the country

During 1957, the Drauon released 256 books and publicity pampliets, including 130 pamplists to avanous aspects of the second Five Year Plan. Among the books brought out during the year were two publications in connection with the Centenary of India's First Struggle for Freedom, Lightens Fifty Secte (in English and Hindi) and 1857—A Fuderal Presentation The Way of the Budden, produced by the Divasion on the occasion of the 2,500th anniversary of Buddha's pensurenes, secured the President's Award (First Prize) for Illustrated books

Among the unportant publications on the Plan brought out during 1957 were Second Fine Fient Plan—Questions and Answers, Achievements and Acta Targets, and We Plan for Property (in English, Hundi and regional languages)

[•] Features 33, Tesilers 21 and Shorts 5. •• Features 28, Trailers 23 and Shorts 5

On January 26, 1958, the Division brought out the first volume in the series *The Collected Works of Mahatma Gandhi*. It includes the writings and speeches of Gandhiji from 1884 to 1896, together with explanatory notes on the position of Indians in South Africa during that period.

The Division brings out selections of important talks broadcast over All India Radio, as well as booklets of tourist interest. In view of the general dearth of children's literature, the Division publishes, in addition to the journal Bal Bharati, story books for children in Hindi and regional languages.

The Photo Unit of the Division helps in getting up exhibitions on the activities of the various Ministries. During 1957, the Unit assisted in organising exhibitions in connection with the Centenary of the First Struggle for Freedom and the 30th Anniversary of Broadcasting in India. In addition to photographic prints, the Division supplies coloured enlargements on the development activities of the Plan for exhibition in India and abroad.

ADVERTISING AND VISUAL PUBLICITY

The importance of advertising and visual publicity has been steadily growing with the increased tempo of development in various fields. At home, the various economic and social measures undertaken by the Government to build up a Welfare State have to be interpreted to the people whose enthusiastic support is indispensable for the success of democratic planning. Abroad, a true picture not only of the new India that is rising but also of the various fascinating features of the country has to be projected with a view to promoting a proper understanding and appreciation of India among the people of foreign lands.

Directorate of Advertising and Visual Publicity

While in the States advertising and visual publicity is undertaken by the Departments of Information and Publicity, at the Centre this responsibility rests with the Directorate of Advertising and Visual Publicity in the Union Ministry of Information and Broadcasting. The Directorate the publicity for all the Ministries (excepting Railways) and their Attached and Subordinate offices. It plans the production and release of all press advertising and display publicity campaigns and utilises media like posters, broadsheets, folders, pamphlets, leaslets, calendars, picture postcards, pictorial maps and charts and in the field of out-door publicity, neon-signs, hoardings, cinema slides, display panels in Public transport vehicles, railway stations, aerodromes, etc., cinema slides and advertising films. Exhibitions organised by the Central Exhibition Division of the Directorate and its regional units have proved a big draw not only in cities but also in rural areas. The Division organised in 1957 the "1857 Centenary Exhibition" to mark the Centenary of the First Struggle for Freedom, and the exhibition "This is India" at the time of the International Labour Organisation and Commonwealth Parliamentary Conferences. An innovation introduced by the Exhibition Division is a special transportable exhibition to popularise small savings.

In keeping with the Government's policy of reaching the people in all walks of life, regional newspapers, particularly Indian language newspapers, have been increasingly utilised for classified and display advertisements. Some of the major publicity campaigns carried out in 1957-58

covered the Five Year Plan, Tourism, Small Savings, Handloom Fabrics and Anti-untouchability

The third State Awards for Excellence in Printing and Designing were presented in November 1957* The 7,000 entires received for the 1957 competition indicated a measure of the enthusiatio response and encouragement that the competition has esoked in the printing trade of the country. In 1957-38, the scope of the competition was further widened by the inclusion of the category of "Display Advertisements".

O

CHAPTER XVI

ECONOMIC STRUCTURE

POTENTIAL WEALTH

India is a country with a developing economy, rich in natural resources and man-power. Her resources, human as well as material, are capable of fuller exploitation and more intensive utilisation. Despite a 10 per cent rise since 1948-49, the per capita income remains low (Rs. 254 in 1954-55*). The Indian economy is still predominantly argricultural, nearly half of the country's national income being derived from agriculture and allied activities which absorb nearly three-fourths of its working force (about 152 million in 1956 inclusive of earning dependents). It has been the aim of national planning, since independence, to accelerate the pace of industrial development and at the same time to increase productivity in agriculture. Net investment in the economy has been rising in recent years. Yet, in 1954-55 it amounted to only 7.8 per cent** of the national income, which is smaller than in most advanced economies and less than what India's own needs of development require.

The consumption pattern of the people underscores the low standard of living. According to the National Sample Survey (April-September 1952) results, over three-fifths (61.3 per cent) of the consumer expenditure was on food articles. Other important items of expenditure were clothing (7.7 per cent), fuel and lighting (5.5 per cent), ceremonials (5.6 per cent) and services (5.6 per cent). Education, conveyance, amusements, furniture and footwear accounted for only small fractions of consumer expenditure.

NATIONAL AND PER CAPITA INCOMES

The national income of India for 1954-55 was computed at Rs. 9,620 crore compared to Rs. 8,650 crore in 1948-49. The per capita income in 1954-55 was reckoned at Rs. 254.4 compared to Rs. 246.9. for 1948-49. The national income in 1954-55 was 11.2 per cent higher than in 1948-49 at current prices; while in real terms, that is, assuming a constant price level, the rise in national income during this period was 18.8 per cent. The per capita income in 1954-55 was 3 per cent higher than in 1948-49; while, at 1948-49 prices, the rise in per capita income amounted to 10 per cent. The table below shows the national and per capita incomes at current and constant prices between 1948-49 and 1955-56. The figures for 1955-56 are, however, preliminary estimates and subject to revision.***

^{*}The per capita income in 1954-55, though nominally lower than in 1953-54 (Rs. 281), was higher in real terms, as shown in table below.

^{**}On the basis of the revised figures of investment given later in this chapter.

^{***}According to the latest information the final figures on national income in 1955-56 at current and constant (1948-49) prices were Rs. 9,990 crore and Rs. 10,480 crore respectively. The corresponding figures for 1956-57 (provisional) were Rs. 11,410 crore and 11,010 crore.

PRINCIPAL CROPS

In 1900 51, the gross value of all the agricultural commodities produced in the country was Rs 4866 crore, the net value being Rs 4,112 crore. The values of the principal gross were as follows:

re	The values	of the		pal crop	is were as follo	WS .		
	Rice	Rs	1,199	crore	Arhar	Rs.	83	crore

PRINCIPAL INDUSTRIES

The net contribution of the manufacturing industries to the national income was computed at Rs. 513.4 crore for 1950. It consisted mainly of the following:

~			
Cotton textiles	Rs.	107.9	crore
Tea manufacturing	Rs.	69.3	,,
Jute textiles	Rs.	46.6	"
Sugar	Rs.	35.8	33
General and electrical engineering	Rs.	29 • 4	"
Iron and steel	Rs.	26.9	23
Chemicals	Rs.	14.0	"
Vegetable oils	Rs.	11.7	"
Tobacco products	Rs.	10.5	"
Rubber and rubber manufacturing	Rs.	10.1	,,
Cement	Rs.	8.5	"
Automobiles and coach building	Rs.	7.4	"
Paper and paper board	Rs.	6.6	"

Of the sum of Rs. 65.12 crore, which represented the income from banking and insurance during 1950, Rs. 36.29 crore were from banks, Rs. 22.85 crore from insurance and the remaining Rs. 5.98 crore from co-operative societies.

PROFESSIONS AND THE LIBERAL ARTS

Out of Rs. 468 crore, which were contributed to the total national income in 1950-51 by the professions and liberal arts, Rs. 116 crore were derived from medical and health services, Rs. 69 crore from educational services, Rs. 66 crore from the letters, arts and science, etc., Rs. 32 crore from legal services, Rs. 47 crore from religious and charitable services, and Rs. 37 crore from sanitary services, etc. Of the sum of Rs. 130 crore, which represented the income from domestic service, Rs. 114 crore were earned by cooks, gardeners and other domestic servants and Rs. 16 crore by motor drivers and cleaners.

Out of the income of Rs. 408.3 crore from house property in 1950-51, Rs. 212.8 crore were from houses in urban areas and the remaining Rs. 195.5 crore from those in rural areas.

PER CAPITA OUTPUT

In 1950-51, the net output per employed person was valued at Rs. 670 for the whole of the national economy. The output per person in each sector of the economy was as follows:

TABLE 77
NET OUTPUT PER EMPLOYED PERSON (1950-51)

	Net output (in crores of rupees)	Number of persons engaged (in crores)	Net output per employ- ed person (in rupees)
Agriculture Mining and factory establishments Small enterprises Railways and communications	4,890	10.36	500

	9,550	14.32	670

CAPITAL FORMATION

According to a provisional estimate, the amount of fixed capital for mation in India during 1934-55 was Rs. 749 crore or about 7 8 per cent of the national income. Of this Rs. 385 crore were in the private sector and Rs. 364 crore in the government sector. Table below gives an analysis of the domestic fixed capital formation in India between 1948-49 and 10.4.55.

TABLE 78

UNEMPLOYMENT

A precise estimate of the number of the unemployed in the country as whole is still to be made. Employment exchange statistics are of limited value, for they cover mainly the urban areas and a syet only a portion of the unemployed actually register themselves with the exchanges even where these exist.

According to a National Sample Survey conducted in 1933 7-10-per cent of the population of the city of Calcutata were unterplayed According to another sample survey conducted in that year 2-50 per cent of the population or 7-44 per cent of the Isbour force were unemployed in towns with a population of 50 900 and above excluding the four big cities of Calcuta, Bombay, Madras and Delhi The latter survey also recaled that 8-48 per cent of the population in these towns were under employed, ancluding 3-17 per cent severely under-employed." The total number

of the severely underemployed in the urban areas for the country as a whole, on this basis, would work out at 27.4 lakhs. According to the Agricultural Labour Enquiry, the number of the rural unemployed in 1950-51 was about 28 lakhs.

On the basis of the available data, the Planning Commission has estimated that early in 1956 there were, roughly speaking, 53 lakh unemployed persons in the country, 25 lakh in the urban areas and 28 lakh in the rural areas.

A study undertaken by the Manpower Division of the Directorate of Employment Exchanges, Ministry of Labour and Employment, of the pattern of unemployment among graduates as on May 15, 1957, showed that graduate unemployment was more widespread in West Bengal, U.P., Bombay and Delhi than in the other States. The highest incidence of unemployment among women graduates was in Kerala. About 93 per cent of the unemployed graduates seeking employment were men and about 7 per cent women. 48.5 per cent of the unemployed graduates were B.A.s, 22.7 per cent B.Sc.s and 12.8 per cent B.Com.s. Unemployment was relatively higher among the holders of commerce degrees than among the holders of arts and science degrees.

PATTERN OF RURAL ECONOMY

According to the first round of the National Sample Survey, conducted between October 1950 and March 1951, a rural household in India consisted, on an average, of 5·21 persons. A little over a fourth of these (28·1 per cent) were earners, about a sixth (16·6 per cent) were earning dependents and more than half (55·3 per cent) non-earning dependents. According to the 1951 census, however, the rural household was made up, on an average, of 4·91 persons. The annual consumer expenditure in the rural areas was, according to the sample survey, about Rs. 220 per person during 1949-50. As against this, the per capita income for the country as a whole was computed at Rs. 253·9 in the Final Report of the National Income Committee. The average consumer expenditure per person was the highest in North-West India, being Rs. 314, and the lowest in Central India where it was Rs. 198.

Two-thirds (66·3 per cent) of the expenditure of an average houshold in the rural areas, taking the country as a whole, were on food, about a tenth (9·7 per cent) on clothing and the remaining one-fourth (24·0 per cent) was distributed among other heads of expenditure. The expenditure on education, newspapers and books was Rs. 1·6 per person per year (constituting 0·7 per cent of the per capita expenditure) and that on medical services and medicines Rs. 2·8 per person per year (1·27 per cent). Together, education and health services accounted for just over 2 per cent of the per capita expenditure. Fuel and lighting absorbed 3·25 per cent, ceremonials 7·21 per cent and the remaining one-eighth of the total expenditure was on other amenities.

The average expenditure on clothing in the rural areas was about Rs. 21 per person for the whole of India. Mill-made products accounted for as much as 74 per cent of the expenditure on clothing, handloom products for 20.4 per cent, khaddar for 2.81 per cent and woollen and other products for 2.74 per cent. The expenditure on ceremonials was Rs. 15.8 per person per year for the whole of India, and formed 7.2 per cent of the total expenditure.

On the basis of the second round of the National Sample Survey, conducted between April and June 1951, households in the rural areas

were classified according to their monthly expend ture. The proportion of each class to the total number of households is indicated in the following table:

TABLE 79

PERCENTAGE DISTRIBUTION OF RURAL HOUSEHOLDS BY SIZE OF MONUMENT EXPENDITURE (APRIL, JUNE, 1931)

Expend ture per month (in rupees)	Proportion of total number of households (percentage)
Up to Rs. 50	20 +
51-100	31 2
101150	21 1
151-200	IO 4
201-300	9 5
501-400	3 6
401-500	1.5
501-600	0 \$
601-800	10
801-1 000	0 3
Over I 000	0.4
Total	100 0

Thus the monthly expend ture of 20 4 per cent of all households in the rural areas was 18 50 or less and 51 6 per cent of these households spent less than 18 100 a month Only 7 4 per cent spent one 18 300 per month and 2 5 per cent above 18 500 Cely seven in a thousand a monthly expend ture of over Rs 800 and only four in a thousand of west 1,000 per month.

The approximate value of rural investment for the year June 1996. May 1919 according to the same Survey was Rs 27 74 per household, about half of which was spent on the construction or unprovement of house, wells tanks bundy etc., and about a third on the improvement of Isnd. The annual capital formation in rural areas was estimated at Rs 166 corect.

In the second round of the National Sample Survey, houst-holds in the trust areas were also classifed according to the size of land under their trust after a were also classifed according to the size of land under their stands for the rate of Inid owned and land leased in minst land feased out. Only 16:3 per cent of all the households in the rural areas had hold sings of 10 acres and above and this category managed 3; 3 per cent of the total cropped area. Of have land of any kind 49:2 per cent and fers than 25:2 acres and above and the households for which fair records were available 5:9 per cent did not have land of any kind 49:2 per cent had fers than 25: acres each and between 2.5 and 5 acres and were managed 7:6 per cent and darker and between 2.5 and 5 acres and were managing 11 per cent fair of the cropped area.

TABLE 80

Land in acres	Percentage of total number of households for which full records were available	Percentage of total cropped area managed by the households for which full records were available	
Nil	5.9	4.4	
0.01-2.49	49.2	7.6	
2.50-4.99	14.3	11.1	
5.00-7.49	9.5	11.4	
7.50-9.99	4.8	7.2	
10.00-14.99	6.1 ,	13.1	
15.00-24.99	4.9	16.2	
· 25.00—and above	5.3	33,4	

Consumer Expenditure Patterns in Villages, Towns and Cities

According to the third round of the National Sample Survey, the consumption expenditure per person per month in the villages (including the imputed value of supplies obtained in kind) was Rs. 24·22 during August-November 1951; in the towns it was Rs. 31·55 and the average for Calcutta, Bombay, Madras and Delhi Rs. 54·82. The average expenditure per person for the country as a whole was Rs. 25·70 per month. The per capita expenditure in the cities was thus appreciably greater than in the towns and in the villages. The per capita expenditure in the cities was more than twice that in the villages.

The patterns of consumption in the villages, towns and cities were also different. While about 40 per cent of the expenditure in the villages was on foodgrains, the proportion for the towns was 22 per cent and for the cities 11 per cent. The expenditure on all food items was 66 per cent of the total expenditure in the villages compared to 55 per cent in the towns and 46 per cent in the cities. The actual expenditure on food in absolute terms was, however, higher in the cities than in the towns and villages. The expenditure on fuel and lighting was the lowest in the villages and the highest in the cities, although their proportion to the total expenditure was more or less the same for all the three categories.

The porportion of expenditure on clothing to total expenditure was also nearly the same (just above 6 per cent) for the three categories, whereas the expenditure on clothing, in absolute terms, was the highest in the cities.

The expenditure on the rest of the items, particularly on education, services, land and taxes, showed a gradual rise as one proceeded from the villages through the towns to the cities. The pattern of expenditure for the country as a whole approximates to that in the villages because of the preponderance of villages in India's economy.

About 43 per cent of the total consumption in rural areas was obtained in kind and 57 per cent purchased in cash. The proportion of the part obtained in kind was high for articles such as foodgrains, pulses, milk and milk products and fuel and light, and varied between 61 per cent and 78 per cent. The proportion for all food items taken together was about 56 per cent. Against this, only 11 per cent of the total value of consumption in the urban

areas was obtained in kind, while the remaining 89 per cent was against cash Here again the proportions for non cash consumption were relatively high in the case of foodgrains pulses milk and milk products and fuel and lighting For the country as a whole during August November 1951, nearly 40 per cent of the value of consumption was obtained in kind.

PRICES

The movement of prices in India over recent years may be seen from the following table which shows the index numbers of wholesale prices compiled by the office of the Feonomic Adviser, Ministry of Commerce and Industry, Government of India (Revised series, base 1952-53=100)

TARLE OF

INDEX NUMBERS OF WHOLESALE PRICES (Base: 1952 53=100)

\ ear	Food articles	Liquor and tobacco	Fuel ps wer, light	Indus- trial	Manufa	ctured ar	ticles	Gene- ral rodes	
		tonacco	and lubri canti	nateri- sals	Inter Finel mediate ed	Finish-	Combra ned	index	
1953 54	106 7	93 7	90 2	109 7	98 5	99 0	98 9	104 6	,
19>4-55	94 6	90 6	97 1	101 9	97 4	101 1	100 6	97 5	,
1955-56	86 6	81 0	95 2	99 0	100 1	99 6	99 7	92 5	,
1956-57	102 2	81 3	104 3	116 0	110 9	105 6	106 5	105 2	•

There was an almost continuous upward trend in prices during 1956 and the major part of 1937 The index number of wholesale prices (new base 1952 53=100) rose from 93 5 in December 1955 to 108 1 in December 1956 and 112 0 in August 1957 when the rise was arrested Thereafter the price index started declining. The index for December 1957 was 1070, which was lower than the index in Decemb 1956 (108.1)

TABLE 89

INDEX NUMBERS OF WHOLESALE PRICES

	(oase 1952 53=100)

The continued price rise since May 1955 was attributable to a general increase in demand resulting from the increase in investment expenditure on public and private account, accompanied by deficit financing and credit expansion during the last few years, and insufficiency of food production in relation to the demand. The measures which the Government took to curb the rise in prices included prohibition of exports of foodgrains, larger imports of wheat and rice, opening of a network of fair price shops for distribution of foodgrains and the assumption of powers to requisition foodgrains stocks. Three wheat zones in the north and a rice zone in the south were formed, and restrictions were imposed on movements of the cereals into and from the zones. Credit restriction measures were also employed by the Reserve Bank of India to deal with the situation.

Consumer Prices*

As a consequence of the rise in prices during the period, the all-India working class consumer price index rose by 4.6 per cent between December 1956 and December 1957. The following table shows the working class consumer price indices from 1950-51 to 1956-57 as well as for the months of December 1956 and March, June, September and December 1957.

TABLE 83

CHAPTER XVII

PLANNING

In his pioneering work, Planned Fonomy for India (1934), Shri M Visesvaraya advocated the necessity of planning and also laid down a ten year programme of planned economic development for the whole of India Subsequently, the idea of planning was taken up in 1938 by the Indian National Congress under the presidentishing of Shri Subhas Chandra Bose That year a National Planning Committee, with Shri Jawaharlal Nehru as chairman, was set up by the Congress to enquire into the possibilities of planned economic development in India and to suggest practicable schemes for this purpose. The Committee issued a questionnaire and, at the end of World War II, produced a series of important studies on the subject

Meanwhile, in June 1941, a number of Reconstruction Committees had been set up by the Government of India to deal with various aspects of post war reconstruction

In July 1914, the Government of India created a Department of Planning and Development. Also, in May 1944, the Provincial Governments were instructed to prepare their plans for post war development.

The general interest in planning in the country was evident from the number of non official plans that saw the light of day during World War II. These included (i) the Bombay Flan, drafted by a group of economists and industrialists, mostly from Bombay, (ii) the People's Plan, drafted by Shin M N Roy on behalf of the Post War Reconstruction Committee of the Indian Federation of Labour, and (iii) the Gandhian Plan, drafted by Shin S N Agarwal

The Planning Commission was set up by the Government of India in March 1950 to prepare a plan for the "most effective and balanced utilisation of the country's resources" In July 1950, the Commission was called upon the country which was later incorporated in the Colombo Plan In July 1951, the Planning Commission issued a draft outline of the first Five-Year I are overing the period April 1951 to March 1956 for the "widest possible public discussion". In December 1952 the final version of India's first Five Year Plan was submitted to Parliament

Objectives

The central objective of planning was defined as initiating "a process of development which will rause living standards and open out to the people new opportunues for an integral part of a wider process aiming not merely as to be every a integral part of a wider process aiming not merely at the development of sources in a narrow technical sense, but at the development of human faculties and the building up of ai institutional framework adequate to the needs and apparations of the people."

The first Five Year Plan was conceived as the first in a series of such plans directed at substantially raising the economic and social standards of the Indian people The long term objective is to double the per capita

income and to raise consumption standards by a little over 70 per cent by 1977. During the first Plan period between 1951 and 1956, the national income was to go up from about Rs. 9,000 crore to about Rs. 10,000 crore, a rise of about 11 per cent. Since economic progress required a large amount of capital accumulation, it was visualised that the rate of saving as a proportion of the national income would have to go up from 5 per cent in 1950-51 to 63 per cent in 1955-56, 11 per cent in 1960-61 and 20 per cent in 1967-68.

FIRST FIVE-YEAR PLAN

The first Plan, being essentially one of preparation or laying the foundation for more rapid development in the future, its targets of investment and the increases in production were modest compared with what have to be achieved within the next twenty years or so. The distribution of expenditure proposed for the development programme in the public sector during the first Plan period is shown in the table below. Initially, an outlay of Rs. 2,069 crore was proposed; it was later raised to Rs. 2,356 crore.

TABLE 84
OUTLAY DURING FIRST PLAN: DISTRIBUTION BY MAJOR HEADS

				Total provision (In crores of rupees)	Percentage of total
Agriculture and Con Irrigation and Powe Industries and Mini Transport and Com Social Services Miscellaneous	r	clopment		357 661 179 557 533 69	15.1 28.1 7.6 22.6 22.6 3.0
		TOTAL	••	2,356	100.0

Agricultural development, along with irrigation and the generation of electric power, had the highest precedence during the first Plan period. The development of transport and communications also received high priority. This inevitably limited investment by the public authorities on industries. Industrial expansion in the first Plan period was, therefore, left largely to private initiative and resources.

The actual outlay in the public sector over the five-year period was about Rs. 1,960 crore or 17 per cent less than the revised target of Rs. 2,356 crore (including adjustments). The yearly outlay is given below:

erore (metading adjustments).	1110) 44	- · · · · ·

	Total	1.960

Targets and Achienements

Both the short term and long term objectives of the first Plan were by and large achieved. There was an increase in domestic production and the economy was cons derably strengthened. Inflat onary pressures were pract cally el minated. The price level at the end of the Plan was 15 per cent lower than at its commencement. The foundation had been laid for a rapid development in the future

Over the period of the first Plan, national income (in constant prices) increased by about 17 5 per cent from about Rs 8 870 crore in 1950-51 to about Rs 10 420 crore in 1955-56**, showing a larger rate of increase than was originally anticipated. The per capita income over the same period also at constant prices recorded an increase of about 10 5 per cent from Rs 246 to Rs 272 while per capita consumption increased by about 8 per cent. The rate of investment in the economy as a percen tage of national income is estimated to have risen from a little less than 5 per cent in 1950-51 to a little over 7 per cent in the last year of the Plan.

The targets and achievements in different sectors of the economy are shown in the following table

,

Based on 'revued estimates' for the fifth year. Actual outlay is estimated at Rs. 1,950 crore.

SECOND FIVE-YEAR PLAN

Object ves

The second Five-Year Plan, covering the period from April 1956 to Murch 1961, was submitted to Parlament on May 15, 1956. The main objectives are: (i) an increase of 25 per cent in the national income; (ii) rapid industrialistation with particular emphasis on the development of biase and heavy industries, (iii) a large expansion of employment opportunities and (i) a reduction of inequalities in income and wealth and a more even distribution of economic power.

Outlay and Allocations

The proposed development outlay of the Central and State Governments amounts to Rs 4200 crore over the period of the second Plan, as compared with the target of Rs 2,556 crore and actual guiday of Rs. 1953 crore under the first Plan. This does not include the contributions in cash or kind made by the people towards the execution of local development works. The distribution of the outlay by major heads of development works. The distribution of the outlay by major heads of development (see table 65) indicates the relative shuft in priorities. In absolute terms the outlay shows a sizable increase under all heads, compared to the first Plan. As a proportion of the total outly there is a significant increase under the head. Industry and Mining! from 7.6 per cent in the first Plan to 18.5 per cent in the second Plan. "Transport and Communications also shows an increase from 23.6 per cent to 28.9 per cent. The relative shares of all the other groups show a decline

Miscellaneous	43	56	99	19	- 6a
TOTAL	2 559	2 240	4 800**	3 800	1,000

Of the total outlay, roughly Rs 3 800 crore represent investment, that is expenditure on the building up of productive assets, and Rs 1,600 crore is what may broadly be called current developmental expenditure.

The likely level of private investment over the second Plan period is placed at Rs 2,400 crore distributed as follows

TABLE BR

	(In crores of rupers)		
Organised industry and mining		575	
Plantations, electricity undertakings and transport other than the ra-		125	
Construction	٠.	1,000	
Agriculture and village and small-scale industries		300	
Btocks		400	

In the first Plan, total investment in the economy was estimated toughly at about RS 3,100 errore, the ratio of public to private investment being 30 50. In the second Plan, the target of investment in the two sectors combined is Rs. 6,200 errores, the ratio of public to private investment being 61.39.

Targets

The targets of production and development, in physical terms, in respect of some important items are shown below

^{*} The revised targets for agricultural production during second Plan are given below in l'able 90.

** Relates to the year 1949-50.

*** Relates to the calendar year 1954.

Figures relate to calendar years.

Since the above targets of agricultural production were considered at inadequate for meeting the increasing demand for food and raw materials expected to be generated by the implementation of the second-Plan, these targets were subsequently revued upwards, although the allocation of resources remained unchanged. Fulfilment of these targets will thus require the maximization of efforts.

of National Income	4 98	700	97	l	1

. The figures in this table are as given in the Second Firs Year Plan (May 1956).

The average level of consumption in the economy will increase somewhat less rapidly than the national income in as much as a larger proportion of the domestic output will have to be saved and invested. The projected total investment of Rs. 6,200 erore during the second Plan period requires, broadly, an increase in the rate of domestic saving from the current level of about 7 per cent of the national income to about 10 per cent in 1960-61, assuming that, in addition, external resources of the order of Rs. 1,100 erore will be available during the period. The total consumption expenditure may, on this assumption, increase by some 21 per cent as against the increase in the national income of 25 per cent. The corresponding increase in total consumption over the first Plan period amounts to some 16 per cent, and that in the national income to about 18 per cent.

The estimated full-time employment likely to be created over the second Plan period in sectors other than agriculture is 80 lakhs. Besides, schemes of development such as irrigation and land reclamation will reduce under-employment and also absorb new persons to some extent. Altogether the Plan envisages a sufficient increase in the demand for labour to match the increase in the labour force estimated at 100 lakhs during the second Plan period.

Financial Resources

Table 92 indicates how the second Plan is to be financed.

TABLE 92
ESTIMATES OF RESOURCES

(In crores of rupees)

Resources to be raised externally]		800
Deficit financing			1,200
Gap to be covered by additional measures to raise dome resources	stic		400
			4,800
•		(

The budgetary resources that can be raised through taxation, borrowing and other receipts thus amount to Rs. 2,400 crore. In arriving at the figure of Rs. 450 crore under additional taxation, the recommendations of the Taxation Enquiry Commission were taken into account and it was assumed that steps would be taken to implement these as early as possible after the commencement of the Plan. The Central and State Governments are expected to raise between them a total of Rs. 450 crore in equal amounts.

The estimate of Rs 700 crore of borrowing from the public assume that the annual receipts from this source will, on an average, be considerably higher than they have been in recent years. In this connection, the possibility of extending the scope of social security schemes must be fully explored. The nationalisation of life insurance should also prove a growing source of public borrowing. In the case of small savings also, the target of Rs 100 crore a year on an average will require a further substantial stepping up of these collections, as compared with net receipts in 1955-56 (Rs 65 crore).

The railways are expected to contribute Rs 150 crore to their Rs 900 crore programme, both through selective adjustments in rates and freights and the growth of traffic. In addition, the railways have to make, in the Plan period, a contribution of Rs 225 crore for current depreciation, which has not been included in the Plan

The Plan also take credit for Rs 800 crore of external resource, which is about four times the amount unliked from foreign loans and grains during the first Plan period. Caternal finance amounting to Rs 298 crore was made available to India for programmes of development in the public sector, of which Rs 204 crore is estimated to have been utilised. The balance of Rs 94 crore was thus available for utilisation in the second Plan period. In addition, arrangements when made for credits from the USSR and UK Governments and British branken for an c amount of Rs 76 crore's to finance the steel projects. As for the private sector, Rs 22 crore was already available as the undabbursed portion of the loan made by the World Bank to the Indian Iron and Steel Company, the Tata Hydro-electric Company and the Industrial Credit and Investment Corporation of India.

Rupers 1,200 crore represent the outside limit of deficit financing Against this must be set off the drawing down of sterling balances by Rs 200 crore. The remaining Rs 1,000 crore represent the net addition to currency in response to the Government's budgetary operations, which may be expected also to result in a secondary croasision of bank credit. Any adverse representsions of deficit financing will have to be dealt with by an appropriate Central banking policy, thing inductious recourse to quantitative and qualitative controls on credit withing the standard properties of the control of the contr

Investment in the Private Sector

The investment requirements of the private sector are estimated at R. 2,400 crore. Of thus, a sum of Rs 720 crore is proposed to be utilised for industrial development (excluding mining, electricity separation and investments and Rs 150 crore on replications and small scale industries)—Rs 570 crore on new howev r, i cludes Rs 55 crore provided for the National Industrial Development Corporation's programme. Against the balance of Rs 665 crore, the resources of the private sector are estimated at Rs 620 crore as follows:

^{*}After allowing for repayment of Rs. 20 crore of the USSR's credit of Rs. 63 crore.

Outlay During First Two Years

The estimated outlay under major heads during the first two years of the second Plan is given below.

TABLE 94

(In crores of rupees)

		<u> </u>		
	1956-57 (Budget)	1956-57 (Revised)	1957-58 (Budget)	Total during first two years, 1956-58 (Esti- mate)
Agriculture and Community Development Irrigation and Power Industry and Mining Transport and Communications Social Services Miscellaneous	108 181 121 247 143 30	93 179 111 233 123 22	117 162 229 271 154 21	210 341 340 504 277 43
TOTAL	830	761	954	1,715

The likely actual outlay during 1956-57 is now estimated at Rs. 675 crore (Centre Rs. 372 crore and States Rs. 303 crore) and that during 1957-58 at Rs. 840 crore (Centre Rs. 470 crore and States Rs. 370 crore), the aggregate outlay during the first two years of the second Plan thus amounting to about Rs. 1,515 crore.

The resources for 1956-57 Plan outlay (likely actual) were found in following manner.

^{*} Including Union Territories

Foreign Exchange Position

The external payments position of the country has been under train since the beginning of the second Plan,* owing munhy to a rise in imports both on private and public account. The increase in imports during 1936 57 mainly arose out of the requirements of development projects under the second Plan, slithough the following other factors were also responsible (i) increased defence expenditure, (a) larger imports of foodgrains, (ii) increased requirements of raw materials, components, etc., (ii) higher imports of consumer goods, and (iv) increase in freight rates and prices. To reduce the strain on the foreign payments position, a progressively restrictive policy on imports has been adopted and steps taken to expand exports. The foreign exchange costs of projects in the second Plan have also increased as a result of higher prices abroad of developmental commodules.

To meet the situation, the provision of foreign exchange for various use is being regulated according to a strict order of priority. Besides making foreign exchange available for the maintenance of the economy and for defence, the first priority is being accorded to the execution of the the 'core' of the plan-that is, steel plants, coal, railways, ports and specified power projects. Phornity is also being twen to projects which have progressed substantially towards completion. Outside these, no new commitments in terms of foreign exchange are being undertaken expert on deferred payment terms or on the basis of new foreign inclusions. It is not succeeded to clean Fresh external assistance of the order of Rs. 700 erore will be needed on Government and private account to see through the 'core' projects as well as the projects in an advanced stage of completion.

Despite increases in the estimated costs of certain development projects, the objective well now be to limit the total outlay in the pubble sector over the Plan period to Rs. 4,800 crore. This assumes an accelerated effort to step up smill saving and realise the targets of additional sustained. The yield over the Plan period from measures of additional taxistion adopted by the Centre so far is estimated at about Rs. 800 crore; the corresponding yield from taxistion measures in the States is estimated at about Rs. 130 crore. It is also proposed to reduce the magnitude of defett financing over the Plan period from Rs. 1,200 crore to Rs. 900 to 1,000 crore.

The foreign auets of the Reserve Bank declined by Ra. 219 erore during 1956-57 and Ra. 217 erore during the first 8 months of 1957-58.

CHAPTER XVIII

COMMUNITY DEVELOPMENT

The Community Development Programme, aiming at the individual and collective welfare of India's vast rural population, was launched on October 2, 1952, in 55 selected projects. Each project covers an area of about 500 sq. miles with about 300 villages and a population of about 2 lakhs. Being the mainstay of about seventy per cent of the rural population, agriculture receives the highest priority in the programme. Among other activities included in this programme are provision of better communications, improvement in health and sanitation, better housing, wider education, measures for women's welfare, and development of cottage and small-scale industries, etc. Emphasis is laid on encouraging community thinking and action through people's institutions like panchayats, co-operative societies, vikas mandals, etc.

This programme has been supplemented by another of a somewhat less intensive character called the National Extension Service. This programme has been designed to provide the essential basic staff and a modicum of finance with which the people could initiate work on a relatively less ambitious programme than that contemplated in the Community Development projects. Out of the areas developed as National Extension Service Blocks, selection is made periodically for intensive development under the Community Development Programme.

The target of covering 1,200 blocks—700 under the Community Development and 500 under the National Extension Service—during the first Plan has been achieved at an estimated cost of Rs. 52.4 crore. One-fourth of the rural population in the country had been brought within the orbit of the programme by the end of the first Plan period. The target laid down in the second Plan is to cover the entire country by 1960-61 with NES Blocks of which 40 per cent are to be converted into CD Blocks. The amount allocated for this purpose is Rs. 200 crore.

The number of Blocks in operation and already allotted totals 2,152 as indicated in the table below:

TABLE 96

Series	No. of Blocks allotted	No. of Blocks started	Villages covered by Blocks	Population (in lakhs)
Intensive Development Blocks 1952-53 1954-55 1955-56 1956-57 1957-58 NES Blocks 1954-55 1955-56 1956-57 1957-58	206 56 152 250 189½ 19½ 187 495 597	206 58 152 250 189½ 191 187 495 597	27,388 8,584 21,438 36,017 25,530 2,893 27,261 66,911 60,004	169 42 124 186 112 18 138 138 333
TOTAL	2,152	2,152	2,76,026	1,494

1,18 9.57 villages with about 6.3 crore people under the Community Development Programme, and 157,069 villages with over 8.6 crore people under the National Extension Service have been covered till the end of June 1937. For the remaining period of the second Plan the year wise phasing of the programme for the country as a whole will be as follows.

TABLE 97

Year	No of NES Blocks	No. of NES Blocks to be converted into CD Blocks
1958-59	750	260
1959-60	900	300
1960-61	1 000	360

FINANCE

Allocation of Expend ture

The resources for the projects are drawn both from the people and the Government. For each project area the programme indicates a qualifying scale of voluntary contributions from the people in the form of money as well as labour and also in kind. Where the State offers financial assistance for the execution of the project, the expenses are shared by the Central and State Governments result; in respect of recurring items and in the proport on of 3 to 1 in the case of non recurring item. For productive works like irrigation reclaims to the State Governments in the shape of loans payable in full with interest. The Centre's contribution will amount to half of the total expenditure subject to a maximum of Rs 6 crore per year

Expenditure on Each Block

Expenditure for a 3 year period on a National Extension Service Block and on a Community Development Block during the second Plan has been placed at Rs. 4 lakh and Rs. 12 lakh respectively.

Expend ture on Post Intensive Blocks

Apart from permitting utilisation of savings if any, up to the end of March 1938 an expenditure of Rs 30 000 per annum per Block has been prouded for 3 years in the post intensive phase on completion of the scheduled period of operation during the second Plan This expenditure also be shared between the Central and State Governments in the prescribed proportion

External Assistance

In this effort to transform the rural areas, India is receiving assistance from the United States of America Under the Operational Agreement No 8 of the Smith Development Programme and the Samplements thereto, the US Covernment agreed to make available from the Indo-American Technical Covernment agreed to make available from the Indo-American Technical Covernment agreed to make available from the India Flurd Na. a sum of 14 of Samplement Prind, more commonly known required for the Community Projects of 1957-53. Indents covering the entire up in India during 1952-53 amount have been placed with the Indian Supply Mission, Washington, and up to December 15, 1957,

equipment worth about 11.50 million dollars has been received and supplied to the State Governments.

From the beginning, the Ford Foundation has been assisting India in training thousands of project workers. The Ford Foundation also provided assistance in the launching of 15 pilot projects for rural development.

ORGANISATION

The Union Ministry of Community Development is in overall charge of the programme, matters of basic policy going before the Central Committee, consisting of Members of the Planning Commission and the Ministers of Food and Agriculture and Community Development, with the Prime Minister as Chairman. Co-ordination with allied Ministries is maintained through special committees and frequent exchange of views.

The actual execution of the development programme is the responsibility of the State Governments. Generally, each State has a single authority known as the State Development Committee, for the implementation of both the Extension Scheme and the Community Projects. This body consists of the Chief Minister as the Chairman, the Ministers of the departments concerned with development work as members and the Development Commissioner as Secretary. The Development Commissioner, who co-ordinates the activities of all the development departments, is a senior Secretary to the Government.

The Collector is the Chairman of the District Planning and Development Committee. All the heads of the development departments in the district are represented on the Committee which also includes the Chairman and the Vice-Chairman of the District Board as well as many other non-officials,

At the Block level, the Block Development Officer is assisted by a team of experts in agriculture, co-operation, animal husbandry, cottage industries, etc.

Finally, there is the Village Level Worker who acts as the multipurpose man and is in charge of 5 to 10 villages. While this remains the general pattern of organisation, minor adjustments to suit local conditions have been made in the States to ensure efficient and smooth working.

Non-official participation in the implementation of the Community Development programme has also been secured. Parliament at the Centre and the Legislatures in the States provide general guidance and direction. At the Block level, the Block Development Officer is assisted by non-official advisory committees. The Village Level Worker discharges his duties in close collaboration with the panchayat or the village development council. Voluntary organisations like the Bharat Sevak Samaj, Mahila Mandals, etc., also play an important part.

ACHIEVEMENTS

Multi-purpose Blocks in Tribal Areas

Forty-two special multi-purpose Blocks have been started with special programmes for 5 years for intensive development of tribal areas. Each of them has a budget of about Rs. 27 lakh per annum.

Industrial Estates

Nine major Industrial Estates and 20 of the small and rural type of Industrial Estates have been started in CD Blocks with the objective of decentralising small industries and encouraging small entrepreneurs.

Royal Housans

Under the first phase of the Village Housing Scheme, one hundred Rural Housing Projects have been set up in 100 Blocks, each project covering 5 villages on the average Rural housing cells for planning projects and guiding their implementation are being set up in the States with central assistance

59 000 new co-operative societies were started and 31.1 lakh additional members were enrolled with the help of extension officers (co-operation) up to June 30, 1957

PEOPLE'S CONTRIBUTION AND TRAINING PROGRAMME

3,378

Production-cum-training centres started (Number)

The results achieved have been made possible by the active co-operaration and participation of the people. Till September 1956, the value of the people's contribution to the programme by way of land, cash and labour amounted to Rs. 45.6 crore as against an actual expenditure of Rs. 75.2 crore by Government. In other words, the people's contribution was 61 per cent of the Government's expenditure, working out at Rs. 4,172 for every thousand persons.

Training of Personnel

A comprehensive training programme has been initiated. At present there are 68 Extension Training Centres for the Village Level Workers (Gram Sevaks). Basic training in agriculture is imparted by 78 basic agriculture schools and 18 agricultural workshops. For the training of the Gram Sevikas there are 25 Home Economics Wings attached to the Extension Training Centres and 2 Home Economics Centres. Another 27 training centres to train Group Level Workers have been sanctioned.

There are 14 training centres for Social Education Organisers, 4 for the Block Development Officers, 8 for the Block Level Extension Officers (Co-operation), and 11 for Block Level Extension Officers (Industries).

Health personnel are being trained in 3 training centres. Besides these, there are over 66 institutions for the training of auxiliary nurse-midwives, 9 centres for the training of lady health visitors and 6 others for the training of midwives.

The position as at the end of December 1957, in regard to the training of various categories of project personnel, was as follows?

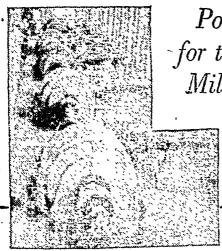

TABLE 93
TRAINING OF COMMUNITY DEVELOPMENT PERSONNEL

Block Development Officers	1,811	l –
Health Fersonnel (Orientation)	1,217	85

Training of non-officials participating in the programme has also been provided for Camps are held for different groups of subjects for Gran Sakepak (functional village leaders) in every Village Level Worker's circle with the aid of specially trained staff supported by district heads of different departments. The Gran Sakapak, on return to their villages, help their fellow-villagers in improving their technique of production and ways of hie through discussions and by practical demonstration.

Stemman are organused at the Divisional and State levels by the State Governments, and at the National level by the Union Ministry of Community Development. These seminars are meant for exchange of views and experiences among the workers in the programme, official as well as non-official At these seminars, non-officials at all levels, e.g., members of Block Advisory Committees, Members of State Legulatures and Members of Parliaments, participate.

Camps of one month's duration for village school teachers are organised in every block under the leadership of perpatetic teams trained earlier in orientation courses. The teachers this trained spread the ideas of development both among the school children and the village community on return to their village.

CHAPTER XIX

FINANCE

PUBLIC FINANCE

Financial System

Public finance is concerned with the modis oberandi of the financial activities of public hodies. In India, there is no single authority for the raising and disbursal of public funds Under the Constitution, the power to raise funds has been divided between the Centre and the States large, the so trees of revenue for the Centre and the States are mutually exclusive. There is thus more than one budget and more than one public treasury in the country

In order to safeguard the rights and interests of the tax-payer, the Constitution provides that (i) no tax can be levied or collected except by the authority of law (ii) no expenditure can be incurred from public funds except in the manner provided in the Constitution, and (iii) the executive authorities must spend public money only in the manner sanctioned by Parliament,

According to the provisions of the Constitution, all receipts and disbursements of the Union Government are kept in two separate parts, namely the Consolidated Fund and the Public Account All revenues received, loans raised and money received in repayment of loans by the Union Government go together to form the Consolidated Fund of India No money can be withdrawn from this Fund except under the authority of an Act of Parlia-All other receipts and disbursements, such as deposits, service funds remutances etc go into the Public Account which is not subject to the vote of Parliament. To meet unforeseen needs, not provided in the Annual Appropriation Act a Contingency Fund of India has also been established under Article 267 of the Constitution This fund which is administered by the Ministry of Finance, provides an imprest which can be drawn upon pending authorisation of the expenditure by Parliament.

The Constitution also provides for the establishment of a Consolidated Fund and a Public Account for each State Similarly the States also have Contingency Funds to meet unforeseen needs pending legislative authorssation

The Railways, the largest nationalised industry, have their own funds and accounts and their budget is presented separately to Parliament. The appropriations and disbursements under the Railway Budget are, however, subject to the same forms of parliamentary and audit control as the other appropriations and dislursements

Allocation of Revenue

The main sources of Central revenue are customs duties, excise duties levied by the Union Government, the corporation and income taxes (excluding taxes on agricultural income), estate and succession duty on non agricultural assets and property and the earnings of the Mints. The revenue from the two new taxes—weelth tax and expenditure tax—will also accrue to the Centre Besides, the railways and posts and telegraphs contribute to the general revenue of the Centre.

The main heads of revenue in the States are: (i) taxes and duties levied by the State Governments, (ii) civil administration and civil works, (iii) State undertakings, (vi) taxes shared with the Centre, and (v) grants received from the Centre. Land revenue, motor vehicles tax, entertainment tax, electricity duty, agricultural income tax and other taxes and duties account for nearly one-half of the total revenue receipts of the States. Property taxes and octroi and terminal taxes are the mainstay of local finance.

Second Finance Commission

The second Finance Commission set up under Article 280 of the Constitution, in June 1956, submitted its final Report in September 1957. The recommendations of the Commission provide for a devolution of about Rs. 140 crore per year (not including the proceeds of the tax on railway fares amounting to Rs. 15 crore in a full year) as against an average sum of Rs. 93 crore, received by the States under the first Finance Commission's recommendations.

The table below summarises what each State may expect to receive under the recommendations taken together in each of the five years beginning on April 1, 1957. The figures shown against share of taxes are only estimates and indicate the order of the sums to be received; the actuals will vary from year to year.

TARLE 99
STATES' SHARE OF TAXES AND CENTRAL GRANTS
(Rs. in cross)

			· · · · · · · · · · · · · · · · · · ·		
State	Shares of taxes	Grant under Article 273*	Grant under sub- stantive portion of Article 275(1)	Total	Tax on Railway fares

Total	100.00	1.88*	37.55	139.43	14.81

This is an average for five years of payments which will actually be made to the States in the three years ending March 31, 1960. Grants-in-aid under Article 273 cease on the expiry of ten years from the commencement of the

Kote 1. Assam will receive, in addition, a grant-in-aid of Rs. 40 lakhs under clause (a) of the second proviso to Article 275 (1).

Wete 2. Under Section 74 of the States Reorganisation Act, the States of Bombay, Kerala, Madras and Mysore are entitled to receive during the three years ending 31-3-1960 the sums by which a prescribed percentage of their share of divisible Central Taxes may fall short of the average of the revenue gap grants guaranteed to the former Part B States of Saurashtra. Travancore-Cochin and Mysore now merged in them. On the estimate of divisible Central Taxes adopted by the Commission, the sums due to Kerala and Madras will be marginal while Bombay and Mysore may receive sums of the order of Rs. 3½ crore and Rs. 1 crore respectively for all the three years.

The Commission increased the percentage of net proceeds of income tax to be as igned to States from \$5 to 60 per cent and fixed the shirt of the Union Territories at one per cent of the net proceeds. The distribution of the share among the States shall be 10 per cent on the basis of collection and 90 per cent on the basis of polyulation as compared to 20 and 80 per cent respectively recommended by the first Finance Commission.

According to the recommendations of the first Finance Commission, 40 per cent of the net proceeds of Union excise duties or obsacco (including manufactured tobacco), matches and vegetable products were distributed among the States The vecond Commission reduced the States share to 20 per cent but added excise duties on sugar, ten, coffee, paper and vegetable non essential oils to the list Ninety per cent of the States' share to Union excise duties would be distributed on the basis of population and the balance used for adjustment.

The Commission suggested that out of the net proceeds of the additional excise duty to be levied on mill made textiles sugar and tobacco (including manufactured tobacco), in replacement of the sales tax being level by the State Governments, one per cent should be assigned to the Union Territories and 1½ per cent to Jammu and Kashmur. For the distribution of the balance to the States amounts representing their "present norms were fixed by the Commission for the three commodities, both separately, and collectively. Percentage shares for the distribution of the remainder were also indicated in a similar manner.

Net pro ecds of the Estate Duty, which was first levied in 1953, were being distributed prosisionally, in the same ratio as the States' share of the divestile pool of income tax. The Commission suggested one per cern as the stare attributable to the Union tertimizes, the behance is to be apportioned between immovable property and other property in the ratio of the gross value of all such properties brought into assessment in that year. The sum thus apportioned to immovable property to be distributed among the States in proportion to the gross value of all such properties of the immovable property located in each state, the remainder is to be allocated among the States according to population. The sum apportioned to property other than immovable property is to be distributed among States on a percentage basis fixed by the Commission.

The Commission also indicated percentage shares for the distribution of the railway fare tax among the States

Annual Financial Statement or Budget

An estimate of all anticipated revenue and expenditure of the Union Government for the coming financial year is laid before Parliament towards the end of February every Far This is known as the "Annual Financial Statement or the Budget". Apart from giving estimates of revenue and expenditure, this statement also contains (i) a review of the financial position of the preceding year, (ii) proposals for fireth taxation if additional money is needed to cover a deficit, and (iii) proposals for financial gaptatel expenditure.

The presentation of the Annual Financial Statement is followed by a general discussion in both Houses of Parliament The estimates of expenditure other than that charged, are then placed before the House of the People in the form of "Demands for Grants" Ordinarily, a separate Demand is made for each Ministry All drawal of money from the Consolidated Fund is thus authorised by an Appropriation Act passed by Parliament every year

The tax proposals of the Budget are embodied in another Bill which is passed as the "Finance Act" of the year. Estimates of receipts and expenditure are similarly presented by State Governments to their legislatures before the beginning of the financial year in April and Legislative sanction for financial expenditure is secured through similar procedure.

Audit .

The Constitution requires that the audit authorities, who are independent of the executive, should scrutinise the expenditure of the Central and State Governments and ensure that this is strictly within the limits of their competence. It further enjoins that an account of the expenditure of each Government should be approved by its legislature.

Union Government

The tables Nos. 100 to 105 show the budgetary position of the Central Government since 1951-52.

Budget Estimates (1958-59)

The budget estimates for 1958-59, as presented in the Lok Sabha on February 28, 1958, placed expenditure at Rs. 796.01 crore as compared to Rs. 719.58 crore (revised) in 1957-58 and revenue (at the existing level of taxation) at Rs. 763.16 crore as compared to Rs. 724.63 crore (revised) in the previous year, leaving a deficit of Rs. 32.85 crore. New taxation proposals were expected to yield an additional revenue of Rs. 5.83 crore. This would leave a final deficit of Rs. 27.02 crore which was proposed to be left uncovered.

Important among the new taxation measures were the proposal to levy a Gift Tax which was estimated to yield Rs. 3 crorc. Important changes proposed in the existing taxation measures were: (a) amendments to the Estate Duty Act including the reduction of the exemption limit from Rs. one lakh to Rs. 50,000 (b) a proposal to levy Excess Dividend Super Tax in two instead of three slabs, namely, 10 per cent on the slab of dividends over 6 per cent of capital and 20 per cent on the slab over 10 per cent of capital; (c) increase in the rate of development rebate for ships from 25 to 40 per cent; (d) exemption of foreign citizens, resident in India, from payment of Wealth Tax on their foreign wealth; (e) increase in the rate of excise duty on cement from Rs. 20 per ton to Rs. 24 per ton and the simultaneous withdrawal of the surcharge levied by the State Trading Corporation; (f) withdrawal of the concession for paying duty at compounded rates from establishments having more than 100 power-looms producing cotton textiles and the enhancement in two stages of the compounded rates applicable to units having 25 to 100 power-looms; and (g) reduction of the duty on vegetable products for the first 3,000 tons cleared by each factory.

Tables 106 and 107 show the budget of the Central Government for 1958-59 on revenue and capital accounts.

Union and State Governments Combined

In view of the integrated plans of economic development and also the transfer of substantial resources from the Centre to the States it will be better to consider the Centre and the States together while studying budgetary trends. In recent years, budgetary policies in India have been largely influenced by the needs of rapid economic development under the Five Year Plans. Owing to the shortfall in resources caused by increasing

expenditure in the public sector, there has been an increasing recourse to deficit financing and the Government's efforts have been directed towards the mobilisation of larger resources through new tax measures. So far, these have been largely confined to the Central Government, many of the States having made no new tax proposals in their budgets for 1957-58.

Tables 108 to 112 show the combined budgetary position of the Centre and the States, on both revenue and capital accounts, for the years 1951-52 to 1957-58.

TAXATION

In pursuance of the objective of maximum mobilisation of resources, new tax measures have been introduced by the Central Government in recent years. These, along with recent changes effected in some of the existing tax measures are briefly described below:

Tax on Capital Gains

This tax, which had also been in operation earlier, during the period April 1, 1946 to March 31, 1948, was revived with a few modifications and made applicable to capital gains, resulting from the sale, exchange or transfer of capital assets and arising on or after April I, capital gains tax is, however, payable by a person (not being a company) if the capital gains during the year are less than Rs. 5,000. It is also not payable if the capital gains together with the other income of the assessee do not exceed Rs. 10,000. The tax is imposed only on realised capital gains and not on the accrued profits. Capital gains arising from the sale of agricultural land or sale of personal effects, and household goods, are exempted from this tax. Persons owning residential houses are not liable to this tax if they make capital gains on the sale of such a house provided the sale is effected for the purpose of acquiring another residential house. An option is provided to the assessee to determine the capital gains on the basis of the estimated value of the assets on January 1, 1954 instead of the cost, if this is found to be more favourable. As in the case of income-tax, capital losses are allowed to be carried forward and set off against the taxable capital gains of subsequent years. The capital gains are taxed at the rate of income-tax applicable to the total income after including therein only one-third of the capital gains. The capital gains are not liable to super-tax.

Wealth Tax

The Wealth Tax came into force on April 1, 1957 and assessments were to be made from the year 1957-58. This tax is payable by individuals having wealth the value of which is in excess of Rs. 2 lakh, by Hindu undivided families having net wealth in excess of Rs. 4 lakh and by companies having wealth of net value in excess of Rs. 5 lakh. Wealth Tax Act allows complete exemption in the case of certain types of properties, such as agricultural properties, properties of charitable trusts, personal effects and balances in recognised provident funds and insurance policies. The exemption also applies to jewellery up to a limit of Rs. 25,000.

In the case of companies, while banking, insurance and shipping companies are totally exempted from wealth tax, new industrial undertakings would enjoy the exemption only for five successive assessment years from the date of their incorporation. Existing companies which establish new industrial units are also similarly exempted for five years on that part of their net wealth which is employed in such units. Shares held by one

company in another are not to be included in the net wealth of the holding company for purposes of this tax. Companies which suffer losses in any particular year will not be subjected to this tax for that year. In the case of companies which make small profits in any year the wealth tax payable has been limited to the amount of profits. Foreign companies will pay the tax only on their Indian wealth, their foreign wealth being left out of account altogether.

Expenditure Tax

The Expenditure Tax came into force on April 1, 1958 and the first assessment year would be 1958-59, in which the expenditure incurred by the assessed during the previous year relevant to the corresponding Income Tax assessment year 1958-59 will be charged to tax. The tax is imposed only on those individuals and Hindu undivided families whose net income from all sources after payment of all taxes exceeds Rs. 36,000. The new tax is leviable only on the expenditure incurred on personal consumption in excess of certain prescribed basic allowances. Thus, savings, investments, expenditure for business purposes etc. are not subject to the tax. Expenditure on items of capital nature which are not immediately consumed, such as, motor cars, furniture, etc., is spread out over a period of five years for the purposes of this tax.

The basic allowance for personal expenditure is Rs. 30,000 in the case of an individual, but goes up to a maximum of Rs. 60,000 in the case of Hindu undivided families. Besides, basic allowance deductions in respect of expenditure incurred on the maintenance of parents, for marriage, medical treatment and educational expenses abroad are also allowed subject to limits specified in the Act.

With a view to avoid hardship to individuals and Hindu undivided families accustomed to a high standard of living in the past, an option has been given that instead of the basic allowance and other deductions allowable under the law, they can have a basic allowance calculated at 75% of the annual average expenditure for the last three years, subject to a maximum of Rs. 75,000. This limit will be progressively reduced by Rs. 5,000 every year so as to enable them gradually to adjust their expenditure accordingly.

Central Excise Duties

The Central Excise Duties (as distinct from State Excise Duties) are levied under the Central Excise and Salt Act, 1944 and their collection is governed by the Central Excise Rules, 1944. A comprehensive list of all commodities and the rates of duty leviable thereon is given in the First Schedule to the Act. Changes in this Schedule are made from time to time by Finance or other Acts of Parliament.

Among the more important developments during 1957-58 were:

- (i) Central excise duties obtaining prior to May 16, 1957 were enhanced with effect from that date on a number of existing excisable commodities. This was in order to meet the mounting expenditure of defence and help implement the Second Five Year Plan.
- (ii) Additional excise duties were imposed on sugar, cloth and unmanufactured tobacco and tobacco products under the Additional Duties of Excise (Goods of Special Importance) Act, 1957, in replacement of the Sales Tax levied by the

Union and the States This step was in pursuance of the recommendations of the National Development Council,

- (ni) The Gentral Escae and Salt (Amendment) Act 19,7 was passed in order to rate the quantum of robite to be granted order to rate the quantum of robite to be granted of steel manufactured from such inquest, and to remove of the recording the bast for determining the average annual count in respect of such other than cotton yar much in the manufacture of mixed cotton fabrics and to provide an uniform last.
- (u) With effect from December 14, 1957, the rate of duty on medium varieties of cotton fibrics was reduced as a temporary medium to the two mans per sq vid to one anna 6 ps with a view to help clearince of recumulated stocks of such cloth.
 - (v) To two impetus to the export of indigenous goods the procedure regarding the relate on excise duty on the export of goods in the immufacture of which excisable commodities are used, was liber liked.

Income Tax

The more important classes of income exempted from income tax are income, from aericulture, income derived from property held under a trustor oth r legal obligations for religious or clastiable purposes, income of a religious or charitable institution derived from voluntary contribution and solidy devoted to religious or charitable purposes, income of a university or any other educational institution or an approved scientific research absociation, income of a local vulberity, except earnings made from trade or business carried on outside its jurisdiction, casual recepts such as price money from crossword puzzles, etc.

Important changes in income tax made during 1957-58 included.

- (1) a change in the procedure of differentiation between earned and uncarned income whereby a standard schedule of rates will be applied to all earned income with a higher surcharge on unearned uncome. The highest marginal rate will be reduced from 91.8 per cent to 84 per cent for unearned mome and 77 per cent for earned income.
- (2) a reduction in the taxable minimum from Rs 4,200 to Rs 3 000 for individuals and from Rs 8 400 to Rs 6,000 for Hindu undivided families The tax free slab for married persons was increased from Rs 2,000 to Rs 3,000,
- (3) the rate of income tax for companies was raised from 25 per cent to 30 per cent and the Corporation Tax from 17 per cent to 20 per cent,
- (4) the Excess Dividend Tax was reduced from 12 per cent to 10 per cent on distribution of dividends ranging between 6 per cent and 10 per cent of paid up capital and to 20 per cent (from 25 per cent) on dividends ranging between 10 per cent and 18 per cent, while on dividends over 18 per cent of paid up capital, the tax was reduced to 30 per cent (from 37) per cent).
- (5) the tax on bonus shares was raised from 12 5 per cent to 30 per cent.
- (6) the Super tax rates on inter-corporate dividends were reduced to uniform 10 per cent from 17 per cent for Indian companies and from 20 per cent for foreign companies

- (7) for foreign companies operating through branches and earning other incomes the rate of Corporation Tax was reduced from 36 per cent to 30 per cent.
- (8) for industrial concerns registered under Section 23-A, the percentage of minimum profits to be distributed was reduced to 45 per cent from 50 per cent. In cases where accumulated profits and reserves were equal to the paid-up capital or the value of fixed assistance, the minimum percentage to be distributed was also reduced from 100 per cent to 45 per cent for industrial companies and to 90 per cent for others;
- (9) a few minor changes were also made, such as, the exemption from income tax of employers' contribution to a recognised provident fund and the increase from one-fifth to one-fourth in the percentage of income that will qualify for rebate on income tax, if saved in provident fund and insurance, subject to the existing maximum of Rs. 8,000.

PUBLIC DEBT

The interest-bearing obligations of the Government of India continued to rise as a result of the growth in outlays on development services. During 1956-57, the technique of market borrowing was re-orientated to cater to a wider range of investor preferences, and instead of a single medium-term loan as in the preceding year, three loans with varying maturities were issued. With effect from June 1, 1957 the rates of interest on small savings were raised. At the end of March 1957, the interest-yielding assets stood at Rs. 2,907 crore and constituted a little over 75 per cent of the total interest-bearing obligations. Table 113 shows the interest-bearing obligations and interest-yielding assets of the Central Government.

The Sparse in the table are to have noted return to the 195-56 (R.E.). The Sparse in the table are to have not return to the 35-tics excepting on the case of Asym where the arrived return to 195-35 and 195-3

 The abnormal increase is on account of substantial ways and means advances (Rs. 18 crore) taken by the Madras Government.

MONEY SUPPLY AND CURRENCY

Morey Supply

During the year 1957, the money supply with the public witnessed a rise of R: 105 crore as compared to R: 152 crore in 1955 and R: 25 crore in 1955. It may, however, be noted that during 1957, time deposits of banks or near money rose sharply by Rs. 213 crore at compared to only Rs. 49 crore in 1936. The rise in active money supply during the year was, by and large, confined to the first five months of the year, which coincided with the busy season of 1936-57, while during the greater part of the remaining period, there was a fairly rapid and stable contraction.

The major factors contributing to the expansion in money supply during the year were the same at those in 1936 though the magnitude of their relative impact differed considerably. Budgetsay deficit on Government transactions was appreciably ingher at Rs. 490 crore as compared to Rs. 244 crore in 1936. The rise in bank credit to the public, however, was half (Rs. 93 crores) the new in 1936 (Rs. 178 crore). As against the expansionary influence of these factors, transactions with the foreign sector continued to operate as the major contractionist factor. The balance of payments deficit as measured by the change in foreign sects of the Reserve Bank was substantially larger at Rs. 232 crose (net of tollar purchase of Rs. 35 crose from 1 M F) as compared to Rs. 199 crore (after allowing for Rs. 6 crose as repurchase from the 1 MF) in the preceding year.

In the financial year 1957-58 (upto December 1957) money supply with the public contracted by Rs. 28 erore as compared to Rs. 6 erore in the same period of 1956-57.

The following table shows money supply with the public and its components for the years 1951 to 1957:

TABLE 116

^(*) Figures are provisional and do not include small coin in circulation.

Currency**

The rising trend in currency circulation (excluding small coin), noticed since 1953, was maintained during 1957, but the rise during the year was considerably smaller than in the preceding four years. While notes in circulation recorded a small increase during the year, circulation of rupee coin (including Government of India rupee notes) showed a net decline. The rise in the notes in circulation was Rs. 41 crore as against Rs. 104 crore in 1956 and Rs. 161 crore in 1955. Total notes in circulation at the end of 1957 amounted to Rs. 1,464 crore, representing a rise of 2.9 per cent during the year and 39.5 per cent since 1953:

The circulation of rupee coins declined further by Rs. 1.4 crore; in 1956, there was an equivalent decline but in 1955, rupee coin circulation had risen by Rs. 6.7 crore. At the end of 1957 the circulation of rupee coins stood at Rs. 113.2 crore.

Hyderabad State Currency

In accordance with the provisions of the Hyderabad Coinage and Paper Currency (Miscellaneous Provisions) Act, 1953, the Hyderabad currency (i.e. Hali Sicca currency) ceased to be legal tender with effect from April 1, 1955, but conversion facilities were provided at all the offices of the State Bank of Hyderabad and the treasuries and sub-treasuries of the Hyderabad Government initially for a period of one year up to March 31, 1956. The period for the provision of these facilities was extended twice, first upto the end of September 1956 and, thereafter upto the end of December 1956. After this, these facilities were withdrawn, thus bringing to an end the process of conversion of Hyderabad currency into Indian currency. As at the end of March 1957, the circulation of Hali Sicca currency amounted approximately to Hali Sicca Rs. 81 lakh (or Indian

^{**} Data for 1957 are provisional.

Rs 70 lakh) Prior to the integration of the Hiderabad State with the Indian Union, the estimated circulation of Hiderabad currency as on January 26, 1950 was Hall Suca Rs 48 crore for Indian Rs 41 crore).

Introduction of Decimal Coinage

With effect from April 1, 1937. India adopted the system of decimal comage as a first step in the programme to introduce the metric system in the country's comage, weights and measures. Under the new system, the rupee remains the same, both in value and nomenclature. Similarly, the half and quarter rupee coins remain the same in value The rupee has been divided into one hundred equal parts called 'pausa,' as against the former division into 64 pice or 192 pies During the transitional period, when both the old and the new coms will be current, the new paus will be called nays passa and after the interim period, which is expected to be about three years from the date of introduction of the new system, the prefix will be dropped. The naya passa has become the primary unit of Indian currency, and us multiples, 2, 5, 10, 25 and 50 constitute the different units of the new currency To start with new coms of the denominations of 1 nays pass, 2 nays pass, 5 nays pass and 10 nays pass have been put into circulation as from April 1, 1957 through banks, treasuries, sub-treasuries and post offices, etc. Coins of the higher denominations, namely, 25 and 50 nay passe and the new rupee (100 nave passe), will be introduced at a subsequent date, until then, the existing quarter rupee, half rupee and rupee coins will be used as currency, as they have undergone no change in value The process of change-over to the decimal coinage will be spread over a period of three years and, during this period, the existing coins will continue to be legal tender, but will be gradually withdrawn from circulation. Conversion facilities have been provided at the Reserve Bank offices, branches of the State Bank of India, other agency banks and treasuries and sub treasuries. New coins are given only in exchange for existing coins of a total value of 4 annas and multiples thereof

Cessation of the legal tender character of notes not bearing the Asoka Pillar Emblers

The currency notes of the Government of India and bank notes other than those bearing the Asola Pillar emblern in the design and in the watermark were to cease to be legal tender, save at the offices of the Reserve Bank and its agencies, with effect from Cother 27, 1956. With a view to avoiding inconvenience to the public, especially in the rural areas where such notes were in reculation to some extent, the Government of India extended the date of cessistion of the legal tender character of these notes by a period of six months upto October 27, 1957 and again by a further period of six months upto October 27, 1957. No further extension of the period was allowed and the rotes have ceased to be legal tender value effect from October 28, 1957. This limitation of the legal tender character of currency notes other than those bearing the Asoka pillar emblem does not, however, pipply to one rugee notes which continue to be legal render.

BANKING

The general upward trend in banking activity, noticed in the past three years, continued in 1957, this was largely in consonance with and emanating mainly from the all round growth in economic activity. However, unlike in 1956, when the wide gap between the growth in bank credit and the accretion to the resources of banks had resulted in an acute financial stringency and had forced the banks to have increased resort to the Reserve Bank for accommodation, the banking situation in 1956, paring

cularly during the second half of the year, was quite comfortable. growth in bank resources outpaced the rising demand for credit. During 1957, scheduled bank deposit liabilities (net) rose by Rs. 267 crore or by 24 per cent as against Rs. 73 crore or 7 per cent in 1956; nearly four-fifths of the increase occurred under time liabilities. A sizable portion of the increase has been of a fortuitous character, representing the initial payment in rupees by the cost of foodgrains imported under the U.S. Public Law 480. Scheduled bank credit expanded by Rs. 82 crore or by 11 per cent as compared with Rs. 153 crore or 24 per cent in 1956; the slowing down in the pace of credit expansion should largely be attributed to the operation of a tighter credit policy by the Reserve Bank and drastic import cuts. Consequently, the banks were able to reduce their indebtedness to the Reserve Bank by Rs. 55 crore, augment their gilt-edged security portfolio by Rs. 69 crore and replenish their cash and balances with the Reserve Bank by Rs. 16 crore. The seasonal ebb and flow in the demand for bank credit, which had been temporarily arrested in 1956 mainly because of the financing of large-scale imports and speculative stock holding of some agricultural commodities in the slack season of 1956, reappeared in 1957. Scheduled bank credit rose from Rs. 749 crore at the end of October 1956 to Rs. 934 crore in early June 1957 and fell to Rs. 845 crore by the 20th September 1957. The variations in the principal items of liabilities and assets of scheduled banks during 1956-57 are presented in the following table.

TABLE 117
SCHEDULED BANKS-LIABILITIES AND ASSETS

(Rs. lakhs)

	-			Vari	ation

Investments in Government Securities	383,00	364,43	432,96	— 18,57	+ 68,53
Bank credit (net of inter-bank transactions)	627,83	781,24	863,43	+153,40	+ 82,19

During 1957, the number of scheduled banks increased from 89 to 91 due to the inclusion of the State Bank of Saurashtra and the Bank of Patiala in the Second Schedule to the Reserve Bank of India Act. The

number of scheduled bank offices increased from 2,900 at the end of 1956, to 3 277 at the end of 1957. Of the increase of 200 offices, a luttle over one-third was accounted for by the newly included scheduled banks, while 78 new offices were opened by the State Bank of India under its branch expansion programme

Monetary and Credit Policy of the Reserve Bank

At the beginning of 19.7, the Bank rate (i.e. the rate at which the Reserve Bank is prepared to huy or redseount bills of exchange or other eligible commercial paper) stood at 3½ per cent and the effective rate for borrowing under the Bill Market Scheme was also about the stime. A from February 1 19.77 with the raising by Government of the stamp duty on usance bills the effective cost of the borrowing under the Bill Market Scheme was raised from 3½ per cent to 4 per cent. Simultaneously, with a view to avoiding discrimination against borrowing under the Bill Market Scheme the Bank also raised its lending rate against Government and other approved securities from 3½ to 4 per cent. Subsequently, with effect from May 16 1927, the Bank rate istelf was raised from 3½ per cent to 4 per cent. With the simultaneous lowering by Government of the stamp duty on usance bills from one-half of 1 per cent to me fifth of 1 per cent, the effective rate for borrowing under the Bill Market Scheme has been 4-13p per cent.

The policy of selective credit control which the Bank initiated in 1956 with a view to curbing the price rise in certain essential commodities like foodgrains and cotton textiles (including yarn) and which took the form of imposition and raising of margins in respect of bank advances against these commodities was modified from time to time so as to meet the requirements of the changing seasonal conditions Furthermore, the policy was further reinforced during the year through the fixation of ceiling limits on advances of individual banks The restrictions on advances against cotton textiles imposed in September 1956 were withdrawn with effect from February 1, 1957, but the restrictions on paddy and rice were reimposed on [February 9, 1957 to forestall excessive expansion of bank credit against these commodities Again on June 7, in view of the persistent rise in bank advances against foodgrains, the Bank issued a directive, designed not only to curb bank finance for speculative holding of stocks but also to bring down substantially the level of advances against these commodities quently, on December 11, the Bank issued another directive, stipulating, on a monthly basis the maximum limit of aggregate advances which each bank was required to adhere to in respect of its advances against foodgrains in the busy season of 1957 58 generally and in particular in the surplus States In the context of an unfavourable trend in food production, this was designed to correct the disproportionately high level of advances in States which have large surpluses of particular foodgrains.

CORPORATE FINANCE

The total number of joint stock companies, having a share capital, in the country, at the end of October 1987 was 29 315, with a total padup capital of about Rs. 1,100 crore. Of these, 9.93 were public companies with a total pad up capital of Rs. 746 crore and 20.022 private companies with a paid up capital of Rs. 356 crore. The total number of associations not for profit and companies limited by guarantee, reported to be at work, was 1,293. The table below shows the number of companies and their paid up capital between 1947-48 and 1956-57.

Foreign Companies

During the first ten months of 1957 (January to October), 28 joint stock companies incorporated elsewhere than in India, established a principal place of business in India Table 120 shows the distribution of these companies according to the country of incorporation and industrial class

INSURANCE

Public and private Insurance

Since September 1, 1956, when the Lafe Insurance Corporation of India was established, life insurance business is transacted in India by the Corporation and, in a restricted sphere, by the Posts and Telegraphs Department of the Government of India and by certain State Governments

Fire, Marine and Miscellaneous classes of insurance business are transacted both by the Indian Insurance companies and by foreign insurance companies operating in India In addition, certain State Governments are also transacting such business.

State run Insurance Schemes

The Governments of Hyderabad (now Andhra Pradesh), Travancorecochin (now Kerila), Mysore, Rajasthan and Uttar Pradesh are tranacting life insurance business, the benefits of which are restricted to their employees. With effect from September 1, 1936, the Life Insurance Corporation of India acquired the exclusive privilege of carrying on life

insurance business in India. But, in terms of clause (f) of section 44 of the Lafe Insurance Corporation Act, the State Governments are cnabled to carry on computory life insurance of their employees. The Government of Bombay has an Insurance Fund for the insurance of all types of Government property in its commercial and industrial undertakings. The Government of Kerala is transacting Fire and Miscellaneous (Motor) insurance business while the Government of Mysore is transacting Miscellaneous (Motor) insurance business.

Insurance Association of Irdia

In order to asserate public opinion in the administration of the Insurance Act, 1938, all insurers carrying on business in India were constituted into the Insurance Association of India in 1990. With the nationalisation of life insurance business in India, the Life Insurance Committee have ceased to function. The membership of the General Insurance Council of the Insurance Association of India is confined to insurance Council of the Insurance Association of India is confined to insurance council of the Insurance business. The Council has an Executive Committee, the man function of which is to aid and advise insurers in the matter of setting up standards of good conduct and sound business practices.

The Executive Committee of the General Insurance Council has evolved a Code of Conduct for observance by general insurers with the object of climinating various alleged malipractices of rebating and payment of excessive commission. With a view to tightening control over general mustrance business, the Executive Committee has recommended untreal acertain standards of solvency and minimum departmental reserves to be maintained by insurers on a voluntary has

The Committee has set up an administrative machinery to administer the code of conduct The Controller of Insurance, in his capacity as a member of the Committee, is the head of the organisation.

Another wing of the association is entrusted with the task of regulation and control of the tariff structure in this business. The authority for this purpose is the Tariff Committee, which functions through four Regional Councils

Reinsurance Corporation of India

In consultation with the Central Government, insurers currying on general insurance business in India have set up a Reinvariance Corporation. All member insurers will compulsorily cede to the Corporation, an agreed amount of their annual premium mome. The capital of the Corporation has been subscribed both by Indian and non-Indian insurers. The registered office of the Corporation is at Bombay. The Corporation commenced underwriting business with effect from January 1, 1957.

LIFE INSURANCE

Lafe lasurance Corporation

According to the Life Insurance Corporation Act, the Life Insurance Corporation of India was to consist of not more than 15 members who would have the authority to manage the affairs of the Corporation on business principles subject to such directives on matters of policy as the Central Government inglet give from time to time. The Corporation was charged with the duty of functioning in such a manner as to secure that the life insurance business is developed to the best advantage of the com-

munity. The other authorities of the Corporation mentioned in the Act were the Executive Committee, Investment Committee, Managing Directors. and Zonal Managers. In addition to the Central office to be located at a place to be notified by the Central Government, there are to be five Zonal offices at Bombay, Calcutta, Delhi, Kanpur and Madras and such number of divisional offices and branch offices as should be found necessary.

When the Corporation was constituted on September 1, 1955, it took over the controlled business of 243 different units (both insurance companies and provident societies) which were engaged in the transaction of life insurance business in India. The total assets of these units on August 31, 1956 were about Rs. 411 crore and the total number of policies in force was over 50 lakh, assuring a sum of more than Rs. 1,250 crore. The total number of salaried employees was nearly 27,000.

New Business

During the first eight months of the year 1956, when insurance companies were being managed by the Central Government, each unit was canvassing business more or less in the same manner as before, except for certain measures of uniformity in premium rates, agency commission, etc. After September 1, 1956, canvassing new business became the responsibility of the various Divisional Offices of the Corporation. figures for new business completed during the first eight months of 1956 by the insurers, the last four months of 1956 and first six months of 1957 by the Divisional Offices are given in the following table:

Operations in Foreign Countries

Before nationalisation there were about 40 Indian insurers, who were transacting lie insurance business outside India Some of them were operating in several countries, while others confined their activities to only a few On December 31, 1935, the total business in force outside India consisted of 27,6000 policies with assured sums of over Rs 92 crore.

After studying local insurance laws and business prospects it was decided that the Corporation should transact business only in the following areas. Activa, Uganda Tanganiya, Zanzibar, Mauritus, Aden the Federation of Malaya, Singapore Hong Kong, Fiji and Nyasaland. The Corporation has been registered in all these countries excepting Nyasaland, where its application was under consideration. In other countries such as Burran, Cybon and Pakistan, where it was not proposed to have fresh business, adequate arrangements existed for servicing of policies.

Postal Life Insurance

The benefits of the Post Office Insurance Fund, which came into being in 1883 are open to employees of the Central and State Governments and of sens Governmental institutions the municipalities, district boards, aniversities, Employee's State Insurance Corporation, etc. The Fund consists

of two Wings, viz. (a) Civil Wing dealing with policies issued to civilian personnel and (b) Military Wing dealing with policies issued to the Defence Services personnel.

The table given below shows new business effected and total business in force at the end of the years 1953-54 to 1955-56:

CHAPTER XX

ACRICULTURE

About 70 per cent of the people in India are dependent on land for their land Agriculture and activities allied to it account for nearly a half of the country's annional income. It supplies raw materials for some of the migor industries such as sugar and textiles and provides the bulk of the country's exports. India enjoys a virtual monopoly in Ita and leads the world in the production of groundnuts and ita. It is the second largest producer of irec, inte, raw sugar, rape-seed, assamium and extitor-seed.

TAND TOUTSATION

The total geographical area of the country is 80 63 erore acres. Land utilisation statistics are available for 71 95 erore acres or 89 per cent of the total area. The following table gives details of land utilisation in India for 1950 51 and 1955-56.

CROPS

The two outstanding features of agricultural production in India are the wide variety of crops and the preponderance of food over non-food crops. In 1955-56, food crops occupied about 75 per cent of the total cropped area. Table 131 shows the area of major crops during the six years ending 1956-57.

Production

Agricultural production in 1956-57, the first year of the Second Plan, registered a marked increase. The overall production of foodgrains exceeded the previous year's outturn by 5.2 per cent and almost touched the peak level of 687 lakh tons reached in 1953-54. Compared to 1955-56, the production of cotton, sugarcane and oilseeds in 1956-57 increased by 18 per cent, 13 per cent and 6 per cent, respectively. Table 133 gives the production of major crops during the six years ending 1956-57.

^{* 392} lbs. each

The index number of agricultural production (all commodities) rose from 115.9 in 1955-56 to a new high of 123.0 in 1956-57, thereby registering an increase of more than 6 per cent over the previous year. The all-India index number of production of the various agricultural commodities and groups of commodities for the years 1950-51 to 1956-57 are given in Table 134.

Despite increased production of foodgrains, the overall supply position indicated conditions of scarcity and the prices of agricultural commodities, especially foodgrains, continued to show an upward tendency till the middle of the year 1957. The Government took measures to augment supplies mainly by ensuring adequate imports. Agreements were entered into with the Governments of the United States and Burma for the import of wheat and rice, respectively. Imports of foodgrains in 1956-57 were estimated at 36 lakh tons as compared to 14 lakh tons in 1955-56 and 7 lakh tons in 1954-55. The following table shows the import of cereals into India during the decade ending 1957.

Distribution of Foodgrains

For the distribution of foodgrains, about 20,000 fair price shops were opened in many parts of the country bringing the total number of such shops to 39,000 at the end of 1950. For the purpose of regulating movement of wheat, three wheat zones were created in June 1957, namely, (i) the Punjab, Himachal Pradesh and Delhi, (ii) U.P. and (iii) Rajasthan, Madhya Pradesh and Bombay (excluding the city of Bombay). This zonal arrangement aimed at free and unrestricted movement of wheat and wheat-products within a zone and the prohibition of export from and import into the zone except under a permit issued by the State Government concerned. A rice zone comprising the States of Andhra Pradesh, Madras, Mysore and Kerala was similarly created in July 1957.

Foodgrains Enquiry Committee

The Foodgrains Enquiry Committee was appointed on June 24,1957 to investigate fully the causes of rise in prices despite higher production and to suggest remedial measures to be adopted immediately and from time to time for preventing speculative hoarding and arresting undue rise in prices.

In its report published on November 19, 1957, the Committee briefly reviewed the food situation during the last few years and the policy of the Government regarding distribution, production and prices of foodgrains. It also made an assessment of recent developments and a prognosis of the food situation as it was likely to develop during the next few years.

As the instability of food prices was expected to continue during the ten years, the Committee felt that special measures were necessary for keeping price disparties within reasonable bounds. For this purpose it recommended, faither than the property of the field of foodgrains, and the field of foodgrains, and the property of the field of foodgrains, and the property of the field of foodgrains.

Regarding short-term measures relating to control of distribution and trading in Goodgrains, the Committee opined that food distribution should be primarily through fair price shops or through institutions like co-operative societies or employers organisations, etc.

Refering to the problem of scarcity areas spreading over a long belt extending from the northern districts of Bombay to the eastern tip of Assam and touching parts of Rajasthan, Madhya Pradeh, Orsas, Eastern UP, Bhar and West Bengal, the Committee pointed to the low purchasing power of the people in these areas and, by way of solution, suggested the correcting of the unbalanced character of the economy by increasing and diversifying employment opportunities through promotion of village and small-scale industries, besides provision of better irrigation facilities and for protecting the economy against flood hazards

DEVELOPMENT PROGRAMMES

The development programmes under the Grow More Food Campaign cover two types of schemes, wr, work schemes and supply schemes. The former include the construction and repair of wells, tanks, small darms, channels and tubewells, the installation of water-things appliances such as pumps, etc., schemes of contour-bunding and the clearance and reclamation of waste land. The supply schemes cover the distribution of fersibilities, organic mannaires and improved seeds. Of the total provision of Rs. 25.97 crore made in 1957-58 for giving financial assistance to the State Governments for the implementation of these schemes, Rs. 22.95 crore was in the form of loans and Rs. 30 crore by way of subsides: The principal aspects of the development under these schemes during 1957-58 are dealt with in the following paragraphs.

Minor Irrigation

During 19,7-53, 28,137 wells and 320 tanks, new as well as old, were expected to be constructed or repared in the various Slatts and were expected to trigate about 173 lakh acres — The installation of more than 19,000 pumping sets, rabit and Persian wheels was expected to provide irrigation facilities to 133 lakh acres. In addition, some other minor irrigation programmes of the Slatte Governments were expected to irrigate 146 0 lakh acres.

By the end of November, 1957, the drilling of 2,650 tubewells under the Indo-American Assistance Programme had been completed. Of these 2,640 tubewells had been fitted with pumping sets and 2,564 tubewells were energised and put into commission. Under the tubewell programme started with G NI F assistance 609 tube-wells had been drilled in the Pumpla and UP and 400 in North Gujarat. Out of the former, 540 tubewells were fitted with pumping sets and 369 energised. Of the latter, 300 were completed with pumping sets and an equal number put into commission. Besides, under the new projects of tube-well construction in UP and Assam, 393.

tube-wells in the former State and six in the latter had been drilled. The total area expected to be brought under irrigation during 1957-58 through the various minor irrigation schemes under G.M.F. and special tube-well programmes, was estimated at about 22 lakh acres.

Under the Groundwater Exploration Project, 115 bores had been drilled by the end of November, 1957, in Bombay, Rajasthan, U.P., Madras, Bihar, the Punjab and Kerala.

Land Reclamation

During 1957-58 an area of 66,249 acres of kans-infested lands in Madhya Pradesh, Assam and Bihar was reclaimed, bringing the total area reclaimed by the Central Tractor Organisation, since 1948, to 16 lakh acres. The jungle-clearance units of the Central Tractor Organisation reclaimed an area of 2,387 acres in Assam and 36,888 acres in Madhya Pradesh, while levelling and terracing operations were completed on an area of 1,458 acres in Bihar.

Manures and Fertilizers

During 1956-57, about 22.6 lakh tons of compost manure were procured and about 19.1 lakh tons distributed as against 21.2 lakh tons procured and 17.9 lakh tons distributed in 1955-56. Twenty-four out of the 53 schemes for the utilisation of sewage and sullage water of important cities put into operation up to the end of 1957 are expected to benefit an area of over 34,000 acres. Two schemes sanctioned during 1957-58 for the development of local manurial resources were: (i) larger production in N.E.S. and C.D. Blocks, and (ii) production of night-soil compost manure in bigger village panchayat areas. Sanction for taking up 676 N.E.S. Blocks under scheme (i) and 2,023 panchayats under scheme (ii) was granted and an amount of Rs. 18.08 lakh as grant and Rs. 40.46 lakh as loan were approved for the implementation of these schemes in 1957-58.

About 6.76 lakh tons of ammonium sulphate were consumed in the country in 1956. During 1957, 7.20 lakh tons of ammonium sulphate, 64,000 tons of urea, 35,000 tons of ammonium sulphate nitrate and 9,000 tons of calcium ammonium nitrate were available for distribution.

Distribution of Improved Seeds

Subsidies amounting to Rs. 2.03 crores and loans amounting to Rs. 1.84 crore were sanctioned during 1957-58 for the setting up of 1,416 seed farms in different States. A sum of Rs. 3.80 lakh was similarly approved for the setting up of 12 seed farms in the Union territories.

Japanese Method of Paddy Cultivation

An area of 23.74 lakh acres was brought under the Japanese method of paddy cultivation in 1956-57, the fourth year since the campaign was started. The average yield of rice per acre under the Japanese method was 19.9 maunds against 13.3 maunds by the local method. In view of the promising response from some of the State Governments, the earlier target of bringing 35 lakh acres under this method in 1957-58 was raised to 60.1 lakh acres against the target of 80 lakh acres for the second Plan period.

AGRICULTURAL MARKETING

The development of agricultural marketing aims at reorganising the existing system in order to secure to the farmer his due share of the price

paid by the consumer and subserve the needs of planned development. These objectives are sought to be achieved through the regulation of markets, standardization and grading of commodities and development of marketing and processing on a cooperative basis

Grading and Standardization

The Agrushural Produce (Grading and Marking) Act passed in 1937 was designed to promote orderly marketing on the basis of statutory grades. Grading under the Act is permissive, but is compulsory in respect of some export commodities such as sann heimp fibre, especiate to bascoc leaf, wool, brutles and lemon grass oil Compulsory grading was extended to sandal wood oil from February, 1937, while proposals for its extension to handpicked groundnuts oilseeds Fait India tanned leather, goat skirs, lac, Pepper, ginger and cashewiths were under consideration.

Quality grading of agricultural commodities for internal consumption was at present confined to ghee, edible oils, butter, cotton, eggs, atta, nee, fruits, sugarceane, gur and potatoes Grading and marking rules for honey were framed recently while grade specifications for jute were being drawn up

Repulated Markete

The State Agricultural Produce (Markets) Act provides for the regulation of agricultural markets. Under the Act, the markets are managed by market committees on which nominees of growers, trades, local bodies and the State Government are represented. Market charges are fixed, correct weighment is ensured and unauthorised deductions on account of charity, sample etc are disallowed. This legulation is in force in nine States, viz., Andhra Pradesh, Market, Viz., Andhra Pradesh, Market, Mysore, Orissi and Punjab, while draft bills are under consideration in the remaining

Cooperative Marketing and Processing

An intergrated programme of cooperative development embracing credit, marketing, processing warehousing and storage was formulated on the bass of the recommendations of the Russ Calust Survey Committee of the Reserve Bank Among its important ferror are linking up credit with marketing, development of processing on cooperative lines, and promotion of storage and warehousing.

The National Cooperative Development and Warehousing Board sanctioned Rs 203 laks to the State Governments for participation in the share capital of marketing societies approved during the first two years of the second Plan During 1956 57, 251 marketing societies were registered, while there was a programme of organising 468 marketing societies in 1957 38 Besides handling the marketing of agricultural commodities, these marketing cooperatives also engage in the distribution of fertilisers and seeds. About 60 70 per cent of the total introgenous fertilizers distributed in the country are through these cooperatives.

Out of the 50 cooperative sugar factories sanctioned under the two Plans, Incences had been usued in respect of 39 factories. Out of these 12 factories were already in production, three were expected to start production before the end of 1957 58, while 24 had made arrangements for the unport of machinery. The Central Warehousing Corportion started warehouses in hired accommodation at six places, namely, Amravati, Gondia, Sangli, Gadag, Davangere and Baragarh. State Warehousing Corporations had been set up in seven States, viz., Bihar, Bombay, Mysore, Rajasthan, Madras, West Bengal and Orissa. Construction of 376 godowns of large-sized credit societies and 218 of marketing societies was under way.

FORESTRY AND SOIL CONSERVATION

India's forests cover 2.81 lakh sq. miles, that is about 22 per cent of the total geographical area of the country. The per capita forest area is 3.5 hectares in the U.S.S.R., 1.8 hectares in the U.S.A. and only 0.2 hectare in India. India's per capita consumption of round wood is 1.4 cft. as compared with the United States' 58 cft.; the consumption of pulp products is 1.6 lb. as against 78 lb. in the United Kingdom. Not only is the forest area proportionately smaller in India but it is also unevenly distributed and the productivity is substantially below the average yield of forests in Western countries. In view of these facts, the National Forest Policy Resolution of 1952 proposed that the area under forests be steadily raised to 35 per cent of the total area, the proportion to be aimed at being 60 per cent in hilly regions and 20 per cent in the plains. The table given below shows the area under forests in the five years ending 1954-55.

Development Schemes

Forestry schemes for which Rs. 27 crore, have been provided in the second Plan, aim at the rehabilitation of about 3.8 lakh acres of degraded forests and the plantation of 50,000 acres with commercially important species like teak, 13,000 acres with wattle and blue-gum and 2,000 acres with medicinal plants. Another 50,000 acres are to be brought under matchwood plantations. It is also proposed to undertake plantations along canal banks and roads, on village waste lands and as shelter belts. The programme also provides for the development of forest roads, adoption of better techniques of timber extraction, establishment of timber treating and seasoning plants and organisation of surveys of forest resources.

During 1957-58, Central assistance amounting to Rs. 1.45 crore was given to the State Governments by way of loans and subsidies for the implementation of development schemes under the second Plan. Steps were initiated to set up a Forest Research Centre for the Southern Region and, for that purpose, the Mysore Government's research laboratory at Bangalore was taken over by the Centre.

Extraction of Andamans timber was now being increasingly done to meet home demands and exports to foreign countries were confined to meeting past commitments. During the first nine months of 1957, 21,281 tons of timber and 1,500 tons of match splints were exported to the mainland by the Forest Department. Up to May 1957, an area of 18,045 acres had been cleared for colonisation and about 896 settlers arrived during the year.

Construction work of the Delhi Zoological Park was proceeding according to a design furnished by a German expert. Some animals had already been collected and were on display in a temporary section.

Soil Conservation

Systematic soil conservation work was begun during the first Plan period. Besides the establishment of a desert afforestation research station at Jodhpur in 1932, and five regional research-cum-training centres in the latter half of the Plan period, pilot projects were taken up in 11 States. Soil conservation measures were adopted on a total area of 7 lakh acres, of which Bombay alone accounted for two-thirds.

Soil conservation work during the second Plan, will be continued at a cust of R s 20 crore and will cover about 31 labh acres comprising agraditural lands (20 lakh acres), desert and coastal sand duries (3 5 lakh acres), truev valley projects (3 3 lakh acres), and regions (1 7 lakh acres), revolved lands (15 lakh acres) and lands eroded by sea. During 1957-59, the Central Soil Conservation Board sanctioned 156 schones involving an estimated Central expenditure of R 312 05 lakh as against 114 schemes anyolving Central subsidies and loans amounting to Rs. 131 lakh during 1956 57. One more soil conservation research station was sanctioned at Chahatra, Negal for the Kois earthment area.

The Jodhpur Station completed roadside plantation along a length of 26 miles besides maintaining the previous roadside plantation of 82 miles

ANIMAL HUSBANDRY AND FISHERIES

According to the 1936 quanquermal linestock census, there are 18 go crore cattle, 48 crore buffloes, 307 crore sheep and 506 crore pages in the country. The large animal population is more a liability thin an asket in view of our limited land resources. In relation to the supplies of the fodder, at least a third of the cattle population is regarded as surplus, while in relation to green fodder and concentrates the position is worse still. Owing largely to promucious breeding and inadequate nourishment, the standard of animals, both bosine and owing is generally low.

Table 139 shows the number of livestock and poultry in the country according to the quinquennial censuses of 1951 and 1956

There are 25 well-defined breeds of cattle and 6 well-defined breeds of onlines distributed in different parts of the country, particularly, the dry ones. In the eastern and southern parts, where the ramfall is heavy, the cattle are non-descript and do not belong to any definite breed

An all-India breeding policy drawn up by the Indian Council of Agricultural Research aims at \longrightarrow

- (a) the development of the milking capacity of well-defined milkbreeds by selective breeding and the use of the males for the improvement of non-descript cattle.
- (b) the putting of maximum possible milk in the cows of the well-defined draught breeds without materially impairing the quality of the bullocks.

Key Village Scheme

The Key Village Scheme, through which the breeding policy in particular and the programme of inectock importance in general are being pursued in the States, aims at a co-ordinated deciment in general are being tervases existation of scrib bulls, control for breeding or generates through artificial insemination, rearing of calves on a subsidied basis, development of fodder resources and marketing of animal bubbandy products on cooperative lines. During the first Plan period, 545 Kev Villages and 166 Artificial Insemination Centries were established. As an adjunct to the Key Village

Scheme, a Call-rearing Scheme, introduced in 1954-55, is being continued with a wider scope in the second Plan. The second Plan envisages the establishment of 254 key Village Extension Centrea and 245 new Artificial Insemination Centres, the expansion of areas and 355,000 selected improved insemination Centres, the manufacture of 355,000 selected improved to the contract of 355 and 355,000 selected improved to the companion of areas around 59 extring Artificial Insemination Centres and the establishment of 26 Key Village Blocks, nine urban Artificial Insemination Centres and seven Especial Centres (1964) the expansion of areas around 50 extension Centres (1964) the expansion of areas around 35 extraing Key Village Blocks and the establishment of 46 new Key Village Blocks in rural areas, (ii) 14 Artificial Insemination Centres in urban areas, (iii) six new Key Village Blocks in conjunction with dairy schemes, (iv) 16 Key Village Extension Centres and (iv) subadised arrang of 4,248 calves

Gosadan Scheme

Under this Scheme which aims at the removal and segregation of old, uneconomic and unproductive cattle, 25 Gosadans were established during the first Plan group of 11 is proposed to set up 60 Gosadans during the second Plan period, of which 24 will be run by private institutions. During 1955-57, eight Gosadans were established in UP, Bhart and Madhya Pradesh During 1957-59, the establishment of 13 Gosadans, including six private ones, was sanctioned.

Gaushala Development Schemes

Under the scheme for the development of selected Gaushalas for augmenting milk supply in urban areas, 40 Gaushalas were taken up in 1956-57, while sanction for the development of 69 Gaushalas was given during 1957-58

Dairy Schemes

In spite of the large population of dairy animals in the country, the quantity of milk available for consumption is comparatively small. The average per ceptae consumption is about 5 or as against the minimum of 15 or recommended for balanced nutrition The second Plan envisages the establishment of 36 urban milk supply schemes, 12 co-operative creameries and seven milk drying plants

Darty schemes approved during 1987-59 included (a) extension of mik supply to the cities of Chandingsth, Husian, Agra, Gorskhupt, Bangalore, Gaya, Invandrum, Agartala, Sholapur and Kanat (b) setting up of a dry cattle farm at Ababhakapata in Madras and Punalur in Kerala and of a buffalo darry farm at Kurikupp in Mysore, (c) expansion of existing darry institutions in several States and (d) training of technical personnel in Bhart.

Sites for the setting up of a 7,000-maund milk treatment plant in Delhi and for four rural milk-chilling stations under the Delhi Milk Scheme were acquired during the year. The dairy is expected to be put into commission before the end of 1938.

During 1957, the handling of milk through the dairy plants at Harnghatta under the Calcutta Milk Project increased to 750 maunds against 600 maunds in the previous year Nearly 2,000 milk cattle were moved from the city to the Haringhatta colony. A new dairy was under construction at Calcutta.

The Aarey Milk Colony made further progress during 1957-58 and handled over 4,000 maunds of whole and toned milk daily. Proposals for the establishment of another cattle colony were under consideration. The Milk Supply Scheme at Poona was expanded and a new dairy was set up to increase the milk supply to 500 maunds a day.

In addition to the assistance received for the milk projects in West Bengal, Bombay, Madras and Delhi, the Technical Co-operation Mission of the U.S. Government offered assistance worth 0.57 million dollars in the form of equipment for the setting up of two city milk plants in Bhopal and Trivandrum, three rural creameries in Bihar, Madhya Pradesh and Bombay and a milk product factory in the Punjab.

Poulity Development

The second Plan envisages the establishment of five regional poultry farms and 300 demonstration and extension centres at a total cost of Rs. 258.1 lakh. Under the pilot scheme initiated in 1955-56 as a preliminary to the adoption of the comprehensive poultry development scheme, 32 centres had been established upto the end of March, 1956. In 1956-57, 50 new centres and in 1957-58, 68 new centres were sanctioned. It was decided that the proposed five regional poultry farms be set up in Delhi, Himachal Pradesh, Bangalore, Bhuvaneshwar and Bombay.

Fisheries Development

The second Plan had provided for a total outlay of about Rs. 12 crore for the development of fisheries as against Rs. 5.5 crore in the first Plan. Out of this Rs. 3.98 crore were set apart for the Central fisheries schemes relating to marine and inland fisheries research, technological research, development of fishing harbours, exploratory fishing stations and development of facilities, extension and training. Financial and technical assistance to the State Governments was provided for development programmes relating to survey, production, preservation, storage, marketing and transport of fish and for the organisation of fishermen's cooperatives.

The maritime fish landings in 1956 were the highest since 1950 and were about 20 per cent more than the landings in the preceding year.

Fisheries extension units were established at Allahabad, Gauhati, Bhopal, Hyderabad, Delhi and Mangalore and the units at Calcutta and Mandapam were strengthened. A Central Technological Station was established at Cochin to undertake investigations on problems relating to fishing crafts, fishing gear, fish processing and utilisation of fish products.

AGRICULTURAL WORKERS

According to the 1951 census, the number of cultivating labourers in the country was 4.9 crore, constituting about 20 per cent of the total agricultural population. According to the reports of the first All-India Agricultural Labour Enquiry conducted during 1950-51, about 30.4 per cent of rural families were agricultural labourers, half of them possessing no land whatever and the other half owning some land. The table below shows the proportion of agricultural labourers to the total rural population in the different regions and States.

⁽a) Including Jammu and Kashmir

The inquiry further revealed that 85 per cent of the agricultural labourers had only casual work, mostly in connection with hare esting, weeding, ploughing etc. The average annual inome per family from all compared with the national average per capit income amounted to Rs 104 compared with the national average per capit income amounted to Rs 104 compared with the national average per capit income amounted to Rs 104 complying the state of the country, the average being 216 days in the years and inferent parts of the country, the average being 216 days in the years and a single production of the country of the production of the producti

The problem of the amelioration of agricultural labourers is intimately related to the basic problem of poverty. The solution does not lie merely

in the redistribution of land. Thus, apart from the general measures of economic development, especially more intensive and diversified agricultural production and a more diversified occupational structure in the rural areas, specific measures such as resettlement schemes, formation of labour co-operatives, allotment of house-sites and enforcement of minimum wages are being implemented.

Resettlement of Landless Workers

During 1957-58 a sum of Rs. 21.42 lakh by way of loans and grants was sanctioned to the Governments of Assam, Bihar, Madhya Pradesh, Kerala and Orissa for the resettlement of 1,185 landless labourers on an area of 10,000 acres. A sum of Rs. 18.62 lakh, out of the total provision of Rs. 49 lakh earmarked for the settlement of landless workers during the second Plan, was utilized for settling 469 landless agricultural workers on the Central Mechanised Farm at Bhopal. Of these 269 labourers belonged to Bhopal and 200 came from Kerala.

Minimum Wages

During the first Plan, minimum wages were fixed throughout the Punjab, Rajasthan, Ajmer, Coorg, Delhi, Himachal Pradesh, Kutch and Tripura. In seven other States, minimum wages have been fixed in certain specified areas. The second Plan has recommended that minimum wages be prescribed in all the States and for all the areas.

Second Agricultural Labour Enquiry

The field work of the Second All-India Agricultural Labour Enquiry, integrated with the eleventh and twelfth rounds of the National Sample Survey for a period of 12 months from end of August 1956 to end of August 1957 has been completed in about 3,600 villages selected on the principle of stratified random sampling. The data on wages and earnings, employment and unemployment, income and consumption expenditure and indebtedness collected for about 28,000 sample agricultural labour households are being tabulated by the Indian Statistical Institute, Calcutta, in 12 agreed tables. It is proposed to bring out a brochure on agricultural labour in the first instance sometime in May 1958, bringing out the comparative position of agricultural labourers vis-a-vis the conditions obtaining in 1950-51. After the publication of the brochure, the preparation of a comprehensive all-India report on agricultural labour will be undertaken.

CHAPTER XXI

LAND REFORM

The geness of the present agrarian problem in India is to be traced to the close of the eighteenth century, when the East India Company decided to make a permanent actilement with the zamiders in Bengal, recogning their proprietary interes in the land Gradually, the zamidan system was extended to Bilar, Banaras and parts of Madras In Agra and Oudh, joint and communal ownership of land under the medalizers and Oudh, joint and communal ownership of land under the medalizers brains and the central Frowness. In the latter, however, it was applied with the important modification that the melguzars, who were revenue armees came very near the zamidan settlement. Thus the major part of more scame very near the zamidan settlement. Thus the major part of gave legal statistics of the settlement of the powerful landed aristocency. This new class of intermeding between the State and the tullers quickly exploited the privileges conferred on them by enhancing rents and evicusing unwanted tenants.

Simultaneously, the gradual elimination of cottage industries in the face of growing competition from British manufactured goods quickened the pace of the impovershinent of the Indian peasantry. To make matters worse, the prevailing laws of inheritance continued to render a substantial proportion of the holdings unconomic through sub-division and fragmentation. The increasing dependence of a rapidly expanding population on agriculture in a feudal and colonial economy further increased the pressure on land, which was gradually passing into the hands of money-lenders and intermediaties.

After nearly fifty years the evul effects of the new Land settlement enforced by the East India Company came to be felt. Subsequent efforts by the British Government to remedy the sunation through legislation, such as the Bengal Rein Act of 1859, the Teadres Latate Land Act of 1903 and the Acts of 1923 and 1925, the Madras Insight amelioration of the condution of the declaring the the band pattern of land organisation remained the same. It was not the band revenue Commission had reported to the Bengal Government in 1940, that the pressing need for radical reform in land organisation and the technique of farming was realised. In the year following, legislation had been undertaken for the abolition of intermediaries in Bihar, Bombay, Madhya Pradesh, Madras and Uttar Pradesh.

The framework of a national land policy set out for the first time in the first Five Year Plan recognized that the future of land ownership and cultivation was a fundamental issue in account development. To bring about a gradual transition from a land system based on the exploitation of the cultivator to one in which he would be every the maximum return from halbour, the Plan recommended.

(i) abolition of intermediaries between the State and the tillers,

- (ii) tenancy reforms to reduce rents, provide security of tenure and give tenants an opportunity to purchase the land they cultivate;
- (iii) fixation of a ceiling on land holdings and the distribution of the surplus land;
- (iv) improvement of the condition of the agricultural workers;
 - (v) co-operative organisation of agriculture with the ultimate objective of co-operative village management.

The objectives of land reform in the second Plan are two-fold: firstly, to remove such impediments in the way of agricultural production as arise from the character of the agrarian structure and, secondly, to create conditions for evolving as speedily as possible an agrarian economy with high levels of efficiency and productivity.

The progress achieved under the objectives outlined above was reviewed by the Standing Committee of the National Development Council in September 1957, and the following decisions were arrived at:

- (i) Tenants should be given effective protection from ejectment and from the so-called "voluntary surrenders."
- (ii) The voluntary right of purchase of ownership not having been generally exercised, tenants should be brought into direct relationship with the Government and steps should be taken to make them owners of non-resumable areas on payment of compensation in easy instalments.
- (iii) Ceilings on future acquisition of land should be imposed in States where such action had not already been taken.
- (iv) Legislation in regard to ceilings on existing agricultural holdings should be implemented speedily and States which have not yet enacted legislation should complete the legislative measures by the end of 1958-59.

ABOLITION OF INTERMEDIARIES

Most of the work relating to the enactment of laws and the acquisition of intermediary areas has been undertaken and intermediaries have almost entirely been abolished; uncultivated lands have been acquired and are being administered directly by the State or through local agencies such as the village *Panchayats*. As a result, the share of the intermediaries, who formerly controlled about 43 per cent of the cultivated area of the country, has been reduced to about 8.5 per cent.

The programme for the abolition of intermediaries is at various stages of implementation in the States as shown below:

Name of the State	Present position
Andhra Pradesh	Intermediates have been abolished in the area covered by the furmer State of Andera. In the Telangana area you have been ab lui of Legalation for abo- litin of seass (other than religenal charitable and village service issue) has been enacted.
Assam	Out of 17 likh acres of permanently settled entairs, canusian rights have been abolithed over an area of 12.7 lash acres. Subordinate tenures are yet to be acquired
Bihar	Intermedianes have been abolished
Bombay	In the area covered by the former Bombay State, inter- mediance have been absoluted with the exceptions of rely sus and charatable soon useful to Govern ment. Inter-neciative have been absoluted in Vidariba and Surrashira areas. A dari Bill for the absolute of Jagridan system in butch area is now under considera- tion.
Jammu and Kashmur	Legislation for abolition of intermediary interests in land held by occupancy tenants and inferior owners abunder consideration
Kerala	Educagor estates have been abolished. Bills have been pro-noted to abolish intermediary interests in Pandors-saks lands and to acquire interests of Jesuits.
Madhya Pradoh	Intermediaries have been abvioled in the State except in- some areas held under mugis and mans
Madras	Intermediaries have been abolished except in post-1936 mans and minor mans
Mysore	In the area of former Mysore State, religious and chara- table mans have been atolished. Legislation for aboli- tion of personal and nucellaneous amoust has been enac- ted. Proposals for abolition of jogos in the Coorg area- are under consideration.
Onsta	All camindaris except a few in the Sundergarh District have been abolished. Some snams and subordinate tenures of intermediary nature also remain to be abolished.
Rajasthan	For the Exmer Rajanthan area legislation for resumption of signs was enacted in 1952 and is under implementation. Legislation for absolution of consideration and the consideration of the standard form of the consideration. Legislation for absolution of the termediaries was reacted in April rate in 1955 and is under implementation. About 6.531 jugges with a retriate value of the 24th cree have been resumed.
Uttar Pradesh	Intermediance have been abolished except in Kumaon Hills in regard to which a full has been promoted.
Wen Bengal	Intermedianes have been abolished.
	<u> </u>

The table below indicates the position in regard to abolition of intermediaries for the country as a whole:

TABLE 141

TENANCY REFORM

The principal objective of tenancy reform recommended by the Planning Commission for adoption by the States are (i) reduction of rents, (ii) security of tenure and (iii) grant of the right to tenants to purchise their holdings. Emphasis has been laid on securing protection for the tenant from gettement of from "oblinary surrenders" open to doubt as boan file transactions. The steps taken by the States in implementing these objectives are briefly summarised in the following paragraphs.

Andhra Pradesh

In the former Andhra area, tenants in possession on June I, 1956, have been given a minimum term of three years and tenants admit after this date a minimum term of 6 years. The rent is not to exceed 50 per cent of the gross produce for irrigated lands, 45 per cent in case of Juliands and 284 per cent in case of lands irrigated from government sources by baling.

In the Telengana area, tenants are classified into (i) protected tenants (all tenants or persons owning an area of more than 3 family holdings and tenants in continuous possession for six years on prescribed daird), and (u) ordinary tenants Protected tenants have fixity of tenure subject to owner's right to resume land for personal cultivation, the limit of resumption being 3 family holding. Ordinary tenants have been given a minimum term of 10 years. The purchase price varies between 6 to 15 times the tent and is payable in halfy-early instalments not exceeding 16. The tent is not to exceed one-fourth of the gross produce in case of irrigated lands and one-fifth in other cases.

Protection against eviction has been given to tenants of private lands upto October 7, 1959, and to nots from sale of holdings in estates which have not so far been taken over by the State

Assam

A landlord can resume land from tenants for personal cultivation up to the others of the area owned subject to a minimum of 10 acres and a maximum of 33½ acres. The right of resumption is permitted to owners whose principal source of income for maintenance is from cultivation of fand. The crop-share tent is not to exceed one-fourth where the cost of cultivation is met by the landlord, and one fifth in other cases. The cash rent payable by a tenant in permanently settled areas is not to exceed 100 per cent of rent payable by his handlord and 50 per cent in temporarily settled areas.

Bihar

Right of occupancy accrues after 12 years' continuous possession. Cash rent is not to exceed by more than 50 per cent of the rental value, if the land is held under a regulered lease, and 25 per cent in other cases. The produce rent is not to exceed 7/20ths of the gross produce excluding chaff

Bombay

In the area of the former State of Dombay, permanent tenants enjoy full security of tenure and can acquire ownership on payment of price equal to six times the rent. The Landlord can resume one half of the area terp anneted, provided that together with the land held under his personal cultivation it does not exceed three economic holdings. The maximum rent is

not to exceed one-sixth of the gross produce or five times the land revenue, whichever is less.

In the Kutch area, protected tenants enjoy security of tenure subject to landlord's right to resume land upto 50 acres for personal cultivation. In the Marathwada area, the position is the same as that obtaining in the Telengana area of Andhra Pradesh. In Vidarbha, ejectment of tenants has been stayed for two years and rent is not to exceed five times the land revenue.

Legislation has also been promoted providing for the transfer of occupancy rights to permanent tenants of talukdari lands and for the abolition of inams and special tenures in respect of non-agricultural lands in the city of Bombay.

Jammu and Kashmir

The limit of resumption of land for personal cultivation from protected tenants (holding lands at the commencement of the Tenancy (Amendment) Act of 1955) is 2 acres of wet land or 4 acres of dry land in Kashmir Province and 4 acres of wet land or 6 acres of dry land in Jammu Province. The rent payable by tenants of owners of more than 12½ acres is not to exceed ½ of the gross produce for wet lands and ½ for dry lands.

Kerala

In Cochin area, the tenants have fixity of tenure and the landowners have no right of resumption. The ejectment of crop sharers (who are not treated as tenants) has been stayed. In Travancore area also, the ejectment of tenants (including crop sharers) has been stayed. Legislation has been promoted seeking to abolish in the Travancore area the rights of Jennies (an intermediary tenure) on payment of compensation equal to $8\frac{1}{2}$ times the net annual income and intermediary rights in respect of tenanted lands held by Shri Padmanabhaswami temple.

Madhya Pradesh

In the former Madhya Pradesh area, the law provides for conferment of occupancy right on tenants of lands which are let out for a period of 3 years in any consecutive period of five years. In the former Vindhya Pradesh area, there is provision for security of tenure for a minimum term of 7 years for all tenants, resumption being permitted at the end of this term for personal cultivation. In the former Bhopal area, ejectment of tenants of ryotwari holdings has been stayed.

Madras

Ejectment of tenants has been stayed up to September 1958. Landowners owning less than 13½ acres of wet land are entitled to resume for personal cultivation half the area held by a tenant, subject to a maximum of 5 acres of wet land. Rent is not to exceed 40 per cent of produce for irrigated lands (35 per cent where irrigation, is supplemented by lift irrigation) and 33½ per cent in other cases. Eviction of tenants of private lands in estates has been stayed and such tenants and ryots have been protected against sale of their holdings for arrears of land.

Mysore

In the former Mysore State area, fixity of tenure has been provided for tenants in continuous possession for 12 years prior to April 1, 1951, subject to the landlord's right to resume for personal cultivation an area

ranging between 50 to 75 per cent of the tenancy varying according to the extent of land held by the tenant from the landlord. In the areas of the State which were formerly parts of the Bombay and Hyderabad States, the position is the same as that obtaining in the former Bombay State and Marathwada areas.

In September 1957, the Mysore Tenancy and Agricultural Land Laws Committee recommended

- fixation of max mum rent at one-fourth of the produce for lands of assured irrigation by flow and one fifth of the produce for other lands
- security of tenure for tenants subject to landlord s right of resumption for personal cultivation and
- (iii) transfer of ownership of non-resumable area to tenants who will be required to pay compensation at rates varying from 8 to 15 times the rent.

Orista

Ejectment of all tenants has been stryed up to June 1958. This is ubuse to the right of landowners who hold less than 30 acres to resume for personal cultivation an area upto 7 acres of wet land or 14 acres of dry land. The maximum rent has been fixed at one-fourth of the gross produce. The State Government have set up a Commutee to suggest measured of land reform in conformity with the recommendations in the second Plan.

Punjab

In the former Punjab area, tenants in continuous possession for a period of six years are entitled to purchase the non resumable area subject to a maximum of 30 standard acres on payment of a price equal to fits of the average market value prevailing during, the previous 10 years. In the former PEPSU area, tenants in continuous possession of land for 12 years on December 3 1953 have been given complete security of tenure in an area not exceeding 15 standard ares. The rent is not to exceed one-third of the gross produce or value thereof.

Rajasthan

In the former Rajasthan area, every tenant is entitled to retain an area which yields a net annual income of Rs 1 200. The rent is not to exceed one-sixth of the gross produce In the Ajmer area, permanent rights accrue to every tenant immediately on admission to lands other than lands of unstable cultivation.

Uttar Pradesh

All tenants and sub-tenants have been brought into d rect relationthing with the State. They will continue to pay rents to the State at the exitting rates and the State will pay compensat on to the landlords out of its increased revenues. Rent has been fixed at twice the hereditary rate.

West Bengal

All rent receiving interests have been acquired by the State and the under yous and their subordinate tenants have been brought into direct relationship with the State. Crop shares do not get tenancy right Rent is not to exceed 50 per cent of the produce, if the landlord contributes the cost of cultivation, and 40 per cent if the does not.

Union Territories

In Delhi, tenants will have a minimum term of five years and rent payable by them is not to exceed one-fifth of the gross produce.

In Himachal Pradesh, occupancy tenants have the optional right to acquire ownership on payment of compensation and in regard to non-cocupancy tenancy the landlord can resume for personal cultivation one-fourth of his tenancy subject to a maximum limit of 5 acres. The rent is not to exceed one-fourth of the gross produce.

In Manipur, ejectment of tenants has been stayed while in Tripura fixity of tenure for ryots as well as under-ryots has been provided.

In the following table the position in regard to security of tenure for the country as a whole is shown:

TABLE 143
SECURITY OF TENURE

	Area in lakh acres	Percentage to total
Complete Security		
Area in which the landlord is not allowed to resume any land by ejecting tenants	730	9
Partial Security		
Area in which resumption by landlord is permitted but the tenant is left with a minimum holding.	2,78 1	34
Area in which an upper limit on resumable area is imposed but where there is no provision against the tenant becoming landless	1,938	26
Area in which the tenants have been given temporary protection	1,560	19
No Security		
Area in which there is generally no security of tenure	997	12

CEILING ON HOLDINGS

The Census of Land Holdings and Cultivation, which was undertaken in most States, has made available a considerable body of information for implementing proposals for the imposition of ceilings. A Committee of the Panel on Land Reforms set up by the Planning Commission has recommended that the ceiling should apply to the total area held by a family. Detailed plans for fixing ceilings on holdings have been left to be worked out by the States keeping in view the agrarian problems in their respective areas. In view of the difficulties involved in the practical application of the concept of family holdings, a committee of experts with practical experience of settlement and revenue has been set up in April 1957 to work out a practical concept of family holding.

Ceiling has two aspects, namely ceiling on future acquisition, and ceiling on existing holdings. Ceilings on future acquisitions of land have

been fixed by legislation, as follows:

Andhra Pradesh Former Hyderabad State area

3 family holdings (12 to 100 acresi 50 acres

Assam Bombay

Former Bombay area

3 economic holdings (12 to 48 acres)

Former Saurashtra area Delhi Jammu & Kashmir

3 economic holdings 30 standard acres 22? acres

Madhya Pradesh Former Madhya Bharat area 50 acres

Puniab Former PEPSU area

30 standard acres (for displaced) persons 40 standard acres)

Uttar Pradesh 30 acres 25 acres West Bengal

Legislation has been enacted in the following States for ceiling on existing holdings

Andhra Pradesh

41 family holdings (i e. 18 to 270 Former Hyderabad State area acres of land)

Himachal Pradesh

50 acres 30 acres in district Chamba and land assessed at Rs. 125 in other areas

Jammu & Kashmir

22} acres

25 acres

Puniab Former PEPSU area

30 standard acres (in the case of displaced persons 40 standard actes)

West Bengal

Legislation has been implemented fully only in Jammu and Kashmir-In Andhra Pradesh, implementation has been taken up in four districts of the former Hyderabad State area In Himachal Pradesh, due to writ petitions, the legislation has not been generally enforced. In Assam, mechanised farms not exceeding 1661 acres have been exempted from the ceiling applicable only to land held by intermediary proprietors. About 15,000 acres of surplus land in West Bengal have been taken possession of by the State Government and are being settled, in the first instance, on a year to year basis

with bonifide agriculturists having no agricultural land In Mysore, the Mysore Tenancy and Agricultural Land Laws Committee recommended (1) fixation of ceiling on holdings at 3 times the family holding in case of future acquisition and 41 times the family holding in case of existing holdings, the ceiling for larger families being twice this area; (u) tea and coffee plantations as on January 1, 1957, orchards where they constitute a reasonably compact area and specialised farms engaged in cattle breeding are to be exempted In Punjab, under the Security of I and Tenure Act of 1953, a limit has been fixed on the resumption of land for personal cultivation at 30 standard acres (40 acres in case of displaced persons). The Act was amended in 1956 to ensure that no tenant was ejected from a minimum area of 5 standard acres until he was provided with alternative land by the Government. In Bihar, the present proposal is to fix the ceiling at 25 to 75 acres.

The Rajasthan Ceiling Committee, which submitted its report in September 1957, recommended the following:

- (i) the ceiling should be an area fetching a net income of Rs. 2,400 a year—in terms of unirrigated land it will vary between 40 and 250 acres, three such acres being treated asone acre of land irrigated by perennial canals or by wells; and
- (ii) the ceiling should apply to the total land held by a family; families consisting of 8 or more members but not exceeding 14 members being treated as equivalent to 2 families.

CONSOLIDATION OF HOLDINGS

Both the first and second Plans have emphasised the need for the consolidation of holdings. The programme has assumed a certain urgency in view of the urgent need to increase agricultural production. The Planning Commission has recommended that the consolidation of holdings should be undertaken in National Extension and Community Project areas as a task of primary importance to the agricultural programme. It has now completed a study of the methods evolved so far with a view to making available the best existing experience in tackling the problem. Financial assistance has also been provided to States to expand their programme.

In the early stages, consolidation of holdings was undertaken on a voluntary basis through co-operative societies. This was followed by the introduction of an element of partial compulsion which enabled the Government to undertake schemes of consolidation where a given proportion of the owners in a village agreed to it. This approach was adopted in the former States of Baroda, Madhya Pradesh, Punjab, Uttar Pradesh, Jammu and Kashmir. Bombay enacted legislation in 1947 enabling Government to frame schemes of consolidation of holdings in any area on its own initiative. Punjab and PEPSU followed with similar legislation in 1948, Orissa in 1951, Uttar Pradesh and Himachal Pradesh in 1953, Rajasthan in 1954, West Bengal in 1955 and Bihar and Hyderabad in 1956. The progress so far achieved is shown in the table below:

TABLE 144
CONSOLIDATION OF HOLDINGS

State		Area consolidated (In lakh acres)			
		In 1955-56	Upto 1955-56		
Bombay	••	6.8	21 2 (1,860		
Delhi	••		villages) 2.0 (210		
Madhya Pradesh	••	1.1	villages) 28.9

Uttar Pradesh	••	Scheme extended to one tehsil each in five districts	43 9 (work is in progress in one tehsil each in 21 districts)		

SUB-DIVISION AND FRACMENTATION

The operation of the ancient laws of inheritance has resulted in the sub-division and fragmentation of holdings to the detriment of agricultural production. The policy is to restrain this tendency either on a voluntary or co-operative basis or by governmental persuasion.

Legislation for the prevention of fragmentation had been undertaken in Bombay, Delhi, Punjab and PLPSU before the commencement of the first Plan During the Plan period Bihar, Hyderbland, Orisa, Raj isthan and Saurashtra ende legislation regulating transfers and partition with a view to preventing break up of a bolding or diminution in the size of a plot below a certain minimum. In 15 States legislative measures were adopted in order to prevent excessive fragmentation or sub-division. In Madhya Pardish, a minimum limit of 15 acres his been fixed in the Bloppal and Madhya Bharat area. In the former Vindhya Pradesh area, 5 acres have land The minimum in the former Hyderahud State area of Andhra Pardish is 2 to 24 acres, 6 acres in Ultrar Pradesh and 8 standard acres in Delhi.

CENSUS OF LAND HOLDINGS

Census of Jand holdmen and cultivation has been carried out in 22 States till May 1937. In Andrar Pradesh, Bombay, Madha Pradesh, and Madras, ti was a complete enumeration of holdmen. In Punjah, Mysore, Delhi and Himachal Pradesh, the census extended to holdings of 10 acres or above. In Uttar Pradesh, Bhar, Oruss, Ray the Goldmen and Kerala, the census was based on sample surveys. In Assam, West Briggal and Jammu and Kashmir, no fresh census was taken as decisions relating to eclings were taken on the basis of data already available.

CO-OPERATIVE FARMING

In the larger interests of agriculture and in view of the potentialine of co operative effort, the States were asked to provide facilities for the voluntary grouping of mail and middle-class owners into co-operative favorage of the settlement of groups of landless agricultural required to be set apart of the settlement of groups of landless agricultural workers on co-operative far the settlement of groups of landless agricultural as criviaged in the first about Plans, is co-operative large management, as an expectation of the land problem, the large properties of the settlement of the large management and large management, and large management of the large properties of the large management of

The main task during the second Plan is to bring about, over a period flo year or so, the cultivation of a substantial proportion of agricultural and on co-operative liner. A special committee appointed by the Panel and Reforms has recommended that lands which become available after the imposuno of the proposed ceiling on highings and government waste lands should be pooled for purposes of co-operative farming

A team of experts which studied the system of co-operative farming in China in 1956, recommended that co-operative farming in India is necessary from economic as well as social considerions. This will bring about fuller utilisation of capital resources, reduction of cost, mobilisation of sa-

vines and capital formation. Recently, a study of 22 selected co-operative societies in different States was undertaken.

At the end of May 1957, there were 1,397 co-operative farming societies, of which 262 were organised during 1955-56. Out of the total number of societies, Bombay accounted for 386, Punjab 347, Uttar Pradesh 168, Rajasthan 79, West Bengal 75, Assam 90, Madras 26, Orissa 5, Jammu and Kashmir 2, Delhi 17, Himachal Pradesh 5, Manipur 10, Tripura 10, Madhya Pradesh 103, Andhra Pradesh nearly 45, Bihar 10, former Coorgarea in Mysore 1, and Kerala 18.

The Standing Committee of the National Development Council considered the programme of co-operative farming at its meeting in September 1957, and decided that 3,000 co-operative farming experiments should be carried out during the rest of the second Plan period. The other important recommendations were: (i) Preparations should be taken in hand immediately for the selection of societies, training of personnel, and drawing up of land development and village industry programmes for the selected societies; (ii) A programme for resettling 3,00,000 families on lands obtained through the application of ceilings and Bhoodan and Gramdan lands should be undertaken during the remaining period of the Plan; (iii) Three regional training centres on co-operative farming should be set up before the end of 1957-58, one for the northern and central zones, a second for the western and southern zones and the third for the eastern zone.

BHOODAN

The Bhoodan or voluntary land gift movement owes its inspiration to Acharya Vinoba Bhave. Describing the aims of the movement, Vinoba Bhave says: "In a just and equitable order of society, land must belong to all. That is why we do not beg for gifts but demand a share to which the poor are rightly entitled". The main objective is to "propagate the tight thought by which social and economic maladjustments can be corrected without serious conflicts."

In its practical application, it takes the shape of asking for voluntary donations of one-sixth of the land for redistribution among the landless. In the non-agricultural sector, the movement assumes various forms such as Sampattid in* (donations of money or other resources), Buddhidan and Jivandan (dedication of one's mental abilities and life to the achievement of the Bhoodan ideals).

The movement which began on a modest scale on April 18, 1951, now covers the length and breadth of India. The target is to obtain 500 lakh acres of land so that it may be possible to provide some land for cultivation to every rural family. The movement has now widened out into Grandan, i.e., donations of entire villages, the ideal being that all land should belong to the community as a whole.

Recognising the importance of the *Bhoodan* movement, the second Plan recommends that schemes for resettlement on land of agricultural workers should bring in *Bhoodan* lands. The Plan recognises that the practical success which is achieved in the development of *Gramdan* villages will have great significance for co-operative village development. *Gramdan* villages will now receive preference in the matter of opening community development blocks and starting of other community development activities. At

^{*}Till the end of December 1956, Rs. 14,42,160 were donated as Sampattidan.

a conference convened by the Akhil Bharat Sarva Seva Sangh in September 1957 at Yelwal (Mysore State), the desirability of the closest co-operation between the Community Development programme and the Grandan movement was emphasised

During the second Plan period, the Akhil Bharat Sarva Sangh will work on a scheme for the development of villages donated under the Grantin movement in the districts of Koraput, Canjam and Balssore in Orsas The Central Government was to provide a sum of Rs. 119 2 lakh during 1936-97 and Rs. 10 lakh during 1937-58 towards meeting the cost of this scheme. It has also sanctioned a scheme costing Rs. 30 lakh for the settlement of 10 000 landless agricultural workers during 1937-58 on Babodie lands in B har This is in addition to another grant of Rs. 21 lakh during the same period for a pilot scheme formulated to resettle landless acroculturals un the Babodie lands on the Babod

Several States have rendered active assistance to the movement. In order to facilitate the donation of lands to Bhoodm and the redistribution of such lands necessary legislation has been enacted in Bombay (Bera and Surashiris areas) Bhiri, Madhya Pradesh Orma, Punjab, Rajasthan, Uttar Pradesh Delhi and Himachal Pradesh and administrative instructions have been usued in Bombay, Kerals, parts of Andhra Pradesh and Myore Legislative proposals in Madhra Pradesh and Asam have been kept pending until the proposals of the Sub Committee appointed by the Akhid Bhirat Saras Saragh have been received. The Madras Bhoodin Tagna Bhit 1936 seeks to facilitate the donation of lands for the Bhoodin Tagna Bhit 1936 seeks to facilitate the donation of lands for the Bhoodin Tagna and the transfer and settlement of such lands for the benefit of landless poor peasants or for community purposes. In Punjab and Delhi although laws have been enacted, rules have yet to be framed. The legislation in all these States deal with the procedure for gwing legal validity, after necessary enquiry, to the Bhoodin donations and for vesting the lands in the Bhoodin committee.

Up to December 31, 1957, 43 82 lakh acres were donated to the Bhoodan movement and the area distributed was about 6 54 lakh. The regionwise break up of land collection and land distribution is as follows:

TARIE 1/E

TABLE 145						
State or Region	Area of land donated (in acres)	Area of land dis- tributed (in scres)

CHAPTER XXII

CO OPERATIVE MOVEMENT

The idea of co-operation took concrete shape in India for the first time in 1901 when the Co-operative Credit Societies Act—a measure designed to combit tural indeitedness—was passed. This Act provided for the formation of credit societies only and so another Act was passed in 1912 to provide for non-credit forms of co-operation in such activities as production, purchive sale insurance, housing, etc. It also provided for the creation of inions of grinary co-operative societies for mutual control and audit, and of central and provincial banks to help the primary societies with credit. Later, the Mackagan Committee, appointed by the Government of India in 1914, recommended greater non-official participation in the movement.

Although co-operation became a Provincial subject under the 1919 Act the Government of India continued to take interest in the grows he of the movement and established Aericultural Circlit Department in the Reserve Bank of Ind as in 1935. The next development was the appointment by the Government of India in 1935 of the Co-operative Planning Committee which recommended that primary societies should be converted into in itin purpose societies and that efforts should be made to bring 30 per cent of the villages and 30 per cent of the rural population within a mint of the reorganised societies within a period of 10 years. It was also urged that the Reserve Bank should provide greater assistance to co-operatives.

The major development in the co-operative field since independence was the appointment in 1951 by the Reserve Bank of a Committee of Direction which exhaustively surveyed the rural credit structure of the country and published its report in December, 1954. The survey revealed that in the field of rural credit, in spite of half a century of co-operative effort, the private agencies—money lenders, traders etc —still reigned supreme, and institutional agencies for credit played only an insignificant part. The cooperatives supplied only 3% of the total borrowings of the agriculturists, and the Government an equally insignificant proportion. However, recognising the potentialities of the co-operative movement despite its previous record of inadequacy, the Committee came to the conclusion that conditions for its success should be created To this end, if e Committee recommended an "integrated scheme of rural credit," the salient features of which are (a) State partnership in co-operative institutions at all levels, (b) full coordination between credit and other allied economic activities, especially marketing and processing, (c) development, at the base, of primary agricultural credit societies which will be economic units , (d) establishment of a network of warehousing organisations, with the main object of helping the agriculturists in the orderly marketing of agricultural produce and (e) provision of facilities for the adequate training of co-operative personnel at all levels through appropriate institutions organised for the purpose Committee also recommended the nationalisation of the Imperial Bank which through its branches would provide vastly extended remittance factlittes for co-operative and other banks, and endeavour to be responsive to the needs of co-operative institutions connected with credit, marketing and processing.

In order to effectively co-ordinate the programmes of co-operative development and to assist the State Governments, the Committee recommended suitable amendment of the Reserve Bank of India Act and the establishment at the Centre of a National Co-operative Development and Warehousing Board. While financial help for the reorganisation of the credit structure by means such as State participation in the share capital of co-operative credit institutions was to be given by the Reserve Bank, the planned development of co-operative activities in the spheres of production, processing, marketing, and storage was to be the responsibility of the Central and State Governments.

In accordance with the recommendations of the Committee, the Reserve Bank of India Act was amended in May, 1955. One of the amendments enables the Reserve Bank of India to set up two Funds, viz. (1) the National Agricultural Credit (Long-term Operations) Fund; and (2) the National Agricultural Credit (Stabilisation) Fund.

The Long Term Operations Fund was set up in February 1956 with an initial contribution of Rs. 10 crore, which was augmented by further annual contributions of Rs. 5 crore each in the years 1955-56 and 1957-58. This Fund is to be used for: (a) grant of long-term loans to State Governments to enable them to contribute to the share capital of co-operative credit institutions; (b) provision of medium-term agricultural loans; (c) grant of long-term loans to central land mortgage banks; and (d) purchase of debentures of central land mortgage banks. The Stabilisation Fund was set up with an initial allotment of Rs. 1 crore during 1955-56 and a further contribution of Rs. 1 crore was made in 1956-57. The Fund can be drawn upon for the purpose of giving medium-term loans and advances to State co-operative banks to enable them to convert short-term credit into medium-term credit, wherever necessary owing to drought, famine or similar calamities.

On the part of the Government of India, a National Co-operative Development and Warehousing Board was constituted on September 1, 1956, under the Agricultural Produce (Development and Warehousing) Corporations Act, which came into force on August 1, 1956. Under the same Act the Central Warehousing Corporation came into being on March 2, 1957.

The State Bank of India also came into existence on 1st July 1955 as the result of the taking over, under an Act of Parliament, of the Imperial Bank of India. An important objective of the State Bank is a concerted programme of expansion of branches; the bank is required under its statute to open not less than 400 branches within a period of five years (unless the period is extended by Government) at such places as may be determined by Government in consultation with the Reserve Bank and the State Bank. In pursuance of this statutory obligation, the State Bank opened 157 branches up to the end of December 1957 since its inception on July 1, 1955.

Schemes for the training of co-operative personnel of all ranks have also been taken up. The Central Committee for Co-operative Training, which was jointly constituted by the Reserve Bank of India and the Government of India has drawn up a comprehensive scheme of co-operative training covering all

ranks of co-operative staff. Under this scheme, there is an All-India Co-operative Trauning Centre at Poons for the training of reainor officers of the cooperative departments and mutuations, there are five Regional Training Continuity of the training of the intermediate grade personnel, and eight tro-Community Project and National Extension Service Block Special ouries of co-operative marketing are organised at the five regional training centre and a special course in land mortisques banking at one of them. There are, in addition, training schools in each State for the training of junior cooperative mitigates.

An integrated programme of co-operative development has been drawn up for the second Five-Year Plan period incorporating the important recommendations of the Rural Credit Survey Committee Under this programme the co-operative movement will receive a new impetus and direction Hitherto virtually restricted to the provision of credit, the movement will now encompass spheres of economic activity such as marketing, processing warehousing, storage, etc. The programme envisages a vastly increased measure of co-operative development in the second Plan period than in the first. The Second Five Year Plan has indicated a target of Rs. 150 erore for short-term co-operative credit, Rs 50 erore for medium term credit and Rs 20 crore for long term credit to be made available to the agriculturists through co-operative channels by the end of 1960-61 The Plan also provides for the organisation of 10,400 large-sized societies, 1,800 prunary marketing societies, 35 co-operative sugar factories, 48 co-operative cotton gins and 118 other co-operative processing societies. It also envisages the construction of 350 warehouses by the Central and State warehousing corporations 1,500 godowns for marketing societies and 4,000 godowns for large sized primary agricultural credit societies

The Reserve Bank of India has played an important role in the sphere of co-operative development. One of its main functions is the provision of hnance to the movement During the year 1956-57, there was an increase in the scale of assistance provided by it for seasonal agricultural operations and marketing of crops in the form of loans at the concessional rate of 2 per cent below the Bank Rate Thus 17 State co-operative banks were sanctioned credit lunits aggregating Rs 3525 erore in 1956-57 Subsequently the number of State co-operative banks has been reduced as a result of the reorganisation of States The medium term loans sanctioned by the Reserve Bank of India during 1956-57 amounted to Rs. 1 67 crore was also made during the year in the direction of providing the working capital requirements of co-operative sugar factories. Side by side, the Reserve Bank conducts inspection of co-operative banks with a view to assessing their financial position and working During 1956-57, 104 co-operative banks were inspected, comprising 94 co-operative central banks, 9 State co-opertive banks and I central land mortgage bank.

The structure of the co-operative movement is three tiered, consisting of apex societies at the State level, Central societies at the district level and primary societies at the village level

Taking the average size of an Indian firmly as five, it may roughly be simated that 881 crore or 2.8 per cent of the population had been brought within the co-operative movement by the end of 1955 56, allowance being made for some individuals being members of more than one society in the table below the main operations of the societies in 1951-52 and 1955-56, are indicated.

PRIMARY SOCIETIES

Primary societies organised at the village level and dealing with notional widnal members constitute the bise of the co-operative structure. Outfoll is total of 240 309 co-operative societies of all hypes at the end of June 1956 primary societies accounted for 236 42° or "0.31 per cent. They were overal elimingly (1,70 443) of the credit type, of which 1,63,110 drul with agricultural credit in 40 10033 with non-agricultural credit. Of the termany 30,208 were agricultural non-credit societies and 27,745 belonged to non-agricultural in oriecht type. The position of all types of primary societies in 1935 50 as compared with 1931 52 as aboven in the (table below.

Agricultural Credit Societies

The working capital of agricultural credit societies at the end of June 1955 stood at Rs. 79 10 crore, boars advanced during 1955-56 amounted to Rs. 49 62 crore, foans outstanding Rs. 59 04 crore and loans overther Rs. 1496 crore. Loans from crutal innancing a model of the control of Rs. 42 80 crore and formed \$1.11 per crut of the small open and Owned fluid (Rs. 29 25 crore) and deposits (Rs. 70 crore) formed 370 per cent and 89 per cent of the working capital. A State was analysis of the working capital reveals that the ratio of deposits to working capital in less than 8 per cent in the case of as many as 12 States indicating that the societies have not succeeded in promoting thrift and assume.

Out of 1,59,939 societies, at the close of 1955-56, as many as 1,29,012 were in former Part 'A' States showing an uneven regional distribution. Membership per society is so small that the vast majority of the societies are uneconomic. The following table shows the average membership, share capital, deposits and working capital of agricultural credit societies.

A major purpose of the co-operative movement since its inception has been the provision of finance to the agriculturists at rates of interest which they can afford. Only a limited success has been achieved in this direction. The rates of interest continued to be high, in some cases as high as 12½ per cent or even 24 per cent as in Manipur. In States where the co-operative movement was well developed, the rates of interest ranged generally between 6¼ and 9 per cent.

Agricultural Non-Credit Societies

Agricultural non-credit societies are concerned with agricultural operations such as purchase of seed, manure, implements and machinery, provision of minor irrigation facilities, consolidation of holdings, co-operative farming and co-operative marketing. The principal types of such societies and their membership are shown below:

TABLE 151

Non-Agricultural Credit Societies

These societies include, among others, employee's credit societies and urban banks Deposits which stood at Rs 53 51 crore at the end of 1935-56 accounted for 62 44 per cent of the working capital. This indicates that these societies were able to attract a relatively larger amount of deposits than the agricultural credit societies. Some of these societies also did non-credit business. Goods worth of Rs. 2.42 crore were received and sales amounted to Rs 2 27 erore The table below provides an analysis of their financial transactions in 1951-52 and 1955-56

Primary Land Mortgage Banks

Of 302 primary land mortgage banks in the country at the end of 1955-56, as many as 213 or 70.52 per cent were concentrated in Andhra Pradesh, Madras, and Mysore. Their membership stood at 3,13,827. Loans advanced by these banks amounted to Rs. 1.74 crore, while the working capital stood at Rs. 1.35 crore. The rates of interest charged to the ultimate borrower ranged between $5\frac{1}{2}$ and 10 per cent (except in Bombay where loans for certain purposes were made at rates as low as $3\frac{1}{4}$ per cent).

CENTRAL SOCIETIES

Central societies function at the district level between the primary societies at the village level and the apex societies at the State level. They may be classified into three categories: (i) central banks and banking unions, (ii) central non-credit societies, and (iii) central land mortgage banks. The composition and activities of these institutions are shown below:

Central Banks and Banking Unions

The principal function of central co-operative banks is to act as a balancing centre to their affiliates and to channel funds to the primary societies. The following table gives details about the central banks and banking unions.

TABLE 155
CENTRAL BANKS AND BANKING UNIONS

	thousand ru	thousand rupees	thousand rupees	

Their paid-up share capital and reserves amounted to Rs. 462 crore and Rs 5 18 crore in 1951-52 and Rs 8 50 crore and Rs 6 65 crore in 1955-56 The composition of the working capital is shown in the following table COMPOSITION OF WORKING CAPITAL OF CENTRAL CO-OPERATIVE BANKS

TABLE 156

Particulars	Percentage to	working capital
	1951-52	1955-56
Owned funds	16 3	16 4
Deposits	63 6	1 03
Other borrowings	20 1	23 5

The outstandings at the end of June, 1956, against individuals and against banks and societies totalled Rs 3 48 crore and Rs 50 86 crore respectively The percentage of overdues to outstandings was 23 in respect of individuals and 139 in respect of banks and societies. The total investment of central co-operative banks amounted to Rs 23 28 erore at the end of 1955-56 of which Rs 13 06 erore represented investments in Governments and other trustee securities

Central Non-Credit Societies

The principal types of societies and their membership are given helos

Central Land Mortgage Banks

Central land mortgage banks raise their funds mainly by the issue of debentures which are guaranteed by the State Government in respect of the repayment of principal and the payment of interest. Debentures of the value of Rs 1494 crore were in circulation at the close of 1955 56 The Andhra and Madras Central Land Mortgage Banks jointly accounted for nearly 59 per cent of the total debentures Table below indicates their development between 1951-52 and 1955-56

OTHER ASPECTS

Superorsing Umons

In 1955-56 there were 522 upper unions with 39,254 affiliated societies with a membership of 32,85,936. Working capital of the affiliated societies stood at Rs 5424 crore. The income of the unions was drawn from (i) subscriptions from affiliated societies (Rs 3 88 lakh), (ii) Contributions from central institutions (Rs 6 47 lakh), (iii) Government grants (Rs 331 lakh), and (w) other sources (Rs 128 lakh). The expenditure incurred by the unions stood at Rs 16 86 lakh.

State Unions and State Institutes

There were 30 such unions with 41,267 primary and 713 central affihated societies and 1,120 individual members at the end of June. 1956 Their total income stood at Rs 39 55 lakh and total expenditure Rs 45 32 lakh. Contributions to their income came from (i) fees or subscriptions from affiliated societies (Rs 15 lakh), (ii) Contribution from central and State banks (Rs 5f lakh), (iii) Government grants (Rs 31 06 lakh), and (iv) other sources (Rs 64 lakh)

Insurance Societ es

At the end of June 1956, there were 24 co-operative life insurance socioties with 2,78,543 members, which issued 39,503 policies for an assured sum of Rs 5 25 crore The total life assurance in force at the end of June 1956 amounted to Rs 27 87 crore

Four fire and general insurance co-operative societies handled business of Rs 21:30 crore in respect of fire insurance, Rs 44:03 lakh in respect of godowns and buildings, Rs 10:51 lakh in respect of cotton mills and Rs 6:02 lakh in respect of factories.

Policies totalling 2,165 were issued in the year 1955-56 by two cooperative motor insurance societies. The types of risks insured were (i) comprehensive (Rs. 58 lakh), (ii) liability to public (Rs. 34 lakh), (iii) 'Act' liability (Rs. 45 lakh).

Societies -Under Liquidation

At the beginning of 1955-56 there were 13,616 co-operative societies under liquidation, 2,335 societies being added during the year. The value of assets realised and liabilities paid off during 1955-56 amounted to Rs. 42.46 lakh and Rs. 32.59 lakh respectively.

CHAPTER XXIII

IRRIGATION AND POWER

IRRIGATION

India's water resources have prosisionally been computed at 13,560 labh acre feet of which approximately 4,500 labh acre feet are expected to be unliable. Only 680 labh acre feet representing about 6.5 per cent of the total and about 19.5 per cent of the unliability stern had been made use of up to 1951. As a result of additional supplies of water expected to be made available by the multi purpose projects undertaken during the first and second Plans, the percentages of water used to the total flow is expected to rus to 11 and 13 respectively. The table below gives the approximate position of the total resources in the different basins and their withstation.

TABLE 161
WATER RESOURCES AND THEIR UTILISATION

(In lakh acre feet)

Ri er System	Est mated average flow	Utalisation upto 1951	Additional utilisation by projects in the 1st Plan (on full development)	Additional utilisat on by projects in the 2nd Plan (on full develop- ment)
Indus Ganga Brahmaputra Godavan Mahana hi Artihna Narbada Taph	1 680 4 000 3 000 8 10 8 10 500 3 70 170	80 380 23 120 31 90 2 2 80	110 0 215 0 3.1 10 0 105 0 156 0 5.1 7 0	12 0 145 0 145 0 20 26 0 101 0 35 0

The possibilities of diserting the normal flow of rivers into urgation consils have almost here exhauted. The plans for the future des-dopment of irrigation, therefore, aim at impossing the surplus river flow dismass the morseon for use during the dry weaters from the top the best of the surface of the plans of the contraction of the insufficiency of water or unfavourable topography, water for irrigation has to be lifted mechanically from subterranean sources. The construction of minor irrigation works, such as tanks and wells, and the installation of water thing devices have, therefore, an important place in the programme for the development of irrigation.

The Central Board of Irrigation and Power, constituted in 1927, is responsible for the initiation of fundamental research in the country in the field of irrigation and power and the co-ordination of the work of sixteen research stations established in different parts of the country

The Central Water and Power Commission was brought into being to cope with the rapid development of water resources and river basins in India. It is charged with the general responsibility of initiating, co-ordinating and furthering, in consultation with the State Governments concerned, schemes for the control, conservation and utilisation of water resources throughout the country for the purposes of flood control, irrigation, navigation and water power generation as well as schemes of thermal power development and of transmission and utilisation of electrical energy throughout the country. The Commission has three wings, viz., Water Wing, Power Wing and Flood Wing.

FLOOD CONTROL

Following the succession of unprecedented floods during the 1954 monsoon season, the Government of India formulated a comprehensive programme of flood control in September, 1954. The programme of flood control is divided into three phases: (i) immediate (ii) short-term, and (iii) long-term. The first phase, extending over a period of two years, was devoted mainly to intensive investigation and collection of data. During the second phase, covering the next four or five years, it is proposed to undertake flood protection measures such as the improvement of embankments and channels. In the third phase, construction of storage reservoirs and necessary additional embankments on the tributaries of certain rivers is envisaged.

To deal effectively with floods, Flood Control Boards, assisted in technical matters by Advisory Committees, have been formed in 12 States in addition to the Central Flood Control Board. Four River Commissions (Floods) have also been set up by the Centre to assist the Central Flood Control Board in technical matters. A Flood Wing has been added to the Central Water and Power Commission. Fifty-four schemes, each estimated to cost Rs. 10 lakh and above, involving a total expenditure of Rs. 24.06 crore, have been approved by the Central Board. The State Boards have also approved a number of schemes, each estimated to cost less than Rs. 10 lakh. Ninety-four works estimated to cost Rs. 40.62 crore are also under consideration. Besides, 477 other schemes, each costing less than Rs. 10 lakh and involving a total outlay of Rs. 9.95 crore, have also been approved or sanctioned in the different States and Union Territories.

The flood control works executed so far have stood the test of the 1957 floods well and afforded protection to large areas. The level of over 3,200 villages in the flood zones in the U.P. has been raised and 1,600 miles of embankments, exclusive of about 125 miles of the Kosi embankments, have been constructed in the various States since the inception of the flood control programme in 1954-55. The earthwork done in the embankments is of the order of 350 crore cft.

A High Level Committee has been set up to go into the entire question of flood control on the basis of the available data and to advise on the nature of protective measures. The Committee has submitted a preliminary report and the final report is expected by the end of March, 1958.

INLAND NAVIGATION

Some of the multi-purpose schemes completed and under construction include navigation as one of the objectives. The Damodar Valley Corporation envisages the construction of a navigation canal 85 miles long, linking up the lower Raniganj coal-fields with the Hooghly at Tribeni, 30

Resources

Considering its vast area and population, India has a considerable leeway to make up in the sphere of power generation. The annual perceptive generation of electricity in India is only 30 kwh, compared to Norways 6 503 kwh. Canada 4 4,890 kwh, the U K 's 1,573 kwh, Japans 715 kwh and Turkeys 69 kwh

The Central Water and Power Commission (Power Wing) has taken in hand a detailed awassment of the water-power potential of the country. The results of the studies of the west flowing rivers of the Western Chats, the east flowing river of South India and the rivers of the Central Indian Plateau indicate an aggregate power potential of 144 ladk wir. 115 major schemes outland in the reports published by the Commission. Similar studies are in hand for other areas. At present the estimated total potential of the country is one; 350 ladk kw.

The state of power development in India, at present, is as follows

South India Mainly hydro-electric.

Bombay area Viunly hydro-electric but served to a limited extent by thermal power also

Bihar and Bengal coalfieds Munly thermal

Central India comprising Andhra Pradesh, Orissa and Madhya

Pradesh Munly thermal

Punjab and Uttar Pradesh Mainly hydro-electric, partly

As at present visualised the picture of power development in India will esentially be one of inter connected hydro-electric and thermal power stations in the various region. It is conceivable that the regional systems will, in due course, be further inter-connected so as to form an all India end

Organisation for Power Development

The generation and distribution of electricity in India was for 1 long time governed by the Indian Fleetricity Act of 1910. To ensure rapid and orderly generation of electricity, the Fleetricity (Suppl). Act was passed in 1948. It provided for the setting up of a Central Electricity Authority for the entire country as well as regional organisations known as State Electricity Boards. Accordingly, the Central Electricity Authority was constituted in 1950. State Electricity Boards have been set up in Delin, West Bengal, Madhya Pradesh, Bombay, Kerala, Madras, Rajasthari, Mysore and U.P.

Ownership

Until 1923, the deselopment of electric power was confined mainly to private companies that took out licences under the Indian Electricity Act of 1910. It was only in the late twenties that schemes for the development of power were launched by some of the States In 1935, private companies owned 45.4 per cent of the public utility installations and 43.7 per cent of the total installed expactly, as shown in the following Table.

TABLE 164
OWNERSHIP—PUBLIC UTILITY INSTALLATIONS

Ownership		Number of undertakings	Installed gen- erating capacity (in kw.)

TOTAL	2,826	100.00	4,724	100.00	795.94	100.00

^{*}Light and small power

Rural Electrification

Most of the power supply undertakings cater for urban areas only. A few large power systems, however, serve the needs of rural areas also. Hitherto, rural electrification has made headway only in Andhra Pradesh, Bihar, Bombay, Kerala, Madras, Mysore, Punjab, Uttar Pradesh and West Bengal. The following table shows the number of electrified towns and villages at the end of 1956:

TABLE 166
TOWNS AND VILLAGES WITH ELECTRICITY SUPPLY

,	Towns and villages in this group	Towns and villages with public electricity supply	Percentage of towns and villages with pub- lic electricity supply
Over 1,00,000 50,000 to 1,00,000 20,000 to 50,000 Below 20,000	73 111 401 , 5,60,522	73 112*** 345 7,964	100.00 100.90 86.03 1.42

^{***}Includes Pondicherry town (population: 59,835)

^{**}Includes electric traction and public water works.

Power Schemes under the tao Plans

The pace of power development has quickened since. Independence Some States have taken the injustive and private electricity utilities have also expinded their activities. The prevailing tendency is in favour of State ownership of electricity concerns.

There were 142 power development schemes in the public sector in the first Plan Of these, the major multi purpose river valley projects were Binkra Nangal, Hirakud Damodar Valley Corporation, Chambal, Rihand, Koyna and Josi

The principal power schemes completed and brought into service

RIVER VALLEY PROJECTS

A long-range and lasting solution to the problems of food shortage and economic development lies in the speedy completion of multi-purpose river valley projects. Apart from providing irrigation facilities for additional food and commercial crops, the two other main benefits that multi-purpose projects confer are the control of floods and the generation of hydro-electric power. Among the other benefits which accrue from the projects are the development of inland navigation, pisciculture and provision of drinking water. The importance of these projects in the country's economic development becomes evident from the fact that nearly a third of the total budget for the first Plan was earmarked for irrigation and power projects, some of which are among the world's largest.

India's natural waterways are more or less evenly distributed over the entire territory. The ultimate target for the development of irrigation is the doubling of the irrigated area within 15 to 20 years. The additional food production resulting from this extension of irrigation will not only cover the present deficit but also provide, to some extent, for the future growth of the population.

The first Five-Year Plan provided for the execution of nearly 300 big and small schemes to extend irrigation facilities, on full development, to nearly 22 million acres.

Particulars of the principal irrigation works in the country and the principal irrigation schemes included in the second Plan are given at the end of this chapter. The following paragraphs describe the major river valley projects briefly.

Bhakra-Nangal Project

The Bhakra-Nangal Project, the largest multi-purpose project in India, consists of a 740-ft. high dam, which is the highest straight gravity dam in the world, about 650 miles length of canals and over 2,000 miles of distributaries. The Bhakra dam is being constructed across the Sutlej river in a natural gorge just before the river enters the plains. The Nangal dam is located 8 miles down-stream and will serve as a balancing reservoir to take up the diurnal variations of water released from Bhakra and thus ensure steady supplies.

The construction of the project was started in 1946. All works, except the Bhakra dam and its power houses, have almost been completed. The concreting work on the Bhakra dam and the work on the power-house at Bhakra are in progress.

In 1956-57, an area of 15,08,291 acres was irrigated by the Bhakra Canal System in Punjab and Rajasthan. The canal system commands a gross area of about 66.7 lakh acres. Of this, the culturable commanded area will be 58 lakh acres and 36 lakh acres will be annually irrigated on full development. In addition, an area of 37 lakh acres will get increased water supply. It is anticipated that, on full development, there will be an additional outturn of 8.5 lakh tons of wheat and other foodgrains, 5.9 lakh bales of cotton, 1.5 lakh tons of sugarcane and 0.3 lakh tons of pulses and oilseeds.

There will eventually be two power-houses at Bhakra, one on each side of the dam. In addition, there are two other power houses on the

Nangal Hydel Channel The power house at Ganguwal with two units of 24,000 kw each was completed and commissioned in Janury, 1955. The power house at Kotla, having the same capacity, was completed and put into operation in July 1956. It is proposed to instal an additional unit of 29,000 kw in each of these power-houses. The left bank power house at Bhakra will have 5 generating sets of 90,000 kw a cach. With the addition of these units and one unit each of 29,000 kw at Gangiuwal and Kotla, there will be an installed capacity of 6,01,000 kw and firm capacity of 3,32,000 kw.

Partial storage of water above the Bhakra dam is expected to start in mid-1958 when limited supply of water for perennial irrigation will be released. The main dam is expected to be completed by 1959-60

Hirakud Dam Project (Stages I & II)

The project will harness the river Mahanadi, and proude irrigation to 67 Jakh acres of land in Sambalpur and Bolangu districts. The power-house at the base of the dam will have an initial installed capacity of 1,23,000 km. The main dam is 15,748 feet long, flanked by 13 miles of dykes on both the sides. This is the world's longest main stream dam and will impound 66 falkh acre-fier of water. The impounded water will form a lake of about 288 sq. miles in area. The revised estimated cost of the project is Rs. 70.78 crore.

The main dain and dykes have been completed in all the reaches. In the power house, two generating sets of 24,000 kw each have been commissioned Transmission lines to Hirakud, Altumnium Factory, Jharasuguda, Raigsangpur, Rourkela, Joda, Talchar, Chowdwar and Bargarh, etc have been completed The lines to Raygangpur and Rourkela have been charged since December, 1956, and power from Hirakud supplied to Rajangpur Cement Factory, Rourkela and the Mandran Dam site. The greater part of excavation on the main canals and branches and on distributions and minors has been completed. Irrigations upplies commenced in September, 1956, and upto the end of November 1937, over 1 45 Jakh acres were brought under uringstion.

A scheme costing Rs 14 92 crore has been sanctioned for delta irrigation and when completed in 1960, will supply perennial irrigation to 18 7 lakh acres annually in the Cuttack and Puri districts

To meet the increasing load demand, the second stage of power development has been sanctioned. On completion, the power-house will have an installed capacity of 2.32.500 kg.

Damodar Valley Project

The project will comprise, on completion, 4 storage dams at Tilaiya, Konar, Maithon and Panchet Hill with hydro electric installations of a capacity of 1,50,000 kw attached to three of them, two thermal power stations at Bokaro and Durgapur with a total capacity of 3,75,000 kw, an extensive power transmission grid and an irrigation barage at Durgapur with canals and distributaires

The all-concrete Tilalya Dam, 99 feet high, above the river Barakar and 1,200 feet long, was completed in 1952 and inaugurated in February, 1953. The Bokaro thermal statuon with an installed capacity of 1,50,000 kw to be eventually raised to 2,23,000 kw was commissioned on the same day

The Tilaiya hydro-station went into commercial operation in February 1953, meeting the power requirements of the mica mines at Kodarma in the Hazaribagh district.

The Konar Dam with a concrete section across the bed of the river and earthen extensions on either side was completed in 1955. The Maithon Dam on the river Barakar will store 12 lakh acre-fect of water and the underground hydro-electric station near the dam will have a capacity of 60,000 kw. The dam was completed in September, 1957, and the first generating unit of 20,000 kw. was commissioned in October, 1957.

Work on the biggest of the four dams at Panchet Hill is in progress. Designed primarily for flood control, it will impound 12.14 lakh acre-feet of water. A 40,000-kw. hydro-electric station is being built near the dam and is expected to be commissioned in 1958.

The 2,271-ft. long and 28-ft. high barrage at Durgapur in West Bengal was completed ahead of the target date and was opened in August 1955. It will irrigate over 10.26 lakh acres of land through a network of canals and distributaries. Nearly 85 miles out of the 1,550 miles of these canals will be navigable and provide an alternative means of communication between Calcutta and the coalfields. The canals will be completed by 1959.

Tungabhadra Project

This joint undertaking of the Governments of Andhra Pradesh and Mysore comprises a 7,942-foot long and 162-foot high dam on the Tungabhadra river and a system of canals with power stations on either side.

The dam was inaugurated in July, 1953. The reservoir, which has a waterspread of 146 square miles, will ultimately store 30 lakh acre-feet of water. The two canals on either side will irrigate nearly 8.3 lakh acres in Andhra Pradesh and Mysore States. There will be two power-stations on the right side, one below the dam and the other at the end of a 15-mile long canal at Bukhasagaram. Initially, the station will have two generating units of 9,000 kw. each. A power-station will also be constructed below the dam on the left side where two generators of 9,000 k.w. each will be installed in the first instance.

The main dam has been completed except for some minor works which are in progress. Two generating units of 9,000 k.w. each have been commissioned.

Ƙosi

The three-unit Kosi Scheme is primarily a flood control project which will yield other benefits also. Unit I of the Scheme includes a barrage across the river Kosi about 3 miles above Hanumannagar in Nepal. Unit II will consist of embankments, about 150 miles in length, along both the banks of the river. Unit III comprises the Eastern Kosi Canal, which will take off from the Hanumannagar Barrage and will irrigate 13.97 lakh acres. The main canal will have four branches, namely, Supaul Branch, Partapganj Branch, Purnea Branch and Arraria Branch.

Work on the barrage and the Canals proper has been taken in hand and construction of the embankments has been completed for the greater part.

Chambal (Stage I)

The first phase of the Project, which is being jointly executed by the Madhya Pradesh and Rajasthan Governments, comprises the Gandhi Sagar Dam Gandhi Sagar Power Station transmission lines, Notah Birrage and canals on either side of the barrage. The reservoir to be formed by the Gandhi Sagar Dam will have a gross storage capacity of 63 5 lakh acre feet. The canal system will irrigate 11 lakh acres in Rajasthan and Madhya Pradesh Besides, 75 000 km of power will also be generated in the first stage. Though the Project as a whole is expected to be completed by 1962, generation of power and irrigation are expected to start in 1959-60.

Nagarjunasagar Project

The Nagarjunasagar Project which is a scheme of the Andhra Pradesh Government comprises the contruction of a masoniny dam on the Krishna river, near Nandkonda village and two canals one on each side of the river. It will have an unpounding capacity of 9 30 million acre feet. The total ultimate draw off by the canals on both sides of the river will be \$6,000 cuecs the biggest for any reservoir in India. The first stage is sheduled to be completed by the year 1963 64 and is expected to yield annually about 8 lakh tons of foodgrains.

The Project, which is estimated to cost Rs 86 33 crore envisages the construction of a masory dam, 290 feet high (Spillway) above foundation level, with 5 ft falling shutters The dam will be built of stone masonry and provided with 8 Peristoks of 14 ft, dia, each, for eventual generation of power in the final stage of the project.

The Right Bank Canal 135 miles long, will irrigate an area of 9 70 lath acres, while the Left Bank Canal 103 miles long, will irrigate 7 9 lath acres Beades this, an additional 3 lath acres in the Krishna delta will be irrigated

Koyna Project

The first stage involves the construction of a 208-foot high dam across the treer koyna and a tunnel which will divert the waters of the river to ensure a drop of about 1,570 feet. The underground power house will be applied to Bombay and Poona and the remaining 10,000 kw to the adjoining areas in Maharashtra.

The Project, estimated to cost Rs 38 28 crore, was manusurated in January 1954 and is scheduled to be completed by the end of 1961

Rihand Project

The Project engages the construction of a concrete gravity dum of strict Marapur, and 294 5 ft high across the river Ruhand near willage Pard in district Murapur, and 29 miles south of the confluence of one and the Sone rivers. The reservoir will have a gross storage capacity of 85 lakh acre-fect A pure reservoir will have a gross storage capacity of 25 lakh kin and ultimate unstation with an initial installed capacity of ted at the toe of the dam. The first of 14 lakh acres of land in the 19 F and direct irrigation benefits to 14 lakh acres of land in the 19 F and direct irrigation to 5 lakh acre of land in the 19 F and direct irrigation to 5 lakh acres of land 1950-61.

Bhadra Reservoir Project

The multi-purpose project across the river Bhadra in Mysore State will irrigate 2.34 lakh acres of land in Shimoga, Chickmaglur, Chitaldurg and Bellary districts and will have 33,200 km. of installed capacity. The estimated cost is Rs. 24.42 crore. Work on the dam is in progress and is expected to be completed by 1961.

Kakrapara Project

This Project, financed by the Bombay Government, may be regarded as the first phase of the development of the Tapi valley. The construction weir, 2038 ft. long and 45 ft. high, on the rocky river-bed near Kakrapara, 50 miles upstream of Surat, was completed in June, 1953. Canals are scheduled to be completed in June, 1960. The scheme will irrigate 6.5 lakh acres in Surat district.

Machkund Project

A joint venture of the Governments of Andhra Pradesh and Orissa, this hydro-electric project harnesses the river Machkund which forms the boundary between the two States. A dam 176 ft. high above foundations and 1,345 ft. long has been constructed at Jalaput across the Machkund, river to store 27,200 million c-ft. of water. There are 3 generating units each with a capacity of 17,000 kw. Later, further three units of 23,000 kw. each will be installed and the total installed capacity will be 1,20,000 km.

Mayurakshi Project

This important project of the West Bengal Government is mainly an irrigation scheme though it also provides for the installation of a 4,000-kw. hydro-electric plant. Power from the project will be supplied to Birbhum and Murshidabad districts in West Bengal and Santhal Paraganas in Bihar. The first stage of the Project was completed in 1951 with the construction of a diversion barrage at Tilpara near Suri in West Bengal. The 105-ft. high and 2,170-ft. long Massanjore Dam, now named Canada Dam, was completed in June, 1955. The canals on either side will irrigate 7.2 lakh acres. The Canada Dam will have a capacity of 5 lakh acre-fect of water and will provide rabi irrigation for nearly one lakh acres. The first 2,000-kw. generating set was commissioned in December, 1956 and the second in February, 1957.

DEVELOPMENT PROGRAMME

About 40 lakh acres of land were brought under irrigation by largeand medium-sized projects in the first Plan. During the second Plan, an additional area of 1.2 crore acres will receive irrigation benefits, 90 lakh acres from projects undertaken during the first Plan and 30 lakh acres from new projects. The area which these new projects will eventually irrigate is 1.5 crore acres. Adding one crore acres brought under irrigation from minor schemes in the first Plan and the target of 90 lakh acres from such schemes in the second Plan and assuming that the shortfall of 23 lakh acres in the major and medium irrigation sector in the first Plan will be realised in the second Plan, the total irrigated area in the country by 1961 will be 8.88 crore acres. This will mean about 73 per cent more than the irrigated area (5.15 crore acres) at the commencement of the first Plan.

At the beginning of the first Plan, the total installed capacity of power-generating plants amounted only to 23 lakh kw. Half of this was

in the electricity companies in the bigger towns. About a quarter of the installed capacity was in the public sector, the balance being in industrial establishments which generated their own power. In the first Plan period, installed capacity increased by 11 lakh, we bringing the total installed capacity to 34 lakh kw. In this, the share of the public sector increased from 6 lakh kw. 104 lakh

It has been est mated that over the next 10 years installed capacity will need to be expanded by 20 per cent annually. This means that the tarvet for 1965 should be about 1.5 evere k. Accordingly, a programme to raise the installed capacity to 69 lakh kw has been included in the second Plan. Of the increase of 35 lakh kw, between 1920.56 and 1960-61, 29 lakh k w, will be in the public sector 53 lakh kw in electricity supply companies and 3 lakh kw. in industrial establishments which generate their 0 sin pover. In the public sector 10 lakh kw in all del power will account for the add ton of '91 lakh kw and thermal power for 8 lakh kw. In all 42 power generating schemes (new schemes and extensions to existing power stations) will be undertaken during the second-Plan. These will include 23 hydro-electric and 19 steam power stations. During the next five years the per capita consumption of electricity is expected to double, from 25 to 50 units.

CHAPTER XXIV

INDUSTRY

According to the 1953 Census of Manufacturing Industries*, India had 7,104 registered factories.** Of these, 6,399, or 90 per cent of the total which had submitted returns, employed in all Rs. 728.7 crore worth of capital, consisting of Rs. 324.9 crore fixed capital and Rs. 403.7 crore working capital. The total number of persons employed in these factories was 16,27,857 including 14,70,749 workers. The total value of the products of these manufacturing industries was Rs. 1,123 crore, the net value added by manufacture amounting to Rs. 334 crore. Salaries and wages (including the money value of other benefits) paid to employees amounted to Rs. 205.2 crore.

The total profits earned by 324 companies during 1953, according to another estimate,*** amounted to Rs. 33.67 crore as against Rs. 24.60 crore during the previous year. The index number of industrial profits during 1953 for all industries, with 1939 as the base year, was 261.2 compared to 190.6, 310.5 and 246.6 during 1952, 1951 and 1950, respectively. The index numbers of industrial profits during 1953 for certain important industries were as follows: jute 326.2; cotton 379.4; tea 391.4; sugar 419.8; paper 512.7; iron and steel 179.4; coal 145.5; and cement 279.0.

INDUSTRIAL POLICY

Independent India's industrial policy was first announced in 1948. This envisaged a mixed economy with an overall responsibility of the Government for the planned development of industries and their regulation in the national interest. While it reiterated the right of the State to acquire an industrial undertaking in the public interest, it reserved an appropriate sphere for private enterprise. (vide *India 1957*, p. 289).

A fresh statement of industrial policy necessitated by the acceptance of a socialistic pattern of society as the objective was announced on April 30, 1956. Under the revised policy, industries specified in Schedule A (enumerated below) will be the exclusive responsibility of the State, while Schedule B industries (also enumerated below) will be progressively State-owned, but at the same time private enterprise will be expected to supplement the efforts of the State in these fields. Future development of industries falling outside these Schedules will, in general, be left to the initiative and enterprise of the private sector. Notwithstanding this demarcation, it would always be open to the State to undertake any type of industrial production.

Schedule A Industries: Arms and ammunition and allied items of defence equipment; atomic energy; iron and steel; heavy castings and forgings of iron and steel; heavy plant and mach-chinery required for iron and steel production, for mining, for machine tool manufacture and for such other basic in-

^{*} The following States were not covered by the Census: Jammu and Kashmir, Madhya Bharat, Hyderabad, Mysore, Bhopal, Bilaspur, Manipur, Tripura and the Andaman and Nicobar Islands.

^{**} Those employing 20 or more workers on any day and using power.

^{***} By the Ministry of Finance, Department of Company Law Administration.

dustres as may be specified by the Central Government, heavy electrical plants, including large hydraulic and steam turbines coal and lignite, mineral oils, mining of iron ore, managanese ore chrome ore, gypsum, sulphiur, gold and diamonds mining and processing of copper, lead, zinc tin, mol bdenum and wolfram minerals specified in the behalf of the companies of the control of t

Schedule B Industrus All other minerals except "minor minerals" as defined in Section 3 of the Minerals Concession Rules 1949 aluminum and other non ferrous metals not included in Schedule A machine tools, ferro-alloys and tool steels basic and intermediate products required by chemical industries such as the manufacture of drugs, dyestuffs and plastics antibiotics and other essential drugs, fertilisers, synthetic rubber, carbonisation of coal, chemical pulp, road transport, sea transport

REGULATION OF INDUSTRY

Consistent with its industrial policy the Government decided to assume powers to regulate and develop the industrial sector and intervien in the private sector if its progress was unaustactory. To this end, the Constitution was amended and the Industries (Development and Regulation) Act, 1951, was enacted

Under the Act all the new and existing undertakings were to be locased. The Government was authorised to examine the working of any industrial undertaking and to see such directions as it considered necessary. If the undertaking continued to be mismaninged the Government was empowered to take over the manageout. The Act also envisaged the extension of a Central Advancy Control The Act also envisaged the extension of a Central Advancy Control of the representatives of industry, labour, consumers and primary producers to advise the old of the control of the control of the setting of the prediction of industries. At the same time it provided for the setting up of Decelopment Councils for individual industries.

By exercising these powers, the Government has been able to secure (i) a proper utilisation of the country's resources, (ii) a balanced evolopment of large scale and small-scale industries and (iii) a proper replaced within the scope of the Act' and Development Connels were set up internal combustion engues and power-driven pumps, (iii) becycle sugger (v) light electrical and power-driven pumps, (iii) becycle (iv) plasmaceuticals and drong (viii) heavy electrical industries (vii) pharmaceuticals and drong (viii) heavy chemicals (alkalis) (xi) woollen metals and alloys. In addition to these Councils, a number of panels and expert committees have been appointed from tune to time to study various acquisited in the control of the contr

In 1955 the Act was amended to bring 34 new industries under the control of the Union The amended Act was brought into force in March 1957

For the development of important industries for which sufficient capital has not been forthcoming in the private sector, the Government has given financial assistance either by granting loans on special terms or by participating in equity capital. Industries which have received such assistance include the manufacture of explosives for civil purposes, intermediates for certain types of dyestuffs, textile machinery and steel. In order to promote decentralisation of industry, the Government has decided to pool and equate the prices of steel and cement at all railheads in India.

PRODUCTIVITY

Following the recommendation of a Productivity Delegation which visited Japan in October-November 1956, a National Productivity Council has been set up as an autonomous body with representatives of Government, employers, labour and others. The object is to inculcate productivity consciousness in the country and apply the latest techniques of increasing productivity in industry.

INDUSTRIAL FINANCE

The Industrial Finance Corporation, established in July 1948, has afforded financial assistance in the form of advances and long-term loans to industrial concerns. Up to March 1957, the loans sanctioned by the Corporation amounted to Rs. 48.36 crore including Rs. 9.76 crore during 1956-57. Loans worth Rs. 20.70 crore had actually been disbursed. sum of Rs. 13.5 crore has been provided in the second Plan for Central Government loans to the Corporation. The State Financial Corporations* have assisted medium and small-scale industries which do not fall within the scope of the all-India corporation. The National Industrial Development Corporation, set up in 1954, has formulated several projects for the establishment of new industries and the development of new lines of production in the private sector, such as steel foundries, forges and fabrication of steel structurals, wood pulp, printing machinery, air compressors, etc. It has also acted as an agency of the Government for the grant of special loans for the rehabilitation and modernisation of the cotton textile and jute industries. The Corporation is a Government-owned private limited company with an authorised capital of Rs. 1 crore, of which the Government's share amounts to Rs. 10 lakh.

The Government has also assisted the private sector by facilitating the import of essential raw materials and basic intermediates, offering tax concessions and protecting young industries. The Statutory Traiff Commission, established in January 1952 in place of the previous non-statutory Tariff Board, has been reviewing the progress of protected industries and examining new schemes for protection.

Efforts have been made to secure technical help from the industrially-advanced countries either under the international technical assistance schemes or through direct negotiations.

Foreign Capital

In order to supplement the capital resources for rapid industrial development, the Government has invited foreign assistance in cases where sufficient capacity for the manufacture of a particular item does not exist in country and where it is considered desirable to secure the know-how from leading foreign firms. The policy in regard to foreign capital was enuncia-

^{*}The number of State Financial Corporations declined by two, from 13 to 11, through amalgamations following the Reorganisation of States in November 1956.

ted in the Industrial Policy Resolution of April 1948, and in the Prime Minister's statement in the Constituent Assembly in 1949, which laid down that

- (i) the participation of foreign capital and enterprise should be carefully regulated in the national interest by ensuring that major interest in ownership and effective control should save in exceptional cases, always be in Indian hands and that the training of suitable Indian personnel for the purpose of eventually replacing foreign experts will be insisted upon in all such cases;
- there will be no discrimination between foreign and Indian undertakings in the application of the general industrial policy;
- reasonable facilities will be given for the remittance of profits and repatriation of capital consistent with the foreign exchange position of the country.
- (iv) in the event of nationalisation, fair and equitable compensation will be paid

DEVELOPMENT UNDER FIRST PLAN

As the country had a deficit in food and raw materials, the emphasis in the first Eve Vear Plan was laid on agriculture irrigation and power consequently, the first Plan allocated by about 5 per cent of the total meetinest for industries and minerals. Fact comparatively modest targets for new investments in the industrial field, or emphasis being on the fuller taleaton of existing capacity. This objects a more of less achieved The effective idle capacity available at the end on the fuller plan and automal industries like cotton and just textle coment proper was negligible. Some idle capacity, however, still existed an the superphosphate, soop, vegetable oils vanapatu and paint industries and not capacity in discretization of the dark of or first and not for first and not firs

New investment on indistries in the public sector during the first Plan was of the order of Rs 60 crore as against the target of Rs 94 crore The investment, installed capacity and the level of production of the industries in the public sector under the first Plan are shown in Table 180 by the private sector on new projects and expansion programmes during the first Plan was expected to be about Rs 233 crore and this target was attained Expenditure on the replacement and modernisation of plant and machinery in various industries in the private sector was, however, considerably lower than anticipated—about Rs 100 crore as against Rs 230 crore In all, new investment on industries (excluding investment on replacement and modernisation) amounted to about Rs 293 crore as against the projected outlay of Rs 327 crore The shortfall occurred mainly in the iron and steel, aluminium and machine tool industries The lag in investment by the private sector in petroleum refineries, aluminium and some other items was, however, offset by higher levels of investment than expected in electric power generation, cotton textiles sugar and paper industries In these industries, capa city targets were achieved and in some cases even exceeded

Targets of production as distinct from capacity, were more or less reached in the case of cotton textiles, sugar, vegetable oils, cement, paper, soda ash, caustic soda, rayon, electric transformers, bicycles, sewing machines and petroleum refining. The expected levels of production were not reached in the case of iron and steel, aluminium, machine tools, fertilisers, diesel engines and pumps, automobiles, radios, batteries, electric motors, electric lamps, electric fans, jute textiles, paints and varnishes, plywood super-phosphate, power alcohol and glass.

Appreciable diversification of production was achieved during the first Plan. Among the new products manufactured for the first time were: staple fibre and cellulose acetate filament, calcium carbide, hydrogen peroxide, rare earth compounds, caustic soda and ammonium chloride, penicillin, DDT, newsprint, carding engines, automatic looms, steel wire ropes, jute spinning frames, deep well turbine pumps and motors and transformers of higher ratings.

The industry-wise break-up of the total outlay of Rs. 293 crore on industrial expansion in the public and private sectors during the first Plan, compared to the original estimate of Rs. 327 crore, is shown below:

TABLE 172

(In rupees crores)

,	Estimate under First Plan	Investment actually incurred
Metallurgical industries (iron and steel, aluminium, lead, etc.) Petroleum refining Chemical industries (heavy chemicals and fertilisers, drugs and pharmaceuticals, dyestuffs and plastics) Engineering industries (heavy and light) Cotton textiles Sugar industry Rayon textiles (including staple fibre and chemical pulp) Cement Paper and paperboard including newsprint Electric power generation and distribution (in the private sector) Others	85.0 64.0 26.0 53.0 9.0 0.1 16.5 17.7 7.4 16.0 32.3	61.0 45.0 27.0 46.0 20.0* 5.0 8.0 17.5 12.0 32.6 18.9

Targets of capacity and production aimed at under the second Plan and the achievement at the end of the first Plan period are given in Table 183.

INDUSTRIAL PRODUCTION,

Industrial production during 1955 and 1956 and the index numbers of industrial production (base 1951=100) for the year 1956 and for the months of October 1956 and October 1957 are given in Table 173. For November 1957 the general index was 148.1 compared to 142.3 in November 1956.

Iron and Steel

The first modern steel plant in India was established by the late J.N. Tata, who set up the Tata Iron and Steel Works at Jamshedpur in 1907.

^{*}Overall outlay inclusive of minor expansions, replacements and modernisation, is estimated at Rs. 80 crores.

The two other important manufacturers of iron and steel in India were the Steel Corporation of Bengal and the Mysore Iron and Steel Works By 1939 the production of steel was over B lakh tons World War II gave an impetus to the industry By 1936 steel output rose to 13 16 lakh tons.

To meet the rap dly increasing demand for steel, the Government of the hand a two-fold policy. On the one hand it is helping the existing units to expand their capacity and on the other, it is setting up new steel plants on its own. The output of the Tata Iron and Sixel Company to be raised during the Second Plan period from 8 lakh tons (of

finished saleable steel) to 15. lakh tons (capital cost Rs. 84.9 erore); and that of the Indian Iron and Steel Company from 3 lakh tons to 8 lakh tons (capital cost Rs. 42.5 erore). The new steel plants in the public sector are discussed later under 'State-owned Industrial Undertakings'.

According to the 1953 Census of Manufacturing Industries, there were in that year 122 large and small iron and steel works in India, located mostly in Bombay, West Bengal, U.P., Bihar, Orissa, Punjab, Delhi, PEPSU, Saurashtra, Rajasthan, Madras and Assam. The most important of them were: the Tata Iron and Steel Company at Jamshedpur; the Indian Iron and Steel Company at Hirapur and Kulti, with which the Steel Corporation of Bengal at Burnpur was merged in 1952, and the Mysore Iron and Steel Works at Bhadravati.

The table below indicates the progress of the industry since 1916:

TABLE 174
PRODUCTION OF IRON AND STEEL

(In thousand tons)

Engineering

Since 1947, the Government has been trying to foster the growth of the engineering industry and India has become self-sufficient in a variety of articles such as electric motors, batteries for motor cars, ceiling fans, conduit pipes and metal sheets for utensils. Every year new units have been added and, in 1954, they belonged to 62 different categories.

In respect of products like ring spinning frames, electric winding wire, machine screws, duplicators, automobiles, sparking plugs, fuel injection equipment, electric house service meters, incandescent lamps, carding engines, small and hand tools, increases in production during 1955, as compared with 1954, ranged from 50 per cent to cent per cent. Among the products manufactured in India on a commercial scale for the first time during 1955 were: alternators, cycle dynamo lighting sets, complete typewriters, self-doffing jute sliver spinning frames, tea dryers, clinker coolers and clinker breakers, delivery valves and pump elements for fuel injection equipment, vertical multi-cylinder diesel engines, certain sizes of drilling machines, all-geared head bench lathes and hypodermic needles. A number of engineering and electrical industries recorded a marked rise in output during 1956, notable among them being radio receivers, electrical

motors desel engines, sewing machines and power transformers. The production of beyels and automobiles rose by 35 and 39 per cent, respectively. The manufacture of new items such as Lambretta scooters and scooterettes auto-nekshaws shock absorbers, radiators and brake linnings was undertaken during 1996.

Committees were set up for making recommendations for the improvement and stabilisation of the industries for the manufacture of machine tools, surgical appliances. A ray equipment and diesel road rollers. The Machine Tool Committee in its report submitted in September 1935, recommended a programme of manufacture for the existing units both in the public and private sectors. It emphassed the need for the creation of additional capacity particularly for the manufacture of heavy machine tools as well as special machine tools sheet metal machinery and wood working machinery. In pursuance of these recommendations, a Development Council for the machine tool industry was set up in January 1937.

Since 1934 the Government has devoted attention to the development of the automob le industry on a sound basis. Several programmes for the manufacture of improved automobile ancillaries have been formulated. Programmes have also been drawn up for the manufacture of jute mill machinery turret lathes windmills steam and diesel road rollers and agricultural tractors.

Chemicale

Since Independence, steady progress has been made in the development of the chemical industry. The establishment of the Sindri Factory in the public sector was a significant development in this direction. In the private sector (companies dealing with chemical industries came into existence during 1946-50. In 1951-131 stress were produced in the country. Among the products manufactured for the first time in India were sheet glass pencilin DDT. Chloromycetin glacial acetic acid and acetic administration of soil as the caustic soils aloud chlorine ammonium sul phate sulphuric acid and soap has risen considerably in recent years powder chlorine and salt increased whereas that of sulphuric acid, ammonium sulphate and matches went down slightly

Cotton Text les

The history of the cotton textile industry the premier industry of the country dates back to 1818 when the first cotton mull was established at Fort Gloster near Calcutta The real growth of the industry, however started with the setting up of the Bombay Spinning and Wea sing Mills in 1856. The grant of protection and the seededs in one ment enabled the industry to make rapid strides. The number of mills increased to 389 in 1939 with a loomage of 20 of 464. World War II brought a freish boom which persisted even after Independence. The production of cloth and yarn since 1947 is

In 1956, handloom production was about 15 090 lakh yards, production during 1957 was estimated at 16 000 lakh yards

According to the 1953 Census of Manufacturing Industries, Indushad 482 registered cotton multi-with a fixed capital of over Rs 83 crores and employing over 655 lakh workers. The Government is carrying out a

TABLE 175

1957*	••	••		18,930	53,409

survey of the textile industry in order to elicit the requirements of the mill industry for equipment and machinery. The assistance of the National Industrial Development Corporation to the industry is based on these data.

Fute

As the biggest earner of foreign exchange for India, the jute industry occupies an important place in the country's economy. Besides employing about 3 lakh workers, it provides work for a large number of intermediaries. Partition of India in 1947 deprived it of vital raw material and at the same time it had to face an increasing competition from the manufacturers of jute goods in Europe and Pakistan. According to the 1953 Census of Manufacturing Industries, there were 109 jute mills in India with an aggregate output valued at Rs. 113 crore.

The following table shows the production of jute goods since 1950.

TABLE 176
PRODUCTION OF JUTE MANUFACTURES

(In thousand tons)

	Production					
1950 1951 1952 1953 1954 1955 1956	••				•••	835 875 952 869 928 1,027 1,093

A drawback of the industry has been its obsolete machinery. To encourage modernisation, licences for the import of modern machinery have been liberally granted to the jute mills and a start has been made in the manufacture of jute mill machinery in the country. Loans are also being offered to the industry through the National Industrial Development Corporation for the modernisation of machinery and equipment. A number of mills have already completed the process of modernisation which aims at reducing production costs.

^{*} Estimate.

^{**} The figures relate to the period July-June, which is the jute year.

Cemert

The following table shows the production of cement since 1950-51.

TABLE 177

PRODUCTION OF CEMENT

Year					Production	
						(In thousand tons)
1950-51			••		\	2,602
1951-52						3,281
1952 53					1	3,510
1953-54					. 1	4,028
1954-55			••			4 418
1955-56						4,600
1956-57						4,991

Cement production almost reached the target (48 lakh tons) fixed for the first Plan In 1956, the output was 49 28 lakh tons In order to meet the increasing internal demand, arrangements were made for larger imports Output during 1957 is estimated at 56 lakh tons.

Paper

The production of machine-made paper in India dates back to 1870, when the Bally Mill was established new Calcutat. During World War I, the number of mills increased to 15 and actual production reached the peak figure of 1,04,000 tons. Since 19.0, rapid progress has been made by the industry and the gap between the installed capacity and production has become very narrow. Production rose to 1,92,000 tons in 19.56.

The first newsprint mill in India went into production in January 1955 It has an installed capacity of 30,000 tons, while the present internal demand is 70,000 tons a year. Output in 1956-57 amounted to 13,534 tons

Oil Production and Refining

The country's oil resources are still poorly developed, about 66 likh tons out of a total 70 likh ton of her annual requirements being met from imports. The only producing oil field is in Assam, around Digbot. Oil has, however, been found in the neighbouring region of Naharkstup and Moran and a number of wells have been drilled. The latter are expected to prode 25 likh tons of crude oil annually rung to 45 to 50 lakh tons when full production is established. When this materialises, about 40 per cent of the country's requirements of the next few years may be met.

Under this programme, test drilling is in progress at Justianukhl in Punjab, directly under the auspices of the Commission, and in the West Bengal basin where the Standard Vacuum Oil Company is executing the work with financial participation by the Government. Geological and geophysical surveys are being carried out in Punjab, Rajasthan, Bombay, West Bengal, Utter Pradesh and Assim The search for oil is being carried out with assistance from certain foreign countries.

At the commencement of the first Plan, practically the entire demand of the country for petroleum products was met by imports, as the output of the Assam Oil Company's refinery at Digbot was a little more than 5 per cent of the total requirements. The establishment of three refineries was accepted as part of the first Plan. Two of these have been set up at Trombay (near Bombay) by the Standard Vacuum Oil Company of New York and the Burmah Shell Group of London respectively, and the third by the Caltex Company at Visakhapatnam. The annual production capacity of all the refineries by the end of 1957 was expected to be about 43 lakh tons in terms of crude processed petroleum.

The first coal companies were established in Bengal and Bihar in the middle of the 19th century. The production of coal showed a great improvement after 1927. After World War II, it rose steadily from 300 lakh tons in 1948 to the record figure of 394 lakh tons in 1956 as shown in table below.

TABLE 178 PRODUCTION OF COAL

, ,	Year	•			Production (In lakh tons)
1947 1950 1951 1952 1953 1954 1955 1956	 		<i>j</i> :	::	300.0 319.9 342.1 362.3 358.4 367.7 382.1 394.3

The target for coal output at the end of the second Plan is 600 lakh tons; of the additional output of 220 lakh tons, 100 lakh tons will be in the private sector.

Other Minerals

Mineral output in 1956 valued at Rs. 125.5 erore accounted for 1.2 per cent of the net national income of India. Bihar headed the States with an output of minerals valued at Rs. 40 crore, West Bengal and Madhya Pradesh coming next. The quantity index stood at 116.5 (base 1951=100) compared with 112.6 in 1955. Table 179 overleaf shows the output and value of different minerals in 1955 and 1956.

STATE-OWNED INDUSTRIAL UNDERTAKINGS

In accordance with its industrial policy, the Government has established several new industries which are of national importance and beyond the resources of private enterprise.

Sindri Fertiliser Factory

The Sindri Fertiliser Factory, built by the state at a cost of about Rs. 28 crore, is under the management of the Sindri Fertilisers and Chemicals (Private) Ltd. It went into production in 1951. In 1956-57, it produced 3,33,705 tons of ammonium sulphate, thus exceeding the target for that

year. A scheme to rame the output by about 60 per cent by othising more gas from the Coke Oven Plant is now under way. The project is expected to be completed in 1958 and will result in the production of 70 tons of urea and 400 tons of ammonium sulphate nutrate (double salt) per day

Other Feet user Projects

In order to meet the antecpated demand for introgenous fertilisers in country units are to be set up at Nangal Ney-ch and Rourkels with annual production capacities of 70 000 tons 70 000 tons and 1,20 000 tons, respectively. The Lettery at Nangal will be an integrated unit for the production of 20 0000 tons of ammonium intrate fertiliser per annum and heavy water for the use of the Department of Atomic Energy. It is expected to a nito production in 1960.

Hinduston Cables

To meet the requirements of the Posts and Telegraphs Department for telephone cables the Hudustan Cables Factory, established at Rupnarampur, West Bengal began production in 1994. It has already exceeded its planned annual capacity of 470 miles and manufactured 610 miles of cables in 1985. The factory is being expanded to produce 1 000 miles of cables a year. It is also proposed to manufacture on axial trunk telephone cables during the second Plan period. The additional plant will produce about 300 miles of caxaxia cables annually, from 1999 onwards.

Hindustan Mach se Tools

The first batch of predominantly Indian lather were produced in the factory in May 1905 and the factory is more producing 25 lather per mount The Company is also taking up the production of other machine tools such as milling mach nes redaid drills and grading machines as part of a programme to diversify production. The aim is to produce, by 1960-61 805, mach nes per annum

Hindustan Shipyard

The Visakhapatnam Shpyard was acquired by the Government from the Sendri Steamship Navigation Company in March 1952. The management was entrusted to the Hindustan Shpyard Ltd., with two-thirds of the capital owned by the Government and the remainder by the Sendras The Shipyard can build four modern discal propelled ships a 1 car.

So far 19 sea-going ships of various types and sizes have been built here. During the second Plan period 75 000 to 90 000 tons GRT see proposed to be produced (at an investment of Rs. 98 cores) against 50 000 GRT during the first Plan period (at an investment of Rs. 6 crore)

DDT Factory

The Government of India has set up a DDT factory in Delia with the assistance of UNIGEF and WHO (now UNITA)). The factory, which is managed by the Hindiusta Intechectae (Irvanic) Ltd (authorized capital Rs 1 crose) commenced production in April 1935 and produced 623 tens of technical DDT and 647 tons of formulated DDT during 1937. Doublings of the capacity was expected by March 1938 A second DDT factory (capital cost Rs 79 labb) is being evil at Always on Kerala State (capacity Holl tons technical DDT).

Hindustan Antibiotics

To meet the increasing demand for penicillin in the country, the Government set up a factory at Pimpri near Poona with the help of UNICEF and WHO (now UNTAA). Production began in August 1955. The management of the factory vests in the Hindustan Antibiotics, Ltd., a State enterprise, with an authorised capital of Rs. 4 crores.

During 1956, a rate of production of 141 lakh mega units of penicillin a year was achieved. Efforts are being made to manufacture bicillin and streptomycin. Twenty per cent of the production capacity of the factory will be devoted to bicillin. In 1957 production amounted to 236 lakh mega units. The capacity of the present plant' will be expanded by 60-per cent and annual production will rise to 260 to 280 lakh mega units by 1959.

National Instruments Factory

The history of the National Instruments Factory dates back to 1830. During World War II, it was converted into a full-fledged instruments factory. It produces 250 types of scientific and precision instruments, including hydrometers, measuring cylinders, barometers and monometers. It also produces students' microscopes, demonstration eye-pieces, Portion's barometers, drafting machines, profile projections, tank periscopes and travelling microscopes. The factory is shortly to undertake the production of optical and ophthalmic glass, as part of a programme to produce 50 tons of optical glass and 250 tons of ophthalmic glass annually. In June 1957 the Factory was converted into a private limited company.

Hindustan Aircraft

In December 1940, the Hindustan Aircraft Ltd., a joint stock company, was established at Bangalore with an authorised capital of Rs. 4 crore. The total subscribed capital of the company in March 1951 was Rs. 3.8 crore. The Government held shares worth Rs. 3.2 crore.

In addition to the repair and maintenance of I.A.F. aircraft, the company has undertaken the assembly and manufacture of Vampire jet aircraft for the I.A.F. It also builds a trainer aircraft known as H.T.2, and manufactures all-steel rail coaches for the Indian railways and bus bodies for various State and private transport authorities.

Chittaranjan Locomotive Works

As part of a plan to achieve self-sufficiency in locomotives, the Government has established a locomotive factory at Chittaranjan in West Bengal. It functions under the Ministry of Railways. Originally designed to produce 120 locomotives and 50 spare boilers a years, the factory has been expanded and it is now producing at the rate of 168 W.G. type locomotives a year which is the equivalent of over 200 standard-type locomotives. Eventually, the aim is to manufacture 300 standard-size locomotives a year.

Integral Coach Factory

The Integral Coach Factory at Perambur went into production in October 1955. From 1959, 350 coaches are to be manufactured annually.

Nahan Foundry

The Nahan Foundry, Ltd, was inaugurated in October 1932, and the Government transferred the control of the Nahan Foundry (originally established in 1872 as a private organisation) to the company in January 1933. It is now managed by a board of directors appointed by the President, who holds all shares.

The foundry manufactures agricultural implements such as carecrushers, etc. Owing to competition from private enterprise, the production of cane crushers was curtailed after 1932 53 and the manufacture of east ron anchor plates and certain non ferrous articles for the railways and east iron saddles for the Posts and Telegraphs Department was taken up instead

New Undertakings

The second Plan envisages the construction in the public sector of three steel plants each of 10 lakh tons ingot capacity and the provision of facilities in one of these for the production of 450,000 tons of foundry grade pig tron. The plant at Rourkela is expected to cost about Rs 128 crore during 1956-61 and to produce 720 000 tons of steel products per annum. The second plant at Bhilai in Madhya Pradesh, estimated to cost about Rs 110 crore is expected to provide 770 000 tons of salable steel, heavy and medium products including 140,000 tons of billets for the re-rolling industry The third plant at Durgapur in West Bengal is expected to cost about Rs 115 crore* and to produce light and medium sections of steel and billets amounting to 790 000 tons per annum Provision has also been made for the expansion of steel production by the Mysore Iron and Steel Works to 100 000 tons by 1960-61 On completion of these projects the annual value of the output of steel in the public sector will amount to about Rs 120 crore as against the figure of about Rs 1 crore at present Further, an exportable surplus of about 300 000 tons of steel may be available. The second Plan provides Rs 350 crore for the three steel projects of the Central Government and Rs 6 crores for the expansion of the Mysore Iron and Steel Works A total production of about 20 lakh tons of finished steel is expected in 1960 61 from plants in the public sector. The management of all the three steel projects now vests in the Hindustan Steel (Private) Ltd (originally set up in 1953 to implement the Rourkela project), now wholly owned by the Central Government (authorised capital Rs 300 crore)

The development programme of the Chittarmyan Locomotive Factory envisages the establishment of a heavy steel founds, so that the requirements of heavy castings for the trailways may be excused introly from within the country. The heavy machinery industries provided in the public sector of the second Plan are manufacture of electrical equipment (Rs 20 crore and Rs 25 crore for completion), expansion of Hindustan Machine Tools (Rs 2 crore), and manufacture of industrial machinery and machine tools (NIDC Rs 10 crore).

For the manufacture of heavy electrical equipment, a Comultant's Agreement was reached with a U.K. firm. The plant will be located at Bhopal. Total investment in about 7 to 8 years as estimated at 8s. 25 erors and eventually to go up to 8s. 45 core. Certain sections of the plant are expected to go into production by 1960. While heavy transformers industrial motors, traction motors and switch gears are likely to be

^{*} Esumated cost of plant only

produced before the end of the second Plan, more basic items of equipment like hydraulic turbines and generators, and generators for diesel sets will be produced in the early years of the third Plan.

The production of heavy industrial machinery will be specially fostered by the National Industrial Development Corporation (set up in October 1954 as a Government-owned private limited company), for which Rs. 15 crore have been earmarked. With such a basis for development, which heavy foundries, forges and structural shops will provide, satisfactory progress is likely during the second Plan in the production of industrial machinery. An agreement was reached in 1957 with the Government of USSR for assistance in establishing a heavy machine-building plant, a coal mining machinery plant and an optical glass factory in India.

Having regard to the paucity of coal deposits in South India, high priority has been given to the development of the multi-purpose South Arcot Lignite Project at Neyveli, involving a total investment of Rs. 68.8 crore (Rs. 52 crore during the second Plan period). The development programme envisages the mining of 35 lakh tons per annum of lignite which is to be used for (i) generation of power, (ii) production of carbonised briquettes, and (iii) production of fixed nitrogen.

The implementation of the Rourkela Fertiliser Factory, the metre-gauge coach factory, the Neyveli Fertiliser Factory, and the aluminium plant included under the NIDC will now depend on the extent of foreign aid that may become available.

The programme of development under the second Plan in the public sector of industry in terms of investment, capacity and estimated production is shown in Table 180.

DEVELOPMENT UNDER SECOND PLAN

New investment in the organised industries during the second Plan will amount to Rs 1,094 crore, Rs. 524 crore in the public sector (besides Rs. 35 crore to be invested by the National Industrial Development Corporation) and Rs. 535 crore in the public sector. The proposed outlay in the private sector is mainly accounted for by iron and steel (Rs. 350 crore), fertilisers (Rs. 37 crore*), the heavy electrical plant (Rs. 20 crore), besides the South Arcot Lignite Project (Rs. 52 crore) and the expansion of the Hindustan Shipyard (Rs. 9.8 crore). The programme of the National Industrial Development Corporation provides for assistance to the cotton and jute textile industries in modernisation and also includes projects for heavy foundries and forge-shops, structural fabrication, refractories, chemical pulp for rayon and newsprint and intermediates for dyestuffs and drugs. The NIDC will also foster the establishment of a new unit for aluminium and the manufacture of heavy machinery and equipment for earth moving, mining etc., and also of rollers and rolling equipment required in ferrous and non-ferrous industries. A list of the industrial projects in the public sector (Central Government) is shown in Table 180.

While the main emphasis during the first Plan period was on fuller utilisation of existing capacity, the main emphasis in the second Plan is on

^{*} This is exclusive of expenditure on the fertiliser plant under the South Arcot Lignite Project and on capacity for by-product ammonium sulphate in connection with the new steel plants.

the expansion of capital and producer goods industries with a view to firmly laying the foundations of industrial progress

The following order of priorities has been laid down in the industrial field

- (i) increased production of iron and steel and of heavy chemicals, including nitrogenous fertilisers, and development of the heavy engineering and machine building industries,
- (u) expansion of capacity in respect of other developmental commodities and producer goods such as aluminium, cerrent, chemical pulp, dyestuffs and phosphatic fertilisers, and of essential drugs,
- (iii) modernisation and re-equipment of important national industries such as jute and cotton textiles and sugar:
- (10) fuller utilisation of the existing installed capacity in industries where there are wide gaps between capacity and production,
- (v) expansion of capacity for consumer goods, keeping in view the requirements of common production programmes and the production targets for the decentralised sector of industry.

The industry-wise break-up of the total outlay of Rs 1,094 crore in the public and private sectors during the second Plan is shown below. As much as 459 per cent and 137 per cent of the total investment is accounted for by the metallurgical and engineering (heavy and light) industries, respectively

TABLE 181
INDUSTRY-WISE BREAK UP OF TOTAL OUTLAY

	Amount (In crores of supees)	Percentage of total investment
Metallurgical industries Engineering industries Engineering industries Comnet electure percelain and refractiones Petroleum refining Paper, newsprint and security paper Sugar Sugar Rayon and teaple fibre Others	150 0 132 0 93 0 10 0 54 0 51 0 36 3	45 9 13 7 12 0 8 5 0 9 4 7 3 2 2 2 3 8

Percentage increases in capacity and production during the second Plan for (i) representative capital and producer goods industries and (ii) a number of important consumer goods industries, are shown below in Table 182.

The proposed percentage increases in both capacity and production in the case of capital and producer goods industries are relatively high. An appreciable increase in the production of some consumer goods industries

Includes an investment of Rs. 29 0 crore in respect of mining and power generation under the South Arcot Lignite Project.

is expected, although expansion of capacity is considered necessary only on a modest scale. In the case of a few industries including cotton textiles, tanning and leather footwear, soap, vegetable oils and matches, limitations have been imposed on the expansion of the organised sector in the interest of the cottage and small-scale units. The existing capacity in the organised sector of these industries, supplemented by what the decentralised sector may be reasonably expected to produce, will be adequate to meet all fore-secable demands. It is also proposed that most of the targets other than those for heavy industries like iron and steel have to be kept under constant review and must not be treated as fixed and immutable.

Table 183 shows for 46 categories of industries, installed capacity and production in 1955-56 and the targets set under the second Plan.

PLANTATION INDUSTRIES

Tea, collee and rubber plantations cover less than 0.4 per cent of the cropped area and are concentrated mainly in the north-east and along the south west coast. They provide employment for over 12 lakin persons and India earns a large amount of foreign exchange from their exports, tea alone accounting for over Rs 100 crore. Coffee and rubber, which used to be important export commodutes, are now largely consumed within the country. The cropped area and the production of each of the three pluntation industries in recent years are given in the table below

TABLE 181
PLANTATION INDUSTRIES

) car	Area under cultivation (thousand acres)	Production (thousand lb)

⁽a) According to the Tea Board (b) In terms of cured coffee

In 1934 Rs. 113 crore were invested in the tea industry which employed 9,39594 persons (including 64,371 temporarily employed). There were in 1935 1,1990 coffee estate employing 1,75,012 persons (including 55,008 temporarily employed) and 14,378 rubber estate which employed 48 332 persons (including 13,537 temporarily employed).

Plantation Inquiry Commission

The Plantation Inquiry Commission was appointed by the Government of India in April 1954 to conduct a comprehensive inquiry into the economic conditions and problems of the tea, coffee and rubber industries. In its report on the tea industry, submitted in August 1956, the Commission suggested: (i) the creation of a Tea Replanting Fund to be used for the purpose of replanting tea bushes, to which each grower should contribute Rs. 50 per acre every year; and (ii) the drawing up by the Tea Board of a programme of phased replanting of tea bushes as well as replacement and renewal of machinery and equipment. The report estimates that tea production in the country may rise to 7,100 lakh lb. per year by the end of the second Plan, representing an increase of about 4.55 lakh lb. over the present level of production.

In July 1957, Government announced acceptance of certain recommendations of the Commission and rejection of certain others; decision on a few other recommendations is still pending. The Government rejected the plea for abolishing the managing agency system in Indianowned tea gardens and for prohibiting withdrawals from reserve funds for declaring dividends. The Government has accepted (i) that the Tea Board should inquire periodically into the retail price structure of tea with a view to preventing unduly high prices; (ii) that special investigations should be held into the difficulties of small packaging firms; (iii) that an enquiry will be held into the conditions of the heavily indebted estates and economically weak gardens, mostly held by Indians; (iv) that co-operative efforts among tea growers should be promoted and voluntary amalgamation of small gardens encouraged; (v) that the Industrial Finance Corporation and the State Financial Corporations should provide longterm finance to the tea industry while the State Bank of India should look after the need of working capital.

The main recommendations of the Commission in respect of coffee are: (i) the creation of a Replanting Fund to which every estate of 25 acres and above should contribute a fixed sum; (ii) the regulation of area under coffee according to the needs of production; (iii) the fixation by an independent expert body of the price to be paid to the producer; (iv) the handling of export trade in coffee directly by the Coffee Board; (v) rational distribution of profit; and (vi) the adjustment of excise duty on different types of coffee according to their market value.

For the rubber industry, the Plantation Enquiry Commission recommended that (i) 1.2 lakh acres of land should be brought under high-yielding rubber by 1965 to meet the increasing internal demand; (ii) the target of replanting 70,000 acres, for which a scheme was already sanctioned by the Government of India, should be reached within seven years; (iii) an area of 50,000 acres should be set apart for planting with high-yielding trees. The Commission also suggested that out of the 70,000 acres for replanting, half should be earmarked for small growers holding 50 acres and less each and the other half for estates of over 50 acres. The area of 50,000 acres for new planting should also be distributed likewise.

SMALL-SCALE AND COTTAGE INDUSTRIES

Although there has been considerable development of large-scale industries, India remains mainly a country of small-scale production. It is estimated that there are about 2 crore persons engaged in cottage industries. The handloom industry alone employs 50 lakh people or nearly as

many as are employed in all other organised industries, including largescale industries, mines and plantations.

The work of organising these small industries is primarily the responsibility of the State Government. To supplement their effort, the Central Government has set up six organisations, namely, (i) the All-India Khad and Village Industries Commission; (ii) the All-India Handicrafts Board; (iii) the All-India Handicrafts Board; (iii) the All-India Handicrafts Board; (iv) the Sall-scale Industries Board; (iv) the Cur Board, and (iv) the Sulk Board.

Funncial assistance to small industries is given both by the Government and banking institutions. Recently, measures were taken to make this assistance more effective. During 1957-58 loans to the extent of Rs 3.5 crore and grants to tabling Rs 1.1 crore were sanctioned to State Governments for the development of the small-scale industries. Sanction has been given so far for the establishment of 55 industrial estates, of which 11 have started functioning. The critic cost of starting these estates is advanced as loans by the Centre to the State Governments. The Plan ceiling for industrial estates has been increased from Rs. 10 crore to Rs. 15 crore.

The programme of technical assistance to small-industries has been undertaken directly by the Central Government. Four regional institutes at Bombay, Calcutta, Delha and Madras have already started functioning Five major institutes at Trivandrum, Hyderabad, Patna, Rajkot and Ludhana as well as 7 branch institutes at Bangalore, Hubli, Indore, Cuttack, Gauhati, Agra and Allahabad, were set up during 1956-57. Experts are also brought in from abroad to help these industries in technical matters and Indian technicians sent for training abroad, both with assistance from the Ford Foundation.

Another significant development was the establishment of the National Small Industries Corporation in February 1955. Its Contract Division has established lasson with Government purchase departments and has evolved a workable arrangement for giving contract to small units Central Government purchases of cottage and small-scale industries products in 1955-56 amounted to Rs. 3°4 crore. The Corporation has introduced a scheme for hire purchase of machinery and equipment needed by small timus; machinery worth Rs. 42 lakh have already been delivered under this scheme.

For the development of small industries, the Community Projects Administration has appointed block level industrial officers in a number of Community Projects and National Extension Service blocks. An intensive development programme has been introduced in 26 selected areas

Special attention has been paid to the marketing of handicrafts both in India and ahroad. Mobile exhibition units have been sent round the country and funds allocated for the exhibition of metalware, bambooware, tet. Handicrafts Weeks have been celebrated in several States. Plans have now drawn up for the building of a museum of handicrafts in

Central expenditure on the development of village and small industries incurred through the various Boards during the first Plan period is given in Table 185

Thads Industry

Financial assistance to the Khadi industry is given by the All India Khadi and Village Industries Commiss on through co-operatives, registered societies and where they exist, the Boards set up by the State Governments. To encourage the production of Khadi, a subsidy of three annua in a rupee is allowed to the consumer, while a subsidy of five annua per square yard is given to those who produce Khadi for their own use and of x annua a rupee to centree regisged in the production and sale of Khadi.

These measures have led to a significant improvement in the production and sale of Khadi, as the following figures will indicate

TABLE 187

(In lakks of ruters)

1955-56	478	426
1956-57*	433	477

Ambar Charkha

A decision was recently taken to introduce an improved type of spin ing unit called Ambar Charkha. This has 4 spindles and enables a spin ner to produce about 6 hanks a day in 8 working hour. The Kare Committee on Village and Small scale Industries (19.5) recommended that the additional requirements of cloth during the period of the second Plan should be met from the decentralised sector. Some 3000 lakh yards of cloth are to be produced by the handlooms from hand spin. Ambar yarn

The Ambar Charkha Enquiry Committee, appointed by the Government in March 1936 came to the conclusion that the Ambar Charkha could be recommended as a most similable spinning unit. The Government accordingly sanctioned the introduction of 75 000 Ambar charkhas during 1936-57, involving about Rs 4 crore as grants and loans. Up to the mid die of March 1937, nearly 72 000 Ambar charkhas were manufactured, 56 lakh lbs of 3am was spun, and 148 lakh sty yards of cloth was word.

The main purpose of decentralized symming on an extrasive scale is to provide the requirements of handlooms which are otherwise sompletely dependent upon mill yarn and also to offer interest of the state of the st

^{*}Up to February 1957

ASSISTANCE TO SMALL INDUSTRIES

THE NATIONAL SMALL INDUSTRIES CORPORATION was set up by the Government of India to provide assistance to small industrial units in the country so as to improve their production, quantitatively and qualitatively, and to create conditions conducive to their planned and healthy development.

Five separate Divisions of the Corporation are executing five specific tasks, one each.

- THE GOVERNMENT PURCHASE DIVISION is helping small units in getting contracts from Government Purchasing Agencies besides encouraging their establishment as ancillaries to large industrial units.
- THE HIRE PURCHASE DIVISION supplies industrial machinery and machine tools for the production of consumer goods and spareparts on Hire-Purchase basis.
- THE MARKETING DIVISION assists in the marketing of small industry products by retailing, publicising and conducting research through mobile sales vans, and encouraging their standardisation by opening wholesaling depots in centres of particular industries and marketing them under the Corporation's quality mark "JANSEVAK".
- THE INDUSTRIAL ESTATES DIVISION has been entrusted by the Government to construct two Industrial Estates at Okhla (Delhi) and Naini (Allahabad). The estate will provide factory-accommodation equipped with modern amenities at very low rent to small industries. The first phase of the estates has been constructed and the Okhla Estate has since been formly inaugurated by the Prime Minister.
- THE PROJECTS DIVISION. The Corporation has been entrusted the responsibility of implementing the scheme for setting up and running two proto-type production-cum-training centres at Delhi and Rajkot. The centres are being set up in collaboration with the West German Government and the U.S. Technical Co-operation Mission respectively. They will produce proto-types of machines and machine tools for commercial exploitation by small manufacturers as also impart training to skilled personnel for manning small scale industries.

Partners in the Plans for Prosperity!

For over a quarter of a century the Walchand Group Industries have been creditably serving India in National projects and in private industrial undertakings. In planning and construction, the Walchand Group exercise a thoroughness and perfection entirely their own... qualities that have won them the confidence of the Nation. And again today, the Walchand Group are partners in the gigantic plans for prosperity, contributing their best to the country's sweeping industrial progress!

CHAPTER XXV

TRADE

EXTERNAL TRADE

The total value of India's foreign trade (imports and exports including receptors) during 1935 56 amounted to 81,314 erore—amports R. 500 erore. The corresponding (provisional) figures for 1935 57 were as follows total trade Rs. 1,440 erore, imports Rs. 840 erore and export Rs. 600 erore. The value of India's imports, exports and the total value of her foreign trade since 1951.52 are given below.

Balance of Payments

The following table shows the current balance of payments position during 1955-56 and 1956-57, after taking into account net invisible receipts and official donations.*

TABLE 190
CURRENT BALANCE OF PAYMENTS

(In stores of supees)

		
	1955-56	1956-57

The surplus of about Rs. 17 crore during 1955-56 developed into a deficit of Rs. 292.5 crore in 1956-57, mainly due to a rise in imports. The pressure on balance of payments continued during the first half of 1957-58. The following table shows the current balance of payments position and the manner in which the deficit was financed.

TABLE 191

	292.5	297.7

Imports During 1956-57

Imports in 1956-57 at Rs. 1,076.5 crore showed an increase of Rs. 326 crore over the previous year. This high level of imports may be attributed to (i) an unexpectedly high tempo of industrial activity in the private sector coinciding with large-scale import demands in the public sector, (ii) some under-estimation in the import content of the Plan, particularly in regard to iron and steel, (iii) larger imports of foodgrains, and (iv) the cumulative effects of successive liberalisation of import policy in the past.

^{*}The figures for imports and exports in this and the following sections are based on Exchange Control records and are not comparable with those given by the Department of Commercial Intelligence and Statistics in The Accounts Relating to the Foreign (Sea, Air and I and) Trade of India. For an explanation of the differences, please see 1. d'a's Balance of Payments 1948-49—1955-56, (Reserve Bank of Iridia, Bombay), pp. 7 and 27-28.

Of the total increase of Rs 326 crore, the share of the private sector was Rs 184 crore A considerable part of the increase of Rs 142 crore on Government account can be attributed to the higher expenditure on food grains. Of the estimated total of Rs 10? crore worth of foodgrains and imports under Indo-American Technical Co-operation Agreement amounted to Rs 10 crore, shipments of foodgrains under P L. 480 in the second half of 190-6-73 amounted to Rs 33 crore

The increase in imports during 1956 57 was mainly on account of the larger volume the rise in the import prices being comparatively small. The largestephasion [Rs 127 crore) occurred in the capital goods category Imports of machinery and vehicles went up by Rs 53 crore, those of iron and steel by Rs 61 crore and other metals by Rs 13 crore

Cons dering the quickened tempo of industrial activity, imports of raw materials vert more or less stable the increase in some stems offsetting the decline in others. Payments for oils rose from Rs 674 crore in the previous year to Rs 80 2 crore in 193-657, while imports of raw jute dropped from Rs 18 4 crore to Rs 78 crore. Increases were recorded under consumer goods stems like cutlery and hardware, electrical goods, woollen yarns and minufactures rayon textiles and so on. On the whole, the increase in imports of consumer goods was of the order of Rs 25 30 crore.

Exports During 1956-57

Export proceeds in 1956-57 totalling Rs 637 crore were 8 per cent higher than the estimated average of Rs 593 crore for the second Plan period With export prices higher than those prevailing in 1955-56, particularly for raw materials, the decline arose mostly from reduced quantity

The fall in the earnings from exports was particularly marked in cotton raw and waste (Rs 22 crore) and vegetable oils (Rs 18 crore), the former was due to the delay in the announcement of export quotas at also to a reduction in quotas consequent on the increased utilisation by the mills while the latter was due to the ban placed on the export of certain oils like groundout oil to conserve supplies for domestic consumption Exports of cotton excutes fell by Rs 6 crore to Rs 80 2 crore Exports of tea rose by Rs 38 7 crore to the record high level of Rs 149 3 crore. The increase was entirely due to an increase in volume following the sharp spirit in demand for stock plung purposes which resulted from the closure of the Suce Canal

Imports on Government Account

In the increase in imports that has taken place recently, the share of imports has been going up. The following table shows the particulars about Government imports since 1955-56

TABLE 192 IMPORTS ON GOVERNMENT ACCOUNT

TRADE POLICY

During the second half of 1956, the import of certain items such as ball bearings, small tools and garage tools was further liberalised, while increased quotas were provided for certain raw materials. Quotas were reduced for 73 items and 31 items were removed from the Liberal Licensing List.

A rapid depletion of foreign exchange reserves, brought about largely by heavy imports of machinery and iron and steel, made it necessary to adopt a more restrictive import policy for the first half of 1957. Quotas were cut down for 509 items, which included a number of consumer goods, machinery and raw materials. The system of liberal licensing was withdrawn, so also the facilities given to newcomers. On the other hand, the facilities provided to importers under the Export Promotion Scheme such as grant of special licences to exporters to replace the import content of their products, and concessions granted to holders of soft currency licences for utilisation, up to specified limits, of their licences for imports from hard currency countries were liberalised considerably. A policy for the import of capital goods under deferred payment arrangements was also formulated in March 1957.

As the decline in the foreign assets of the Reserve Bank persisted (they stood at Rs. 358 crore, exclusive of receipts from IMF, at the end of June 1957 as compared to Rs. 530 crore at the end of December 1956), (i) it was decided not to renew the Open General Licences expiring on June 30, 1957—except for imports of poultry, fish vegetables, etc., from Pakistan, and (ii) a temporary ban was imposed on the issue of fresh licences to established importers during July-September, 1957, subject to certain conditions. Established importers could, for example, have their outstanding licences converted from a less essential item to a relatively more essential one.

The licensing policy for the period October-March 1957-58 involved a relaxation of some of the rigorous restrictions imposed since July. Thus, the ban of fresh licensing to established importers was removed. However, quotas for most items of consumer goods were reduced drastically and imports of some of these such as tobacco manufactures, woollen fabrics, cycles, watches, fountain pens, crockery including glassware and cultery including blades were totally banned. Though the quota for drugs and medicines was cut down, established importers were required to make the greater part of their imports "in bulk" so that adequate quantities could still be imported within the lower cost ceiling.

The effect of the intensification of import restrictions in the first half of 1957 was seen in the sharp fall of Rs. 207 crore in the value* of total import licences issued. The rate of import licensing slumped further in July-September, when it was running at a six-monthly rate of Rs. 263 crore only.

Export Promotion

To stimulate exports, Government has established Export Promotion Councils for different commodities including cotton textiles, silk and rayon textiles, plastics, engineering goods, cashewnut, pepper, tobacco, leather and leather goods, shellac and mica. Other measures to encourage ex-

^{*}Quantity licences issued for imports of raw jute are excluded from the values of import licences here.

ports included (t) extension of free licensing to all varieties of cotion peegoods up to June 30 1957 (ii) abolition of export duty on coarse cloth and inseed oil (iii) modification with effect from February 1, 1957, of the procedure for obtaining refund of exe seduty on exports and (iv) announcement of an export quota of 1 lakh tons for sugar However, export of commodities in short supply or commodities considered to be essential for in diagnous industries continued to be restricted

The Cotton Textile Promotion Council sent a delagation in 1955 to Burma Thailand Singapore, Malaya Indonesia and Ceylon to study mar ket condit ons in those countries The Council has all o opened a network of branch offices in South West Asia Africa and South East Asia to premote the export of cotton textiles The silk and Rayon Export Premotion Coun cil has obtained market reports and samples of silk and rayon piecegoods from foreign countries and circulated them among representatives of trade and industry The Engineering Export Promotion Council sent a team of experts to Burma in January 1956 to explore the market for engineering goods The delegation reported that India must improve the quality of its manufactures and reduce prices in order successfully to compete in this field Two other delegations were sent to the East African and West Asian countries In May 1956 the Tobacco Council sent a delegation to West As an and African countries European countries were visited by a delegation sponsored by the Cashew and Pepper Council The Silk and Rayon Coun cil and the Plastic Council sent out delegations to West Asia and East Africa in October 1956 and March 1957 respectively The Development Councils for the various industries are also being pressed into service for purposes of export promotion India has also been participating in international fairs.

To promote exports a scheme was introduced for the grant of draw backs on customs duty on imported goods used for the manufacture of articles for export. The procedure for the refund of excise duties on certain exportable commodities has been sought to be simplified. To ensure quality control compulsory grading before export has been introduced under the Agricultural Produce (Grading and Marketing Act) in respect of certain agricultural commod ties such as tobacco some hemp, raw wood and bridde lemon grass oil and sandalwood oil. Special rail and shipping facilities are also provided for the movement of export commodities.

In January 1956 an expert committee was appointed to draft an experient guarantee scheme stunble for Indian conditions. Following the recommendation of this Committee a wholly State-owned Export Ruis Insurance Corporation with an authorised capital of Re 5 crore was viru in July 1937. To coordinate all work relating to the development of India's force for trade particularly promotion of export a Foreign Trade Daard and a Directorate of Export Promot on (as the Board's executive Signey) in the matter of export promotion) were created in June 1957.

In February 1957, an Export Promotion Committee was appointed to make a comprehensive study of all aspects of export promotion. In it final report submitted to the Government in August 1957 the Committee laid down the following estential prerequisites of policy (i) a sustained in crease in production in all sectors particularly agriculture, (ii) mintenance of prices at competitive levels (iii) that export should be encouraged evant the cost of domestic consumption, (iv) diversification of exports and of export markets and (v) research into new uses for the traditional export commodities and adaptation of internal production to such new him. With

appropriate steps taken, the Committee thinks, India's exports could be increased substantially to Rs. 700 to Rs. 750 crore a year immediately as against the target of Rs. 615 crore at the end of the second Plan. In order to provide incentives for exports, the Committee recommended that export duties should not only be kept low but should not be changed too often and that goods for export should be given refund at a flat rate of excise duty and sales tax. The other important recommendations included the following: canalisation of exports through single agencies, private or public, in certain cases; encouraging the entrepot trade of India; provision of better export credit facilities by the Reserve Bank and the State Bank of India through commercial banks; trade agreements with foreign countries with provision for a part of the payments to be made in rupees; specialised training in business and commercial practice for India's Trade Commissioners and other trade officials posted abroad; better publicity for Indian goods abroad (publication by Government of a weekly journal of foreign commerce and by a private agency of an exhaustive and up-to-date directory of Indian importers and exporters); increasing participation of Indian shipping companies in the carrying of the trade of India so as to increase the invisible exports; effective quality control of export commodities; and elimination of malpractices on the part of Indian exporters by introducing of a system of compulsory registration for them.

Apart from the delegations sponsored by the Export Promotion Councils, an industrial-cum-commercial goodwill mission was sent in May 1956 by the Government of India to Sweden, Finland and Denmark. A trade deligation from India visited the Federal Republic of Germany in 1957. A survey team of technical experts was sent to Cambodia. India also received such delegations from South Viet Nam, Burma, Ethiopia, Chile, the German Democratic Republic, Pakistan, Denmark, Sweden, the Democratic People's Republic of Korea and Afghanistan.

TRADE AGREEMENTS

During 1956-57, eleven existing trade agreements were renewed, while seven new agreements were signed with Poland, Bulgaria, Pakistan, Burma, Viet Nam, Eastern Germany and Chile. The agreements with Viet Nam and Chile were entered into for the first time; the total number of countries with whom India had trade agreements rose to 23. The agreements in general would help augment supplies of machinery and capital goods, electrical goods, locomotives, certain items of chemicals like nitrate and sulphur, foodgrains, raw jute and other essential materials required for fulfilling the second Plan, while India would, in turn, export some of her traditional items like cotton and jute goods which have been facing severe competition in their traditional markets in Western Europe, America and South-East Asia. The agreements with neighbouring countries like Burma also provide for the export of products of some of the newer industries, particularly light engineering goods like sewing machines, electric fans, radio receivers, kerosene stoves, etc. The agreements do not envisage a bilateral balancing of accounts, and the commodities listed are only illustrative of the scope for exports from and imports into the contracting countries,

The Indo-U.S. Agreement of August 1956 provided for the import into India of surplus U.S. agricultural commodities under P.L. 480, valued at £360 million, equivalent to Rs. 172 crore (inclusive of the payment of half the estimated shipping cost, namely, Rs. 26 crore), distributed as follows: wheat Rs. 95 crore, rice Rs. 13 crore, cotton Rs. 33 crore, tobacco Rs. 3 crore and dairy products Rs. 2 crore. Of the sale proceeds, Rs. 137

crore would be transferred to the Government of Irdia (Rs. 1114 crore as loan and Rs. 25.7 crore as grant) and the rest would be left free for use by the U.S. Government in India. Of the lonn component of Rs. 1114 crore, about Rs. 26 crore have been earmurked for re lending to the private sector. The agreement will go a long way in meeting possible food shortages and will assist in conservation of India s foreign exchange resources.

Under the Triparute Agreement among India, the USA and Burma, sgned in July 1956 India would export to Burma cotton textiles worth approximately Rs 185 lakh The payment for these textiles would be made in raw cotton purchased by Burma from the USA under the PL 460 programme

TARIFF

During 1936-57 the Tariff Commission conducted 6 tariff inquiries and 4 price inquiries. Two of the tariff enquiries were in respect of industries seeking protection for the first time, the rest related to industries already enjoying protection. The Government fully accepted the Commission's too for grant of protection to new industries.

The two fresh applicants were the isonizid and calcium carbide industries. In the case of the calcium carbide industry, the Government accepted the Commission is recommendation that protection should be granted up to December 31, 1956, but retained the existing level of 50 per cent of valuem revenue duty inside of reducing it to 45 per cent, as recommended by the Commission as regards the isoniazid industry, the Government accepted the Commission recommendation that protection by means of starill was not desirable since this would rause the price of a life-saving drug for certain classes of commission. The Government, however, decided to import duty on gamma proline—an essential raw material for the manufacture of isoniama proline—an essential raw material for the manufacture of isoniam and in the manufacture of isoniam and isoniam

The four tariff inquiries connected with existing protection covered the following industries ball bearings, plastics (phenol formaldehyde moulding powder, electrical accessories and buttons), power and distribution transformers and electric brass lamp-holders In the case of the electric brass lamp-holder industry, the Commission came to the conclusion that the industry could stand on its own legs without protection and, therefore, recommended that the industry should be de protected after December 31, 1957 For the ball bearing industry, the Commission recommended that the existing protective duty on ball bearings up to a 2*-bore might be continued and that protective duty on adapter bearings be raised to 941 per cent duration of these duties was to be extended up to December 1960 tion to the power and distribution transformers industry was also recommended to be continued at the existing rates up to December 31, 1960 the case of plastic manufactures the Commission recommended that the existing protective duties on phenol formaldehyde moulding powder and plastic buttons should be continued for a period of three years till December 31, 1959

The electrical accessories section of the plastic industry was a section of the plastic industry however, recommended for withdrawal of protection after December 31, In all the four cases, the Government of India accepted the recommendations of the Commission

DIRECTION OF TRADE

The U.K. and the U.S.A. continued to be India's principal buyers: and suppliers. During 1956, their shares in India's import trade were as follows U.K. 25.7 per cent, U.S.A. 11.6 per cent. The share of the U.K. in the exports was 30.9 per cent and that of the U.S.A. 14.8 per cent. There was a considerable increase in imports from some European countries during the year.

The principal countries to which India exported during 1952-56 and the values of the exports are shown in Table 193.

FOREIGN TRADE DURING SECOND PLAN

The following table gives the expected earnings from major exports over the second Plan period compared to those in 1955

TABLE 200

MERCHANDISE EXPORTS DURING SECOND PLAN

(In croses of subses)

	1955	Last year of second Plan, 1960-61	Annual average, second Plan	Five-year total, 1956-61
Tea Jute yarn and manufactures Cotton yarn and manufactures Cotton yarn and manufactures Cotton yarn and manufactures Tobaco Tobaco Tobaco Cotton raw and deather (raw, tanned and dressed) Cotton raw and waster Cotton raw	112 126 63 39 11 27 35 20 4 4	133 118 84 24 17 28 22 27 3 5	127 122 75 22 15 28 22 23 5 5	635 610 275 110 75 140 110 115 25 25 20 725
-	596	615	593	2,965

The estimates are in terms of the prices prevailing in 1955-56 (first nine months), whereas the data for 1955 are in terms of the prices the current. As compared to 1955, the level of exports in the Plan period shows little improvement. This is mainly because the exports of oils and cotton in 1955 were unitually high and are not expected to continue at that level. In other items, significant increases are expected

Ratio of export price index to import price ladex.

The increase envisaged in exports over the Plan period is not very striking. India's export earnings are derived mainly from a few commodities. Three of these, namely, tea, jute manufactures and cotton piecegoods, account for one-half of the total. These major exports are faced with increasing competition. This limits the scope for a substantial increase in exports in the short run. While every effort has to be made to promote exports of new items and to develop and diversify the markets for the country's major exports, it is only after industrialisation has progressed that increased production at home will be reflected in larger export earnings.

The following table shows the estimated level of imports during the second Plan period.

TABLE 201 MERCHANDISE IMPORTS DURING SECOND PLAN

(In crores of rupees)

				1955	Last year of second Plan, 1960-61	Annual average, second Plan	Five-year total, 1956-61

O.L.	• •	••	••	130	140	140	700
	•	TOTAL	••	655	786	868	4,340

The bulk of the additional imports relate to machinery and vehicles, iron and steel and other metals. Of the total imports of machinery and vehicles estimated at Rs. 1,500 crore over the Plan period, the requirements of the public sector take up about Rs. 1,050 crore: Rs. 425 crore for transport and communications (Rs. 290 crore for the railways alone); Rs. 290 crore for industries and minerals (Rs. 180 crore for the steel plants); Rs. 170 crore for irrigation and power schemes; and about Rs. 165 crore for other Governmental requirements. Imports of machinery and vehicles needed by the private sector for purposes of expansion, modernisation and replacement are estimated at Rs. 450 crore.

STATE TRADING CORPORATION

In May 1956, the State Trading Corporation*, an entirely State-

^{*} The objects of the Corporation have been set out as follows: 'to organise and effect exports from and imports into India of all such goods and commodities as the Company may from time to time determine, and the purchase, sale and transport of and general trade in such goods and commodities in India or anywhere else in the world, and to do all such other things as are incidental or conductive to the attainment of the above object'.

owned organisation with an authorised capital of Rs. 1 crore, was established Its aim is to stimulate trade, mainly exports and also imports, by filling up the many gaps in India's foreign trade structure Since its inception, the Corporation has been striving to increase India's exports with countries with controlled economies in order to secure from them such items as steel, cement and industrial equipment without straining the country's sterling reser-The Corporation has already purchased, at reasonably low prices, such items as cement, soda ash, caustic soda, raw silk, fertilisers and gypsum The quantum and timing of the imports have been so fixed as to avoid recurring disruption in supply and also to create and maintain conditions favourable for a larger production of these commodities in India. Among the goods for which exports had been arranged by the Corporation are mineral ores, shoes, handicrafts, salt, tea, coffee and woollen goods Corporation's business transactions, including contracts entered into with foreign countries since inception amounted to about Rs 42 crore (imports Rs 15 crore and exports Rs 27 crore)

The Government has also entrusted to the Corporation the task of acquiring cement from Indian manufacturers, importing it from abroad, and distributing the commodity at an equalised price at all railheads in For this the Corporation is given a service fee on the gross turn-With effect from July 1957 the task of canalising all exports of iron ore from the country was entrusted to the Corporation.

INTERNAL TRADE

COASTAL TRADE

For purposes of statistics, the Indian coast has been divided into the following martime blocks (i) West Bengal, (ii) Orissa, (iii) Madras (including Andhra), (iv) Tranvancore-Cochin, (v) Cochin Port, (vi) Bombay, (vii) Saurishtra, Osha and Kutch Trade between ports in the same maritime block is classed as "internal trade" and that between one maritime block and another as "external trade"

In 1956-57, the total coastwise trade was valued at Rs 343 crore, coneasting of Rs 180 crore (imports) and Rs 163 crore (exports) Of Rs 180 crore worth of imports, over Rs 169 crore constituted external trade as among the blocks and about Rs 10 crore internal trade within the blocks themselves The Rs 169 crore of external trade in the coastal sector again consisted of Rs 158 crore worth of Indian merchandise and Rs 11 crore worth of foreign merchandise Table below shows the values of the coast-

TABLE 202

COA	STWISE TRAI		lakhs of rupee	
Imports	1953-54		1955-56	1956-57

TOTAL TRADE	15 069	15,492	15,979	16,314
	30,585	31,137	33,802	34,267

INLAND TRADE

Considering the vastness of the country, its varied climate and diverse natural resources, it is not unnatural that the inland trade of India is many times larger than its external trade. According to an estimate in the report of the National Planning Committee's sub-committee on trade, the value of the country's internal trade in 1940 was about Rs. 7,000 crore as compared to the figure of Rs. 500 crore for external trade. Precise date about the internal trade is, however, not available. It is difficult to keep track of the large volume of goods carried by bullock carts and country boats. Statistics of the trade carried by rail and inland steamer are, however, available.

The following table shows the movement of selected articles by rail and river between the States and the chief port towns (in terms of imports):

TABLE 203
INLAND TRADE—SELECTED ARTICLES

(In thousand maunds)

-		1951-52	1953-54	1955-56 -	1956-57
Coal and coke Raw cotton Cotton piecegoods Rice (not in the husk) Wheat Raw jute Iron and steel products Oilseeds Salt Sugar (excluding khandsa	 	5,41,300 12,119 6,646 22,320 52,148 12,626 46,537 22,256 33,863 17,499	5,34,065* 8,141** 6,679 28,287 26,546 6,385 42,648 17,679 28,589 20,394	5,80,188 7,769*** 8,733 22,119 44,006 9,466 51,366 25,335 30,245 22,218	5,75,222 7,026 45,411 29,774 9,120 66,095 25,057 29,420 24,459

For purposes of these statistics, again, India has been divided into 36 trade blocks, roughly representing the former states of the Indian Union with the addition of the chief port towns of Bombay, Madras, Calcutta and Cochin. The Andhra ports, the Saurashtra ports and the ports in Madras other than Madras port have also been treated separately. Only the figures of actual imports into these blocks are represented here. Thus, the internal trade within each of these trade blocks is excluded from the scope of these statistics.

CHAPTER XXVI

TRANSPORT

RAILWAYS

The Indian railway system with a route mileage of 34.744 is the largest in Asia and the fourth largest in the world. About 38 lakh persons and 3.4 lakh tons of goods were carried, on an average, by the railways daily in 1957. The capital at charge of the railways, the country biggest nationalised understaing at the end of 1956-57 stood at Rt. 1,078 crore and the gross earnings Rs. 350 6 crore. They employed 10.54,400 persons and beat them Rs. 136 crore in wares and salarn.

The first railway line in India was opened on April 16, 1853 The progress made by the railways during the past hundred and four years can be seen from tables 204 and 205

The 37 railway systems, which existed in India before August 1949, have been grouped into eight Zones with a view to effecting economy and efficiency in administration. These Zones are shown in table 207.

Certain narrow gauge feeder railways (total length 453 miles), owned and operated by private companies, were not included in the reorganisation scheme, allthough under the Railway Companies (Emergency Provisions) Act, 1951, the Government assumed powers to ensure their efficient operation in the public interest.

Railitay Finances

Railway finances were separated from general finances in 1925, the railways contributing to the general revenues according to a fixed formula In December 1919; it was decided that during the quinquenium beginning 1930.51, the railways should pay a guaranteed dividend of four per cent on the capital at charge at the end of each penulumate of non-per-cent on the capital at enarge at the end of each periodicial year. The revised Financial Convention which became applicable after 1955 prescribes the same rate of payment except that on new lines a moratorium is to be granted during construction and for the five years to follow

The following table gives an outline of the financial results of working

DEVELOPMENT UNDER PLANS

The main problem of the railways in recent years has been that of rehabilitation and replacements. First created by the economic depression, it was later accentuated by the severe strain placed on them by the war and Partition. By 1948, however, the railways had turned the corner and have since been showing steady improvement.

Under the first Five-Year Plan, Rs. 423.73 crore was spent on rehabilitation and expansion of railways. Rs. 240.81 crore or 55.7 per cent of the expenditure was made on rolling stock, largely on rehabilitation account. Even then, 30.8 per cent of the locomotives, 19.6 per cent of the wagons and 33.7 per cent of the coaches on line were overage. A substantial part of replacement and modernisation of plant and machinery in workshops, rehabilitation of track and bridges, development of line capacity, modernisation of signalling, etc., had to be carried over to the second Plan period. Satisfactory progress in the matter of self-sufficiency in railway equipment was made and foundations of a growing rolling-stock industry were laid. An enlightened outlook towards comforts of third class passengers came into existence and staff welfare received special emphasis, a sum of Rs. 24 crore having been spent on construction of quarters for them.

The railways have been asked to provide during the second Plan period an additional carrying capacity of about 610 lakh tons per annum (250 lakh tons for steel, 130 lakh tons for coal, 50 lakh tons for cement and 180 lakh tons for other traffic), over and above what they carried at the end of the first Plan period. Out of a total proposed Plan outlay of Rs. 4,800 crore in the public sector, the railways have been allotted Rs. 900 crore, of which they will themselves find Rs. 150 crore. An additional sum of Rs. 225 crore will be spent as their contribution to the Railway Depreciation Fund. The principal items of expenditure in the total Railway Plan of Rs. 1,125 crore are as follows:

TABLE 208

The progress achieved at the end of the first Plan period and the targets aimed at under the second Plan are dealt with in the following paragraphs.

New Construction and Works

Four hundred and thirty miles of dismantled lines were restored, 380 miles of new lines constructed and 46 miles of narrow gauge lines converted into metre gauge during the first Plan period 454 miles of new lines were also under construction, 52 miles in the process of being converted into broad gauge and surveys for over 2,000 miles of new lines being in progress. Construction of 842 miles of new lines, doubling of 1,607 miles, conversion of 265 miles from metre gauge to broad gauge and renewal of 8,000 miles of existing track are to be undertaken during the second Plan period.

The following lines representing an addition of 95 82 miles were opened during 1956-57

TABLE 209

Railway	New Lines	Gauge	Mileage

Rolling Stock

During the first Plan period, 341 broad gauge and 159 metre gauge locomotives, 2,356 broad gauge, 1,862 metre gauge and 114 narrow gauge coaches and 31,999 broad gauge and 10,683 metre gauge wagons write produced in the country

The provision of Rs. 380 crore for rolling stock under the second Plan includes Rs. 183 crore for development and Rs. 197 crore for rehabilitation. The details of the programme are shown below:

TABLE 211

	Locomotives		Wagons			Coaches			
÷	broad gauge	1	narrow gauge	broad gauge	metre gauge	nar- row gauge	broad gauge	metre gauge	nar- row gauge
Development	533	373		66,575	16,820		2,149	2,768	•••
Rehabilitation	1,062	209	81	14,879	4,952	4,021	4,392	1,422	633
TOTAL	1,595	582	81	81,454	21,772	4,021	6,541	4, 190	633

It is expected that 828 broad gauge and 461 metre gauge locomotives and 5,634 broad gauge, 4,738 metre gauge and 633 narrow gauge coaches will be manufactured in the country itself. The entire second Plan needs in respect of wagons is expected to be met from indigenous manufacture, import being restricted to a small number of special type coaches.

During 1956-57 the following new rolling stock was placed on line:

TABLE 212

	Broad gauge	Metre gauge	Narrow gauge
Locomotives	322	254	3
Coaches	565	70 1	32
Wagons	17,968	13,936	120

Production at the State-owned Chittaranjan Locomotive Works has now been stabilised at the steady average of 14 WG locomotives per month. The 100th locomotive manufactured at the works rolled out of the assembly lines on January 6, 1954, the 200th on February 5, 1955, the 300th on November 30, 1955, the 400th on August 12, 1956, and the 500th on March 25, 1957. Till the end of December 1957, 625 engines had been turned out. The total second year production is estimated at 828 WG engines.

The Tata Engineering & Locomotive works Co. Ltd., have further expanded in the last two years and a new target of 100 complete metre gauge locomotives has been fixed and is expected to materialise during 1958. Till the end of December 1957, the works had turned out 286 engines. The total second Plan production is estimated at 461 locomotives.

The State-owned Integral Coach Factory, near Madras, was originally scheduled to reach the target production of 350 coaches per annum by 1960-61. This has now been advanced by a year to 1959-60. A proposal is now under consideration for the introduction of a second shift and when this materialises, the production target will be raised to 600 coaches

per annum Two hundred and fifty-three coaches were produced by the factory till the end of December 1937. An independent coach furnishing factory is being set up in the vicinity of the Integral Coach Factory at an estimated cost of Rs 3 69 erore.

Bendes the Integral Coach Factory, there are other coach manuscums factories in the country. Means Hundustan Aircraft, Ltd. Bangalore, another Sitte-owned undertaking, builds every year 190 broad gauge furmshed steel body coaches on conventional underfarmes applied to them. The factory produced 1,156 coaches till the end of December,

The wagon building industry in India, entirely privately owned, was in its infiney when the first Plan commented on April 1, 1951. Since then it has made outstanding progress, the total production rising from 3,700 wagons in the first year of the Plan to 15,445 in its last year. Arrangem in the high already been completed to raise the total installed capacity to 36,000 wagons by the end of the second Plan period. The output during 1956-57 was 15,958 wagons

Workshops, Plant and Machinery

The second Plan provides for six new workshops, a new metre gauge corch building, factory, a new furnishing unit for the Integral Coarl Factory and expansion of the Chitteranjan Works. As a result, the overall annual capacity in respect of overhaul of rolling stock is expected to increase by 29 per cent and 66 per cent in respect of broad gauge and metre and narrow gauge foomotives, 79 per cent in respect of broad gauge and 190 per cent in respect of metre and narrow gauge coaches and 68 per cent in respect of broad gauge and 144 per cent in regard to metre and narrow gauge wagons

Electrification

Electric traction, first introduced in 1925, it confined to a few line are Bombay, Madras and Calcutta Televinfeation of track for a distance of 14 mids between Howrah and Sheoraphuli on the Eastern Raby. The total electrified route mileage on March 31 1938 was 254 244—Central Railway 184 885 (BG) miles, Western 37 25 (BG) miles, Southern 18 14 (MG) miles and Eastern 14 (BG) miles A further £26 miles will be electrified during the second Plan period—463 (BG) miles on the Eastern Railway, 72 (BG) miles on the South Eastern, 191 (BG) miles on the Central and 100 (MG) miles on the Southern

Dieselisation

Deselisation is proposed to be introduced over a total route mileoge of 1,233 by 1960-61—232 on the Eastern Railway, 295 on the South Eastern, 227 on the Central, 421 on the Southern and 115 on the Western Railway

Bridges

Work on the Ganga Bridge near Mokameh Ghat has made satisfactory progress. The bridge, which will be 6 074 feet long with a wide prodern roadway above and a modern transhipment yard on the northern bank to handle 350 to 400 broad gauge wagons dails, is estimated to cost 83 16 crore and is expected to be completed by 1960. Out of 83 32 crore provided for bridges under the second Plan, 83 18 crore are to be

devoted to rehabilitation, Rs. 9 crore to the Ganga Bridge and Rs. 6 crore for 6 new bridges.

Amenities for Railway Users

Of the improvements carried out during the period 1951-52 to 1955-56 to offer better travel conditions to passengers, particularly third-class passengers, mention may be made of the following significant ones:

- (i) safe and relaxed travel—at a cost which is perhaps the lowest in the world—in all-steel light-weight coaches;
- (ii) reservation of coaches for long distance passengers in all important mail and express trains;
- (iii) introduction of 791 new trains and extension of the runs of 550 trains;
- (iv) sleeping accommodation;
- (v) introduction of a number of all-third class janata trains on the main trunk routes (corridor janata trains on trunk routes between Delhi, Bombay, Calcutta and Madras);
- (vi) improvement in catering facilities; and
- (vii) drinking water facilities at 510 stations, provision of fans in 4,856 third class and 2,095 inter class coaches, waiting halls at 180 stations, new or improved foot bridges at 160 stations, 35 new platforms and raising, surfacing or extension of 922 other platforms.

A sum of Rs. 15 crore has been provided for amenities to railway users in the second Plan.

Staff Welfare

As against an average of a little over Rs. 4 crore per year spent on the construction of new quarters and staff welfare measures during the first Plan period, it is proposed to spend on an average Rs. 10 crore per annum during the second Plan period.

As against 40,000 staff quarters constructed during the first Plan, 65,000 will be built during the second Plan period. About 10,000 of them were built during 1956-57 and 16,000 more were expected to be constructed during 1957-58.

At the end of 1956-57, there were 81 hospitals and 434 dispensaries. Since then 3 hospitals and 11 dispensaries have been added. A number of chest clinics for domicilliary and out-door treatment of T.B. patients have been established in addition to expansion of facilities by way of additional beds. It is also proposed to open 13 new railway hospitals and 75 new dispensaries, add 1,600 beds in existing railway hospitals, double the present number of beds for railway staff in various T.B. sanatoria, and increase the number of railway schools. A number of steps to increase educational facilities for the children of railwaymen are also being taken.

In December 1957, it was decided to offer the choice of a pension scheme to all the 10 lakh or more railway employees. A scheme of large-scale upward re-distribution of posts calculated eventually to benefit 1,70,000 railwaymen in non-gazetted cadres was announced in February 1957. Steps are also being taken to explore avenues for quicker promotion of class IV staff.

OPERATING STATISTICS

Passenger Traffic and Earnings

The sahent features of passenger traffic and earnings therefrom on all Indian railways during 1955-56 and 1956-57 are shown below.

TABLE 213
PASSENGER TRAFFIC AND EARNINGS

- AMERICA TRAFFIC ARE	EAGAILAG	
	1955 56	1956-57
Number of passengers (in hundreds)	1,29,73,550	1,38,25,430
A C.	858	1,002
First Class	1,90 301	2,10 677
Second Class	1,68,752	1,81,428

First Class	32 8 14 6	14 3
Second Class	9 45	9 43
Third Class	4 97	4 98

Tichetless Travel

Among the stept taken for intensifying the effort against tickelest travel are raids on selected sections and at frequent intervals, continuity checks from starting to terminal stations, surprise impections of booking offices and the statistic terminal stations, surprise impections of booking offices and the statistic travelling casaminers for conducting cross-country and surprise checks. The results of the checks made by the organisation during 1953-55 and 1956-57 are summarised below —

TABLE 214

		1955-56	1956-57
Number of passengers detected travelling without neckets Amount of fare and excess charges realised	•	69,02,114 Rs. 1,40,29,656	

Accidents and Safety of Passenger Trains

The number of fatalities and casualties in train accidents expressed as a ratio of ten lakh passengers carried, excluding those resulting from unlawful tampering of track, for 1954-55, 1955-56 and 1956-57 were as follows.

TABLE 215
TRAIN ACCIDENTS

	Fata	lities	Casualties		
	Number Per ten lakh passen- gers carried		Number	Per ten lakh passen- gers carried	
1954-55	147	0.12	303	0.24	
1955-56	16	0.01	266	0.20	
1956-57	276	0.20	335	0.24	

Goods Traffic and Earnings

The goods traffic carried and earnings therefrom on all Indian railways are shown in the following table.

1955-56	541	203
19-6-57	570	210

FARES AND FREIGHTS

The fare and freight rates were rationalised in 1948. In view of the steep rise in the general price level and in the operational and replacement costs, passenger fares were further increased from April 1, 1951. The following further changes, involving the introduction of telescopic rates of passenger rates (rates diminishing with increase in distance travelled), came into force from April 1, 1955:

TABLE 224
RATES OF PASSENGER FARES

	Before April	Since April 1955 (telescopic rates)			
Class	1955 (flat rates per mile)	Distance in miles	Rates per mile		
Air-conditioned First*	30 pies 16 "	1—300 301 and above 1—150 151—300 301 and above	34 pies 32 ,, 18 ,, 16 ,, 15 ,,		
Second** Mail/Express	10½ "	1—150 (Mail/Exp) (ordinary)	11 ,, 9½ ,,		
Ordinary	9 "	151—300 (Mail/Exp) (Ordinary) 301 and above (Mail/Exp) (Ordinary)	10½ ,, 9 ,, 9½ ,, 8½ ,,		
Third Mail/Express	6 "	I—150 (Mail/Exp) (Ordinary)	6} " 5} "		
Ordinary	5 "	151300 (Mail/Exp) (Ordinary)	6 ,, 5 ,,		
	**************************************	301 and above (Mail/Exp) (Ordinary)	5 ,, 4½ ,,		

For vestibuled air-conditioned third-class trains running between Delhi-Howrah, Delhi-Bombay and Delhi-Madras, an additional charge of 4 pies per mile is collected.

The Railway Passengers Fares Act came into force on September 15, 1957. The rate of tax is 5 per cent of the fare for distance between 16 and 30 miles, 15 per cent for 31 to 500 miles and 10 per cent for over 500 miles. Distances upto 15 miles are exempt from the tax.

The rationalised freight structure provides for fifteen "class rates" for goods and thirteen wagon-load scales of rates. The rates decrease with increase in distance. The telescopic taper of goods rates was further accentuated in April 1955, thereby making long distance haulage of goods cheaper still. Goods traffic now moves along the shortest route and at the cheapest rates. Export and import traffic is treated at par with internal traffic, and the preference previously given to the former has thus been

^{*}was known as "Second" before April 1955."

^{**}was known as "Intermediate" before April 1955.

done away with A committee with A Ramaswamy Mudalirr as Chairmin was appointed in August 1935 to undertake a review of the present feetly structure and mike suitable recommendations. The report of the Committee submitted in December 1957 is under consideration. The recom in altitions of the Committee in regard to the constitution, jurisdiction and rules of procedure of the Rulway Rates Tribunal have, however, bein accepted and necessary legislation has been passed to amend the Indian Railways Act.

ADMINISTRATION

The responsibility for the overall control and administration of the railways verts in the Rulway Board, which was first set up in 1905. Board now constits of a Chairman, who is ex-officion. Secretary to the Union Railway Ministry, the Financial Commissioner and three Members each in charge of Staff, Transportation and Engineering.

With a view to ensuring constant and close consultation between the public and the railway administration, the following committees have been created (i) Regional Railway Users' Consultative Committees, (ii) Zonal Railway Users' Consultative Committees at the headquarters of exch railway zone, and (iii) the Autional Railway Users' Consultative Council at the Centre. Divisional Consultative Committees will now be set up for each division together as now

ROADS

The Central Government assumed responsibility for the construction and muntenance of the national lighways in 1947. Under the new Constitution the national highways have become a Central subject, while oth r roads namely, the State highways and district and vallage roads remain the responsibility of the State Covernments.

According to the Nagpur Plan (1943) revised to apply to the Indian Union the total road mileage contemplated for the country as a whole was 3,31,000 as follows

reamonal riighways	10,000
National Trails	4,150
Provincial Highways	53,950
District & Village Roads	2,56,300

Antional Habiner

Total 3,31,000 (including surfaced (hard crust) 1,23 000 Unsurfaced 2,08,000)

14 500

India's road system is insufficient for her needs, the surfaced road being only about 10 miles per hundred square miles. The development of road communications was, therefore, one of the major items of India's first Five Year Plan and an expenditure of about Rs. 156 crore was incurred on road schemes under that Plan.

At the commencement of the first Plan, India had about 98 000 miles of surfaced roads and about 151 000 miles of unsurfaced roads By the end of the first Plan (on March 31, 1956), the total road mileage rose to

3,20,522, including roads under Community Development Projects and National Extension Schemes. The break-up of 3,20,522 miles is as follows:

TABLE 225

(in miles)

		Surfaced	Unsurfaced	Total
Extra-municipal roads Community Project and NES Block roads	••	1,16,141 6,029	1,60,012 38,340	2,76,153 44,369
TOTAL	••	1,22,170	1,98,352	3,20,522

The total road mileage at the end of the first Plan period was thus short of the Nagpur Plan targets by a little less than 1,000 miles of surfaced roads and 10,000 miles of unsurfaced roads. The targets can be expected to be reached by the end of the second Plan period. Certain deficiencies in the road system will, however, still continue. For instance, it will not be possible to bridge all the unbridged river crossings. Besides, in certain cases the road crust will not be upto the required standard to cater to the abnormal increase in the intensity and volume of traffic.

National Highways

In the Nagpur Plan, as adapted for the Indian Union, the target for national highways including national trails was 20,750 miles. Owing to financial limitations, however, the Central Government could accept liability for about 13,800 miles only.

The national highway system includes the Grand Trunk Road from Calcutta to Amritsar via Banaras, Kanpur, Agra and Delhi; the Agra-Bombay Road; the Bombay-Bangalore-Madras Road; the Madras-Calcutta Road; the Calcutta-Nagpur-Bombay Road; the Banaras-Nagpur-Hyderabad-Kurnool-Bangalore-Cape Comorin Road; the Delhi-Ahmedabad-Bombay Road; the road under construction from Ahmedabad to Kandla Port with a branch road to Porbandar; the Hindustan-Tibet Border Road from Ambala to Tibet border via Simla; the road from Delhi to Lucknow, Gorakhpur and Muzaffarpur with a branch road to the Nepal border; the Assam Access Road; the Assam Trunk Road on the south bank of the Brahmaputra; and the road branching off from the Assam Trunk Road towards the Burma border through Manipur.

On April 1, 1947, when the Centre took over the liability for the national highways, the selected N.H. routes had approximately 1,600 miles of missing road links and thousands of missing culverts and bridges out of which about 150 were bridges on large rivers. In addition, about 9,000 miles of these roads had a low-grade surface.

A sum of Rs. 34 crore was spent on the development of national highways up to the end of the first Plan period, and the construction of 746 miles of missing links, 33 major bridges, the improvement of about 5,000 miles of existing sections of the national highways and the widening of 400 miles of improved sections to two-lane carriageway were completed.

A proxision of Ri. 55 crore has been included in the second Five-Year Plan for the development of national highways. The targets aimed at are the construction of 900 miles of missing links, by passes and diversions, 60 major bridges, the missing province of 4,000 miles of existing sections of the national highways and the widening of 1,500 miles of the improved sections to two-lane carranges. When these targets are achieved, there will be no missing link in the prior system of national highways and all the major bridges, with the Eachimaputra on the national highway route to Assam und acress the Ganga on the national highway route to Assam und acress the Ganga on the national highway route to Assam und acress the consideration of the state of the state of the state of the state of the will have the minimum one lane asphalted carrangeway and nearly 2,000 miles will have two-lane asphalted carrangeway at the end of the second

Among the important bridges so far constructed, mention may be made of the Barakiv and Poon-Poon bridges on the Grand Trunk Road, the Baikra and Autenian bridges on the Patna Rancha Road in Bibar, be Pennar and Chungavaii bridges in Andhra Pradesh; ard the Kathjuri and Kaukhai bridges near Cuttack, on the Madras-Calcutta Road, but bridges over the Mahanadi and a bridge on the Brahmani on the Calcutta-Bombay Road the Kauer bridge at Tugaliv and the Palar Bridges at the Calcutta-Bombay Road the Kauer bridge at Maller and the Palar Gheesh bridges on the Massam Accest Road in West Bengal; the Tansa Bridge on the Bombay Ahmediabad Road in Bombay, and the Bhakra and Baigul bridges on the Delih-Lucknow Road in Uttar Pradesh.

Among the important works in progress on national highways, mention may be made of the Jawahar (Bamhai) Tunnel, which is under construction at a height of about 7,500 ft. Grances the Pir Papid range on the Jammu Siringary Uri National Highway in its one of the longest tunnel in the world and, when completed the proposed live whether command tunnel has two tubes, one of which is practically different or freedred to be completed in all respects by 1960. With the construction of the condition of a con

Other Roads

Apart from natuonal highways which are the direct responsibility of the Centre, the Government of India are financing the development of certain other arterial roads in the States. These include, *inter* dis, the Fassis Badappir Road and Assam, and the West Coast Road in the States of Bombay, Mysore and Kerela. An expenditure aggregating about Rs. 25 forcre was incurred on these schemes during the first Plan period and a provision of Rs. 9 25 core has been included in the second Plan.

Under a special programme approved in May 1954 for the development of certain selected State roads of inter-State or economic importance, 125 miles of new roads were constructed and 500 miles of existing roads improved during the first Plan period. An expenditure amounting to Ri 4 crore was incurred on these schemes during that period. The programme is being continued in the second Plan and a provision of Rs. 18 crore has been made for this purpose. The programme provides for the construction of 1,000 miles of new roads and 9 major bridges and improvement of about 2,000 miles of existing roads during the second Plan period.

Roads under the States' Sector

A provision of Rs. 164 crore has been made for road development in the States' sector of the second Plan. Under the programmes drawn up by the States, about 21,000 miles of surfaced roads and 40,000 miles of unsurfaced roads will be constructed. The second Plan devotes special attention to the needs of the backward areas. The National Extension and Community Project schemes as well as local development works will make large additions to the village road system.

ROAD TRANSPORT

The number of motor vehicles taxed in India during the last quarter of 1954-55 was 3,76,477 as compared to 3,53,053 in 1953-54. The break-up is as follows:

Motor cycles	. 33,324
Private cars	1,70,682
Public service vehicles	56,341
Goods vehicles	1,04,389
Miscellaneous	11,741
Total	3,76,477

The number of motor transport operators in the country is computed at about 48,000 of whom more than 46,000 are small operators, each owning five vehicles or less. The private operators are being encouraged to amalgamate wherever possible into viable units. Under the Road Transport Corporations Act, 1950, statutory transport corporations are being formed on a tripartite basis by the State Governments, the railways and private operators. State-operated passenger transport services exist in most of the States: The investment by the Government in public road transport services stands at over Rs. 35 crore.

Almost the entire goods transport and about three-fourths of the passenger services are at present in the hands of private operators. Despite expansion in the public sector of road transport during the second Plan, a large part of the road traffic will continue to be carried by them. The inadequate development of road transport during recent years has been attributed to the fear of nationalisation, high levels of taxation on motor transport, restrictions placed on inter-State services and on long haulages under the Code of Principles and Practice, and the policy followed in some States of granting permits for only short periods instead of for three to five years, as required by law.

The Planning Commission has had the problems of road transport development reviewed by a special study group. The Commission has recommended that the nationalisation of goods transport services should not be taken up during the second Five-Year Plan and that private opera-

tors should be assisted in forming viable units. In regard to passenger transport services, the Commission has recommended that programmes for the expansion of nationalised services should be suitably phased and to the extent that State. Governments do not themselves propose to operate road transport services the terms on which permits are granted to private operators should be liberalised.

The Motor Vehucles (Amendment) Act, 1936, provides for the setting up of an Inter-State Transport Commission for the development, co-ordination and regulation of road transport services on inter-state routes. The Commission is expected to start functioning in the near future. Other provisions included in the Act relate to the payment of compensation to holders of permits if their permits are cancilled or the terms thereof are modified increase in the period of validity of permits for transport vchucles, licensing of conductors enhancement of penalties for offences committed under the Motor Vehicles Act, 1939 and reconstitution of Transport Authorities etc. Most of the provisions of the Act have already been brought into force.

The demand for transport particularly for the movement of raw materials and finished products has increased considerably. As the Raulways are not in a position to lift all the traffic that is officred the development of road motor transport as a complementary mode of transport is an urgent necess by Varioussteps have been taken to ensure the development of road motor transport as a complementary mode of transport to the railways. The State Governments have been requested to allow greater freedom of movement to transport vehicles and also to agree to a ceiling for motor wholes under the central casting. Madras rates. The necessity of abolition of double taxation and the desirability of consolidating all taxes on motor vehicles into one single tax has also been impressed upon them. The State Governments have also been advised to liberalise their locasing policies and to encourage the formation of visible units

For ensuring co-ordination, between all modes of transport, on the net hand and the Central and State transport policies on the other, the Government of India have decided to constitute a Transport Development Council, a Road and Inland Water Transport Advisory Committee and a Central Transport Co-ordination Committee. These bodies will replace the present Transport Advisory Council, Central Board of Transport and the Standing Committee of the Central Board of Transport and the

INLAND WATERWAYS

The length of waterways which are navigable is over 5000 mles. The important ones are the Ganga and the Brahmaputra and their tributaires the Godavari and the Krisina, the backwaters and canals of Kreila, the Backingham Canal and the West Coast Canals in the Madras and Andhra States and the Mahanda Canals in Orissa.

To co-ordinate the development of water transport on the Ganga the Brahamputra and their tributaries a body known as the Ganga Brahamputra Water Transport Board was set up in 1932 by the voluntary co-operation of the Central and State Governments

At present, 1 557 miles of tivers are navigable by mechanically propelled vessels and 3 587 miles by large country boats. Navigation can be developed on shallow stretches to some extent by deepening the channels, by regulation works, dredging and by the use of craft specially designed to negotiate such stretches. Deepening entails heavy outlay by way of dredging. Attention has, therefore, been focussed on the use of specially designed shallow craft. The Ganga-Brahmaputra Board has taken up an experimental project for this purpose on the Upper Ganga. Craft designed for the Upper Ganga project will be brought into use during the year 1958. Planned development works in the Ganga-Brahmaputra region include the dredging of important waterways, provision of aids to navigation, such as radiotelephone and automatic beacons, and the development of inland port facilities at selected places. The Plan also provides for the development of the Buckingham Canal and the development of the West Coast Canals. A provision of Rs. 3 crore has been made in the second Plan for the development of inland water transport. This includes Rs. 115 lakh for the development of the Buckingham Canal and Rs. 43 lakh for the West Coast Canals. The balance of the provision together with contributions from the State Governments to the revenues of the Ganga-Brahmputra Board will be available for projects to be undertaken by the Board.

SHIPPING

In 1947, the Shipping Policy Committee had recommended a target of 20 lakh tons GRT in order to secure for Indian shipping (i) 100 per cent of the coastal trade of India, (ii) 75 per cent of India's trade with Burma, Ceylon and other neighbouring countries, (iii) 50 per cent of India's distant trade and (iv) 30 per cent of the trade formerly carried by German, Italian and Japanese vessels in the Orient. The target in respect of coastal trade has been achieved. About 40 per cent of the trade with adjacent countries and about 6 per cent of the trade with distant countries is now carried in Indian bottoms. At the end of January 1958, 132 ships totalling 5,81,689 GRT were on the Indian Register—84 ships of 2,57,456 GRT on the coastal trade and 48 ships of 3,24,233 GRT on the overseas trade.

The progress achieved during the first Plan period and the targets aimed at in the second Plan are shown below:—

TABLE 226

(Gross registered tens)

·				
Types of vessels		Before the first Plan	At the end of the first Plan	At the end of the second Plan
Coastal and adjacent Overseas Tramps Tankers Salvage Tugs	••	2,17,202 1,73,503	3,12,202 2,83,505 5,000	4,12,202 4,05,505 60,000 23,000 1,000
Total	••	3,90,707	6,00,707	9,01,707

Out of an additional tonnage of about 3,00,000 proposed under the second Plan, the gross addition is now not expected to exceed 1,80,000 GRT due to scarcity of foreign exchange and the difficult internal financial position. Efforts are, however, being made to secure additional funds and foreign exchange and for acquiring tonnage on deferred payment terms. One or two shipping companies have already succeeded in acquiring some thips on these terms.

A Shipping Development Fund will be set up soon according to a decis on taken recently The Fund will be made up of annual contributions from the Consol dated Fund of India and will provide a perennial source of finance for sh pping development

Indian vessels at present ply on six overseas routes namely Ind a UK Cont nent Ind a Malaya India Japan India-East Africa India Pers an Gulf and India Australia On four of the six routes, the ships carry cargo and on the remaining two passengers as well as cargo The total Indian sh pping tonnage employed on overseas trade at the end of January 1958, was 3 24 233 GRT (48 vessels)

A Government sponsored shipp ng corporat on known as the Eastern Sh pp ng Corporat on Limited was set up in 1952 with an authorised capi tal of Rs 10 crore to carry India's trade with Australia the Far East and West As a The management of the Corporation was taken over by the Government from the Scindias in August 1956 The Corporation will take over the Madras Rangoon service as soon as it is able to acquire a suitable Or sta of 5 266 GRT for the India/Austraha trade and the MV Andamans of 2 628 GRT for the India/Andamans Service After providing for depreciation amounting to Rs 32 00 lakh the Corporation made a net profit of Rs 35 12 lakh during 1957

The Western Shipping Corporation registered in June 1950 with an authorised capital of Rs 10 erore will operate on the India Persian Gulf India Red Sea and India Poland routes The sh ps ordered by the Corpot on are st || under construction and the operat ons of the Corpora t on during 1957 were confined to the operation of the tanker Deth Seeak under charter to Messrs Shell Fankers

An India USSR service started operating in April 1956 to facilitate movem at of commod ues covered by the Indo-Soviet Trade Agreement. A sum lar agreement with the Government of Poland was made

A beg nn ng has been made in acquiring a tanker fleet by the acquir tion of t vo tanker-one in the public sector and the other in the private A th rd will be acquired in the public sector as soon as possible

Hındustan Sh pyard

The Visakhapatnam Sh pyard was purchased from the Scindias by the Government in March 1952 and its management entrusted to the Hindustan Sh pyard Ltd, a Government sponsored company in which t vo-th rds of the cap tal is held by Government The first vessel to be built at the Yard was Jaunched in March 1948 Fifteen ships have so far been been built by the Shipyard and fifteen more ships are at present on order, of which n ne are at various stages of construction Three ships and also a tug and a motor launch will be ready for delivery in 1958-59

The Government of the United Lingdom have agreed to provide under the Technical Co-operat on Scheme of the Colombo Plan, a technical mission to survey possible sites and collect data for the establishment of a second ship yard. The mission or visited India in 1957 and its report was ex-

Assistance to Sh pp ng Companies

The private sector has received loans to the extent of Rs 24 crore in

the first Plan and Rs. 12.5 crore in the second Plan for adding to their fleet. Thirty-seven ships totalling about 68,000 GRT will be added under this aid.

Indian tonnage was encouraged to carry the cargo controlled by Government and closer co-ordination between railway and coastal shipping is being considered.

Foreign Shipping Companies

The estimated freight payments to foreign shipping interests on account of Indian imports and exports—on Government and private account—during the years 1954, 1955 and 1956 were Rs. 55 crore, Rs. 67 crore and Rs. 74 crore, respectively. The payments on food imports were Rs. 6.17 crore in 1954-55, Rs. 3.02 crore in 1955-56 and Rs. 18.31 crore in 1956-57.

Training Institutions

In 1956-57, it was decided to increase the annual intake of cadets to T.S. *Dufferin* from fifty to sixty during the next three years. Forty-nine cadets out of 50 recruited in 1955 passed out during 1957-58 and have all been employed on board ships.

Three hundred and seventy-two candidates took advantage of the training facilities available at the Nautical and Engineering College, Bombay, and 46 candidates representing the fifth batch of trainees passed out of the Marine Engineering College, Calcutta.

The three ratings training establishments—T.S. Bhadra, T.S. Mekhala and T.S. Nau Lakshmi—together turned out 802 trained seamen for the engine room and 826 for the deck department during 1957-58 and all of them found employment on board ships.

Recruitment of Seamen

The number of seamen registered at the Bombay and Calcutta Employment offices totalled 64,881 up to the end of December 1957.

PORTS

India's 3,500-mile long coastline has six major ports, namely, Calcutta, Bombay, Madras, Cochin, Visakhapatnam and Kandla. With the addition of Kandla, the total capacity for handling cargo of these non-profit-making national undertakings has increased to 260 lakh tons per annum as against 200 lakh tons at the time of Partition. During the second Plan, the capacity is to be increased by about 30 per cent.

The ports of Bombay, Calcutta and Madras are administered by statutory port authorities, subject to the overall control of the Central Government. The ports of Cochin, Visakhapatnam and Kandla are administered by the Central Government itself. The Port Trusts and Ports (Amendment) Act was passed in 1951 to ensure uniformity in port administration, to bring about a greater measure of central control and to effect decentralisation of authority in the day-to-day administration of the major ports of Calcutta, Bombay and Madras.

The traffic handled by and the financial aspects of the major ports during 1956-57 are as follows.—

TARI F 227

		Ships en	tered	Imports	Exports	Surplus (+)	
Port	Ī	No	Gross tonnage (lakhs)	(lakh toni)	(lakh tom)	or deficit(in earnings (Rs., lakhs)	
Calcutta Bombay Madras Cochin Vrukhapatnam Kandla	-	1,383 2,640 873 965 494 141	85 63 140 37 54 43 28 75 31 90 NA	43 53 82 39 20 33 13 08 4 94 3 19	43 42 37 40 6 32 4 19 9 96 1 53	+ 126 73 + 239 88 + 122 68 + 10 51 + 17 16 + 12 66	

Rehabilitation and augmentation of the facilities at the existing major ports to take care of the anticipated increase in traffic has been undertaken. The projects already completed are

- four new cargo berths with warehouses and transit sheds, bulk oil discharge facilities, bunder, passenger landing stages, etc., at Kandja.
- (ii) two marine oil terminals, one in Bombay and the other in Visakhapatnam .
- (iii) installation of 34 electric cranes in the Alexandra docks and the reconstruction of 11 out of 12 transit sheds destroyed in the explosion of 1944 in Bombay;
- (iv) a mechanical ore berth, a heavy lift yard equipped with a 200-ton crane and a mechanical coal loading plant at Calcutta.
- (v) the work designed to counteract the sand drift menace and a new marshalling yard at Madras;
- (iv) two oil tanker berths with pipeline connections, a black oil berth and a coal berth at Cochin, and
- (vii) acquisition of several items of port equipment and harbour craft at all the ports.

The important works which are in progress are:

- (i) two additional cargo berths at Kandla;
- (n) the development of two berths at King George's Dock as general cargo berths at Calcutta;
- (iii) the acquisition of an additional 54 electric cranes at Bombay;
 - (iv) new ore, coal and passenger-cum-cargo berths, preliminary works connected with the excavation of a wet dock at Madras;
 - (v) four cargo berths at Cochin, and
 - (vi) dredging work preliminary to the construction of additional berths at Visakhapatnam

Minor Ports

The Indian coastline is also served by a large number of minor ports (about 225, of which 150 are working ports) which together handle a traffic of about 50 lakh tons per annum. The administration of these ports is the responsibility of the State Governments. A few of these ports have alongside berthing facilities but most of them are road heads. They have much scope for handling additional traffic but improvements are required in approach channels and shore facilities. Various works of improvement have been undertaken under the first and second Five-Year Plans. The second Plan includes a provision of Rs. 5 crore for the purpose and includes Rs. 1 crore for the establishment of a pool of dredgers required to improve depths in port approaches.

National Harbour Board

For advising the Central and State Governments on the co-ordinated development of ports with special attention to minor ports, the National Harbour Board was constituted in 1950, consisting of representatives of the Government of India, the maritime States, major port authorities, and 4 non-official members, representing trade, industry and labour. A Standing Committee of the Board meets every year to screen and approve schemes for hydrographic surveys.

TOURIST TRAFFIC

Since 1948, considerable attention has been given to the development of tourist traffic which is an important source of foreign exchange and promotes international understanding. A Tourist Traffic Branch was set up under the Ministry of Transport in 1949 and a chain of regional tourist offices has since been established in important cities like Delhi, Calcutta, Bombay and Madras.

Tourist information offices have also been set up at Agra, Banaras, Jaipur, Aurangabad, Bangalore, Darjeeling, Simla, Bhopal, Bhubaneshwar, Cochin and Ootacamund. These offices work in close collaboration with the State Governments, travel agents, hoteliers, and carriers. Abroad, India has tourist offices in New York, San Francisco, Melbourne, London, Paris, Colombo and Frankfurt. A Central Advisory Committee, including representatives of the public, the travel trade and the State Governments, advises the Government on tourist problems. There are regional advisory committees for the different regions in the country.

In order to encourage the promotion of tourist traffic on a large scale and to exploit this source of foreign exchange to the fullest extent possible, a high-level committee consisting of the Secretaries and heads of Departments concerned and presided over by the Secretary to the Cabinet, has been set up.

A Hotel Standards and Rate Structure Committee was constituted in July 1957, to advise the Government on the question of laying down the criteria for standardisation and gradation of hotels in India and the question of presenting a suitable rate structure.

Regulations relating to police, registrations, currency, exchange control and customs have been relaxed to promote tourist traffic. A special inter-departmental committee makes periodic inspection of the various ports of entry with a view to ascertaining the possibility of further simplification of such formalities. Concessional tickets are offered by the railways for

round trip journeys and circular tours. Special concessions are given to students and pligims as well as to tourist usiting hill resorts during summer. At present there are 22 officially recognised travel agencies. 12 shake (lig gams) agencies and 4 recognised eventions nigents which serve the tourist. These vices of an increasing number of celucated specially trained and approved travel guides are also available.

Tourist information material in the form of guide books, pamphlets folders map posters and picture cards are being brought out. More than six mill on items of travel literature in Engl sh. French. Spanish. German and in the Ind an languages are bing annually produced and widely distributed. An illustrated monthly magazine entitled Traveller in India is issued to attrict tourist traffic. Travel films are also made for distribution and exhibition abroad.

The number of foreign tourists visiting India has more than trebled a nee 1951, as shown below

TABLE 228

1951 20 000 1952 20 448 1953 28 000	
1952 20 445 1953 28 000	Foreign Tenerals
1955 43 645 1950 68 800 (et 1957 (for the feet six months) 34 074 (at	ccluding Paksitanti) purox mately excluding aksitants)

The revenue from tourist traffic during 1955 was estimated at Rs 101 crore. The earnings during 1956 as estimated by the Reserve Bank of India are Rs 1545 crore.

The Central and some of the State Governments have formulated plans to provide for the development of foursm. The pro-ramme envisage additional accommodation, transport and recreational find the at important foursit centres especially those a tunted in out-of the way places. Broadly these are of three k and (i) schemes for the development of facilines at a lin ted number of places usuted largely by foreign foursits (i) facilities at a lin ted number of places waited largely by foreign foursits (i) facilities at a line ted number of places waited largely by foreign foursits (i) facilities and local importance which are visited by I ome tourists of low and middle-in come groups. The schemes in the first category are being undertaken by the Central Government. Sel emes in the second group are being implemented by the States with assistance from the Centre.

The programme also provides for publicity in the regional language and aid to tourist associations and bureaus run by the State or level authorities. Tourist Bureaus are being run by the State Governments at Gaya Bodh Gaya Ranchi Hard var Agra Vartnasi Mathura, Farabad, Luchao y Debra Dun, Kotdwara Gorakhpur Chutrakut (Banda) Balrampur (Gonda) Gauhati Kotah, Udaipur, Madurai and Pathankot.

CIVIL AVIATION

Civil aviation has come to play a vital role in the transportation system of the country. Indian aureraft operate scheduled services both within and beyond the front ers of India.

During 1957, Indian aircraft flew about 291 lakh miles carrying about 7.2 lakh passengers and nearly 1,948 lakh pounds of cargo and mail on scheduled and non-scheduled services taken together.

In 1949, an 'all up' air mail scheme and night air mail services connecting the four principal cities of Delhi, Bombay, Calcutta and Madras via Nagpur were introduced. In 1957, approximately 62,000 passengers, 28,71,000 lbs. of freight and 42,61,400 lbs. of mail were carried on these services, giving a nightly average of 170 passengers, 7,866 lbs. of freight and 11,675 lbs. of mail.

The table below shows the progress made by civil aviation in India since 1947 (for scheduled services alone).

Year	Miles flown (in thousand)	Passengers (in thousand)	Freight (in thousand lbs.)	Mails (in thou- sand lbs.)
1947	9,362	255	5,648	1,405
1948	12,649	341	11,975	1,583
1949	15,098	357	22,500	5,032
1950	18,896	453	80,007	8,356
1951	19,498	449	87,665	7,182
1952	19,562	434	86.038	8,377
1953	19,202	404	84,820	8,846
1954	19,798	432	86,415	10,673
1955	21,267	469	98,200	11,478
1956	23,481	559	96,231	12,686
1957	23,345	594	85,094	12,942

TABLE 229

Since 1947, the passenger traffic has more than doubled, the cargo loads have gone up more than 15 times, mail loads about 9 times and miles flown about 2½ times.

Air Corporations

In 1953, the Government of India decided to nationalise the air transport industry, and following the enactment of the Air Corporations Act, 1953, two Corporations, namely, the Indian Airlines Corporation and Air-India International were set up, the former for operating the domestic services and for services to neighbouring countries and the latter for long distance international air services. The Air Transport Council as contemplated in the Air Corporation Act, 1953, was constituted in April 1955. The Indian Airlines Corporation with its fleet of 97 aircrafts (63 Dakotas, 12 Vikings, 6 Skymasters, 5 Viscounts, 8 Herons and 3 other types)* links up most of the principal centres in the country, and its air routes cover a total mileage of 22,700. Air India International with its fleet of 8 Super Constellations, 3 Constellations and 1 Dakota provides services reaching out to 17 countries and covering a total route-mileage of 23,483.

Training

Pilots, engineers, aerodrome officers, control operators, radio operators, pilot instructors and technicians are trained at Allahabad in the Civil Aviation Training Centre of the Civil Aviation Department. During 1957, the Centre trained 358 candidates in various courses. At the end of 1957, there were 162 trainees at the Centre.

^{*}As on December 31, 1957.

India has 13 subsidieed flying clubs with herdquurters at Delhi, Romay, Madras, Patin, Birrackpore, Bhubanewar, Luchnow, Jullundur, Hyderabad, Nagpur, Japur, Indore and Bang-lore. In addition, there are three Government Gliding Centres at Poor-, Bingalore and Allahabad and the Deltin Gliding Club, New Delhi. During 1957, the flying clubs trained 233 "A" hience and 3" B" hience pilots. On December 1, 1957, there were 359 persons undergoing training at these flying clubs. During 1957-50, the Government of India awarded. 50 scholarships to deserving students for training at flying clubs.

Aerodromes

Eighty-five aerodromes are controlled and operated by the Caul Avaston Department of the Government of India. Three of these aerodromes-Bombay (Santa Caug), Calcutta (Dum Dum) and Delhi (Falam) are international airports. The aerodromes at Agartula, Ahmedabed, Paura, Bombay (Santa Caug), Calcutta (Dum Dum), Delhi (Palam), Delhi (Saldarjung), Midras (St. Thomas Mount), Tirucharpalai, Jodhpur, Bhuj and Amritasr have been declared customs necotromes.

The programme for development of cuil a viation during the second Plan period aims at meeting the new demands which have aither from recent technical advances and from India's obligations under the Convertion on International Civil Aviation to provide facilities at aerodremes in conformity with the standards laid down by the Convention. The programme includes works at aerodromes (Rs 8 8 3 crore), tele-communication equipment (Rs. 26 facility), and aeronautical inspection equipment (Rs 16 lakh), and aeronautical inspection equipment (Rs 16 lakh), and

During the first Plan 9 new aerodromes were constructed at Mangalore, Khowai, Kamalpur, Kailashahar, Belonia, Passighat, Shella, North Lakhimpur and Chandigurh, and three more at Haldwani Incar Namital), Kandla (Bombay) and Malda (West Bengal) are likely to be completed soon Several new aerodromes and gliderdromes will be constructed during the second Plan in pursuance of the general objective of providing aerodromes in the capitals of all the States and in other important towns throughout the country, eg, at Tulihal (Imphal), Razzul, Jogbani and Behala Schemes relating to the installation of telecommunication equipment, air routes and aerodromes equipment are drawn up on the assumption that, of the total number of serodromes under the control of the Cavil Aviation Department, by the end of the second Plan period, at least 50 will have to be provided with permanent ground lighting installations to facilitate the landing of aircraft at night and that aerodrome beacons will have to be provided at about 24 aerodromes. The main runway at Santa Cruz airport is being extended for the use of jet aircraft. It is proposed to establish 10 new gliding centres and 5 new flying clubs during the second Plan period.

Aircraft

An effort is being made to rationalise the air services by opening new routes and operating feeder services connecting remote places in the country with the trunk routes. The dakots aircraft is to be gradually replaced by larger and faster aircraft on trunk routes and on services to the neighbouring countries. On January 1, 1958, 536 aircraft held current certificates of registration and 224 aircraft held current certificates of registration and 224 aircraft held current certificates of anyorthness. The

For a list of acrodromes see Appendices.

number of current Aircrast Maintenance Engineers' licenses on January 1, 1958, was 953. During 1957, 24 new aircrast were registered.

Periodical flight checks and tests of pilots belonging to Air-India International, the Indian Airlines Corporation and non-scheduled operators, are regularly carried out.

Air Transport Agreements

A draft Civil Air Transport Agreement between India and Lebanon was signed at New Delhi on the 22nd March, 1957, for the operation of air services between the two countries and through them the points beyond. Air Transport Agreements have already been concluded with Afghanistan, Australia, Ceylon, Egypt, France, Japan, Netherlands, Pakistan, Philippines, Sweden, Switzerland, Thailand, Iraq, the United States of America and the United Kingdom. Temporary arrangements for the operation of scheduled air transport services also exist with certain other countries.

RAIL DASSENGERS

DOES YOUR LUGGAGE CONTAIN JEWELLERY, PRECIOUS STONES, WATCHES, SILKS, SHAWLS, CAMERAS, MUSICAL INSTRUMENTS

or other

"EXCEPTED ARTICLES"

If so, you are advised that when you entrust such articles to the care of the Railways for carriage and the value of such articles in any one package exceeds

- Rs. 300/-, you should
- (1) declare their value in writing at the time of booking, and
- (2) pay a percentage on the value so declared over and above the normal freight charges,

failing which the Railways will not accept liability for the loss, destruction, deterioration or damage of such articles. The articles named above and many others you will find listed as "Excepted Articles," in the I.R.C.A. Coaching Tariff No. 17.

The Station Master of the nearest station will give you detailed information if you contact him-

CENTRAL & WESTERN RAILWAYS

CHAPTER XXVII

COMMUNICATIONS

The communication services constitute the second largest State undertaking in India, being next only to the railways. The number of persons employed in them on March 31, 1957, was 3,01,798 while the capital outlay was Rs. 100 crore.

The postal, telephone and telegraph services are provided by the Department of Posts and Telegraphs which also undertakes work connected with the Post Office Savings Bank, National Savings Certificates and Postal Life Insurance. Headed by a Director-General, who is also the Chairman of the Posts and Telegraphs Board, the Department functions through 13 territorial units—12 post and telegraph circles and 1 postal circle for Delhi only. There are four telephone districts for the cities of Calcutta, Bombay, Madras and Delhi and six other administrative units on a functional basis. The Department functions as a commercial-cum-utility service and makes over a part of its surplus earnings as a contribution to the general revenues, the balance accruing to the credit of the Department. The accumulated surplus on April 1, 1957, stood at Rs. 22.08 crore.

The Overseas Communication Service came into being on January 1, 1947, when external communications operated by the Indian Radio and Gable Communications Co., Ltd., were taken over by the Government. It now functions under a Director-General with two main branches (Traffic and Engineering) and four 'gateway' centres at Bombay, Calcutta, Delhi and Madras.

POSTAL SERVICES

The steady expansion of the postal network in India, as reflected in the mounting volume of postal traffic and postal revenues during the last thirty years, is shown below:

TABLE 230
POSTAL TRAFFIC AND REVENUES

	ostal articles	Postal	revenues	
Year	Total (in crores)	Average per head of population	Total (in crores of rupees)	Average per head of population in tupees

The number of new post off ces opened between April 1, 1937 and november 30 1937, was 735. The programme for opening post off cet in v Ilaves with a population of 2 000 and above was practically completed in 19.3. A new pol cy was, therefore evolved for the extension of postalfact it is in the rural areas. According to this policy, post offices were to be opened in areas. According to this policy, post offices were to be opened in a reset of a constant of the policy post of the section of the policy post of the section of the policy post of the policy p

Urban Mobile Post Offices

The Urban Mobile Off ce Scheme was first introduced as an experimental measure at Nagpur Subsequently, the Scheme was extended to Madras Delhi Bombay and Calciuta The mobile post office visit important centres of the c ty at specified hours after the ordinary post off ces have closed for the day to enable the public to derive full henefit of the Night Air Mail S rates It works on all days of the year, including Sundays and

other postal holidays. Money orders are not accepted at the mobile post offices nor is Savings Bank business transacted by them.

Air Mail and All-up Schemes

An inland night air mail service linking up the principal cities of India, namely, Bombay, Calcutta, Madras, Delhi and Nagpur was introduced on January 30, 1949. Under the 'All Up Scheme' introduced on April 1, 1949, all inland letters, letter cards and post cards are normally carried by air without any air surcharge. The Scheme was extended to inland money orders from May 1, 1951.

Air Parcel Service with Foreign Countries

The direct air parcel service which was introduced from India to Australia, Egypt, France, UK and USA on January 2, 1953, was subsequently extended to the following countries: Aden, Afghanistan, Bahrein, Burma, Belgium, Canada, Ceylon, Czechoslovakia, Denmark, East Africa (Uganda, Kenya and Tanganyika), Ethiopia, Fiji, Germany, (Federal Republic), Germany (Democratic Republic), Holland, Hong Kong, Indonesia, Iran, Iraq, Ireland, Italy, Japan, Malaya, Mauritius, New Zealand, Pakistan, South Rhodesia, Sudan, Sweden, Switzerland, Thailand and Zanzibar.

Postal Savings Bank

Facilities are available at most post offices in the country for depositing savings, the maximum limit of deposit for an individual depositer being Rs. 15,000 and for a joint account Rs. 30,000. The interest rate on these savings accounts are $2\frac{1}{2}$ per cent per annum on any sum not exceeding Rs. 10,000 in the case of individual account and Rs. 20,000 in the case of a joint account and 2 per cent per annum on the remainder of the balance.

Bi-weekly withdrawals subject to a maximum of Rs. 10,000 are now possible at the G.P.Os at Bombay, Calcutta, Madras, Delhi and New Delhi. This factility will be extended to all other post offices with effect from April 1, 1958.

The system of withdrawals by cheques has been introduced in Bombay and this facility will be extended to all head and sub post offices. To start with, the facility will be made available in nine cities.

Postal Certificates

A new series of National Plan Savings Certificates was introduced in June 1957*. These are encashable at any time after the completion of twelve months from the date of issue. To afford facilities to illiterate persons in villages for encashment of certificates purchased by them, payment for certificates of a sum not exceeding Rs. 200 is made through the village postman.

TELEGRAPHS.

On the eve of the first Plan, the telegraph network in India was considered inadequate for the country's vast areas. The first Plan aimed at a large-scale expansion of the services to new areas. It was proposed to open a telegraph office in every town with a population of 5,000 or over, in every sub-divisional headquarter and every thana or police station, irrespective of size. By the end of March 1957, only 2 out of 322 district towns, 19 out of

^{*} For details, see Appendices.

476 sub divisional towns and about 169 out of 1,380 tehsil towns remained without telegraph facilities. The number of telegraph circuits between important stations increased with the initialization of the Voice Frequency Telegraph (VFT) system between more places.

The second Plan provides for opening 1,400 telegraph offices and for extending the telegraph network in the underdeveloped areas by opening telegraph offices at about 200 places which are now far away from the existing network. The Plan also provides for improvement of the main network introduction of Telex and Printergram services and modernisation of the central Telegraph Offices and Educiting Madrais and New Dellin Between April 1 1936 and December 31, 1937, 581 telegraph offices were opened out of which 193 were provided at administrative stations. The total number of telegraph offices (exclusive of the enced offices) on December 31, 1937 was 5 583 and the telegraph channel milege was 3 2 [618 channel miles

Some salient facts and statistics regarding the telegraph services are given below

TABLE 233

	1954-55	1955-56	1956-57
Aumber of telegraph offices (including I censed effice) Number of telegrams esclud og P & T service telegrams (lakh) Mileage of overhead wires Mileage of out-ground cable conductors Carrier and VFT Channels Telegraph revenues (crores of rupees)	8 792 305 8 26 708 9 22,202 4,50 648 6 2	9 893 335 8 67 199 10 03 437 4 79 210 6 7	10 069 345 9 10 451 12 47,361 5 39 410 7 7 7

Out of 345 lakh telegrams (excluding the P&T service telegrams) transmitted during 1956 57, 301 lakh were inland and 44 lakh foreign telegrams. The revenue derived from these telegrams amounted to Rs 6.52 ctore (Rs 205 crore from inland telegrams and Rs 1 47 crore from foreign telegrams). Out of 301 lakh inland telegrams about 261 lakh were private and the rest State and Press telegrams. The number of Press telegrams during 1956 57 was 2 40 lakh.

A Tape Relay exchange was installed at Bombay in June 1907, thus mirroducing for the first time in the country modernised telegraph working whereby messages are transmitted automatically to the destination stations connected to the exchange by push button operation

Telegraph Service in Hinds and other Isdian Languages

To begin with a Hindi Telegraph Service was introduced on June I 1949 at numplace via Yaru Allahabad, Gaya, Jabalpur, Kanpur, Lucknow Telana and Varanau In pursuance of the policy of its gradual victions to other places the facility a now available at about 1,250 offices (usclud ay 41 Railway Telegraph offices) in the country. The service has been introduced to Medras and Gauhata also. To cope with the uncreasing termand of operators trained in Hindi Morse, training classes have been opened at twelve places. Over 2 000 operators have hitherto been trained at

Telegrams can be sent in any Indian language provided they are written in Devanagari script.

In addition, the following special services and facilities have been made available in the Hindi Telegraph system:

- (i) Greetings telegrams on festive occasions are accepted.
- (ii) Emergent telegrams to call relatives and friends in case of serious illness or death are admitted.
- (iii) Local telegrams are allowed.
- (iv) Telegrams in Hindi can be tendered on Phonogram System where such a facility exists.
- (v) Telegraphic money orders are also allowed.
- (vi) Registration of telegraphic abbreviated addresses is allowed at concessional rates.

Telegraph traffic in Hindi is gradually increasing as shown below:

2,570 1949-50 1950-51 5,784 7,801 1951-52 18,639 1952-53 28,503 1953-54 45,501 1954-55 . . 58,522 1955-56 . . ٠. 1956-57 66,927 . . ٠.

TABLE 234

Hindi Teleprinters

Some English teleprinters have been modified for the requirements of Hindi at the training centre at Jabalpur. These were first brought into use in January 1953. In addition to these modified teleprinters, 'Olivetti' Hindi teleprinters are also being used.

Flash Telegrams

A new class of telegrams, known as 'flash message," was introduced on April 15, 1947, for the Press. Though these messages are charged for at the same rate as the private express telegrams, they receive a higher priority. Flash telegrams may be communicated over the telephone, if so desired.

Human Life Telegrams

These telegrams are permissible in case of accidents, serious illness or death of a person, and are accepted at the inland express rates. Such telegrams receive priority in transmission over all express telegrams.

Photo-telegrams

Photo-telegrams are accepted for the UK, USA, Canada, Egypt, Australia, South Africa, Finland, Sweden, Belgium, Denmark, Greece, Germany (German Federal Republic), Italy, Portugal, Switzerland, Norway, China, Japan, USSR and France at special rates.

Telegrams to Follow

"To Follow service in foreign telegrams enables the sender, who is not quite certain about the exact place at which the addressee will be found to give various addresses at which the message is to be successively presented

Printogram Service

The Printogram Service introduced in Bombay from May 1, 1956 provides direct communication between the subscriber and the Central Telegraph Office and is almost similar to the Phonogram Service

TELEPHONES

Before the commencement of the first Plan, there were I 68 000 telephones in use in the country. The Plan aimed at (i) setting up a telephone exchange at every district headquarter and in every town with a population of 30 000 or over. (ii) extending trink facilities to every with divisional head quarter as well as to every town with a population of 20,000 or over, and (iii) opening a large number of public call offices. By the end of March 1977. 20 out of 322 district towns remained without telephone exchange though 12 of them had trink facilities. Of 476 sub-divisional towns 95 remained without public call offices.

The second Plan envisages provision of 1,200 long distance public call offices and 1 80 000 telephones as against the targets of 660 and 1 30 000 respectively during the first Plan Installation of an adequate number of 12 channel 3 channel and single channel carrier systems and additional switch boards has also been proposed

The largest scheme during the second Plan is the provision of trunk cable from Delhi to Calcutta and Delhi to Bombay including linking of important stations in rotal: like Agra Kanpur, Patina, Lucknow, etc. This scheme will provide an adequate number of trunk circuits between the clues on the rotate.

At the end of March 19a7, there were 3 07,000 telephones and the equipped capacity of the exchanges stood at 2 90,000 and channel miles age was 2 36 745.

The following table shows the number of telephones telephone exchanges trunk calls and the amount of telephone revenues during 1954 55 1955 56 and 1956 57

TABLE 235

Oun Your Telephone Scheme

The Own Your Telephone Scheme introduced in December 1949 is in operation at Ahmedabad Amritar, Bangalore, Bembay, Calcutta,

Delhi, Hyderabad, Kanpur, Madras and Nagpur. Up to January 31, 1958, the Scheme had 30,878 subscribers and the deposits amounted to about Rs. 6.93 crore and the number of telephone connections provided under the Scheme was 30,274.

Message Rate System

· Under the message rate system, a subscriber pays for every call that he makes plus a fixed monthly rental. This system is in operation at 35 stations, namely, Agra, Ahmedabad, Ajmer, Allahabad, Aleppey, Amritsar, Bangalore, Bareilly, Bombay, Bihar Coal Fields, Calcutta, Cochin, Coimbatore, Delhi, Ernakulam, Hyderabad, Indore, Jaipur, Jodhpur, Jullundur, Kanpur, Kottayam, Kozhikode, Lucknow, Madras, Mangalore, Patna, Poona, Quilon, Rajkot, Salem, Simla, Trivandrum and Vijayawada.

Telephone Industry

The Indian Telephone Industries Private Limited, was established in July 1948, at Duravaninagar, near Bangalore, for manufacturing telephones and other tele-communication equipment. Since February 1950, it is functioning as a joint stock company with an authorised capital of Rs. 4 crore, out of which the Government of India holds about 90 per cent. The other shareholders are the Government of Mysore and the Automatic Telephone and Electric Company of England.

The present production includes the manufacture of different kinds of telephones such as C.B., Auto, Intercom, railway control etc., automatic exchange equipment of sizes ranging from 10 lines to thousands of lines and transmission equipment for long distance working. The Factory which began by assembling telephones from imported parts is now manufacturing almost all the parts of telephones. In 1957, the factory produced over 50,000 telephones. As much as 85 per cent of the components required for auto exchanges are now made in the factory.

On the transmission side, single, three and twelve channel carrier telephone systems are in production. Other items manufactured are V.F. repeaters, secrecy equipment, transmission measuring equipments, etc.

OVERSEAS COMMUNICATIONS

The Overseas Communications Service, taken over by the Government of India on January 1, 1947, has now fifty-one direct radio services which link India with foreign countries. During the last six years, the external communications branch handled about 162 lakh telegrams consisting of about 4,214 lakh words; 1,02,000 radio telephone calls of about 5,88,000 minutes' duration; 1,075 radio pictures of about 3,69,100 sq. cms. in area and about 120 lakh multipress words.

Radio Telephone

India has direct radio telephone services with the following countries: Aden, Australia, Bahrein, Burma, China, East Africa, Egypt, Ethiopia, France, Hongkong, Indo-China, Indonesia, Iran, Japan, Malaya, Poland, Saudi Arabia, Switzerland, the United Kingdom and the USSR.

Radio telephone services via London are available between India and Algeria, Argentina, Barbados, Belgium, Bermuda, Brazil, Canada, Ceuta, Cuba, Czechoslovakia, Denmark, Finland, Germany, Gibraltar,

Greece, Guatemala, Honduras, Hungary, Iceland, Israel, Italy, Lebanon, Lustembourg, Mexico, Morocco, Netherlands, Newfoundland, Nucaragua, North Rhodesia, Norway, Panama, Span, South Africa, South Treland, South Rhodesia, South-West Africa, Sweden, Tangier, Tunisii, the United States of America and the Vatiena City.

Radio Telephone Service is also available to Yugoslavia via Berne Gairo (Espipt), to New Zealand via Australia, and to Asmara via Ethiopia. The following ships at sea make use of the radio telephone services. America, Althone Castile, Capetoun Castile, Caronia, Constitution, Ethiopia, Ethiopia Statile, Empress of Britain, Express of England, Independent, Natural, Estima, Maurelania, Neovia, Niew Amitradim, Olympia-Eir, Orash, Ogietin Mary, Rena-Del-Mar, Riyadam, Saxonia, String Castle, Umted State and Zion

Radio Telegraph

The Oversets Communications Service also operates radio telegraph services to the following countries 'Afghanistan, Australia, Burma, Cana, Egypt, France, Indo-China (Sagon), Indo-China (Hano), Indonesia, Iran, Japan, Poland, Thailand, the UK, the USA, the USSR, and Yugoslavia

Radio Photo

Direct Radio-Photo Services operate between India and China, France, Japan, Poland, the UK, the U.S.A., and the USSR In addition, the service is at present available for transmission of photographs via London to Australia, Belgium, Canada, Demmark, Egypt, Frialand, the Federal Republic of Germany, Greece, Italy, Norway, Portugal, South Africa, Sweden and Switterland

CHAPTER XXVIII

LABOUR

In the organised sector of India's economy, the largest number of workers are employed in factories. In 1956, the average daily employment in factories stood at 28,82,309.* Plantations provided (in 1954) average daily employment to 12,42,158 workers, while the Railways employed 10,54,408 workers daily in 1957. 5,90,712 workers were employed daily in the mines in 1955 and 33,439 in major ports other than Calcutta.

The following table gives the State-wise break-up of average daily employment figures in factories subject to the Factories Act for the period 1953 to 1956.

TABLE 236 EMPLOYMENT IN FACTORIES (Covering only those subject to the Factories Act)

	7			Average daily number of workers employe

1953 1954 1955 1956 July 1956 July 1957			1,81,973 1,81,280 1,87,593 1,87,068 1,82,490 1,78,810	28,866 28,457 30,161 29,823 27,009 27,850	1,26,957 1,22,583 1,22,861 1,16,499 1,15,652 1,10,845	3,37,796 3,32,320 3,40,615 3,33,390 3,25,151 3,17,505

^{*}Relates to factories in Andhra, Assam, Bihar, Bombay, Madhya Pradesh, Madras, Orissa, Punjab, U.P., West Bengal and Delhi. The figure in respect of the other States (former Part B States and Part C States other than Delhi, Coorg and Ajmer) was 3,79,199 in 1955. **Provisional (for reorganised States)

The employment position in the cotton mill industry is as follows:

FABLE 233
EMPLOYMENT IN COTTON MILL INDUSTRY

Year	Tetal number of	Neras	r of workers er	nploved	
workers on rolls		First shift	Second shift	Third shift	Total
1953 1954 1955 1956 September 1957 September 1957	8 01 853 7 97 443 8 55 78 9 3 .8*3 9 45 504 9 39 578	4.21 383 4 16,227 4 19 236 4 34 231 4 41 624 4 36 212	2 58 372 2 58,851 2 62 226 2 76,504 2 81 982 2 80 846	63 724 66 091 76 582 96 056 1 01,517 97,426	7,43,964 7 41 169 7,58 044 8 00,791 8 25 123 8 14,224

Productivity

Studies on the productivity of labour were initiated in India only recently. On the basis of the census of manufacturing industries for the year 1950, labour productivity figures were compiled in 1952 for different industries and also for small, medium and large establishments in each industry. The following table sets out the findings in respect of certain selected industries.

TABLE 239
PRODUCTIVITY OF LABOUR (1950)
(Value added per man-hour)

(In pupers) Industrice VI sizes Small size Molium size Large size Sugar Cement 1 4 1 5 0 7 1 4 Cotton text les 0 7 i Woollen textiles ō 08 fute textiles ĭ 2 ō i Iron and steel 0 3 Õ Ś ñ 0 6 Chemicals 1 4 ñ Ďя́ ĭš All sodustoes 1 5 1 7 26

A study of the changes in the productivity and earnings in certain industries in India published in 1955 revealed that:

- (i) in the case of the coal mining industry, the overall rate of increase in productivity for miners and loaders during the period 1951 to 1954 was 0 076 per month as against 0 26 in the average weekly cash earnings.
- (ii) in the case of the paper industry, the average earning of workers increased during the period 1948-1953, but there was no evidence of an increase in productivity,
- (iii) in the case of the jute textile industry, the rate of increase in productivity during the period 1948 to 1953 was 2 9 per year as against 3 7 in earnings, and

(iv) in the case of the cotton textile industry the annual rate of increase in the productivity index during the period 1948 to 1933 was 2 28 as against 1 14 in that of earnings. In 1955 the trend in the relation of the index of productivity of factory workers to the trend in the index of real earnings was studied with the following results:

TABLE 240
PRODUCTIVITY AND REAL EARNINGS OF FACTORY WORKERS

1 ear	Year			1939 = 100) of
			Real earnings	Productivity
1940 1941 1942 1943 1944 1945 1946 1948 1949 1950 1951 1952 1953			108.6 103.7 89.0 67.0 75.1 74.9 73.2 78.4 84.4 91.7 90.1 92.2 101.8	104.2 94.8 85.3 84.5 86.3 79.5 74.7 72.5 79.4 75.6 78.8 88.7 97.4 105.8 113.0

On the basis of the monthly statistics published by the Chief Inspector of Mines in India, the productivity of workers employed in coal mines was as follows:

TABLE 241
PRODUCTIVITY OF WORKERS IN COAL MINES

,		Output	(in tons) per man	shift for
' Peri	od	Miners and loaders	All persons employed under- ground and in open workings	All persons employed above and underground
1953 (Average) 1954 1955 1956 July 1956 July 1957	,	 1.05 1.09 1.10 1.12 1.13 1.16	0.57 0.58 0.54 0.59 0.58 0.59	0.35 0.37 0.37 0.38 0.38

NATIONAL EMPLOYMENT SERVICE

The Employment Service, started in 1945, consists of a net-work of Employment Exchanges, each staffed by personnel trained in a carefully devised procedure. The Employment Exchange renders employment assistance to all grades and categories of employment seekers. It also discharges certain special responsibilities such as the provision of employment assistance to displaced persons, discharged Government employees and those belonging to the Scheduled Castes and Tribes.

At the end of November 1937, there were 172 Exchanges in the country Table 242 below gives figures relating to the activities of the Exchanges during the period 1933 57

TABLE 242

EMPLOYMENT EXCHANGE STATISTICS

The day to-day administrative control over the employment exchanges was transferred to the State Governments with effect from November 1, 1956 The Central Government now limits as responsibilities to poleymaking co-ordination of procedure and standards and to rendering of assistance whenever needed

Several schemes such as (i) the collection of employment market information, (ii) occupational research and analysis, (m) the publication of career pamphlets and hardsearch and analysis, (m) the publication guidance and employment counseling and (i) the development of oral testing are under was to improve the quality of service being rendered by the evchanges

Craftsmen Training

There were 104 training centres under the Craftsmen Training Scheme at the end of December 19.7 Their present capacity of 10,500 With a view to meeting the increased by 13,400 seats by the end of the second Plan period the Central Training Institute Aoni Bilaspur (MF) has been re-organised and a second centre will be started at Aunth (Bombay).

A National Council for Training in Vocational Trades has been set up to advise the Government of India on all questions of training policy, to co-ordinate vocational training and to lay down uniform standards. It also awards national certificates of profilectney to craftomen.

WAGES AND EARNINGS

Annual Earnings

The following table gives the average annual earnings of factory workers

Regulation of Wages

The regulation of wages is governed by the Payment of Wages Act, 1936 and the Minimum Wages Act, 1948 as amended subsequently. The former extends to the whole of India except the State of Jammu and Kashmir and applies to persons employed in any factory and upon any railway in respect of wages and salaries which average below Rs. 400 a month. Under authority vested in the Act, the provisions of the Act have been extended to mines, plantations, certain categories of State transport services and the construction industry.

The Minimum Wages Act empowers the appropriate Government to fix minimum rates of wages payable to employees in industries specified in the Schedule. Such rates have been notified and enforced in most of the scheduled industries and, under an amendment of 1957, all categories of workers including those employed in agriculture are required to be brought within the purview of the Act by the end of 1959.

The function of Wage Boards set up under the Bombay Industrial Relations Act, 1946, is to fix a wage structure on the principle of fair wages. The decisions of the Board for Working Journalists have recently been set aside by the Supreme Court as "illegal and void" Two more Boards for the cotton textile and sugar industries have been set up.

Wage Census Scheme

A scheme to conduct a wage census in 50 major industries covering 85 per cent of employment in mines, 76 per cent in factories and nearly the whole of the employment in plantations is underway and is to be completed in two years.

Steering Group on Wages.

The steering Group, consisting of nominees of the Union and State Governments and representatives of workers and employers, will study the trends in relation to wages, production and prices, and plan the collection of material for drawing up a wage map of India, industry-wise and region-wise for the guidance of wage-fixing authorities.

Coal Mines Bonus Schemes

The Coal Mines Bonus Schemes framed under the Coal Mines Provident Fund and Bonus Schemes Act, 1948 are in operation in the coal mines of West Bengal, Bihar, Madhya Pradesh, Orissa, Andhra Pradesh, Rajasthan, Assam and Bombay. Under these schemes, colliery workers, other than those in Assam, are entitled to receive a third of their basic earnings as bonus by virtue of a minimum qualifying attendance during the quarter. In Assam, bonus is paid on a weekly basis to those employed on a weekly wage and on a quarterly basis to those employed on a monthly basis.

INDUSTRIAL RELATIONS

Industrial Disputes

The table below shows the number of disputes, workers involved and man-days lost during 1951-56 and in October 1957:

TABLE 247

Year	Number of disputes	Number of workers involved (in thousands)	Total number of man-days lost during the period (in thousands)
1951	1,071	691	3,819
1952	963	809	3 337
1953	772	467	3 383
1954	810	477	3,373
1953*	1,166	528	5 678
1936	1,203	715	6,992
October 1957	190	93	472

Industrial Employment Standing Orders

Under the Industrial Employment (Standing Orders) Act, 1946, the Central and State Governments has eframed model rules for adoption by industrial establishments employing 100 workers more The measure has been estended to all establishments in West Bengal employing 50 workers or more and, under certain cucumstances, to all industrial concerns employing less than 100 persons in U.P. In Assam, it applies to all industrial establishments (except mines, quarnes, oilfields and railways) which employ 10 workers or more.

Discipline in Industry

A Code of Discipline has been evolved with the approval of the Indian Labour Conference and the Standing Labour Committee A tripartite Committee will examine breaches of the code and non-implementation of awards and will publicuse cases of flagrant violation

Works Committees

Under the Industrial Disputes Act, 1947, 779 works committees in central undertakings were functioning at the end of the third quarter of 1957. The number of works committees and production committees (in 1954-55) in private undertakings in the States was 2,095.

Triparlite Machinery

The machinery at the centre mainly consists of the Indian Labour Conference, the Standing Labour Committee, the Industrial Committee and a few others. There is also the Labour Ministers' Conference which is closely associated with the machinery though not tripartite in character. The subjects discussed at the annual sessions of these bodies in 1957 included wage policy, discipline in industry, rationalisation, workers' education and workers' participation in management. The 8th Session of the Industrial Committee on Plantations was held at Shiflong on January 2, 1958. It has been decided to set up new industrial committees for the iron and steel and chemical industries. Another committee for mines other than coal mines is under active consideration.

^{*}These figures exclude figures for Kerala Mysore and Rajasthan which were pressously included

Conciliation Machinery

The administration of industrial relations in the central sphere undertakings rests with the Chief Labour Commissioner. To assist the Chief Labour Commissioner, a field organisation consisting of Regional Labour Commissioners and Conciliation Officers and Labour Inspectors has been set up. Similarly, the State Governments have their own conciliation machineries, headed by the Labour Commissioners.

Adjudication Machinery

There is a three-tier machinery for the adjudication of industrial disputes—Labour Courts, Tribunals and National Tribunals—all with original jurisdiction. An ad hoc National Tribunal is functioning at Lucknow. There are two Industrial Tribunals—one at Dhanbad and the other at Nagpur, the latter also acting as a labour court. In addition, there is one ad hoc Industrial Tribunal at Delhi. The States have their own Tribunals and Labour courts.

Workers' Participation in Management

The recommendations of the study group which made a first hand study of the working of the scheme in certain Western countries, were considered by the Indian Labour Conference in July, 1957. The Conference decided to experiment with management councils on a voluntary basis and appointed a tripartite committee to examine and consider further details of the scheme. The Committee has drawn up a list of establishments which agreed to co-operate and defined the scope and functions of the councils. At a seminar of a representative character organised in January-February 1958, a model agreement for the setting up of these councils was approved.

TRADE UNIONS

The following tables show the number and membership of registered trade unions in India and of those affiliated to each of the four national federations:

TABLE 248

SOCIAL SECURITY

Employees State Insurance Scheme

The provisions of the 1-mployees State Insurance Act, 1946, apply to all prennial factories using power and employing 20 or more personal and certain the provision of the provision and see all abserts and derical with monthly cartings below R4 400. There had not been to converted by the scheme in areas below R4 400. There had not been implemented. At the end of 1935-56 employers contribution at sood at R8 2.37 errors and employers contribution at R8 2.25 errors. As aim of R8 1.13 errors was given to insured persons by way of benefits (R4.79) 315 lakh towards stehess, R8 2.26 lakh towards statement, R8 10 63 lakh towards stemporary duablement, R8 0.63 lakh towards stemporary duablement duablement.

Employees Provident Fund

The Employees Proordent Funds Act, 19-2 applies to all unitemploying 50 or more workers and all workers with monthly earnings of Rs 300 or us are required to make a minimum contribution of 64 per cent of their are the pulled action of the Act has been extended to proceed than 30 industries including more other than coal mines and plantations. At present 6 215 factories/establishments employing about 28 11kh workers are covered. The total provident fund contributions amounting to about 88, 100 cross

Coal Mines Provident Fund Schemes

Workers are required under these schemes to contribute about 6f per cent of their bas c v age and dearness allowance inclusive of food con cessions in cash or kind the employer contributing a similar amount. The total assets of the Fund amounted to over Rs 11 crore at the end of November 1937.

Workme s Compensat on

The Workmen's Compensation Act, 1923 provides for the payment of compensation for injuries received during employment occupational diseases and deaths resulting from such injuries and diseases. Employees earning up to Rs 400 a month are covered.

Verif ed figu es not available

Maternity Benefits

Legislation concerning the payment of maternity benefits is in operation in almost all the States. Some of the State Acts apply to all regulated factories within their jurisdiction, while others apply to non-seasonal factories only. The qualifying period and the rates of benefit vary from State to State. There are 3 Central Acts—the E.S.I. Act, 1948, the Mines Maternity Benefit Act, 1941 and the Plantations Labour Act, 1951—which also regulate payment of maternity benefits.

LABOUR WELFARE

Provision for amenities such as canteens, creches, rest shelters, washing facilities, medical aid and for the appointment of welfare officers has been made in respect of industries and establishments covered by the Factories Act, 1948, the Mines Act, 1952, and the Plantations Labour Act, 1951. In addition, legislative measures for the constitution of funds for financing welfare schemes have been enacted and are in force.

Coal Mines Labour Welfare Fund

The Fund maintains 2 central hospitals, 5 regional hospitals-cummaternity and child welfare centres, 2 mobile dispensaries and 2 T.B. clinics. Steps have been taken to increase their number. Anti-malaria measures and B.C.G. campaigns are also in operation. An Infectious Diseases Hospital at Chandkuiya has been sanctioned for the Jharia Mines Board of Health.

The Fund is also running adult education centres, women's welfare centres, children's parks and a family counselling service. A scheme for imparting elementary education to miners' children has also been approved.

Under the old subsidy scheme for construction of houses, 2,805 houses were sanctioned, out of which 1,623 houses have already been completed. Another 3,077 houses were sanctioned under the Revised Subsidised Housing Scheme, while a new housing scheme for construction of 30,000 houses has been sanctioned. A sum of Rs. 1.14 crore was allotted and Rs. 0.6 crore spent by the Fund till the end of 1956-57.

Mica Mines Labour Welfare Fund

The Fund provides medical, educational and recreational facilities for mica mine workers. Two hospitals have been established by the Fund at Karma (Bihar) and Kalichedu (Andhra) and another is to be established at Gangapur (Rajasthan). Several dispensaries with maternity and child welfare centres are under construction and 2 mobile medical dispensaries are operating in certain areas. The Fund maintains several primary schools, awards sholarships and distributes books and stationery free of cost. During 1957-58, the sums provided to the mica producing States were Rs. 9.77 lakh to Bihar, Rs. 2.47 lakh to Andhra Pradesh and Rs. 3.55 lakh to Rajasthan.

Welfare of Plantation Labour

Under the Plantations Labour Act, 1951, all plantations are required to provide housing accommodation to their resident workers and their families and to maintain hospitals or dispensaries. Some of them also maintain elementary schools for the eduation of the labourer's children. Recreational facilities and training in useful handicrafts such as tailoring, knitting, weaving and basket-making, have been provided in some of the tea estate centres with the help of donations from the Tea Board. The Coffee and Rubber Boards have also agreed to allocate funds for the welfare of workers employed in coffee and rubber plantations.

Labour Welfare Funds in Central Givernment Industrial Undertakings

These welfare funds were created on a voluntary basis in 1946 for financing welfare activities among workers During the year 1956-57, a sum of Rs 200 lakh was made available for welfare amenities for 47 032 wackers

Labour Welfare Centres

Most of the Governments of the States and Union Territories are running a number of welfare centres. These centres cater to the recreational, educational vocational and cultural needs of the workers and their children All private industrial establishments of some standing also maintain welfare centres for the benefit of their workers

INDUSTRIAL HOUSING

The Subsidued Industrial Housing Scheme, which came into operation in September 1952 envisages the construction of houses for industrial work ers governed by the Factories Act, 1948 and mine workers covered by the M nes Act 1952 except those employed in coal and mica mines Under the scheme, loans and subsidies are given by the Central Government to State Governments statutory Housing Boards, industrial employers and registered co-operative societies of industrial workers The following table indicates the financial assistance given by the Centre till the end of 1957

TABLE 250 (In ererts of supres)

Agency	Loan	Subsely	Total	No of houses sanctioned
1 State Govis 2 Employers 3. Workers Co-operatives	12 08 0 83 0 25	11 37 0 93 0 13	23 45 1 76 0 38	75 985 13 171 1 747
TOTAL	13 16	12 43	25 59	90 303

The number of houses completed till the end of November 1957, aggregates to about 66 700, the rest being at various stages of construction

Plantation Labour Housing Scheme

The Plantation Labour Act, 1951, makes it obligatory for every planter to provide housing accommodation for all his workers. As most of the plan ters especially the smaller ones were not in a position to fulfil this obligation, a scheme known as the Plantation Labour Housing Scheme was formulated an April 1956 and communicated to the State Governments envisages the grant of assistance in the form of interest bearing loans (to the extent of 80 per cent of the cost of houses) to the plantes through the State Governments There is a prous on of Rs 2 crore for the construction of 11 000 temperate during the construction of the construction of 11 000 tenements during the second Plan During 1956 57 the Kerala Government withdrew a sum of Rs 1 50 lakh for disbursement among the planters in the State for constructing houses for their employees

ADMINISTRATION OF LABOUR LAWS

The administration of labour laws is a divided responsibility. The Central Government, through its various offices, administers the labour laws applicable to mines, railways and other central undertakings. The rest of the labour laws are administered by the State Governments through their own organisations. The Central organisations concerned are:

- (i) the Office of the Chief Labour Commissioner, New Delhi.
- (ii) the Office of the Coal Mines Welfare Commissioner, Dhan-bad;
- (iii) the Office of the Coal Mines Provident Fund Commissioner, Dhanbad;
- (iv) the Offices of the Welfare Commissioners, Mica Mines Labour Welfare Fund, Dhanbad, Jaipur and Nellore;
- (v) the Office of the Chief Inspector of Mines, Dhanbad;
- (vi) the Office of the Chief Adviser of Factories, New Delhi;
- (vii) the Office of the Director-General, Employees' State Insurance Corporation, New Delhi;
- (viii) the Office of the Controller of Emigrant Labour, Shillong;
 - (ix) the Office of the Director, Labour Bureau, Simla; and
 - (x) the Office of the Central Provident Fund Commissioner, New Delhi.

#### CHAPTER XXX

#### INDIA AND INTERNATIONAL ORGANISATIONS

The activities of the Government of India in the international sphere have been guided since independence by the ideals of conduct embodied in one of the directive principles of the Constitution. This directive requires the State to endeavour to promote international peace and security, to maintain just and honourable relations between nations, to foster respect for international Iww and treaty obligations and to encourage settlement of international disputes by arbitration

#### UNITED NATIONS ORGANISATION

A founder-member of the United Nations Organisation, India is a firm adherent of the principles enshrined in the UN Charter. Her association with the United Nations has been marked by a number of significant events, the most notable being the spontaneous tribute paid in 1948 by the world organisation to Mahatima Gandhi and through him to the great traditions of the country which gave birth to him. Among others worth recalling have been India's membership of the Security Council for a two-year term from 1930 to 1952, the Indian Plan for the solution of the prisoners of war problem and the case-fire in Korea, her charmanship of the Neutral Nations' Repatriation Commusion for Korea in 1933-54, the election of Smt. Viayalakshim Pandit as the President of the eighth session of the UN General Assembly in 1933, and India's charmanship of the UN-sponsored International Conference on Atoms for Peace in Geneva in 1953.

The Indian delegation to the twelfth session of the UN General Assembly in 1957 was composed as follows:

Representatives .. V.K. Krishna Menon (Chairman), Ali Yavar Jung, G.S. Pathak, Arthur S. Lall,

Rev 1r. J D'Souza

Alternate Representatives - Fakhruddin Ali Ahmad, M Gop

Menon, JN Sahni, Mona Hensman.

Advisers . Tarakeshwari Sinha, Aytar Singh, R.A.

Narayanan, R. Japal, P.N. Kaul, A.K.
Mitra, Romesh Bhandari, N.E. Chacko
Secretary-General

y-General .. T J Notarajan

#### POLITICAL AND SECURITY

### Hungary

In the discussions on Hungary during 1957, India continued to oppose "the presence of foreign troops, whether in Hungary or anywhere else in the world", while emphasising the avoidance of a negative approach to the studies in order that honourable negotiations between the UN and the parties concerned much the facilitated

#### Egypt and Israel

With six other member-nations, India introduced and secured passage of two separate resolutions during the debate on the Secretary-General's

suggestions for the evacuation of Israeli troops from Egyptian territory. The first one called for the complete withdrawal of Israeli troops from Egypt and the other asked the Assembly to recognise that the Israeli withdrawal "must be followed by action which would progress towards the creation of peaceful conditions." Reiterating her earlier stand taken at the time of contributing troops to it, India maintained that the United Nations Emergency Force could at no time become an occupying force in another country and the movements and functions of the force, therefore, must depend upon the agreements made.

# Algeria

In the debate on Algeria, India's experience with her former rulers was cited in support of the view that "once independence is gained, cooperation between former rulers and former colonials, on a basis of equality and mutual respect, is possible; but it is possible only if that co-operation comes by free will from both sides. Co-operation that is compelled still spells domination." The Assembly's recommendation calling for efforts to resolve the Algerian problem through private talks in conformity with the principles of the UN Charter was described by the Indian representative as "the best way out" at this stage.

# Syria and Turkey

With the assistance of Norway, Japan and the United States, India was responsible for a compromise, as part of an agreed formula, to end without a vote the debate on Syria's demand for a commission of inquiry to investigate the crisis on the border between Syria and Turkey.

# Cyprus

During the debate on the Cyprus question in December 1957, the stand taken earlier in the eleventh session that it was a colonial question was reaffirmed by the leader of Indian delegation who observed: "We stand four square by the independence of the Cypriot people and their right to be a sovereign State entitled to membership of the United Nations."

# Kashmir

In pursuance of the Security Council's resolution of February 21, 1957, Dr. Gunnar Jarring visited the sub-continent and later submitted his report. During the discussions in the Council on the report, India was represented by V.K. Krishna Menon, who detailing Pakistani violations of the Security Council's resolution of January 17, 1948 and Part I of the UNCIP resolution of August 13, 1948 as recorded by the agencies of the Council in their reports, emphasised that vacation of Pakistani aggression on Indian Union territory was the issue before the Council. The Indian representative made it clear that the Government of India could not accept the resolution requesting Dr. Graham to visit the sub-continent for further talks with the Governments of Pakistan and India but assured Dr. Graham the traditional hospitality of his country. He added that the resolution which India could accept and which, he hoped, the Council would adopt in time would be one calling upon Pakistan to vacate the aggression in terms of the UN Charter.

## Disarmament

Ever since it came up before the UN, India has taken an active interest in the problem of disarmament and made certain concrete proposals for its solution at the tenth session of the Assembly as also before the Disarmament Commission in July 1956. During the twelfth session of the Assembly,

India sponsored, jointly with four other countries, a resolution seeking to enlarge the nembership of the Disarmament Commission and to find a modus mend aimed at the reconcilation of the Soviet and Western attributes on the issue India was chosen as one of the eleven members of the enlarged Commission

When the 24-Power Resolution sponsored by the Western Powers came up for discussion in November 1957, India moved a number of amendments, one of which sought inclusion of a provion for the setting up of a scientific technical body to recommend a system of control and inspection after immediate agreement for the cessition of nuclear tests and another asked that powers possessing atomic weapons should abstain from using them

#### Atomic Energy

India was designated as one of the ten permanent governors of the International Atomic Energy Agency the instruments of which were ranfied by her in July 1957. At the General Conference of the Agency held in Vienna in October, India played an active role in the drafting of a resolution seeking agreement between the UN and the Agency, which was ranfied by the Assembly in November 1957.

# Trust and Non-Self Governing Territories

India has been a member of the Trusteeship Council since 1954 and was re-elected for a further term of three years beginning from January 1957 at the eleventh session of the UN General Assembly A agindicant event of the year 1957 was the election of the Indian representative as Chairman of the Standing Committee on Petitions and of the Committee on Administrative Unions

At the nuneteenth season of the Council in 1957, India was represented by V. S. Irishian Menon with Arthur S. Lall as alternate representative. She lent her support to Thailand's proposal for augmenting the membership of Syria the 1900 of South West Africa from seven to nine. Along with a legislative assembly by adult suffrage in French. Togoland at an early date. The proposal was not acceptable to the Council.

The leader of the Indian delegation vigorously opposed the use of the Trust territory of Marshall Islands as proving grounds for nuclear tests at being contrary to the world concept of a sacred trust, when the issue came up before the Council in May 1937. The administrative reforms introduced by Britain in the Trust territory of British Camerooms were warmly welcomed.

# People of Indian Origin in South Africa

The Special Political Committee adopted a joint resolution sponsored by fran, Mexico the Philippines and Yugoslavia appeal ng to the Government of South Africo a participate in negoniations with the Government the purposes and principate in negoniations with the Government the purposes and principal of the UN Chairer and the Universal Declaration on Human Rights The parties are to report jointly or separately to the UN Assembly regarding the progress of the negotiations.

## Peaceful Co-existence

Along with Sweden and Yugoslavia, India submitted for the consideration of the twelfth session of the Political Committee a resolution calling upon all States to make every effort to strengthen international peace and to develop friendly and co-operative relations and settle disputes by peaceful means as enjoined in the Charter.

# Elections to UN Bodies

In May 1957, India was elected to the UN Technical Assistance Committee. In June, she was elected Chairman of the Sub-Committee on Freedom of Information set up by the Human Rights Commission.

An amendment providing for the reservation of one of the offices of Vice-President of the Assembly for the Commonwealth countries was tabled by India along with seven other member nations and adopted by the Assembly's Special Political Committee. She co-sponsored with sixteen other nations a resolution in the same Committee for increasing the number of judges on the International Court of Justice and for enlarging the UN Economic and Social Council. Her plea for increased representation for Asian and African countries was postponed for another year.

# International Law Commission

India is a member of the International Law Commission established by the UN General Assembly in 1948. The Commission is charged with promoting the progressive development of international law and its codification. Its 21 members, elected by the Assembly for a three-year term, do not serve as representatives of their governments but in their individual capacity as experts.

A standing legal committee known as the Asian Legal Consultative Committee came into existence in November 1956, at New Delhi for examining questions under the consideration of the International Commission and placing its views before it, considering legal problems referred to it by any of the participating countries (Burma, Ceylon, India, Indonesia, Iraq, Japan and Syria) and exchanging views and information on legal matters of common concern. India is represented on the Committee by M.C. Setalvad and Sachin Chaudhuri. At its first session held in New Delhi in April 1958, it adopted rules of procedure and decided to locate its headquarters at New Delhi and to establish consultative arrangements with the UN and its specialised agencies as well as the International Law Commission and the International Law Institute.

# ECONOMIC AND SOCIAL

India has served on the Economic and Social Council of the United Nations since its inception, except for two brief spells in 1948 and 1952. Though she chose not to seek re-election to the Council in 1957, she continues to be a member of several functional commissions of the Council. She was a member of the Committee for consideration of a convention on the abolition of slavery, etc., in 1956, which she signed in September 1956. She was elected to the Technical Assistance Committee on May 1, 1957, and is represented on the following other functional commissions of the Council: Commission on International Commodity Trade; Commission on Human Rights; Commission on Narcotic Drugs; Population Commission; Social Commission; Statistical Commission and Transport and Communication Commission.

# Economic Commission for Asia and the Far East (ECAFE)

The Asian countries have a natural link between their own economic efforts and those of the UN in the ECAFE which was established in March

1947. The Commission has so far held two of its sessions in India in 1948 and 1956. The first executive secretary was an Indian and after his resignation in 1956, another Indian has been appointed to the post.

The report presented to the thirteenth session of the Commission held in Bangkok in March 1957, was impressed with the size of India's second and observed. "India is among the best-placed countries in the region to undertake developmental planning on an ambitious scale."

India's Minister for Trade was elected first Vice-Chairman of the ninh session of the Committee on Industry and Trade which met in Bangkok in March 1957 The Commission's Committee on Small-Scale Industries which met in June 1957 in Madras, considered ways of improving footwers production and marketing leather and leather products from the countries of Assa and the Far East. The preparation of a draft geological map of Asia and the Far East was discussed at the meeting of the working party of senior geologists of the Commission held at Calcutta in November 1957. At the meeting of the Sub-committee on Mineral Resources, also held at Calcutta in November 1957. When the Sub-committee on Mineral Resources, also held at Calcutta in November 1957, USSR, USA, UK, Australia and Trance offered India and other Asian countries technical assistance, information and tranging in the prospecting and utilisation of radio-active minerals. The leader of the Indian delegation to the ECATE seminate of low-cost roads and sol stabilisation organised in January 1958, in New Delhi, was elected its Chairman.

## Food and Agricultural Organisation (FAO)

India has been actively associated as one of its founder members with the FAO since its inception. The Executive Committee of the FAO had for its chairman an Indian who was closely associated with the drafting of the organisation's constitution. It was through the infinative taken by India at the conference in 1955 that the FAO constitution was amended to permit non-self-governing countries to join the organisation as associate members and participate in its various technical meetings. She is represented on important standing committees of the organisation such as the FAO Connect, the Programme Committee, the Finance Control Committee and the Committee on Commodity Problems. In 1956, the organisation elected B R. Sen as the Director-General of FAO.

The FAO has rendered valuable technical assistance to India in building up her farm economy, particularly in connection with the operation and maintenance of farm machinery, reclamation of waste lands, control of inderpest and other diseases, improvements in methods of fishing, dairy and poultry farming, forestry and locust control, etc. The first pilot study sponsored by FAO on the uses of agricultural surpluses to finance economic decelopment was conducted in India in 1935

The Union Food Minister led the Indian delegation to the plenary conference of the FAO held in November 1957, at which India was redected to the IAO Council for three years and to membership of its Committees on Programme, Financial Control and Commodity Problems

The concept of small watersheds as the basis for the planning and management of land use was the main copie of discussion at the International Development Centre on Westman Management for Ans and the For East organised at Hazarabasis during February-March 1957. The scool FAO Development Centre on Farm Planning and Management was held in New Delhi in October 1957 arm Planning and Management was held in New Delhi in October 1957.

# International Labour Organisation (ILO)

India has been a member of the International Labour Organisation since its inception in 1919 and has been a permanent member of its governing body since 1922. She is a member of eight out of the nine industrial committees set up by ILO. India has so far ratified 23 ILO conventions. The more important of these provide for the limitation of working hours in industrial undertakings, prohibition of the employment during night hours of women and children under 14, compensation in cases of injury or death, protection of dock labourers against accidents, suppression of compulsory labour in all forms, and a system of labour inspection and machinery for fixing minimum wages in certain trades.

The services of experts were availed of by India in 1957 in the fields of productivity, employment information and occupational analysis and for the National Safety Council and Trade Training Project under the ILO's Expanded Programme of Technical Assistance. Fourteen Indian trainees were sent in 1957 to different foreign countries for training in supervisory duties, trade unionism, labour administration, industrial relations, labour management and factory inspection under the same programme. Two ILO fellowship holders from Burma and Sarawak received facilities for study in the fields of social security and co-operation.

Apart from the meetings of the governing body and the 40th session of the ILO Conference held in Geneva in June 1957, Indian representatives participated in the 4th session of the Advisory Committee on Salaried Employees and Professional Workers held at Geneva in April 1957, the Tripartite Working Party on Wages, Hours of Work and Manning on Boardship held at Geneva in April 1957, the 6th session of the Metal Trades Committee held at Geneva in May 1957, the 6th session of the Iron and Steel Committee held at Monterry (Mexico) in October 1957, and the Tripartite Technical Meeting for Mines other than Coal Mines held at Geneva in November-December 1957.

The 4th session of ILO's Asian Regional Conference was held at New Delhi in November 1957, at the invitation of the Government of India. The Union Minister for Labour and Employment was unanimously elected President of the Conference. India also participated in the seminar organised by the ILO Regional Training on Co-operation at Nuwara Eliya (Ceylon) in November 1957. The Asian Seminar on Vocational Guidance and Employment Counselling, organised by the ILO, was held in New Delhi in December 1957.

# United Nations Educational, Scientific and Cultural Organisation (UNESCO)

A founder-member of UNESCO, India has a permanent National Commission for Co-operation with UNESCO. The Commission has been actively implementing UNESCO programmes in India by organising seminars and conferences on various subjects. Notable among these were the Asian Seminar on Rural Education, the Round Table Conference on the Concept of Man and the Philosophy of Education in the East and the West and the International Seminar on the Contribution of Gandhian Outlook and Techniques to the Solution of National and International Tensions. The Commission also undertook a research project relating to social tensions. A Research Centre on the Social Implications of Industrialisation in Southern Asia was set up at Calcutta in 1956 as a joint enterprise of the Government of India and UNESCO.

India has participated fully in UNESCO's programmes and activities A National Fundamental Education Centre set up by UNESCO at Myser provides an onentation course for educational experts intending to take up their work of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of

Sunce 1948, Delhi has been the headquarters of UNESCO's South Aria Science Co-operation Office which facilitates exchange of scientific research and information in the entire region. Another important programme concerns pilot experiments in and zones from Egypt across Ana to Ceylon. The programme which was irrutated as a result of an Indian proposal assumed great significance at the 9th session of UNESCO's General Conference in New Delhi.

Cultural activities account for the largest measure of co-operation between India and UNESCO Apart from the seminars and conference mentioned carlier, UNESCO's programmes of translating representative Indian works into European languages, dissemination abroad of visual arts and muse of India through reproductions and recordings, and contributions to social development through the use of libraries, museums and reading materials are worth mentioning in this context.

In April 1957, the Indian Ambassador in Paris was elected Chauman of the UNESCO'S Committee for Better Understanding between the Onest and the Occudent. India participated in a UNESCO regional seminar on production of reading materials held in Burma in October 1957, and in a meeting of the UNESCO Arid Zone Research Advisory Committee held at Karachi in November 1957. The Kalinga Prize which is offered annually by UNESCO was awarded to Bertrand Russel in December 1957, for the popularisation of science. Various problems connected with UNESCO's Associated Schools Project for Education in International Understanding and Co-operation were discussed at the second meeting of Heads of Schools held in New Delhi in January 1958.

## World Health Organisation (WHO)

India has been a member of the World Health Organisation (WHO) since its inception in 1948 and has taken active interest in its various activities. An Indian has been appointed Director of WHO's South-East Asia Regional Office The WHO provides assistance by way of expert technical advisors, field workers, equipment and fellowships for training abroad. India has provided training facilities for the nationals of many countries.

At the 10th session of the WHO held in Geneva on May 7, 1957, India was elected to the Nomunations Committee and the General Committee The Indian delegation was led by A.L. Mudaliar. The WHO Rural Health Conference of the South-East Asia Region was held in New Delin on October 14, 1957.

## United Nations International Children's Emergency Fund (UNICEF)

The UNICEF provides assistance in the form of equipment and supplies for maternal and child welfare, child nutrition, milk conservation and the training of nurses and midwives. India has been taking part in the activities of UNICEF for a number of years, first as a member on the Executive Board, then as chairman of the Programme Committee and finally as chairman of the Executive Board from 1955 to January 1957. A milk drying plant was inaugurated at Anand marking the start of operations of UNICEF's first milk conservation project in Asia.

In April 1957, the UNICEF allocated 38,000 dollars for expansion of facilities for training physicians in social and clinical pediatrics in Madrat State; 131,000 dollars for assistance to the training aspects of the Union Government's five-year tuberculosis control programme; 16,500 dollars for goitre control; 383,000 dollars for feeding programmes and 1,515,000 dollars for maternal and child health services. The Executive Board meeting in New York in September 1957, approved a sum of 2,123,000 dollars for UNICEF programmes in India. India's contribution to UNICEF in 1957 was 336,000 dollars. India has two UNICEF area offices situated at New Delhi and Calcutta. The New Delhi office covers India, Afghanistan and Ceylon.

# The General Agreement on Tariffs and Trade (GATT)

India is a signatory to the General Agreement on Tariffs and Trade which came into force in July 1948. In 1949, the Indian Tariffs Act, 1934, was amended accordingly. The concessions agreed to by India provided for a reduction in the existing rates of duty and included commitments against future increases of duty and a reduction or elimination of preferences which India had granted to several countries.

The GATT has so far held four tariff conferences and India has taken an active part in all of them. At the 9th Review Session of the contracting parties held at Geneva in 1954, India pressed for the inclusion of certain special provisions in the Articles of the GATT to enable countries like India to fulfil their economic development programmes. India's point of view was accepted and the relevant articles were amended to meet its special needs.

The leader of the Indian delegation to the 12th session of the GATT in Geneva was elected as its chairman on October 24, 1957.

# United Nations Technical Assistance

Since its inception in June 1950, the UN Technical Assistance Programme has furnished technical assistance mainly in the form of services of experts, equipment, award of scholarships and fellowships, etc. The programme, up to December 1957, has provided India with over 308 highly specialised experts and awarded fellowships and scholarships to some 659 Indian nationals for study abroad. The specialised agencies of the UN have also separate programmes of technical assistance in India. Technical assistance has been secured under the UNESCO Expanded Programme of Technical Assistance for the establishment of the Western Higher Technological Institute, Bombay.

# International Bank for Reconstruction and Development (IBRD)

The International Bank assists reconstruction and development in member countries through long and medium-term loans. It also promotes private foreign investments by guaranteeing or participating in loans and other investments made by private investors. India became one of the original members of the Bank, with a quota of 400 million dollars, by ratifying the

Bank Agreement on December 24, 1954 Being one of the five countries with the largest quota. India has a permanent representative on the Executive Board of the Bank.

Up to November 1957, India had received loans from the Bank total ing Ra 176 for core: Some of these loans have been given directly to the Government of India and others to private enterprise against a Government guarantee. The schemes for which the Bank has advanced loans include (i) purchase of locomotives for the Indian Railways (ii) purchase of agricultural machinery such as tractors and buildozers required for reclamation of weed infested and jungle lands (iii) the Bokaro Konar Project of DVC which has now been completed (iv) the second phase of DVC Project, (iv) purchase of planes by Air India International, (iv) purchase of equipment and masterials for railways, (vin) expansion and modernisation of the Indian Iron and Steel Co. Ltd. (viii) installation of thermal plants at Trombay, (iv) assistance to Indiastrial Gredit ind Intersiment Corporation of India to enable it to advance loans to private companies and (x) the expansion programme of the Tata Iron and Steel Company

The Bank has sent several massions to India for field sure sp. of vanow projects and also for investigating the country's development programmes. The IBRD recently appointed one of its sensor officers as its Resident Representative in New Delin who remains in close contact with the Government of India in regard to the country's development plans and project. India participated in the 12th annual meting of the Board of Governors of the IBRD held in Washington on September 25, 1957 The Union Finance Minister led the Indian delevation

Under the terms of IBRD s Articles, the Bank is precluded from making non guaranteed loans. This has prevented it from readering substantial assistance to private enterprise. India has therefore, been advocating for sometime the establishment of an International Finance Corporation which could be authorised to make such loans. The Corporation came into existence in July 1956. India s quota in the subscribed capital of 93 million dollars. is 4431 million dollars.

## International Monetary Fund (IMF)

India is also an original member of the International Monetary Fund stup in 1945 to maintain the stability of exchange rates, to facilitate the expansion and balanced growth of international trade and to provide exchange resources during temporary of seguluhrums in the balance of payments of member nations. India, which ratified the Fund Agreement on December 24 1945, has a quota of 400 million dollars and a permanent representative on the Executive Board of the Fund. In 1903, the Government of India invited a mission from the Fund to study and report on India a monetary and fiscal policies. The report of the Fund Mission was published under the tutle Economic Deschopment with Stability

In order to met the shortage of foreign exchange, the Government of India in January 1957 negotiated with the Fund for a loan of 1275 million dollars India in 1957, has availed of a 200 million dollars standby cred from the Fund The first withdrawal of 60 million dollars selfected in February the second withdrawal of 67.5 million dollars in March and the third withdrawal of 72.5 million dollars in June 1957 Under the raticles of agreement of the INIF, India is entitled to purchase back for rupics foreign currency equivalent to 400 million dollars deposite by it with the Fund The Unnor Finance Minister led the Indian delegation

to the 12th annual meeting of the IMF held in Washington in September 1957. At the invitation of the Finance Minister, the Managing Director of the IMF visited India in February 1958, and reviewed India's fiscal policies.

# Special UN Fund for Economic Development (SUNFED)

India has been intimately associated with the various stages in the development of the SUNFED idea. In December 1957, the UN decided to establish a special fund to provide to the less developed countries systematic and sustained assistance in fields essential to their technical, economic and social development. India is among the sixteen countries represented on the Preparatory Committee.

# Other Specialised Agencies of the UN

Among other specialised agencies of the UN with which India is actively associated are the International Civil Aviation Organisation (ICAO), the International Tele-Communication Union (ITU), the Universal Postal Union (UPU) and the World Meteorological Organisation (WMO). The 4th International Tuberculosis Conference organised by the International Union against Tuberculosis was held at New Delhi between January 7 and 10, 1957. The 5th Session of the International Rice Commission and its ad hoc Working Group on the Storage and Processing of Rice was held at Calcutta in November 1956.

## OTHER INTERNATIONAL ORGANISATIONS

Some of the important international organisations outside the UN, with which India is associated, are the Commonwealth of Nations, the Inter-Parliamentary Union, the Commonwealth Parliamentary Association, the Colombo Plan for Co-operative Development in South and South-East Asia, the periodical conferences of the Prime Ministers of the five South-East Asian countries commonly known as the 'Colombo Powers', the Asian-African Conference and the International Red Cross.

# Commonwealth of Nations

On the attainment of independence on August 15, 1947, India assumed the status of a full-fledged Dominion within the British Commonwealth of Nations, as it was then known. Later, when India decided to become an independent sovereign republic under the new constitution, a change in the basis of the country's association with the Commonwealth became necessary. This was provided for by an official declaration issued at the end of the Commonwealth Prime Ministers' Conference on April 27, 1949. The declaration noted the impending constitutional changes in India and accepted her as a full member of the Commonwealth. The prefix "British" was dropped and the association re-designated as the "Commonwealth of Nations." This declaration was ratified by the Constituent Assembly of India on May 17, 1949.

The principal organs of Commonwealth co-operation are the periodic conferences of the Prime Ministers and the Foreign and Finance Ministers of the member countries (UK, Canada, Australia, New Zealand, South Africa, India, Pakistan, Ceylon, Ghana and Malaya). There is a Liaison Committee which co-ordinates the activities of some 30 other Commonwealth conferences, committees, commissions and organisations, etc., which deal with specific subjects falling under the broad categories of defence, communications, science, agriculture, education and parliamentary affairs.

The last conference of the Commonwealth Prime Ministers was held at London from June 26 to July 5, 1937. In the course of their discussions, the Commonwealth Prime Ministers reviewed all the major international questions of common concern to their countries. These included the events in Hungary, disarmament, international problems of West Asia, the contribution which might be made by the Commonwealth Governments towards the casing of tension and the maintenance of peace, stability and poliucal freedom in Last Asia and South East Asia, the impact of the major programmes of development in their countries, the proposals for the creation of an industrial free trade area in Lurope and the progress made towards freeing of trade and payments, the Colombo Plan and the development of sucker energy for cut) purposes

The last Commonwealth Finance Ministers' Conference was held in Mont Tremblant (Canada) in September Cotober 193.7 Larrived at agreed findings on three subjects, namely, co-operation in the Sterling area, European economic integration and the Commonwealth Trade and Economic Conference Arrangements were made for continuing Commonwealth consultations on economic matters

#### Colomba Plan

Indix has both been receiving as well as giving assistance under the Plan. The country has received assistance for the relabilitation of the railways and the expansion of All India Radio from Australia, for the Maynakin and Kundah projects from Canada for the All India Institute of Medical Sciences and the Delhi Milk Supply Scheme from New Zealand, and for the Dulrapur Steel Plant from the United Kingdom

Till the end of June 19-7, India obtained the services of 190 experts, of which 10 were from Austria, 18 from Canada, 1 from Cepten, 7 from Japan 8 from New Zealaard 86 from the UL. Durch et al. 1900 Japan 19 from New Zealaard 1900 from the UL. Durch 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 1900 Japan 19

## Colombo Powers Conference

Another international forum in which India has developed a deep interest has been the periodical meetings of the Prime Ministers of Burma-Ceylon India, Indonesia and Pakistan The firming may held at Golombo in April May 1934 and the last in New Delh in November 1934 formal exchange of views on subjects of mutual interest took place the Prime Ministers of India and Ceylon in December 1937 and between the President of Indonesia and the Prime Minister of India and January 1936 A conference of the national womens or organisations in the Colombo power countries was held in February 1958 at Colombo for exchange of views on increased mutual help and understanding among women of the region.

# Asian-African Conference

At the invitation of the Prime Ministers of Burma, Ceylon, India, Indonesia and Pakistan, a Conference of Asian-African countries was held at Bandung (Indonesia) in April 1955. Twenty-nine countries of Asia and Africa, comprising nearly three-fifths of the world's population, participated in the Conference. The object of the Conference was to promote goodwill and co-operation, to consider common social, economic and cultural problems, to consider problems of special interest to Asian and African peoples such as recialism, colonialism, etc., and to review the position of Asia and Africa in the world and the contribution they could make to the promotion of world peace and co-operation.

The deliberations of the Conference resulted in the historic joint Communique on economic and cultural co-operation, colonialism, nuclear and other weapons of mass destruction and on the promotion of world peace and co-operation. The Communique also incorporated the five principles of the India-China Agreement which India regards as the basis of its relations with other countries.*

The Conference was a world event which attracted great attention, marking the coming together, for the first time in history, of self-governing and independent nations of Asia and Africa. It generated goodwill and friendship among the Asian-African countries and helped to establish personal contact among the leaders of these countries.

# Commonwealth Parliamentary Association.

The Commonwealth Parliamentary Association is an organisation composed of branches formed in the legislatures of various Commonwealth countries. The aim of the Association is to promote understanding and cooperation for common purposes between those engaged in the parliamentary government of the countries of the Commonwealth.

The last conference of the Commonwealth Parliamentary Association was held in New Delhi from December 2 to 10, 1957. India, Pakistan and Ceylon acted as joint hosts. The Speaker of the Lok Sabha, M. Ananthasayanam Ayyangar was elected Chairman of the Conference. The subjects discussed at the Conference were: economic relations in the Commonwealth; the problem of under-developed territories in the Commonwealth; social services in the Commonwealth; the future of the smaller states in the Commonwealth; the role of the English language in the Commonwealth; the working of the party system in Parliament; international affairs and defence.

# Inter-Parliamentary Union

The Inter-Parliamentary Union is an association of parliamentary groups constituted within the various national Parliaments for the purpose of promoting personal contacts between the members of different Parliaments.

^{*} The five principles known as Panchsheel were first incorporated into the preamble to the India-China Agreement on Tibet, signed on April 29, 1954. They are: (i) mutual respect for each other's territorial integrity and sovereignty, (ii) non-aggression; (iii) non-interference in each other's internal affairs; (iv) equality and mutual benefit, and (v) peaceful co-existence.

The Indian Parlamentary Group has been sending delegations to the annual conferences of the Inter-Parlamentary Umon since 1949. At the invitation of the Indian Parlamentary Group, the 101st session of the Executive Committee of the IPU was field in New Delhi in December, 1955. The Indian delegation to the meetings of the Inter-Parlamentary Union, held in Nice in April 1957 and in London in September 1937, was headed by H N. Kurary.

#### International Red Cross Conference

India played host to the 19th International Red Cross Conference which was held in New Delha in October-November 1937, and was elected to the Funante Commission and the Standing Commission of the Conference The Conference adopted an Indian resolution unanimously applying to all nations to intensify their efforts for general disarmament and take measures to protect humanity from "the terrible consequences of the use of incendiary, chemical, bacteriological, radio-active or such other agents"

radiation to present and future generations, nor pave the way to the abandonment of these weapons of mass destruction. On the other hand, such regularisation would tend to make thermo-nuclear war seem more legitimate and to appear to have the sanction of the world community. This House further expresses its considered opinion that the proposals at present canvassed for the so-called Limitation and Registration of these tests will not help to rid the world of the dreadful consequences of

further delay their programmes for the explosions for test purposes of nuclear and thermo-nuclear weapons This House carneally appeals to each and all of the three Great Powers concerned at least to suspend without pending agreement on their discontinuance and the abandonment of the production and stock-piling of such 3

This House considers that if any or all the Powers concerned take the initiative or agree to the suspension of their est-explosions, a substantial contribution would be made to rid the world of the fear which has led to the present armaments race and open the way for the lowering of tensions, progress towards disarmament and international co-operation and peace." 9

"This House approves the Convention for the protection of cultural property in the event of armed conflict, as passed at the Hague on the 14th May, 1954, and signed by the representatives of the Government of India and of the Governments of certain other countries, and is of the opinion that the said Convention should be ratified by the

September 11, 1957 "This House approves the Universal Copyright Convention and the Protocols thereto as adopted at Geneva on the 6th September, 1952, and recommends that the said Convention and Protocols be ratified by the Government of India."

#### SUMMARY OF SELECTED LAWS

The Copyright Act, 1957, provides for the establishment of a Copyright Office and a Copyright Board and entitles the owners of copyright whose work has been infringed to covic remedies such as injunction, damages, etc., and to claim possession of all infringing copies

The Rulvay Protection Force 4et, 1957, provides for the constitution and regulation of a Force called the Railway Protection Force for the better protection and security of railway property

or The Indian Succession (Amendment) Act, 1957, substitutes a new section for Tection 382 of the principal Act so as to enable succession certificates granted in the State of Jamuu and Kashmir after the commencement of the Part B States (Laws) Act to have validity in the rest of India

The Legislative Conneil Act 1857, provides for the creation of a Legislative Council for the State of Andhra Pradesh and the uncreasing of the strength of Legislative Council of States having such Councils. After the strength of Legislative Council from one fourth to one-third of the strength of a Legislative Assembly, State Legislatives which felt that the strength of the Legislative Assembly, but Legislative which felt that the strength of their Legislative Assembly passed resolutions recommending an increase in the strength of their Legislative Council was meagine of Article 169(1) especially also passed a resolution in pursuance of Article 169(1) of the Constitution recommending the creation of a Legislative Council for the State The Legislative Council Act, 1957, was passed to implement these recommendations

The Inter-State Corporations Act, 1957, provides for the reorganisation of certain corporations functioning in two or more States by virtue of Section 109 of the States Reorganisation Act, 1956, and for matters connected therewith The Act enables will be supported by the State Corporation to frame a scheme for its reorganisation as one of more intra-State Corporation to providing for the division of the assets and other moderation artister and re-employment of its employee and other moderation artister and re-employment of its employee.

The Naga Hills Tuenson Aria Act 1937, seeks to create a new administrative unit consisting of the existing Naga Hills district and the Tuensarg frontier division of the North East Frontier Agency. The new unit, which is to be named the Naga Hills—Tuensing Area will be administered by the Governor of Assam as the agent of the Fresident. The Act provides for an additional nominated member in the Lok Sabha to represent the new unit.

The Public Emblyommi (Requirement as to Rendence), Act, 1957, seeks to repeal all exturing laws which prescribe a period of residence within a State or Union territory for spublic employment in that area. This is one of the adequated for longuistic minorities suggested by the States Reorgan sation Commission in regard to employment in public services.

The Delhi Development Act 1957, seeks to set up an authority to replace the Delhi Development (Provisional) Authority and the Delhi Improvement Trust with the object of promoting and securing the development of Delhi

in accordance with the Master Plan and Zonal development plans to be prepared by the Authority and approved by the Central Government.

The Delhi Municipal Corporation Act, 1957, provides for the setting up of a municipal corporation for Delhi, excluding an area of 15 square miles of New Delhi, where Rashtrapati Bhavan, the Central Secretariat and other Government buildings are situated. The Act empowers the Corporation to have jurisdiction not only over the urban areas of Delhi but also over rural areas around the capital.

The Navy Act, 1957, seeks to consolidate the existing naval laws in conformity with the constitutional changes.

^{*}Appendix to Chapter I. Figures are on the basis-of the 1951 census. Changes in district boundaries between March 1, 1951 and November 1, 1956 other than those covered by the Andhra State Act, 1953, Chandernagore (Merger) Act, 1954, States are supplied by the Surveyor General, India. The area figures of taluks/tehsils are as supplied by the Surveyor General, India. The area figures of taluks/tehsils are supplied by the State authorities. Changes in district boundaries carried out in Kerala and Madhya Pradesh since November 1, 1956, have been incorporated.

(a) This is inclusive of three circles which have been included in the district and exclusive of one circle transferred to Bombay.

(b) This is inclusive of Islapur circle which has been transferred to Bombay.

(i) on the first rupces five lakks of net wealth (ii) on the balance of net wealth

Provided that in the case of a company which has incurred a net loss in any year tomputed in the manner bereinafter provided and which has not declared any dividend on its equity cap tal in respect of that year, the rate of tas for the relevant year shall be nit.

The loss referred to in the above proviso shall be computed in accordance with the protocol of actions 8 9 10 and 12 of the Income tax Act but without deducation the above sages referred to in paragraph (b) of the proviso to clause (v) of abbection (d) of section 10 mbcms (via) and imbeliance (vib) of aib-section (2) of section 10 of that Act or the allowance between the above the control of the Act or the allowance to the property of the provisor brought forward from earlier property of any loss to brought forward from earlier property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property

Nuls 1—Where the net wealth of an assence includes the value of any asset on which weith-it as no to payable under sub-action (2) of section 5 the amount of act payable under sub-action (2) of section 5 the amount of act payable on the new amount of wealth tax which would have assence shall be an amount bearing to the total amount of wealth tax which would have assent payable on the net wealth had no property been exempt the same proportion as the unexampted position of net wealth.

; Rule 2 —Where the net wealth of an assessee not being a company in respect of any assessment year, includes the value of any shares in a company as defined in section 3 of the

^{*}Append x to Chapter XIX.

Companies Act, 1956, the wealth-tax payable by the assessee on his net wealth for that assessment year, computed in accordance with the rates specified above, shall be reduced by the amount, if any, by which the sum of the following, namely:—

- (a) that portion of the wealth-tax payable by the assessee computed as aforesaid as bears to the whole amount of the tax, the same proportion as the value of the shares aforesaid included in his net wealth bears to his net wealth,
- (b) that portion of the wealth-tax, if any, paid by the company in respect of the same assessment year, as bears to the whole amount of the said tax, the same porportion as the paid-up value of the shares included in the assessment of the assessee aforesaid bears to the aggregate paid-up value of the share capital of the company as on the relevant valuation date, exceeds the amount calculated at the rate of 1.5 per cent on the value of the shares included in his net wealth.

Rule 3.—Where an assessee is an individual who is not a citizen of India and who is not resident in India, the wealth-tax payable by him in respect of any assessement year computed in accordance with the rates specified in this schedule shall be reduced by an amount equal to 50 per cent thereof.

Rule 4.—Where the net wealth of an assessee, being an individual who is a citizen of India, or a Hindu undivided family, includes any assets located outside India, the wealth-tax payable by the assessee in respect of any assessment year shall be reduced by an amount which bears to the amount of tax that would have been payable by the assessee if the rates of tax had been reduced to one-half of the rates specified in this Schedule the same proportion as the value of the assets located outside India as reduced by the debts located outside India bears to the net wealth of the assessee.

Rule 5.—Where the profits of a company in respect of any year, before deducting any of the allowances referred to in the second paragraph of the proviso to Part II, are less than the amount of wealth-tax payable by it in respect of the relevant assessment year, the wealth-tax payable by the company for such assessment year shall be limited to the amount of such profits:

Provided that the company has not declared any dividend on its equity capital in respect of that year.

# RATES OF EXPENDITURE TAX*

In the case of every individual and Hindu undivided family, on that portion of the taxable expenditure—

## The Final Spurt

Tata Steel's two million ton expansion programme is now entering the final phase. Scheduled for completion by mid-1958, it is now a race against time.

Today all over Jamshedpur there is a new sense of urgency...work goes on round-the-clock to complete the expansion programme on time.

Embracing every phase of operation from the winning of ore and the mining of coal to the rolling of steel, Tata Steel's expansion programme will double the annual production to two million tons of ingot steel—one-third of the country's target.

### 'The Artillery Man ...'

The early smokers in England were brave and hardy souls. The targets of poetasters, wits and frowning mortalists, they had, in addition, to bear the heavy burden of their elaborate smoking paraphernalia. These consisted of sets of clay and ornamented papers, an livery box to hold up to a pound of tobacco, silver 10072 to lift glowing embers to light the pipe, a puck, a Smife and a small scoop. Armed with this 'artillety', as a contemporary writer dubbet the paraphernalis, the smokets were to be seen at the Playhouse, at the taverns and at the other fashlouble durities of London.

From a fashion confined to an intropid few, smoking today has become a simple pleasure, universally empyed. To provide this pleasure The Imperial Tobocco Combings of India Limited manufastive the finest quality eigerettes that modern means and materials can produce.

## the sturdy growth of a mighty tree....

a symbolic of our sation's progress. Rooted in her native soil, maintained by the endeavours of her people, India's than of industrial and agricultural progress has soured to encouraging heights within a short space of time. We take peide in this progress achieved not by the talents of a few individuals but by the

concerned efforts of an united people.
